

currencies. Yandex, the most popular search engine in Russia, now offers its users data on more than 140 of the most widely used cryptocurrencies in addition to information on the currencies of dozens of other nations. The newest update to the business's currency converter now includes cryptocurrency rates, the company said. Russian news site Rb.ru cited Yandex's claim that the widget, which includes a pricing chart and a rapid conversion tool, may be found just above the search results. Standard keywords and even slang or imprecise language in the inquiry are both understood by the programme. Coins and tokens may be priced in various fiat currencies like Russian rubles, U.S. dollars, Euros, and more. The ability to see the value of a digital asset in a different cryptocurrency, as well as other currency pairings, are planned for the future. Similar Tool Launched by Twitter According to the report, one of the biggest aggregation platforms in the cryptocurrency field is Coingecko, where Yandex obtains its market statistics. Bitcoin, Ethereum, Litecoin, Dogecoin, and Solana have topped the list of most-searched cryptocurrencies on the Russian search engine so far in 2022, according to data from the search engine itself. Similar features are available on global web platforms, although some of these services are blocked in Russia. Twitter introduced a tool in December 2022 for keeping tabs on the value of various cryptocurrencies, however, access to the site is restricted in Russia, as reported by BBC Crypto. Even though Russia's recent Digital Financial Assets legislation became effective in 2021, the country's central government has yet to implement regulations for decentralized cryptocurrencies like bitcoin. It has been stated by authorities that this will occur this year.

- According to Jack Lu the company needed to make changes. - MoonPay and Magic Eden announced a partnership. As part of a company-wide restructuring, non-fungible token (NFT) marketplace Magic Eden announced on Monday that it will be letting go of 22 of its employees. Jack Lu, the CEO, and co-founder of Magic Eden, wrote on Twitter that the firm needed to make staff adjustments to meet new objectives in 2023. Jack Lu stated: "As we established our priorities for 2023, we took an in-depth look at what structures and roles are needed internally, and had to make hard decisions to find the right mix of roles for us to pursue the next stage of scaling across chains. Lu pledged to assist impacted staff during their transition. And noted that several platform products are entering new stages of growth. Other NFT platforms have scaled back recently as the ongoing crypto winter continues to stifle market activity. While OpenSea laid off about 20% of its workers in July 2022, NFT marketplace SuperRare reduced its workforce by 30% last month. As a result of the sharp decline in SOL's price, the leading Solana-based NFT market has suffered. In response, to continue competing with marketplaces like OpenSea, it has increased support for Ethereum and Polygon-based NFTs. Magic Eden Partners With MoonPay And also Magic Eden has partnered with Web3 payment platform MoonPay to provide new payment options for purchasing digital collectibles. Users of Magic Eden are now able to buy NFTs using a variety of payment methods. This includes debit cards, credit cards, Apple Pay, and Google Pay. Using Solana, Ethereum, and Polygon NFTs, Magic Eden is a cross-chain NFT platform. As per reports, MoonPay, which has handled about \$3.5 billion in transactions across more than 160 nations, will offer the NFT platform multichain onboarding payment solutions so Magic Eden customers may purchase NFTs with credit cards, debit cards, Apple Pay, Google Pay, and more.

- On January 19, Genesis Global Capital filed for bankruptcy. - DCG ceased paying quarterly dividends in an effort to improve its balance sheets. It has been reported that Digital Currency Group (DCG), a cryptocurrency holding company, has started selling its stake in crypto funds run by its subsidiary Grayscale Investments in an effort to raise cash and retain liquidity. U.S. securities documents seen by the Financial Times on February 7 revealed that DCG had sold almost a quarter of its stake in Grayscale's Ether-based fund for about \$8 per share, despite each share having a claim to nearly twice that value in ETH. Small portions of its Digital Large Cap Fund (which holds Bitcoin, Ether, Polygon, Solana, and Cardano) and Grayscale's Litecoin, Bitcoin Cash, and Ethereum Classic-based trusts have reportedly been liquidated as well. Improving Balance Sheets Moreover, DCG, led by Barry Silbert, has been predicted by some to have financial difficulties in the near future. On January 19, another of its companies, Genesis Global Capital, a crypto lending business, filed for bankruptcy allegedly owing creditors over \$3 billion. Over 500 people at DCG-owned businesses have been laid off in recent weeks. As a consequence of the ripple effect of FTX's meltdown. However, DCG has taken many measures to conserve liquidity in 2023. Including notifying its shareholders in a letter dated January 17. That it will cease paying quarterly dividends in an effort to improve its balance sheets. After claiming to have received bids for CoinDesk, a crypto media outlet. That is also a DCG subsidiary, that exceeded \$200 million. DCG has enlisted the aid of financial consulting company Lazard to help it evaluate its possibilities for selling CoinDesk.

- Jim Cramer reiterates current bullish on the crypto market. - Bitcoin (BTC) has surged by nearly 2% in the last 24 hours. Jim Cramer, a famed host of CNBC's Mad Money, stated in his recent Twitter post, "I reiterate it is a bull market, as he claimed in January that the current bullish cloud lasts for the next few months." Since the start of 2023, the cryptocurrency market signals a bullish trend. At the time of writing, global crypto market has a market cap of \$1.14 trillion, which surged over 3.1% in a day. Jim Cramer believes he has as a stock and cryptocurrency guru and strives to provide investment advice to people but always ends up recommending the wrong investments. Therefore people always choose to act in the opposite manner from what Cramer suggests. Even earlier in December 2022, the Mad Money host warned investors to liquidate their holdings due to Sam Bankman Fried's SBF's FTX exchange collapse, which resulted in a market downtrend. Bullish on Crypto Market The prominent cryptocurrency Bitcoin (BTC) price soared around 37% from the preceding month and rose by 3% in the previous two weeks. In the midst of the market's massive growth, the market-leading coin has achieved a six-month high of \$23,000 level after a prolonged bear market. According to Coingecko, BTC traded at \$23,271 with a market dominance of 40%. And the crypto king has a market cap of \$448 billion, which increased by 2% in the last 24 hours. Further, the biggest altcoin Ethereum (ETH) price jumped 31% in a month and 8% in the last 14 days. ETH traded at \$1,681, a high level since November 2022. Also, Bitcoin's rival holds a market dominance of around 18% and has a market cap of \$202 billion, surging 3% in a day. Moreover, other altcoins such as BNB, Cardano (ADA) Polygon (MATIC), Solana (SOL), Polkadot (DOT), Avalanche (AVAX), and more traded with significant price changes. Also, the memecoins Dogecoin (DOGE), Baby Doge coin, and Shiba Inu (SHIB) witness notable price surges.

Cedro Finance announced that they raised \$1.5 Million in their Pre-seed funding. STANFORD, Calif. (BUSINESS WIRE) "Cedro Finance is delighted to announce that they have raised \$1.5 million in a pre-seed fundraising round led by Shima Capital. Cedro is an Omnichain Liquidity Platform that lets users lend and borrow across chains seamlessly. Infinity Ventures Crypto (IVC), Mask Network, and Sam Thapaliya also participated in the round. The funds will be used to grow the team and scale development of Cedro's platform. "We're thrilled to be leading the pre-seed round for Cedro Finance," said Shima Capital founder and Managing General Partner, Yida Gao. "We believe Cedro is poised to become the primary liquidity layer that sits on top of multiple networks for unifying liquidity across diverse DeFi protocols. "Right now, the cross chain lending and borrowing process is tedious, dangerous, and expensive," said Cedro founder Rachin Kalakheti. "Operating under the UX of existing cross-chain bridges, a user needs to use multiple dApps and ~50 clicks just to deposit in a cross-chain manner. Last year, DeFi protocols were offering insanely high yields. At one point, we wanted to take advantage of a yield program in Solana, but our funds were in Ethereum. The hassle to collateralize the funds in Ethereum to borrow in Solana didn't feel right. We knew there was a better way. "Cedro's vision is to provide a seamless user experience for this cross-chain process without compromising on security. For the same action that took ~50 clicks, a user can now do it in ~5 clicks. Cedro is starting out as an omnichain lending and borrowing protocol, but eventually aim to become an omnichain financial hub, and currently have new products in development. Cedro Finance has been live on testnet since December 2022 and has since processed over 159,000 transactions. You can check learn more and try it for yourself at: <https://app.cedro.finance/> About Cedro Finance Cedro Finance is an Omnichain Liquidity Layer. Users are able to lend and borrow across multiple chains within a few clicks with excellent UX. Our innovative architecture and features provide the highest capital efficiency. Multiple products on top of Cedro are being planned. Bay Area based Cedro Finance was founded in June last year by a Stanford undergraduate Rachin Kalakheti. Contact us through Twitter, Discord or email at contact@cedro.finance. About Shima Capital Shima Capital is a leading early stage VC firm, founded by Yida Gao in 2021, investing in disruptive blockchain companies. The fund is deeply focused on taking a hands-on approach and working closely with its portfolio companies to provide the most sweat equity per dollar invested. As teams in Web3 push the frontier of innovation Shima helps hire talent, build community, amplify narratives and foster the acceleration of technical research and development. Shima is composed of seasoned investors, accomplished operators, and former founders who align on a mission to support all-star teams with building and scaling generational companies. - Fantom (FTM) price surged over 30.5% in the last 7 days. - Fantom market cap increased by around 10% in just a day. Fantom, a decentralized smart contract platform for DApps native cryptocurrency FTM, price rallied over 103% in the previous 14 days and 195% in a month. At the time of writing, Fantom traded at \$0.6302, climbing by 11% from the last day. And FTM had a market cap of \$1.7 billion and 24 hours trading volume of \$742 million, which increased by around 18% and 25% in the last day as per Coingecko. Fantom's Bull Run Started? In the wake of the crypto exchange FTX collapse, the entire cryptocurrency market sets a bullish trend as the king Bitcoin price surges with 5th week of a green candle in a row. BTC traded at \$23,561, which rose by 42% from the preceding month. However, after three months, the global crypto market cap reached the \$1.12 trillion range. And other Altcoins also indicate great hikes in their price. Undoubtedly, Fantom (FTM) is one of the coins on the market that witnessed a massive surge in January. From January 1 to the time of this writing, FTM rallied over 185% on a daily basis. After nine months, FTM was trading around \$0.6302, a range that the asset was at in May 2022. However, Fantom is still significantly lower than its high of \$3.46, which is recorded on October 28, 2021. Further, Fantom buzzed on social media with its new updates and significant price changes same as Bitcoin, like a five-week straight green candle in the chart. And the crypto community strongly supported Fantom's gas monetization program. The program provides high-quality decentralized applications (dApps) with a sustainable income. Moreover, the second largest crypto Ethereum (ETH) price soared by around 36% in a month. Also, other altcoins such as Polygon (MATIC) and Solana (SOL) surged along with memecoins Dogecoin (DOGE) and Shiba Inu (SHIB).

- Everlend has changed its app to a withdrawal-only mode. - The protocol's codebase was also made public. Everlend, a DeFi borrowing and lending platform based on Solana, has stated that it would be discontinuing operations. Including further development of the platform. Project leaders explained its end in a statement released Wednesday. Citing a shortage of liquidity and the general contraction of the borrowing and lending market as the main factors. Everlend has changed its app to a withdrawal-only mode. And requests that any users who have funds in the protocol withdraw them immediately. The protocol's codebase was also made public. So that anyone could use what we've built and continue the work, as the project put it. Even if a long enough runway were available. The team admitted that maintaining and improving the procedure would be a "gamble." Everlend stated, "Liquidity is just one of the things we're not just talking about Solana and the ability borrowing and lending market, which Everlend is 100% dependent on." Keeping Shrink and Shrink, as reported last week suggested a liquidity crunch coincides with a shrivel away the ecosystem's primary liquidity source for the vast majority of projects. This changed in November when it was revealed that the private keys for the project had been stored at the defunct FTX crypto exchange. It has been difficult to find a viable alternative for Serum's liquidity pools since they supported the bulk of the Solana DeFi ecosystem and made access to liquidity incredibly efficient. Meanwhile, SOL's total value locked (TVL) has declined by roughly 6% over the previous 7 days, to \$270 million, due to frequent withdrawal from the Solana network. - Bitcoin Fear and Greed Index is at Greed scoring 60 out of 100. - Ethereum is trading near \$1,700, which rose by about 42% from last month. The cryptocurrency market kick-off February with continued bullish momentum as the crypto king, Bitcoin (BTC), soared by over 45%, and the largest altcoin, Ethereum (ETH), surged around 40% in a month. At the time of writing, the global crypto market cap has a market cap of \$1.12 trillion, which increased by 4.5% in a day, as per Coingecko data. Earlier in the morning, the Bitcoin price pumped to the \$24,195 range. Currently, BTC traded at \$23,844, rallied around 4% in the last 24 hours and 15% in two weeks, and has a market dominance of 41%. Also, Fear and Greed was scored at 60 due to the Bitcoin price surging with five weeks of straight "green candles" in a row. According to Alternative.me, Bitcoin Fear and Greed Index is at Greed scoring 60 out of 100. Additionally, the second-largest cryptocurrency, Ethereum, traded at nearly \$1,700, which rose by about 42% from last month and 10.5% in the last 14 days. ETH beholds over 18% market dominance and has a market cap of \$201 billion, which increased 6.5% in a day. Top Altcoins Signals Bullish The whole cryptocurrency market started facing a downtrend as the failure of the UST stablecoin project run by Do Kwon pledged that Terra Luna (LUNA) would help its stablecoin, worth billions of dollars. Then the crypto winter got worsened, as the groups of prominent firms, such as Three Arrows Capital, Celsius Network, and Voyager Digital failed over the summer of 2022. Further, another wave of bearish started as the largest crypto exchange, FTX, filed for bankruptcy protection in November, 2022. However, After the

prolonged bearish trend, the crypto market shows green in the chart. And the top altcoins such as Polygon (MATIC), Solana (SOL), Avalanche (AVAX), Aptos (APT), and more coins are trading with notable price surges. From the past 7 days, MATIC increased by over 12%, SOL soared by around 6.5%, AVAX climbed by 15%, and APT rose by 10%. Additionally, Memecoins Dogecoin (DOGE) and Shiba Inu (SHIB) indicate strong price rallies. At the time of writing, the DOGE price hikes 35%, and SHIB skyrocketed over 50% in the preceding month.

- Current top trending cryptocurrencies are APT, BTC, SHIB, MATIC, and SOL. - Bitcoin surged over 40% in a month. While the crypto market beholds a significant rally, the top cryptocurrencies outperform the market with bullish momentum. The king Bitcoin (BTC) has surpassed to \$24,000 range, and the top altcoin Ethereum (ETH), is near \$16,000. As, the global cryptocurrency market cap has surged to \$1.05 trillion, which increased by 1.5% in a day. Additionally, more altcoins have seen price hikes. Let's look at the top 5 cryptocurrencies to watch in the first week of February. Bitcoin (BTC) in the wake of a prolonged bear market, the largest cryptocurrency, Bitcoin trading with the fifth week of a green candle in a row. Also, BTC gained its 42% dominance in the market and reached near to the \$24K price range on January 30 after five long months. At the time of writing, Bitcoin traded at \$23,159, surged around 40% in 30 days, and 9.5% in two weeks. Aptos (APT) The layer-1 blockchain Aptos native cryptocurrency APT maintains remarkable increases since its launch on October 17, 2022. According to CoinGecko, Aptos attained its all-time high of \$19.92 on January 26, 2023. At the time of writing, APT traded at 16.62 with a market cap of \$2 billion. APT soared over 35% in the last 7 days and 380% in the preceding month. Shiba Inu (SHIB) Shiba Inu buzzed on social media as the SHIB Army anticipated the layer 2 scaling solution 'Shibarium' launch, which triggered SHIB prices. At the time of writing, Shiba Inu traded at \$0.00001174, climbed over 45% in the preceding month, and 11% in the last 14 days. Also, Shiba Inu ranked as the 'second safest crypto project' in the blockchain arena and the SHIB burn rate has increased. Polygon (MATIC) After two months of low Polygon blockchain's native cryptocurrency MATIC surges above \$1 on January 26, 2023, and it's trending on Twitter. The price of Polygon is currently \$1.11 and has a market cap of \$9 billion. MATIC Price has risen almost 15% in the last 7 days and increased by 45% over the past month. Solana (SOL) Solana ecosystem's governance token SOL is in fifth place in terms of the most popular and talkative cryptocurrency in 2023. At the time of writing, Solana traded at \$23.74, surging around 140% from the last month and 5% in 14 days. Further, the recent Twitter CEO Elon Musk plans to continue to advance the concept of Twitter payments, triggering the largest memecoin Dogecoin (DOGE) price. DOGE climbed by around 10% in just 7 days and 32% in a month. Also, Twitter has witnessed Dogecoin as a hot hashtag frequently.

- Ordinals bring more financial use cases to Bitcoin - A new NFT protocol Ordinals launched on the Bitcoin mainnet. A new technique known as 'ordinals' is making waves in the Bitcoin community. The idea enables non-fungible tokens (NFTs) to transact directly on the Bitcoin blockchain. The consequences triggered a divide between Bitcoin sophists and others who believe the network is wide and diverse enough to support a variety of financial use cases. Ordinals were developed by software engineer Casey Rodarmor, who formally launched the case on the Bitcoin mainnet. According to its creator Casey Rodarmor, the Ordinals protocol uses 'inscriptions' or arbitrary content like text or images. That can be added to sequentially numbered 'satoshis, or sats', to create one-of-a-kind NFT referred to as 'digital artifacts' on the Bitcoin network. The copies of NFTs for BTC may be JPEG images, PDF files, or audio or video files. Which can be managed to hold and transferred across the Bitcoin blockchain. NFTs on Bitcoin Network When it comes to digital collectibles 'NFTs' many of the crypto users think of Ethereum, Solana, or Polygon. Due to the proof-of-stake blockchains, which have significant dominance in the NFT arena. However, Bitcoin-based digital collectibles have been in existence since 2014. And lots of initiatives have made it their continuous goal to introduce NFTs to the first and largest cryptocurrency. By introducing Ordinals, BTC enthusiasts may have a way to build a ring of protection to save their digital gold from non-financial use cases. According to the Ordinals website, just 277 digital artifacts have reportedly been inscribed thus far. Further, Rodarmor claimed earlier that digital artifacts are 100% meme-themed art developments. Since the start of 2023, the global cryptocurrency market signaling bullish momentum as Bitcoin (BTC) climbed over 8% in 14 days and around 40% from the preceding month. Prominent altcoins such as Ethereum, BNB, and Aptos also trade with greens in their chart.

- Friktion is encouraging consumers to remove their money from the protocol. - Nonetheless, the underlying protocol will continue to be available on-chain. According to a statement released on January 26th, the Solana decentralized finance (DeFi) platform Friktion is closing down its user interface. And encouraging consumers to remove their money from the protocol. Due to the platform's website switching to a withdrawal-only mode for all Volts, deposits are no longer possible. According to Friktion's website, its Volts are structured products for DeFi investments. That provide investors with a cut of the profits made by investment pools. Friktion has made the difficult decision to sunset its user platform, a process beginning with moving all Volts into Withdrawal-Only mode on Friktion's User Interface <https://t.co/zrRbHgr6FV> starting 25 Jan 2023. 'Friktion' (@friktion_labs) January 27, 2023 (1/8) Nonetheless, the underlying protocol will continue to be available on-chain. The business claims that the move was motivated by the difficult market for DeFi advancement in recent months. Domino Effect Continues Before the crypto winter of 2022, Friktion's app had approximately 20,000 user wallets, had passed \$3 billion in traded volume, and had achieved over \$160 million in total value locked (TVL). Undercollateralized lending was introduced in November 2022 to cater to the demand from institutional investors for DeFi. Nearly a year after announcing \$5.5 million in a financing round in January 2022, the firm has decided to shut down its user interface. It was backed by a diverse group of investors, including Jump Crypto, Defiance Capital, Delphi Ventures, Solana Ventures, and Tribe Capital. Moreover, Alameda Research, a subsidiary of FTX, was one of the board members at the time of the exchange's demise in November 2022. Other companies represented on the board were Genesis Trading, LedgerPrime, CMS Holdings, and Orthogonal Trading. Both Genesis Trading and FTX have filed for Bankruptcy and it seems the domino effect is affecting more firms. Recommended For You:

- The trending cryptocurrencies on Twitter during the day are APT, MATIC, and SOL. - Aptos (APT) hits a new all-time high of \$19.92 on January 26. The global cryptocurrency industry has a promising outlook as the new year kicks into gear. Bitcoin (BTC), the dominant coin in the crypto market, has witnessed a massive price rally since the beginning of 2023. During the past 24 hours, Bitcoin hit a price range of \$23k, and it is continuing to attain a significant price surge. Amidst BTC's tremendous hike, the leading altcoins are also following the same track. As the global cryptocurrency market has gained rapid bullish momentum, the buzz around the coins has also extended throughout social media. Some of the altcoins were constantly trending on Twitter after achieving an enormous price climb. Now, let's take a look at the top trending coins on Twitter during the past 24 hours. Aptos (APT) The current year appears to be a better year for Aptos, the layer-1 proof-of-stake (PoS) cryptocurrency from the Aptos ecosystem. During the day, APT is continuing to trend on Twitter and crypto market data aggregators, whereas the token strikes a new all-time high (ATH). According to CoinGecko, Aptos hits a new ATH of \$19.92 on January 26, 2023, with a notable price surge. However, the token is currently 11.1% down from its new all-time high and is trading around the price range of \$17.85. Aptos's value has decreased by nearly 4.7% in the past 24 hours, as per CoinGecko. Polygon (MATIC) The native cryptocurrency of Polygon Network, MATIC, is also trending on Twitter as the token's price rallies above \$1. Polygon is currently trading around \$1.07 with a one-day trading volume of \$1,274,481,611. MATIC has increased by nearly 7.7% in the last 24 hours and 33% in a month, while the price of the token is currently trading around \$0.9338, 20% higher than a year ago. The past week. Solana (SOL) Since mid-December, the native cryptocurrency of the Solana ecosystem, SOL, has experienced a substantial price increase. In recent days, Twitter frequently recognizes Solana as a trending hashtag because of its constant price increase. The token is still trending on the social media platform despite a hike of 113.9% in a month. During a month, Solana recorded a massive low of \$8 and rapidly jumped to a price range of \$26. Moreover, SOL is currently trading at around \$23.69, according to CoinGecko. Recommended For You

- Polygon blockchain beats Ethereum on daily active users. - Polygon has daily active users of over 349.20K. Since the start of 2023, the global cryptocurrency market has witnessed significant gripping changes. As the leading altcoin, Polygon (MATIC) joined the trend by 'overtaking' the second largest crypto Ethereum (ETH) in daily active users (DAU). This year Polygon maintains its impressive growth. And the Polygon blockchain has lifted to the second position just after Binance's BNB chain, which recorded 803,707 DAUs. According to data aggregator Token Terminal, Polygon has daily active users of over 349.20K, which climbed by 8.4% in the last 7 days and 49.8% in the previous 180 days, while Ethereum has a DAU of around 340.97K, decreased by 18.6% in 180 days. Polygon Witnessed Massive Surge Polygon rally comes with a crypto market upswing in January that saw the price of Bitcoin (BTC) rise by almost 40% in the last 30 days. MATIC price rallied with 'four weeks straight green candles'. Further, Polygon's hard fork upgrade, which occurred on 17th January 2023, maybe the reason behind the price increase. Also, Polygon announced significant partnerships and launches over the last month. According to the CoinGecko data, Polygon surged by around 10% in the last 24 hours and 20% over the previous two weeks. At the time of writing, MATIC traded at \$1.08 with a 24 hours trading volume of over \$1.1 billion, which climbed 173%. Polygon holds a market cap of around \$9.7 billion, which increased 8% in just a day. Further, MATIC's price rose by 15% in just a week. However, the largest altcoin Ethereum also beholds notable price gains. ETH traded at \$1,578.66, which soared approximately 11.4% in the last 14 days and 2% from 7 days. Moreover, Aptos (APT) and Solana (SOL) are trending with remarkable price rallies. The APT price climbed by 125% in just a week, and SOL increased by around 12% in 7 days.

- Doodles is moving to the Flow blockchain for its next major release. - It is reported to cover millions of NFTs, rather than the 10,000 avatars as in first series. Doodles stands out as one of the most well-known Ethereum NFT initiatives because to its vibrant profile photos (PPFs), over \$550 million in trading volume, and the involvement of artist and chief brand officer, Pharrell Williams. Doodles, however, is moving to the Flow Blockchain for its next major release. Doodles, the company behind the popular project, said today that its 'second series' of 10,000 PPFs initiative would be released on Flow, the Web3 platform's most well-known blockchain for sports NFT projects like NBA Top Shot and NFL All Day. More Customization Options The sequel to Doodles was unveiled during a New York City NFT event last June. It is reported to cover millions of NFTs, rather than the 10,000 avatars in the first Doodles series, while retaining the same pastel, cartoonish look of the previous series and artist Scott 'Burnt Toast' Martin. As an added bonus, this will provide NFT holders almost limitless options for personalizing virtual avatars for usage in gaming, social networking, and more. In a press release, Doodles said that it will be releasing digital wearable goods for the NFT avatars 'via limited-edition IRL drops tied to specific events and brand collaborations,' with the items later becoming tradable on the Gaia marketplace inside Flow. The Doodles 2 team announced at NFT NYC that, owing to the customization component and the high network gas costs associated with transactions on Ethereum, the project will debut on a new blockchain platform. It has been theorized by several in the NFT community that it may be either Solana or Polygon.

MarketAcross, a pioneer in blockchain marketing, has become the exclusive worldwide media partner for the forthcoming European Blockchain Convention (EBC). In its ninth edition, this conference will take place at the Hyatt Regency in Barcelona, Spain, from February 15-17, 2023, and is projected to attract more than 2,500 participants. The experienced blockchain PR and marketing agency has agreed to handle all marketing for the 2023 Convention, both before and after the event, to help spread the word about the groundbreaking conference taking place in Barcelona. The EBC Blockchain Awards, honoring Europe's top 100 early-stage firms, will make its debut during this year's in-person conference, which is expected to be the largest blockchain event ever held in Europe. After a 10-month public vote, 20 finalists were chosen to enter the 'final round' of the competition, a panel of investors throughout the course of the three-day event and compete for the prize. Over 200 prominent players in the cryptocurrency sector will be present at this year's EBC, including Bittrex CEO Oliver Linch, Aave founder Stani Kulechov, Solana co-founder Stephen Akridge, and Santander's Head of Crypto Coty de Monteverde. The conference will include two stages and attract a wide range of blockchain professionals, including as those working on DeFi, NFTs, Web3, and blockchain games, as in past years. The event's 30+ sponsors will be represented at booths in a brand-new exhibition area, giving guests an opportunity to learn more about these businesses. A special networking event will be held on February 15, and two parties will be held on February 16 and 17 with live music and drinks for attendees to mingle after business hours. MarketAcross, one of the well-respected PR firms in the business, has previously participated as a web3 media partner of Benzinga's Future of Crypto conference in New York City. Additionally, in March of 2023, Paris Blockchain Week will have it as an official media partner. 'We are thrilled to join EBC as the main media partner, especially this year, as the speaker list will showcase a lot of exciting personas and projects. EBC is a veteran in the Europe crypto event scene and we are hyped to finally be there in person and make this year's event the best one yet.' said Itai Elizur, COO &

Partner at MarketAcross. Victoria Gago, Co-Founder of European Blockchain Convention added “Since we launched in 2018 our mission has always been to help the blockchain community connect and thrive. We are very excited to partner up with the MarketAcross team. We are convinced that together we will have a bigger impact in the space.”

- More than half of the Cardano nodes disconnected and restarted due to an anomaly. - The cause of the anomaly and subsequent node disconnections is still under investigation. Cardano Network, one of the leading open-source blockchain platforms, has recovered rapidly after its brief node disruption. According to recent posts from the developers of Cardano, the blockchain ecosystem witnessed a brief outage on Sunday as 50% of nodes disconnected due to an anomaly. However, the network problem was immediately resolved. Rick McCracken, a developer for Cardano, tweeted: Some of you will be aware of an incident last night at approximately 00:09:00 UTC (between blocks 8300569 and 8300570) that caused approximately 50% of Cardano nodes to disconnect and restart. This impacted relay nodes and block-producing nodes; edge nodes appear to have been unaffected. Cardano Fixes Itself in Minutes The tweet further elucidated the interruption that occurred in Cardano. According to the post, the issue appears to have been brought on by a transitory anomaly that caused one of two responses in the node: some disconnected from a peer, while others threw an exception and restarted. However, the major cause of the anomaly and subsequent node disconnections is still under investigation. Furthermore, Tom Stokes, a Cardano SPO, tweeted a network sync statistic following the Cardano node outage. According to the data, network sync has progressed quickly to a level of more than 87%. However, it has not straightaway returned to its earlier level of 100%, as per the statistics. This is not the first time the nodes have been disconnected on blockchain networks. In the previous year, the Solana ecosystem also experienced a similar concern. An interruption caused the sudden fall of Solana for more than seven hours. The blockchain developers had been working nonstop to restart the network.

- The charges stem from his alleged actions on the Mango Market in October 2022. - Eisenberg will be extradited to New York to face the many allegations against him. Mango Markets hacker Avraham Eisenberg, who had previously claimed responsibility for the scheme, was charged with fraud and market manipulation by the United States Securities and Exchange Commission (SEC) on Monday. The charges stem from his alleged actions on the Solana-based decentralized exchange (DEX) in October 2022. U.S. citizen and alleged criminal and civil wrongdoer Eisenberg was detained in Puerto Rico in December and will be extradited to New York to face the many allegations against him. He is suspected of stealing almost \$116 million worth of cryptocurrencies by manipulating the platform’s markets. SEC’s Focus on Crypto Sector On Twitter in October of the previous year. He boasted about the first attack and referred to it as a very profitable trading strategy. According to him, he and a number of other users successfully carried out a strategy. That caused Mango Markets to experience a temporary halt in its operations. In addition, he defended the strategy when being interviewed about it on the Unchained Podcast. In December, the U.S. Department of Justice filed charges against Eisenberg; the CFTC followed suit early this month. Many sections of the federal securities laws, including several anti-fraud and anti-market manipulation provisions, are cited in the SEC’s complaint as having been broken by Eisenberg. Particularly problematic is the SEC’s labelling of the exchange’s MNGO governance token as a security. A claim many crypto supporters would likely reject. Under current Chair Gary Gensler, who has stated his belief that almost all crypto assets qualify as securities, the SEC has increased its focus on the crypto sector. - 250 million code commits from the GitHub repositories collaborated for the report. - The present active crypto BUILDers sum up to 23,343 per month. Electric Capital released the 2022 Crypto Developers Report. The firm collaborated on the 250 million code commits from the GitHub repositories. The codes were fingerprinted across the 9000 ecosystems and found the result of the last 14 years. A tragic year in cryptocurrency has initiated opportunities for many new BUILDers. Cryptocurrency has gained over 22K monthly users in the last seven years. The present active crypto developers sum up to 23,343 per month. At the start of crypto development from genesis bitcoin block creation to Ethereum genesis block creation, the total number of developers was only 1,164. It took almost six years to capture 1K developers and in the proceeding six years, it captivated over 20 times more in number. The first 10 K developers joined the community during the years 2018-2019. This is significantly the golden era, where the majority of coins and tokens attained their All Time High (ATH). Developers and Crypto Pricing The trembling crypto prices created speculation in the minds of traders, investors, and HOLDERS. But the innovators and developers took this challenging time to experiment with the blockchain and supplementing technologies. The developer’s ATH was attained during June 2022 when the crypto market was extremely in downfall. Though we can see the major virtual assets still struggling to regain the positions they left, their development over them seems to be functioning perfectly. Coming to major ecosystems, projects like Solana, Polygon and NEAR protocols are overpowering the market pioneers Bitcoin and Ethereum. Above mentioned platforms have an average of 500+ active monthly developers. The developers on the external ecosystems contribute 72% to the overall number. The conclusion to be derived from this report is that the phrases “Buy in the Dip” and “HODL in the Dip” was suppressed by the phrase “BUILD in the Dip”.

- Bullish SRM price prediction is \$0.6633 to \$1.5112. - Serum (SRM) price might also reach \$2 soon. - Bearish SRM price prediction for 2023 is \$0.1052. In Serum (SRM) price prediction 2023, we use statistics, price patterns, RSI, RVOL and other information about SRM to analyze the future movement of the cryptocurrency. Serum (SRM) Current Market Status | Current Price | \$0.421131 | | 24 hr Hour Trading Volume | \$50,516,149 | | 24 hr Hour Price Change | 10.3% up | | Circulating Supply | 372,782,297 | | All Time High | \$13.78 (On Sep 11, 2021) | What is Serum (SRM)? Serum is a Solana-based decentralized exchange software that allows traders to buy and sell cryptocurrency. If this is new to you, Solana is a blockchain platform that seeks to boost user scalability by accelerating transaction settlement times. Serum (SRM) Price Prediction 2023 Serum (SRM) holds the 187th position on CoinGecko right now. SRM price prediction 2023 is explained below with a daily time frame. The above chart of SRM laid out the Horizontal Channel pattern. A horizontal channel or sideways trend has the appearance of a rectangle pattern. It consists of at least four contact points. This is because it needs at least two lows to connect, as well as two highs. Buying and selling pressure is equal, and the prevailing direction of price action is sideways. Horizontal channels provide a clear and systematic way to trade by providing buy and sell points. When the price hits the top of the channel, sell your existing long position or take a short position. The difference between the other two is that a horizontal channel is characterized as having equal highs and lows. Currently, Serum (SRM) is in the range of \$0.456936. If the pattern continues, the price of SRM might reach the resistance levels of \$0.5123 and \$2.2625. If the trend reverses, then the price of SRM may fall to \$0.2490, & \$0.1191. Serum (SRM) Support and Resistance Levels The chart below shows the support and resistance levels of Serum (SRM). From the above daily time frame, we can clearly interpret the following as the resistance and support levels for Serum (SRM). | Resistance Level 1 | \$0.6633 | | Resistance Level 2 | \$1.5112 | | Support Level 1 | \$0.2657 | | Support Level 2 | \$0.1052 | The charts show that Serum (SRM) has performed a bullish trend over the past month. If this trend continues, SRM might run along with the bulls overtaking its resistance level at \$1.5112. Accordingly, if the investors turn against crypto, the price of Serum (SRM) might plummet to almost \$0.1052, a bearish signal. Serum (SRM) Price Prediction 2023 “RVOL, MA, and RSI The Relative Volume (RVOL) of Serum (SRM) is shown in the chart below. It is an indicator of how the current trading volume has changed over a period of time from the previous trading volume. Currently, the RVOL of SRM lies above the cutoff line, indicating strong participants in the current trend. Also, the Moving Average (MA) of Serum (SRM) is shown in the chart above. Notably, Serum’s (SRM) price lies above 50 MA (short-term) so it is in an uptrend. Currently, SRM has entered a bullish state. Therefore, there is a possibility of a reversal trend of SRM at any time. Meanwhile, the Relative Strength Index (RSI) of the SRM is 66.35. This means that Serum (SRM) is in an overbought state. However, this means a major price reversal of SRM may occur in the upcoming days. So, traders need to trade carefully. Serum (SRM) Price Prediction 2023 “ADX, RVI Let us now look at the Average Directional Index (ADX) of Serum (SRM). It helps to measure the overall strength of the trend. The indicator is the average of the expanding price range values. This system attempts to measure the strength of price movement in the positive and negative directions using DMI indicators with ADX. The above chart represents the ADX of Serum (SRM). Currently, the ADX of SRM lies in the range of 50.7244 and thus, it indicates a strong trend. The above chart also represents the Relative Volatility Index (RVI) of Serum (SRM). RVI measures the constant deviation of price changes over a period of time. The RVI of SRM lies below 50, indicating low volatility. In fact, the RSI of Serum (SRM) is at 66.35 thus confirming a potential sell signal. Comparison of SRM with BTC, ETH The below chart shows the price comparison between Bitcoin (BTC), Ethereum (ETH), and Serum (SRM). From the above chart, we can interpret the trend of SRM is moving in the same direction as BTC and ETH. That is, when the price of BTC and ETH increases or decreases the price of SRM increases or decreases respectively. Serum (SRM) Price Prediction 2024-2030 Numerous factors are taken into account when forecasting prices including volume changes, price variations, market cycles, and similar coins. Let’s predict the price of SafePal (SFP) between 2024 and 2030. Serum (SRM) Price Prediction 2024 If the declining price action completely slows down in momentum and the trend reverses, Serum (SRM) might probably attain \$5 by 2024. Serum (SRM) Price Prediction 2025 With several upgrades in the network, Serum (SRM) might enter a bullish trajectory. If the coin grabs the attention of major investors, SRM might rally to hit \$10 by 2025. Serum (SRM) Price Prediction 2026 If Serum (SRM) sustains major resistance levels and continues to be recognized as a better investment option among the investors for the next 3 years, SRM would rally to hit \$17. Serum (SRM) Price Prediction 2027 If Serum (SRM) sustains major resistance levels and continues to be recognized as a better investment option among the investors for the next 4 years, SRM would rally to hit \$21. Serum (SRM) Price Prediction 2028 If Serum (SRM) sustains major resistance levels and continues to be recognized as a better investment option among the investors for the next 5 years, SRM would rally to hit \$26. Serum (SRM) Price Prediction 2029 If Serum (SRM) holds up a strong stance as a better investment option for the next 6 years amid the trends in the highly-volatile crypto market by driving significant price rallies, SRM would hit \$30 in 2029. Serum (SRM) Price Prediction 2030 If investors flock in and continue to place their bets on Serum (SRM), it would witness major spikes. SRM might hit \$34 by 2030. Conclusion With continuous improvements in the Serum network, we can say that 2023 is a good year for SRM. For this reason, the bullish price prediction of Serum (SRM) in 2023 is \$1.5112. On the other hand, the bearish price prediction of Serum (SRM) price prediction for 2023 is \$0.1052. Furthermore, with the advancements and upgrades to the Serum ecosystem, the performance of SRM would help to reach above its current all-time high (ATH) of \$13.78 very soon. But, it might also reach \$2 if the investors believe that SRM is a good investment in 2023. FAQ Serum (SRM), is a game-changing token that will rebuild the DeFi network and the decentralized derivatives market. 2. Where can you purchase Serum (SRM)? Serum (SRM) has been listed on many crypto exchanges which include Binance, OKX, Bybit, BingX, and XT.COM. With the ongoing developments and upgrades within the Serum platform, Serum (SRM) has a high possibility of reaching its ATH soon. 4. What is the current all-time high (ATH) of Serum (SRM)? On September 11, 2021, Serum (SRM) reached its new all-time high (ATH) of \$13.78. Serum (SRM) seems to be one of the top-gaining cryptocurrencies this year. According to the recorded achievements of Serum in the past few months, SRM is considered a good investment in 2022. Serum (SRM) is one of the active cryptos that continues to maintain its bullish state. Eventually, if this bullish trend continues, Serum (SRM) will hit \$2 soon. Serum (SRM) price is expected to reach \$5 by 2024. Serum (SRM) price is expected to reach \$10 by 2025. Serum (SRM) price is expected to reach \$17 by 2026. Serum (SRM) price is expected to reach \$21 by 2027. Disclaimer: The opinion expressed in this chart is solely the author’s. It does not interpret as investment advice. - Pokee had promised this on Twitter if his post on January 13 received 1,000 likes. - The buyer claimed to oversee a private cryptocurrency fund. On Monday, an unnamed trader who goes by the handle @pokee paid over \$1 million to @esweep69 DeGods NFTs. Using a technology that allows purchasers to “sweep the floor,” or acquire a specified amount of NFTs, Pokee acquired the NFTs from a project via the Magic Eden marketplace. To hedge against potential losses, investors may sometimes acquire a large quantity of the lowest-priced NFTs in a project rather than a select few more costly assets. According to DeGods, it is the “#1 NFT community on Solana.” The Boring Ape Yacht Club (BAYC) has nothing to do with these NFTs. Fulfilled His Promise Pokee had promised this on Twitter if his post on January 13 received 1,000 likes. As part of his tweet, he stated his intention to buy 69 in NFTs “in support of” the project’s planned migration to Ethereum. Over time, the tweet was liked over 3,000 times. The transaction, which cost close to \$900,000, was consummated three days later. He stated: “My goal with this investment is actually to bridge them to ETH. I was unable to invest more of my portfolio into Solana because of on-chain risks. On smaller NFTs and mints back then, I was having a good time in Solana.” According to Pokee, the owner of the Pokee.eth Ethereum wallet is the same person. But it includes the Ethereum Name Service (ENS) name, three rare Bored Ape Yacht Club NFTs, and other rare NFTs. In a text interview posted on the Magic Eden website, Pokee claimed to oversee a private cryptocurrency fund. Recommended For You: Disney’s Market Capitalization Upsurges to \$257 Billion with NFT’s

- Serum (SRM) price has skyrocketed to \$0.45. - The fear & Greed Index of SRM is currently showing 55 (Neutral) Serum price surged today to \$ 0.45 with a 24-hour trading volume of \$1,128M, the market cap of \$120M, and market dominance of 0.01%. The SRM price increased over 60% in the last 24 hours. Serum's highest price was recorded on Sep 11, 2021 when it was trading at its all-time high of \$13.58, and its lowest price was recorded, when it was trading at its all-time low of \$ 0.89. Since its ATH, the price has dropped to \$ 0.13394 (cycle low). SRM reached its highest price since the last cycle low at \$ 0.597316 (cycle high). Fear & Greed Index is currently showing 55 (Neutral) while Serum price prediction sentiment is neutral. There are 263.24M SRM in circulation out of a maximum supply of 10.16B SRM. Currently, the yearly supply inflation rate is 97.58%, which means 130.01M SRM were created last year. Serum is ranked #3 in the Solana Network sector based on market capitalization, and #35 in the DeFi Coins sector. SRM price is making a move toward the weekly resistance level at \$1. This follows after SRM's price entered into an upward move over the last 7-14 days. As a result, SRM's price has been able to break above the 9-week EMA line and now looks to do the same with the 20-week EMA line. Weekly RSI has crossed above its weekly SMA line, indicating a bullish trend. A positive slope in the weekly RSI line also indicates overbought territory, which is bullish. If the price of SRM is able to break above the 20-week EMA line, then it will have no remaining obstacles that will hinder its move toward the \$1 level.

- APTaE™s price increased by an astounding 101 percent in a single week. - Aptos is a blockchain tech that relies on a custom programming language called Move. With the decentralized exchange (DEX) PancakeSwapaE™s decision to continue its multichain deployment on the Aptos blockchain, the price of Aptos (APT), a Layer 1 proof-of-stake (PoS) blockchain, has increased. According to CoinMarketCap, APT was trading for \$7.45, up 7% from the previous day. In the meanwhile, APTaE™s price increased by an astounding 101 percent in a single week. The majority of participants (97%, to be exact) on PancakeSwap approved of the firm pushing through with the deployment. Growing Demand For APT Coins When Aptos Labs (the firm behind APT) needed to raise money in July 2022, it turned to the FTX cryptocurrency exchange, which filed for bankruptcy on 11 November 2022. The exchange helped raise \$150 million. Furthermore, Aptos Labs said at the time that it would utilize the chance to rebuild the reliable foundation Web 3.0 has been waiting for at Mo Shahn and Avery Chang, former 1 of Meta, launched Aptos Labs in 2021 after working together on the doomed cryptocurrency initiative Diem. Aptos is a blockchain tech that relies on a custom programming language called Move. Many see Aptos as a viable substitute for Ethereum and similar digital currencies. Moreover, about three months ago, Aptos reached its all-time high value. An important factor that is contributing to the growth of the Aptos token is the growing demand for APT coins, as well as the rising practicality of blockchain architecture. Aptos has already garnered significant recognition despite the fact that it is still in its infancy as a blockchain protocol. This popularity is due to the fact that Aptos has an increasing number of valuable integrations and features. Recommended For You: Solana Spiked over 40% following its Partnership with Google

- Bitcoin's advance above the \$16k resistance level has now reached the \$18k level. - Bitcoin is trading above \$18k and above the 100 hourly simple moving average as the crypto market witnesses the bull trend alarms and the cryptos are illuminating with green signs everywhere and the bulls are taking control over the market and the losses trend is reversed. - Bitcoin is trading at \$18,223.65, below the previous price resistance levels, reaching its highest point since December. And since the beginning of January, Bitcoin has been trading at a price of \$16K and from the past 7 days it rallied in green. At the point of writing, the Bitcoin (BTC) price is \$18,223.65 and has climbed by 4.6%. According to glassnode studio, almost 13% of the circulating supply is returned to profits. With a market cap of \$3 billion, about 19 million BTC are in circulation. With a market value of \$22.83 billion in 24 hours. Trending Crypto From the Last 24 Hours For the past 24 hours, the cryptos have been in a green march, with the top moving currency, Solana (SOL), gaining 23.02% in the last 7 days and trading at \$16.28, up 1.15% in the previous 24 hours. And cryptos such as Bitcoin (BTC) and Binance Coin (BNB) are among the top 24h trending coins. Avalanche (AVAX) has been the top gainer over the last 24 hours since Ava Labs engaged with the service giant Amazon. As a result, the price of AVAX has skyrocketed over the last 24 hours and is currently trading at \$15.34, a 22.67% increase. From 24h, the leading gainers are Near Protocol (NEAR), Aave (AAVE), and Fantom (FTM). And the crypto market, after many battles and downtrends, and after many collapses, as well as the FTX collapse in 2022, is finally entering bulls.

An early-stage accelerator programme called Beacon with an emphasis on web3 recently launched its first batch. On Tuesday, at a demo day, the teams from the first cohort, referred to as Cohort 0, presented their concepts. Even though itâ€™s only the second week of 2023, startups are already starting demo days in an effort to maintain momentum in the rapidly shifting cryptocurrency sector. Sandeep Nailwal, a key contributor to Beacon and co-founder of Polygon speaking to a media house, stated that â€œFor Cohort 0, we spoke with over 1,000 projects to end up at 15 companies in Cohort 0 with 13 graduating at our Demo Day.â€ For its autumn and spring cohorts, the three-month programme accepts roughly 15 to 20 applicants each time it is offered twice a year. â€œWe feel like Cohort 0 is our MVP of Beacon,â€ Nailwal said. â€œSo for this cohort, we hand-picked our favorite teams through taking calls with founders sourced through our networks.â€ The elite list of the mentors that joined to chat with our founders is included below; to see the whole list of all mentors engaged, visit [xbeacon.com/mentors](https://x.beacon.com/mentors).

- Jack Lu (CEO, Co-Founder Magic Eden) - VC Panel: Anand Iyer (Venture Partner Lightspeed), Maria Shen (Partner Electric Capital), Ryan Kim (Founding Partner Hashed), Geoff Hamilton (Investment Partner at Variant Fund) - Rob Behnke (Co-Founder Halborn) - Brendan Farmer (Co-Lead Polygon Zero) - Dan Kim (VP of Business Development and Listing Coinbase) - Miles Anthony (CEO, Co-Founder Decentral Games) The standard investment for the next cohort will be \$250,000, and each firm accepted into the programme will get an \$8 million post-money valuation from Beacon, according to Nailwal. Investments in Cohort 0,

were made on a case-by-case basis since the team was still perfecting its approach, he noted. Beacon is “chain-agnostic,” therefore the majority of the Cohort 0 teams were developing cross-chain apps, according to Nailwal. But when it comes to the number of teams developing on that blockchain, Ethereum came out on top. Kenzi Wang, a key contributor at Beacon and co-founder of Symbolic Capital, said at the demo day that there were 29 founders of the 13 firms, spread across nine countries and 13 cities. The firms concentrated on a number of cryptocurrency-related subsectors, including developer tools, infrastructure, gaming, and decentralized lending and borrowing. With the exception of Community Gaming, which is in the Series A stage, almost all of the firms in the cohort are at the seed stage. Here are the details behind Cohort 0’s 13 startups:

Organization: Arcana - **Core:** Web3 developer toolkit - **Founders:** Aravindh Kumar and Mayur Relekar - **Level:** Seed - **Profile:** With capabilities like user authentication, storage, and access control, Arcana lets developers complement their tech stack so they can create nearly any project. Due to its design and architecture, developers may simply utilize the expanding Arcana stack of tools and services to provide their consumers with benefits that have never been seen before.

Organization: Blinkmoon - **Core:** Game development studio - **Founders:** Hajeir Mazinani and Hugh Behroozy - **Level:** Seed - **Profile:** Blinkmoon, a Canadian company with its headquarters in Vancouver, aims to revolutionize the gaming sector by combining cutting-edge technology from the VFX and gaming industries into a single studio. The breathtaking graphics on popular movies like Game of Thrones and Guardians of the Galaxy, as well as classic video games like NBA 2K, League of Legends: Wild Rift, and the Dead Rising series, are the work of a team of artists behind Blinkmoon.

Core: Web3 event experience - **Founders:** Chase Guo - **Level:** Seed - **Profile:** The web3 event experience firm assists businesses in turning events into one-of-a-kind experiences. Companies may simply develop customizable virtual worlds or interesting real events to captivate people using in-world DAO governance and GameFi.

Organization: Colexion - **Core:** GameFi ecosystem - **Founders:** Abhay Aggarwal - **Level:** Seed - **Profile:** With an emphasis on servicing APAC, Colexion is a GameFi ecosystem integrating web2 games into web3. This is being accomplished by Colexion using a platform known as the Colexion Core, which offers games a variety of services essential for them to survive in the web3 environment (minting, marketplace, web2 to web3 bridge, comment/wallet, etc.). In their web2 daily fantasy game and hyper casual game, Colexion has over 18 million members.

Organization: Community Gaming - **Core:** Esports platform - **Founders:** Chris Gonsalves - **Level:** Series A - **Profile:** A comprehensive esports tournament platform, Community Gaming strives to provide infrastructure to participants in the market. The platform offers tools for players, tournament organizers, and game creators to organize, host, and take part in esports competitions. It is supported by blockchain payment systems based on Ethereum and Solana. Additionally, it offers players a daily content engine for profits, and the option to monetize their gaming via quest completion, and game discovery.

Organization: Cubist - **Core:** Web3 developer tools and infrastructure - **Founders:** Ann Stefan, Deian Stefan, Riad Wahby, Fraser Brown - **Level:** Seed - **Profile:** The goal of Cubist, a supplier of infrastructure and developer tools, is to provide web3 developers access to modern software engineering methods and security. In order to make it simple for developers to create, test, and deploy dApps across multiple chains and cross-chains, this toolkit focuses on offering safer and more secure choices. A former COO of a financial company as well as professors of computer science from Carnegie Mellon University and UC San Diego make up its founding team. The members of the team have devoted their professional lives to retrofitting security for real-world systems, and they have jointly authored over 80 research papers on subjects including computer systems, programming languages, security, and cryptography.

Core: MEV solutions for Ethereum-based blockchains and rollups - **Founders:** Alex Watts, Jordan Hagan - **Level:** Seed - **Profile:** Without the need to install or maintain specialized software on validating nodes, the Fastlane protocol aims to pay validators, boost algorithmic traders’ efficiency, and relieve network members of the strain caused by duplicate transactions. The protocol monetizes propagation bottlenecks in the layer-2 blockchain Polygon and distributes the benefits to participating validators in order to decrease transaction spam and enhance the general health of the Ethereum network.

Organization: Meta Apes - **Core:** Web3 game - **Founders:** Taylor Shim, Nicholas Carr - **Level:** Seed - **Profile:** Meta Apes is a mobile web3 game that is free to play and win-to-earn and is based on the BNB Application Sidechain (BAS). In order to win the “race to space,” players may construct their own towns and cities while competing with and discovering others. The game tries to merge web3 components like in-game money with classic gaming elements like massively multiplayer online (MMO) techniques. The crew has experience from Ubisoft, Gameloft, Zynga, AppLovin, and Epic, among other companies.

Organization: Mystic Moose - **Core:** Web3 gaming developer - **Founders:** Mike Levine - **Level:** Seed - **Profile:** A group of industry professionals from Activision, LucasArts, and Electronic Arts founded the web3 platform, game studio, and publisher, Mystic Moose. Their debut game, Planet Mojo, is a browser-based server of networked games that was built on top of its scalable backend platform Sumatra. Its auto-chess game, Mojo Melee, is now undergoing alpha playtesting and is scheduled to officially debut on browsers and mobile devices in the first quarter of this year.

Animoca Brands, Republic Crypto, and Polygon Studios are a few of the sponsors of the studio.

Organization: Nillion - **Core:** Web3 infrastructure - **Founders:** Alex Page, Andrew Yeoh, Andrew Masanto - **Level:** Seed - **Profile:** Nillion is a web3 infrastructure firm that is concerned with protecting data storage, processing, and fragmentation on the internet. According to Andrew Yeoh, the company’s founding chief marketing officer, “Nillion is a deep technology infrastructure project.” “While blockchains decentralise finance, Nillion aims to decentralise everything else and the rest of data.” Along with former workers of Uber, Indiegogo, and Hedera Hashgraph, the founders also include Coinbase and Nike executives. According to Nillion CEO Alex Page, the business gathered more than \$20 million in December 2022 from more than 150 investors in a “conscious move” to avoid consolidated ownership.

Organization: Davos Protocol - **Core:** Stable asset lending protocol - **Founders:** Varun Satyam, Julian Hayward, Filipe Gonçsalves - **Level:** Seed - **Profile:** According to its website, Davos Protocol is home to its stable asset, DAVOS, which is sustained by its monetary policy, which, on a weekly basis, balances yield production and price stability by using liquid staking. It gives customers the option to take out DAVOS loans using liquid staking tokens as security. Additionally, users may provide stable asset pairings to yield farm, give liquidity, and earn incentives. Through its protocol, the team wants to encourage the use of blockchain technology among the general public. Among its strategic partners are Ankr and Polygon.

Organization: Timeswap - **Core:** Decentralized lending and borrowing protocol - **Founders:** Amesh Devadas, Harshita Singh, Ricsson Ngo - **Level:** Seed - **Profile:** Timeswap is an automated market maker (AMM) protocol powered by Polygon and a decentralized lending and borrowing platform. One of its primary features allows users to construct any Ethereum-based ERC20 token pool by supplying the necessary liquidity. The feature also includes customizable interest rates and collateral considerations so users may pick the risk level they want. According to a post from August 2020, the platform has completed over \$2 million in lending, allowing liquidity volume on its protocol without the use of token incentives.

Organization: Ylide - **Core:** Decentralized protocol for wallet communication - **Founders:** Ignat Shapkin, Kirill Zubkov, Danila Simonov - **Level:** Seed - **Profile:** Ylide is a decentralized protocol for wallet-to-wallet communication that supports end-to-end encryption, multichain messaging, and data storage in smart contracts. Additionally, it offers a built-in mail client and tools enabling developers to add communication capabilities to their applications “as easily as building a Lego set,” according to the team.

Tickets for the flagship crypto event are now available. Speakers include Javier Garcia, Country leader for Spain and Portugal at Binance, Laurent Perello, Blockchain Advisor at Tron, Austin Federa, Head of Communications at Solana, Vilma Mattila, Founder of Sifre, Mary Camacho, CEO of Holochain & Holo, Cyrus Fazel, Founder & CEO of SwissBorg and many, many more.

- Unrivalled networking opportunity and chance to see in-person reveals of groundbreaking new Blockchain projects

More than 5,000+ delegates are expected to grace the stunning Altice Arena in Lisbon, Portugal this July 6 & 7 as Block 3000: Blockchain Battle gathers the best and brightest of Blockchain, Web3 and Crypto to unveil exciting new projects, engage in priceless networking and to set the discourse for the industry.

Block 3000: Blockchain Battle will welcome a diverse range of speakers that includes C-Suite Executives from some of Fintech’s biggest movers and shakers, influential media figures, inspirational founders and Blockchain thought leaders. The main theme of the event is the Battle of Blockchains, which will be held in the form of panel discussions with four to five speakers per round. During the panels, the speakers will delve into the various perspectives and challenges associated with blockchain networks, interoperability, scalability, and security. They will explore the potential of these technologies and how they can be leveraged to create innovative solutions to existing problems within both the blockchain ecosystem and the wider fintech space. Additionally, they will discuss the implications of these technologies on the future of the industry and the world at large. We invite all leading blockchain networks to join us! Not only that, but we also welcome outstanding projects from the DeFi, GameFi, Metaverse, NFT, and other industries.

Binance, Tron, Solana, Zilliqa, Holochain, and SwissBorg have already confirmed their attendance, and this is only the beginning! This event will set the standard for the industry, with crypto investors and enthusiasts mixing with developers and VC fund representatives. There will be engaging and combative panel discussions on crypto’s most controversial topics, groundbreaking new projects will be unveiled, the best of which will walk away with the coveted “Best Blockchain Project 2023” Award.

Arguably though, the value in attendance for many is the networking opportunity that Block 3000: Blockchain Battle provides. No other crypto event to date has offered an opportunity to pitch, discuss and collaborate like this. If you’re looking for investment in your project or looking to find the next big thing in Blockchain, this is a must-attend! Tickets come in a variety of packages to suit delegates’ needs from standard which includes access to the conference and networking events, to our very special whale package, which includes:

- Conference access (best whale seats in 1-2 row)
- Welcome bag from our partners and sponsors
- Exclusive gifts from partners and sponsors
- Networking app
- VIP coffee breaks and lunch
- Conference video
- PartyNight
- VIP registration
- VIP lounge area + access to speakers area with terrace
- 3D Networking Day

There will also be some extra surprises to be revealed later! For more information and to buy your tickets, click here. Follow us on social media for all the latest updates on Block 3000: Blockchain Battle

- Bitcoin (BTC) hovered around 3.6% in the last 7 days. - Ethereum (ETH) traded at \$1,331 and has soared by 10% in the last week. FTX collapse led to the winding down of cryptocurrency trading and custody services once again in 2022 crypto history. As the crypto market recovers with the start of 2023, Today the global cryptocurrency market turned to bullish price momentum. Also, the market cap of all cryptos increased to \$889 billion. Prominent cryptocurrencies such as Bitcoin (BTC) and Ethereum (ETH) also witnessing a rapid jump. Bitcoin (BTC) The world’s largest cryptocurrency Bitcoin hovered around 3.6% in the last 7 days with a market cap of \$332 billion. \$BTC has a trading volume of \$22 billion, which surged over 10% in the previous day. At the time of writing, Bitcoin traded at \$17,275, still two years low. Ethereum (ETH) The world’s biggest altcoin Ethereum traded at \$1,331, which has soared by 10% in the last week with a 24 hours trading volume of \$6 billion. ETH had a market capitalization of around \$160 billion. Binance (\$BNB) Following the BTC and ETH, the world’s biggest crypto exchange Binance native token \$BNB climbed by 12.5% in just a week with a 24 hours trading volume of \$210 million. \$BNB holds a market capitalization of approximately \$45 billion. Solana (\$SOL) & Cardano (\$ADA) According to CoinGecko, the value of both Solana (\$SOL) and Cardano (\$ADA) rose by over 19% and 26% in the last 7 days, returning to their zones. At the time of writing, SOL traded at \$110.02 with a 24 hours trading volume of \$1 billion and Solana has a market capitalization of around \$5 billion. \$ADA is the second-best performer among the top coin and 8th largest crypto in the market, as per CoinGecko. Cardano traded at \$0.318188 with a market cap of \$11 billion. Additionally, ADA has a 24 hours trading volume of \$569 million. Memecoins the OG memecoin Dogecoin (\$DOGE) has one of the most active communities in the history of cryptocurrency, and some celebrities even promote it. \$DOGE has increased by 7% during the past week and traded at \$0.076587 with a market cap of \$10 billion. Shiba Inu (\$SHIB) has also witnessed price gains due to its much anticipated Shibarium updates. \$SHIB traded at \$0.0000934, which surged by 14% in the last 7 days and 5% in a day. Shiba Inu has a market cap of over \$5 billion. Further, other altcoins such as Apecoin (\$APE), Lido coin (LDO), Aptos (APT), and Cult Dao (\$CULT) also pumped along with all above mentioned top coins.

- Eisenberg led off the deceptive manipulation of Mango Markets’ assets on October 11, 2022. - \$47 million worth of assets is still in the exploiter’s custody as a bug bounty. The Commodity Futures Trading Commission (CFTC) filed a civil enforcement action in the United States District Court of Southern District of New York on Monday against the “Mango Markets exploiter” Avraham Eisenberg for indulging in illicit market manipulation. This is the first time CFTC will charge an illegitimate trader with an enforcement action for initiating a manipulative scheme on a DeFi platform. Gretchen Lowe, Acting Director of Enforcement at CFTC, asserted: “The CFTC will use all available enforcement tools to aggressively pursue fraud and manipulation regardless of the technology that is utilized.” The CEA prohibits deception and swap manipulation, whether on a registered swap execution facility or on a decentralized blockchain-based trading platform. “Reportedly, Eisenberg executed a fraudulent trading scheme on the Solana-based DEX Mango Markets to wipe out over \$110 million worth of digital assets during last year’s mid-October. Eisenberg is detained in prison in Puerto Rico since December 27 after filing by the US Department of Justice (DOJ). CFTC Briefing

Eisenbergâ€™s Deceiving Plot Through Mondayâ€™s filing, CFTC laid out and briefed Eisenbergâ€™s deceptive trading scheme â€” the so-called â€œoracle manipulation.â€ Oracles, off-chain data providers, are integral parts of the DeFi exchange. That is, the price feed of Mango Markets is in sync with three external exchanges (â€œoracle exchangesâ€). This mechanism turned out to be a beneficial factor for Eisenbergâ€™s plot. The exploiter set up his swap positions on the DEX with two anonymous trading accounts. He deployed \$5 million worth of USDC from each account to purchase large sums of the exchangeâ€™s native tokens MNGO on oracle exchanges. This brief whale activity triggered a spike in the price of MNGO. In 30 minutes, the price of MNGO spiked 13% from \$0.04 to \$0.54, as on the attack day. The price of MNGO-USDC Swaps on Mango Markets is directly proportional to that of the MNGO traded on the DEX. Following this, his token swapsâ€™ prices were artificially inflated. Eventually, he managed to deploy those as collateral to borrow funds and wipe out Mango Marketsâ€™ major liquidity. According to CFTC, he liquidated \$114 million worth of cryptos such as Bitcoin (BTC), Ethereum (ETH), Tether (USDT) from Mango Markets. Despite the accusations, Eisenberg called this entire act â€œa highly profitable trading strategy.â€ To prevent Mango Markets from filing a criminal investigation or freezing his funds, Eisenberg executed his proposal of returning \$67 million worth of cryptos that he illicitly wiped out from the DEX. The US regulators are looking forward to the unrevealed court trial date. As per the Commission, Eisenberg might be subjected to monetary penalties and be banned from any trading activity.

- The top 5 gainers of the day are ZIL, SOL, OP, LDO, and IMX. - Zilliqa (ZIL) has attained a massive price surge of 50.63% during the past 24 hours. As the global cryptocurrency market attained a rapid bullish outlook, the leading cryptocurrencies experienced a dramatic price surge. Letâ€™s take a look at the top 5 cryptocurrencies, their assigned positions, and the development of complex tokens of the blockchain system with high throughput and low costs. According to CoinMarketCap (CMC), Zilliqa is currently trading around \$0.02644 with a one-day trading volume of \$329,816,887. Surprisingly, the token has attained a tremendous price surge of 50.63% during the past 24 hours. ZIL registered a price hike of 58.59% in the past week. Solana (SOL) Solana (SOL) is the native cryptocurrency of the Solana Ecosystem. SOL has expanded to rank among the top cryptocurrencies in the world since its launch. At the time of writing, Solana is trading around \$16.49 with a one-day trading volume of \$1,335,151,473. SOL has continuously experienced a significant price rise during the past few days. It registered a price increase of 21.49% in the past 24 hours and 50.19% during the past week. Optimism (OP) Optimism (OP) is a layer-two blockchain built on top of Ethereum. Using optimistic rollups, optimism benefits from the security of the Ethereum mainnet and helps scale the Ethereum ecosystem. The current price of Optimism (OP) is \$1.33 with a 24-hour trading volume of \$213,661,779, as per CMC. At the time of writing, the OP token has increased by nearly 20.87% during the day. Lido DAO (LDO) Lido is a liquid staking solution for Ethereum. It enables users to stake their ETH while engaging in on-chain activities, such as lending, to increase returns without requiring any minimum deposits or infrastructure maintenance. The current price of LDO DAO is \$1.93, with a 24-hour trading volume of \$278,323,284. At the time of writing, the token has increased by nearly 20.12% in the past 24 hours. Immutable X (IMX) a Immutable X, a scaling solution for NFTs that aims to make transactions nearly instantly and inexpensively possible, is powered by the Ethereum token known as IMX. IMX can be used to stake on Immutable X, vote on the protocolâ€™s future, and cover transaction costs. Immutable X (IMX) is currently trading around \$0.4916 with a one-day trading volume of \$15,140,596. The token has increased by nearly 16.79% in the last 24 hours.

- Cardano (ADA) has increased by nearly 20.11% during the past 24 hours. - Cardano dApps completed 16 million transactions earlier this week. Cardano (ADA), the native cryptocurrency of the Cardano blockchain, is currently experiencing positive price momentum amid the marketsâ€™ surprising â€œgreen turn.â€ According to CoinMarketCap (CMC), the 8th largest cryptocurrency is now trending in the global crypto market after attaining a significant price surge of 20.11% during the past 24 hours. At the time of writing, Cardano is trading around \$0.3312 with a one-day trading volume of \$840,247,007. ADA has increased by nearly 32.69% during the past 7 days. Cardano (ADA) Surges Up The price of Cardano has provided a very typical illustration of a consistent downward trend over the last few months. However, the ongoing uplift of the Cardano ecosystem has been attributed to several key factors, including user trust. Cardano dApps achieved a new milestone earlier this week by completing 16 million transactions. Further, ADA joined the top ten most used cryptocurrencies list for the first time in 2022, according to a recent survey. Moreover, as a result of the recent upward movement, Cardanoâ€™s market cap increased to \$10.2953 billion, or 1.23% of the entire market capitalization of cryptocurrencies. Cardano had a market cap of \$94.8001 billion at its peak. However, Cardano is currently 89.30% down from its all-time high of \$3.10, according to CMC. In addition, as the market is quickly gaining bullish momentum, the leading cryptocurrencies have experienced a considerable price increase. At the time of writing, Bitcoin (1.78%), Ethereum (3.83%), Binance Coin (7.06%), XRP (3.61%), Dogecoin (5.19%), Polygon (7.50%), and Solana (23.17%) have obtained a major price surge in the past 24 hours.

- Moonbirds will now have access to extensive UTA network of talent. - The Moonbirds project on Ethereum has 10,000 owl-themed 8-bit avatar NFTs. In February of 2022, Kevin Rose, an early Facebook and Twitter investor, and Justin Mezzell, a designer, launched a firm centered on NFTs. The Proof Collective and Oddities NFT lines are also available through the business. Rose hinted on Twitter on January 6 that the dealâ€™s primary motivation was to elevate Moonbirdsâ€™ profile beyond its current standing as a Web3 industry powerhouse and into the public worldwide. Rose stated: â€œWhat does UTA bring to the table? They are 1,400 people strong, with divisions in film, television, music, video games, sports, books, branding and licensing, speaking, marketing, fine arts, broadcast, and more.â€ Extensive Outreach Now Possible With the signing of a representation arrangement with prominent Hollywood talent agencies United Talent Agency (UTA), PROOF, the firm behind the top-tier NFT project Moonbirds, will have access to their extensive network of talent. Moreover, Rose went on to explain that UTA would assist PROOF in â€œvet, broker, and execute partnerships and expansion opportunities across a variety of fields,â€ providing greater context for the decision. Initially launching in April 2022, the Moonbirds project on Ethereum has 10,000 owl-themed 8-bit avatar NFTs. Data from CryptoSlam shows that it has produced over \$619.5 million in secondary sales thus far. With those sales, Moonbirds ranks as the eleventh best-selling NFT collection, behind only Doodles (\$553m) in twelfth place and CloneX (\$794.9m) in tenth. Moonbirdsâ€™ 24-hour sales volume decreased a massive 57.86%, with \$442,747 worth of Moonbirds NFT changing hands, despite the ostensibly optimistic UTA news. Trading volume is still up by 63.74% when looking over the last week. Moonbirdsâ€™ decision to pursue a Hollywood deal mirrors those of other major players in the NFT industry. - On Friday morning, Grayscale filed a notice with the SEC detailing the rebalancing. - The Grayscale fund manages \$163 million in assets. After the Grayscale Digital Large Cap Fund liquidated its investment in the Avalanche network on Thursday, the AVAX token dropped by around 3% on Friday. On Friday morning, Grayscale filed a notice with the SEC detailing the rebalancing, explaining that it had â€œadjusted the fundâ€™s portfolio by selling Avalanche (â€œAVAXâ€) and using the cash proceeds to purchase the existing fund components in proportion to their respective weightings.â€ In a thread on Twitter, the business said that it has also rebalanced its DeFi Fund to include Synthetix (SNX) while selling off Algorand (ALGO) from its Smart Contract Platform Ex-Ethereum Fund. Last month, Avalancheâ€™s token appreciated by 6.9 percent, reaching \$13.65 as per data from CMC. However, early Friday trade showed a 15% drop from the previous month to \$11.50. Held less than 1% Furthermore, the Grayscale Fund, which manages \$163 million in assets, held a very modest amount of AVAX. Based on the most recent quarterly report, as of September 30 AVAX accounted for less than 1% of the fundâ€™s total assets. Bitcoin now makes up 65% of the portfolio, Ethereum 31%, Cardanoâ€™s ADA token 2%, Polygonâ€™s MATIC 1%, and Solanaâ€™s SOL 1%. Since July, Grayscale has been monitoring the CoinDesk Large Cap Select Index. This April-born index follows â€œthe largest and most liquid digital assetsâ€ as measured by their combined market value. Moreover, coincident with Grayscaleâ€™s adoption of the index, the fund sold its holdings in Bitcoin Cash (BCH), Litecoin (LTC), Chainlink (LINK), Polkadot (DOT), and Uniswap (UNI) after its quarterly review.

DUBLINâ€”(BUSINESS WIRE)â€”The â€œThailand NFT Market Intelligence and Future Growth Dynamics Databook â€” 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels â€” Q2 2022â€ report has been added to ResearchAndMarkets.comâ€™s offering. NFT industry in Thailand is expected to grow by 47.1% on an annual basis to reach US\$112.1 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 33.7% during 2022-2028. The NFT Spend Value in the country will increase from US\$112.1 million in 2022 to reach US\$5783.1 million by 2028. Reasons to buy - Based on data and analysis, develop country-level strategies. - Identify investment opportunities in growth segments. - Exceed competition by incorporating forecast data as well as market trends. - Use the relationships between major data sets with valuable insights to improve strategy. - Appropriate for providing accurate, high-quality data and analysis to support internal and external presentations. DUBLINâ€”(BUSINESS WIRE)â€”The â€œLatin America NFT Market Intelligence and Future Growth Dynamics Databook â€” 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels â€” Q2 2022â€ report has been added to ResearchAndMarkets.comâ€™s offering. NFT industry in Latin America is expected to grow by 48.4% on an annual basis to reach US\$5871.1 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 34.8% during 2022-2028. The NFT Spend Value in the country will increase from US\$5871.1 million in 2022 to reach US\$31994.3 million by 2028. The non-fungible token (NFT) market in Latin America has undergone strong expansion over the last few years. The presence of Brazilian sports players on NFT marketplaces has supported the widespread adoption of NFTs among the general public. In addition, the adoption of NFT in the art industry has also grown significantly in these countries. Adoption by visual artists and some well-known names in the music industry are supporting the growth of the NFT industry in Brazil. With the NFT industry recording strong growth over the last four quarters in Brazil, NFT marketplaces are looking to tap into the high-growth market potential. Consequently, firms are entering into strategic partnerships with Brazilian football players, who have millions of fans across the country and globally, seeking to drive their growth in the NFT market. As the popularity of NFTs continues to gain rapid momentum globally, the publisher expects an increasing number of sports teams to collaborate and launch NFTs shortly. NFT marketplaces in Brazil are choosing an eco-friendly way to attract more artists to their platform, which will subsequently help them drive their growth. Hic et Nunc, one of the leading Brazil-based NFT marketplaces for artists globally, mints artwork on the Tezos blockchain, which consumes only a fraction of the energy of its rival blockchains, such as Ethereum. In addition, the energy-efficient Tezos blockchain costs only 30 cents compared to the US\$200 for conducting a single transaction on the Ethereum blockchain. As the popularity of NFTs continues to grow

globally, Brazilian startups and artists are creating NFT collections and raising millions of dollars by selling them. In March 2022, Lumx Studios, one of the leading startups from Rio de Janeiro that develops experiences in the metaverse, announced that the firm had earned R\$ 2 million by entering the NFT market with the 55Unity collection. To date, the 55Unity collection remains the largest collectibles project, having sold 3,000 tokens in 28 hours. In September 2021, Monica Rizzolli announced that the generative art NFT collection, Fragments of an infinite field, was sold for R\$28.35 million in an auction. The publisher expects similar trends to evolve in the Mexican NFT market over two to three years. Several brands have already started to mix NFT in their marketing strategies with increasing frequency. This trend is expected to intensify in the country from the short to medium-term perspective as the awareness and adoption among customers continue to grow in Mexico further. The publisher, therefore, expects the rising adoption of NFTs among brands to drive the market's future growth in the country. Music festivals are using NFTs as part of their marketing strategies in Mexico. Over the last 12 months, the NFT popularity has grown continuously. In the growing talks about NFTs in Mexico, music festivals have started to use NFTs as part of their marketing strategies. In March 2022, Cerveza Tecate Pa  l Norte, one of the largest music festivals in Mexico, announced the creation and sale of NFTs. Notably, the NFTs, created specifically for the event and loaded with lifetime benefits for the owners, were part of Cerveza Tecate  s marketing strategy. Football leagues are launching NFT collectibles to generate a new source of income amid the pandemic impact on revenue. In April 2021, Liga MX, the top soccer league in the country, announced that it would launch the NFT collection at the beginning of the 21  o/22  o season, which was slated to start at the end of August 2021. To launch its NFT collection, Liga MX entered into a strategic collaboration with Bondly, the NFT marketplace which auctioned the NFTs. Notably, Liga MX is one of the first soccer leagues to launch NFT collectibles. Globally, several individual teams have entered the NFT space and announced the sales of their collectibles. Football clubs are entering into strategic partnerships with NFT platforms to launch NFT collectibles. Several global football clubs and players are entering the NFT space to launch their NFT collectibles. Similar trends are visible in Mexico, wherein football clubs partner with global NFT platforms to launch their NFTs. In February 2022, the Atlas Futbol Club announced that the club has entered into a strategic partnership with Sorare, the French NFT platform, allowing fans to trade NFT cards of their favorite players. NFTs are helping communities to rebuild an underserved Mexican village. Because of its geographical location, Akumal, a small village in Mexico  s Yucatan peninsula region, most government funding for developmental projects failed to reach the village. This is why most of the region and the population remained underserved for many years. However, things started to change when a local bakery owner, Jennifer Smith, launched Akumal Arts Festival in 2018. Notably, the event attracted artists worldwide who visited the region to decorate the town with beautiful images. The art festival caught the attention of local authorities, and now small development work is taking place in the region. However, in 2022, thanks to NFTs, the Akumal Arts Festival is expected to help the Akumal community rebuild the underserved Mexican village. In January 2022, hundreds of artists worldwide gathered in Akumal for the festival under the sponsorship of Third Rail Art. These artists created murals, organized various community-driven interaction programs, and conducted workshops during the Art Festival. In April 2022, Third Rail Art dropped animated NFTs of a few selected murals from the festival on its street-art NFT platform. Termed the NFT-4-GOOD collection, 85% of the proceeds from the NFT are expected to go to the Akumal Cultural Foundation. These NFTs were designed by artists who created the original murals in partnership with Cryptic Gallery. As the NFT market matures and develops in Mexico, the publisher expects more innovative NFT use cases to emerge over the next three to four years. This will keep supporting the market growth from the short to medium-term perspective. Cryptocurrency exchanges are turning popular Mexican games into a Solana-based NFT experience. Amid the growing number of use cases, raising funds through NFTs is the most common. Many organizations globally are using NFTs to raise funds for non-profit organizations. Notably, similar trends are seen in Mexico, where cryptocurrency exchanges turn the famous Mexican game into a Solana-based NFT experience. In October 2021, FTX, one of the leading cryptocurrency exchanges, announced that the firm is turning the famous Mexican game Loteria into an NFT-centric game on Solana. Notably, the firm stated that the funds from the project would benefit the non-profit organization. The non-profit organizations that will benefit from the project include the Hispanic Heritage Foundation, the Rising Tide Network, and Latino Community Foundation. As of December 30, 2022, at 4 p.m. ET, the Bitwise Decentralized Finance Crypto Index held the following constituents: 57.98% Uniswap (UNI), 11.12% Aave (AAVE), 7.90% Maker (MKR), 4.49% Lido DAO (LDO), 4.16% Curve DAO Token (CRV), 3.51% Loopring LNC (LRC), 3.58% Convex Finance (CVX), 3.32% Compound (COMP), 2.98% Balancer (BAL), and 2.81% Yearn Finance (YFI). The Bitwise 10 ex Bitcoin Large Cap Crypto Index had no changes as a result of the December 30, 2022 reconstitution. As of December 30, 2022, at 4 p.m. ET, the Bitwise 10 ex Bitcoin Large Cap Crypto Index held the following constituents: 78.81% Ethereum (ETH), 4.70% Cardano (ADA), 3.62% Polygon (MATIC), 2.80% Polkadot (DOT), 2.68% Litecoin (LTC), 2.09% Uniswap (UNI), 1.95% Solana (SOL), 1.85% Avalanche (AVAX), and 1.47% Chainlink (LINK). The Bitwise Crypto Indexes are reconstituted on a monthly basis according to the rules of the Bitwise Crypto Index Methodology as applied by the Bitwise Crypto Index Committee. Minutes of the December 2022 Bitwise Crypto Index Committee meeting are publicly available here. The Ball Multicoin Bitwise Metaverse Index reconstitutes in February, May, August, and November, and as a result had no changes as a result of the December 30, 2022 reconstitution. As of December 30, 2022, at 4 p.m. ET, the Ball Multicoin Bitwise Metaverse Index had 25 constituents. The following were the 10 largest constituents of the Ball Multicoin Bitwise Metaverse Index: 13.53% Polygon (MATIC), 11.66% Ethereum (ETH), 6.90% Filecoin (FIL), 6.79% Chainlink (LINK), 6.41% Uniswap (UNI), 6.05% Binance Coin (BNB), 5.46% The Graph (GRT), 5.02% Arweave (AR), 4.68% Solana (SOL), and 4.38% Avalanche (AVAX). The index methodology for the Ball Multicoin Bitwise Metaverse Index is available here. The Bitwise Crypto Innovators 30 Index of equities reconstitutes quarterly and had the following changes as of December 30, 2022: Intel (INTC), CBOE Global Markets (CBOE), Nu Holdings (NU), and Applied Blockchain (APLD) entered, and Nvidia (NVDA), Advanced Micro Devices (AMD), Signature Bank (SBNY), Greenidge Generation Holdings (GREE), and Terawulf (WULF) exited. As of December 30, 2022 at 4 p.m. ET, the following were the 10 largest constituents of the Bitwise Crypto Innovators 30 Index: 11.77% Galaxy Digital Holdings (GLXY CN), 9.76% Coinbase Global Inc. (COIN), 8.99% MicroStrategy (MSTR), 5.16% Applied Blockchain (APLD), 4.65% Canaan Inc. (CAN), 4.46% Northern Data (NB2 GR), 4.09% Hut 8 Mining (HUT), 4.04% Riot Blockchain (RIOT), 4.02% CleanSpark Inc. (CLSK), and 3.88% Silvergate Capital (SI). The index methodology for the Bitwise Crypto Innovators 30 Index of equities is available here. The Bitwise Web3 Equities Index reconstitutes quarterly and had the following changes as of December 30, 2022: Intel (INTC), Nike (NKE), CleanSpark Inc. (CLSK), and Applied Blockchain (APLD) entered, and PayPal (PYPL), Advanced Micro Devices (AMD), Shopify Inc. (SHOP), and HIVE Blockchain (HIVE CN) exited. As of December 30, 2022 at 4 p.m. ET, the following were the 10 largest constituents of the Bitwise Web3 Equities Index: 9.26% Meta Platforms (META), 8.91% Equinix (EQIX), 7.96% Roblox Corp (RBLX), 7.06% Coinbase Global (COIN), 6.63% Unity Software (U), 4.87% Take Two Interactive Software (TTWO), 3.95% Cloudflare (NET), 3.70% Electronic Arts (EA), 4.68% Bilibili (BILI), and 4.57% Akamai Technologies (AKAM). The index methodology for the Bitwise Web3 Equities Index is available here. The Bitwise Blue-Chip NFT Collections Index reconstitutes quarterly and had no changes as of December 30, 2022. As of December 30, 2022, at 4 p.m. ET, the Bitwise Blue-Chip NFT Collections Index held the following constituents: 30.17% Bored Ape Yacht Club, 28.17% CryptoPunks, 13.34% Mutant Ape Yacht Club, 6.35% Chromie Squiggle, 5.89% Azuki, 4.80% CloneX, 3.23% Moonbirds, 3.09% Meebits, 2.67% Doodles, and 2.29% VeeFriends. The index methodology for the Bitwise Blue-Chip NFT Collections Index is available here. About Bitwise Asset Management Based in San Francisco, Bitwise is one of the largest and fastest-growing crypto asset managers. The firm is known for managing the world  s largest crypto index fund (OTCQX: BITW) and pioneering products spanning Bitcoin, Ethereum, DeFi and crypto-focused equity indexes. Bitwise focuses on partnering with financial advisors and investment professionals to provide quality education and research. The team at Bitwise combines expertise in technology with decades of experience in traditional asset management, and is coming from firms including BlackRock, Blackstone, Facebook and Google, as well as U.S. technology and financial firms. Bitwise is backed by leading institutional investors and asset management executives, and has been profiled in Institutional Investor, CNBC, Barron  s, Bloomberg and The Wall Street Journal. RISKS AND IMPORTANT INFORMATION Carefully consider the investment objectives, risk factors, and charges and expenses of any Bitwise investment product before investing. Investing involves risk, including the possible loss of principal. There is no guarantee or assurance that the methodology used by Bitwise or any of the Bitwise investment products will result in any Bitwise investment product achieving positive investment returns or outperforming other investment products. There is no guarantee or assurance that an investor  s investment objectives will be met through an investment into any Bitwise investment product, and an investor may lose money. Investors into any Bitwise investment product should be willing to accept a high degree of volatility in the price of such investment product and the possibility of significant losses. Bitwise investment products involve a substantial degree of risk. Certain Bitwise investment products may be available only to institutional and individual accredited investors. Certain of the Bitwise investment products may be subject to the risks associated with investing in crypto assets, including cryptocurrencies and crypto tokens. Because crypto assets are a new technological innovation with a limited history, they are a highly speculative asset. Future regulatory actions or policies may limit the ability to sell, exchange or use a crypto asset. The price of a crypto asset may be impacted by the transactions of a small number of holders of such crypto asset. Crypto assets may decline in popularity, acceptance or use, which may impact their price. The technology relating to crypto assets and blockchain is new and developing. Currently, there are a limited number of publicly listed or quoted companies for which crypto assets and blockchain technology represent an attributable and significant revenue stream. NFTs are an extremely new artistic and cultural phenomenon, and interest in such artwork could wane. If the demand for NFT artwork diminishes, the prices of NFT items could be negatively affected. The market for NFTs can be subject to shallow trade volume, extreme hoarding, low liquidity and high bankruptcy risk. NFTs are also subject to risks and challenges associated with intellectual property rights and fraud. In general, Metaverse protocols do not operate on a native blockchain, but rather are built and operated on other public blockchain networks. As a result, a Metaverse protocol does not control the blockchain network on which it operates. Any adverse impacts or changes on the underlying blockchain network could have a negative effect on the operation of the Metaverse protocol and, as a result, could impact the price of the Metaverse protocol  s digital asset. Such adverse impacts can include, but are not limited to, technical bugs, hacks, 51% attacks or network congestion due to, among other issues, high fees. The first Solana Dogecoin \$BONK was sold at a price of over 1622% - The new meme token \$BONK token has significantly surpassed the 1622% since the trading began on December 29, 2022. At the time of writing, the robust price performance boosted the new memecoin to attain an all-time high of \$0.0000154. In the past week, Solana Twitter has gone crazy about the trending memecoin \$BONK, which is spreading new year cheer throughout the Solana community. However, the \$BONK trading volume rose by around 200% in the previous day to reach over \$22 million. And it has surpassed an \$84 million market capitalization. What is BONK? Bonk is the first Solana Dog Coin referred to as “reach for the people, by the people”. The Solana-based meme token’s introduction seems fortunate, while the chain is witnessing a crisis of confidence due to its connections to the bankrupt FTX exchange. The Bonk (BONK) one-pager stated that; The Bonk contributors were tired of toxic “Alameda” tokenomics and wanted to make a fun memecoin where everyone gets a fair shot. Also, the new crypto token airdrop made up half (50%) of its token supply to the Solana community. As it created lots of curiosity in the community, 20% of the airdrop supply will go to Solana NFT collections, which contain 297,000 unique NFTs, and 10% will go to Solana-focused artists and collectors. However, the new Shiba Inu-themed token details were not available much and the website’s whitepaper was not linked. But in the last week, users already used Bonk tokens in over 500,000 transactions. Further, Solana native token \$SOL faced selling pressure due to its close links to Sam Bankman-Fried, the notorious founder of the cryptocurrency exchange FTX and the trading business Alameda Research. On the other hand, SOL increased around 16% in the last 24 hours and hiked back above \$13.

- Bitcoin (BTC) is now trading around \$16,733.30, 0.07% up in the last 24 hours. - Altcoins also attained a significant price surge during the past 24 hours. The global cryptocurrency market currently signals a bullish outlook. In response to the market’s upward movement, the Bitcoin and Cap (CMC), the market’s dominant cryptocurrency, Bitcoin (BTC), is currently trading at around \$16,733.30 with a one-day trading volume of \$11,663,989,920. Bitcoin has attained a slight price surge, registering 0.07% in the last 24 hours. After experiencing fluctuating price actions during the past few days, the top altcoins are also showing a significant jump in their value. At the time of writing, Ethereum (ETH) is trading around \$1,215.11, with a one-day trading volume of \$3,316,818,805. ETH is 0.04% up during the past 24 hours, as per CMC. Further, XRP (0.19%), Polygon (0.56%), Polkadot (0.38%), Litecoin (0.30%), TRON (0.32%), Solana (6.00%), Uniswap (1.09%), and Avalanche (0.84%) have experienced a major price climb, respectively. However, Binance Coin (0.51%), Dogecoin (0.61%), Cardano (0.59%), and Shiba Inu (0.40%) have plummeted during the past 24 hours.

- The top 5 gainers from 24h are LDO, SOL, BIT, LUNC, and LTC. - The Top 1 gainer from 24 hours is Lido DAO (LDO). The downfall of the FTX led to suffering in the entire crypto market, and the red candle march. The global crypto market has fallen from trillions to billions and it is still trying to recover from the down. At the time of writing, the global market cap is \$895.83B and it has increased to 0.90% in the last 24 hours. And the top five gainers in the last 24 hours are Lido DAO (LDO), Solana (SOL), BitDAO (BIT), Terra Classic (LUNC), and Litecoin (LTC). Lido DAO (LDO) Lido is a proof-of-stake (POS) blockchain liquid staking solution. LDO offers a liquid staking service for Ethereum2.0, allowing users to earn staking rewards without having to maintain staking infrastructure. And LDO coin is now ranked 37 positions in CMC, and at the time of writing, Lido DAO (LDO) is trading with a price of \$1.2193, it is the top 1 gainer in the last 24 hours, and it has climbed to 14.69%, with a 24-hour volume of \$82.51M and a market value of \$1 billion. There are also 823 million LDO in circulation. Solana (SOL) Solana is a blockchain platform that allows for the hosting of decentralized, scalable apps. Solana has a much higher transaction rate per second and cheaper transaction fees. At the time of writing, it is a top 2 gainer and ranked 16 from 24 hours with a price of \$11.24 and a gain of 19.05% from 24 hours, and a volume of \$589.50M. And 367 million SOL are in circulation. BitDAO (BIT) BitDAO is a decentralized platform based on the Ethereum blockchain that allows users to manage and invest in cryptocurrency assets collectively. BIT has ranked 46th and is the top 3 crypto in the last 24 hours trading with a price of \$0.3788 and a 24 volume of 37.46M. There are about 2 billion BIT in circulation, with a market valuation of \$792 million. Terra Classic (LUNC) Terra is a blockchain protocol that powers price-stable global payment networks with fiat-pegged stablecoin. And LUNC is the top four gainer from the last 24 hours, ranking 38th and trading at \$0.0001632, up 9.45% from the previous 24-hour period with a volume of \$141.63M. Terra Classic has a market cap of \$997 million and 6T circulating coins. Litecoin (LTC) Litecoin is a peer-to-peer internet currency and worldwide payment network that is completely decentralized and open source. LTC is ranked 12th, trading at \$75.57, and has gained 2.10% with a 24h volume of \$707.30M. There are 71 million LTC in circulation, with a market cap of \$5 billion.

- Lido’s liquid staking protocol has a total market cap of \$5.96 billion in TVL. - Lido finance had the largest portion of staked ETH among DeFi, at 31%. Total value locked (TVL) for Lido Finance, one of several decentralized finance (DeFi) protocols, has risen to the top since the Ethereum merging in September. DeFiLlama reports that as of right now, Lido’s liquid staking protocol has a total market cap of \$5.96 billion in TVL, which is more than both MakerDAO’s \$5.91 billion and AAVE’s \$3.26 billion. By January 2nd, 5.8 billion Ether had been staked, according to Lido Finance’s website. While Polkadot had \$11 million staked, Kusama had \$2.2 million, and Solana had \$43.9 million. Riding the Ethereum Merge Lido’s methodology eliminates the need for users to put up the standard 32 ETH minimum to participate in liquid Ether staking. Since Ethereum has moved to proof-of-stake, staking solutions like these have been in great demand, according to data analytics conducted by Nansen on the blockchain in December. Its research emphasized the Merge’s role in the introduction of staked ETH as a native cryptocurrency-native yield-bearing instrument that has swiftly outpaced other collateralized yield-bearing offerings. Since Lido deposits every Ether it receives into the Ethereum Proof-of-stake (PoS) staking mechanism, it stands to gain from this arrangement. Lido said in November 2022 that it has been earning \$1 million in fees daily since October 2022. According to a statement released by Messari in September 2022, MakerDAO, the regulatory body of the Maker protocol, had its income drop to little over \$4 million in Q3, an 86% collapse from the previous quarter, due to low liquidations and poor lending demand. Moreover, according to Nansen in September, Lido had the largest portion of staked ETH among DeFi, at 31%. This is a substantial proportion compared to the 15% and 8.5% held by big crypto exchanges Coinbase and Kraken, respectively. Recommended For You:

- Andre Cronje becomes a new member of the board of Fantom. - Fantom to completely concentrate on DApps throughout 2023. - Fantom will slash down 75% of token burn. The Decentralized applications (DApps) services brought over by Decentralized Finance (DeFi) through means of smart contract consensus, exhibits the complete evolution of the Fantom services. The Fantom platform is indeed one of the most sophisticated, and efficient platforms for outgrowing all sorts of smart contracts, and DeFi services, from the time when there was only the Ethereum (ETH) blockchain platform at dispense. Though the year 2022, has been tough for Fantom, like all other crypto based firms, the Fantom platform has solid plans, and aims to achieve for the forthcoming year. High Spirits of Andre Cronje Accordingly, the information has been released officially by Andre Cronje himself. Andre Cronje is actually the man behind the projects such as Keep3rV1, and the Yearn.Finance. Being such a prolific DeFi based architect, Andre Cronje has now joined the Fantom group, as one of the members of the group, constituting for both the Fantom Foundation Ltd, and the Fantom Operation Ltd. In such terms, as an active member for the board, Andre Cronje puts forth the future plans for Fantom platform. Accordingly, Cronje officially acknowledges that Fantom will be completely focusing on DApps, and prolific development upon the attribute for the year 2023 completely. Also, Cronje states that a profuse platform for Dapp developers ought to be built upon which one would be able to sustain business, and at the same time maintain a difference from other layer 1 attributes. The major view of Cronje for Fantom for the year 2023, is gas monetization. This aims in establishing revenue generation for DApps, and the developers together as added additives, and advantages. Moreover, Cronje states that this entire ecosystem for the DApps wouldn’t have any interference from the platform’s native token, the FTM. Currently, FTM is trading for the price of \$0.2041, with the graphs staying positive by 1.57% surges for the past 24 hours into account.

- DeGods was identified as one of Solana NFT’s key collections. - DeGods and y00ts will move to new chains in 2023. The top Solana NFT collection DeGods and y00ts announced their departure from Solana earlier today on Twitter. DeGods will switch to the more well-known Ethereum, while y00ts will be moved to Polygon, an Ethereum sidechain. y00ts will officially bridge to @0xPolygon in Q1 2023. pic.twitter.com/Mn225dJko1 – y00ts (@y00tsNFT) December 25, 2022 The Migrations to New Chains in 2023 The utility token \$DUST, which runs y00ts and DeGods, will also be moved from Solana to Ethereum and Polygon. DeGods and y00ts are anticipated to move to new chains in the first quarter of 2023. Frank III, the creator of DeGods, has also confirmed this information with a more thorough explanation. Additionally, Frank III assured the DeGods community that the project’s decision to migrate does not reflect badly on the Solana ecosystem, despite what is being said on social media. Following the fall of FTX, Solana is facing a grave crisis. There have also been speculations that the world’s most powerful NFT project has emerged. Polygon has recently been at the vanguard of NFTs, capturing the attention of web2 businesses as the go-to choice for NFTs. Polygon will be approaching y00ts,

adding the community-first NFT collection to an ever-expanding list of æ“corporateæ” partners and hosts. Nike, Adidas, Disney, and Starbucks are among the brands involved in the collaborations. As per reports, the rise of collectible avatars on Reddit has resulted in a surge of users to the side-chain, with over 5 million unique holders. Following a string of institutional wins, Polygon now has a more community-focused NFT collection win.

The most secure and seamless trading experience for non-fungible tokens SAN FRANCISCOæ“(BUSINESS WIRE)æ“Kraken, one of the worldæ”s largest and most-trusted digital asset platforms, is excited to announce the public beta launch of Kraken NFT, the marketplace for collectors to explore, discover and securely trade NFTs. Following todayæ”s earlier launch of Kraken Pro, clients will now benefit from two new and unique services, demonstrating Krakenæ”s commitment to accelerating the adoption of cryptocurrency. Kraken NFT makes the NFT space accessible and intuitive for all types of collectors, from professional flippers to those just starting their collection. It was built from the ground up to make it one of the most secure, easy-to-use and dynamic marketplaces available in the industry today. æ“Since 2011, our mission has been to accelerate the adoption of cryptocurrencies with a secure platform that both protects client funds and offers a comprehensive range of products and services,æ” said Jesse Powell, co-founder and CEO of Kraken. æ“We were the first major exchange to list ether and recognize the promise of the non-fungible space. As a secure gateway complete with curated collections and a host of unique features, we believe Kraken NFT will be the destination of choice for collectors from all backgrounds to explore and interact with the NFT ecosystem.æ” At launch, Kraken NFT will feature a curated offering of over 110 of the highest-trading-volume NFT collections in the market today. Supported collections pass a thorough and comprehensive vetting procedure, with new collections added regularly. Collectors can also access the NFT screener tool on Cryptowatch to track real-time NFT market data, average sale price and in-depth statistics for hundreds of different collections. Powell added: æ“Kraken has always championed free and diverse expression. NFTs enable content creators to effectively monetize their unique perspectives and connect directly with like-minded audiences. We believe NFTs have the potential to become the way most people start interacting with crypto.æ” With the aim of creating the most seamless and well-thought-out user experience in the space today, Kraken NFT includes: - Zero gas fees: Collectors can buy and sell NFTs held on Kraken without clogging up the underlying blockchain network and incurring sky-high network gas fees. Collectors can easily trade on the marketplace even during peak network activity. - Creator earnings: A portion of the value of eligible NFTs sold on our marketplace goes back to the original content creator, rewarding ongoing creativity and invention within the space. - Rarity ranking: All supported collections have an accompanying rarity ranking so collectors can better assess how rare an individual NFT may be, informing a potential bid or offer. - 200+ funding options: Kraken NFT clients can list or offer an NFT in any of the fiat or cryptocurrencies supported on the platform. Right now, NFTs can be traded in 8 fiat currencies and well over 200 cryptocurrencies. Kraken NFTæ”s whitelisted collections will begin with those built on Ethereum and Solana. Support for other blockchains will be added in the near future. Expect Kraken NFT to be at the forefront of this exciting space with a growing array of related products that reflect our long term commitment to the NFT ecosystem. For more information, please visit kraken.com/nft or reach out to press@kraken.com. About Kraken: Kraken is one of the worldæ”s longest-standing digital asset platforms. Globally, Kraken clients trade more than 200 digital assets and 8 different national currencies, including GBP, EUR, USD, CAD, JPY, CHF, AUD and AED. Kraken, over 2,000 strong, was founded in 2011 and was one of the first exchanges to offer spot trading with margin, parachaig auctions, staking, regulated derivatives and index services. In 2022, it launched a custodial NFT marketplace. Kraken is trusted by over 9 million traders and institutions around the world and offers professional, round-the-clock online support. Kraken was the first company to have ever conducted a Proof of Reserves audit and has since committed to undergoing Proof of Reserves on a regular basis. Kraken is backed by investors including Tribe Capital, SkyBridge, Hummingbird Ventures, Blockchain Capital, Digital Currency Group, among others. Kraken markets can be monitored and traded through the Kraken iOS and Android apps, and through the Cryptowatch iOS, Android and Desktop apps. Contacts press@kraken.com Alex Rapoport

DUBLINæ“(BUSINESS WIRE)æ“The æ“Asia Pacific NFT Market Intelligence and Future Growth Dynamics Databook æ” 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels æ” Q2 2022æ” report has been added to ResearchAndMarkets.comæ”s offering. NFT industry in Asia Pacific is expected to grow by 54.8% on an annual basis to reach US\$22606.7 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 40.1% during 2022-2028. The NFT Spend Value in the country will increase from US\$22606.7 million in 2022 to reach US\$154365.2 million by 2028. In the Asia Pacific region, non-fungible tokens (NFTs) were the most popular word, and the popularity is expected to continue. The significant growth potential of the NFT industry suggests that many opportunities are untouched or unexplored. Among the factors that have driven the popularity of NFTs among the general public include the tech-savvy nature of consumers and the countryæ”s high smartphone and internet penetration rate. NFT continues to grow in China as the popularity of the NFT continues to grow in China, many of the largest internet companies have launched their own NFT trading platforms, which either function as an exchange or marketplace where Chinese consumers can buy and sell different digital assets. With the rising number of investors looking to get involved in the Chinese NFT market, more opportunities exist. In China, NFT purchases take place directly through RMB, using traditional non-crypto means, such as Alipay, WeChat Pay, and bank cards for payment processing. The creators of NFTs in the country have not yet opened a secondary market for trading such tokens because of a series of regulations from the Chinese government. However, the government expects to launch a pilot digital art trading market in 2022. Emergence of NFTs has created a space for digital artists in India The emergence of NFTs has created a space for digital artists in India and offered them a more prudent way to reach the inaccessible audience. The NFT market has allowed artists previously working with brands and agencies to find a more independent option, creating endless possibilities for them. In India, many artists have sold their work on different NFT platforms, thus creating a new source of revenue. The NFT ecosystem is attracting people from all walks of life. Almost every talent management agency and entertainment company has been looking at the NFT space to find new revenue streams while connecting with the fans better. In 2021, Indiaæ”s most celebrated stars such as Rajnikanth, Amitabh Bachchan, and Salman Khan had already launched NFTs. In the cricketering fraternity, Sunil Gavaskar, Rishabh Pant, and Yuvraj Singh have also become part of the growing NFT ecosystem in India. Businesses using NFTs as marketing tools to expand their operations to the digital world are expected to grow further in India over the next four to eight quarters. Few firms have already ventured into the space. Mahindra & Mahindra, one of the leading car manufacturers in India, experimented with NFT marketing. The firm auctioned four Thar-themed NFTs, each priced at INR 2.6 million. The auction winner received a chance to enjoy an off-road experience to drive the Thar. Similarly, MakeMyTrip, one of the leading travel-focused firms, launched virtual vacation NFTs themed on the best travel destination in India. Each of the NFTs from the firm was valued at INR 14,999. MG Motor India also has plans to launch 1,110 NFTs at a starting price of INR 500. These NFTs are expected to have four themes: collaborative art, community and diversity, car-as-a-platform, and collectibles. Through these NFTs, the firm allows MG Motor fans to own a piece of the company. The NFTs gaining constant momentum and popularity in Indonesia Similarly, in Indonesia, artists are increasingly entering the NFT space as they continuously seek new ways to grow and leverage their talent. Notably, Art Moments Jakarta, one of the early adopters in the NFT space, has fully supported the Indonesian digital economy by taking a hybrid live-on-the approach to the exhibition in 2021. This event from Art Moments Jakarta brought together a community of more than 64 local and international artists, curators, and galleries. Authorities have also shown interest in examining the existence of blockchain technology. The publisher expects a more robust set of regulatory guidelines for the NFT sector in Indonesia from the short to medium-term perspective. In the booming NFT trends in the country, influencers and celebrities have started creating their NFT projects as they seek to monetize their work and create new revenue streams. Syahrini, an Indonesian singer and socialite, is one of the celebrities in the country who created the NFT project and gained widespread popularity globally. Under Princess Syahrini, she created and launched the NFT collection on the Binance NFT marketplace. The NFT collection was sold out within eight hours of its launch on the Binance NFT marketplace. Luna Maya, another prominent figure in the Indonesian entertainment industry, created an NFT project. Luna Maya entered a strategic collaboration with Tokau, the Japanese art firm with NFT creation experience. The NFT collection was launched on the BakerySwap NFT marketplace. Influencers and celebrities are not just creating their own NFT collections. But they are also actively promoting various NFT projects. NFT adoption in Singapore has become increasingly crowded with several players the NFT adoption in Singapore is still in its early infancy. The adoption has recorded steady and is expected to grow significantly over three to four years. However, the growing awareness about NFTs among Singaporeans is expected to drive the adoption rate significantly from the short to medium-term perspective. The Singaporean NFT market has become increasingly crowded with several players over the last 12 months. Some of the leading players driving the market growth include OpenSea and Mintable. The homegrown NFT marketplace, Mintable, allows creators to mint and list their work on the platform without review. OpenSea, one of the leading NFT platforms, recorded strong growth in transaction volumes in Q1 2021. The transaction volumes in Q1 2021 reached US\$82 million, representing 14,000% growth. During the same period, Raribles, another NFT platform, experienced a growth of 634%, amounting to US\$24.2 million worth of transactions. FomoArt is yet another platform that is specifically an art-based NFT marketplace. Rarible and Rario are among the other leading NFT marketplace that is driving the growth of the industry in Singapore and globally. The publisher expects the trend to continue in the Asia Pacific region over the next four to eight quarters as more and more players, including the government, are entering the NFT sector. It will subsequently drive the popularity of NFTs among the general public, thereby supporting the overall market growth from the short to medium-term perspective. Non-Custodial, Multi-Chain Wallet is First-of-Kind Offered Among Web2 Banking Services NEW YORK—(BUSINESS WIRE)—Cogni, the lifestyle-focused banking platform bridging the gap between Web2 and Web3, has announced the launch of its new Multi-Chain Wallet, the first of its kind to integrate Web3 services within a fully digital Web2 banking platform. This integrated, non-custodial wallet solves a long-standing security issue by integrating within existing platforms and overly complex user experiences,“ said Archie Ravishankar, founder and CEO of Cogni. “This Multi-Chain Wallet is proof that Web3 services can reinvigorate traditional banking products and place more financial control in a consumer’s hands than ever before.“ While Cogni’s existing platform offers traditional Web2 banking services, this Multi-Chain Wallet adds a new dimension to the platform’s offerings. The wallet supports blockchains including Binance, Bitcoin, Ethereum, Litecoin, Solana, and others, while accommodating non-fungible tokens (NFTs) on all supported blockchains. Users will be able to hold their NFTs, and other non-fungible tokens across multiple blockchains, all in the Cogni app. Users will also be able to send, receive, and store cryptocurrencies and NFTs to easily readable wallet addresses using Unstoppable Domains integration (ERC 20, 72, 1155 contracts). Unlike major crypto exchanges, Cogni’s users maintain sole ownership of the private keys that control their digital assets. These security measures are grounded in the wallet’s multi-party computational technology that enables recovery options, and ensures users have the security, safety, and compliance of traditional banking integrated into the Web3 ecosystem. “We are proud to launch this new wallet as a conduit for traditional banking services and Web3 experiences to coexist seamlessly, and safely,“ said Simon Grunfeld, Head of Web3 at Cogni. “Cogni welcomes increases in regulatory oversight to ensure that all users have absolute confidence in their platforms.“ In this rapidly evolving regulatory environment, Web3 compliance is crucial to ensure a seamless and safe digital experience for all consumers. Users now have higher requirements for due diligence from their platforms, and this Multi-Chain Wallet propels Cogni as a frontrunner in regulatory compliance. Cogni’s new Web3 offerings expand its lifestyle-focused services beyond the confines of traditional Web2 digital banking. With new Web3 banking products on the horizon, Cogni plans to continue to offer users frictionless access to traditional, and non-traditional financial services. About Cogni Cogni is a leading lifestyle-focused digital banking platform founded in 2018. We give members zero-fee banking, access to 55,000 free ATMs worldwide, single-use cards, and access to discounted gift cards. Cogni also allows users to track carbon emissions on each transaction. Cogni aims to bridge the gap between Web2 and Web3 services by building a fully compliant, digital banking experience for mainstream user adoption with unique features. Cogni is headquartered in New York City with a second office in San Francisco. The company’s investors include Hanwha Asset Management, CXO Fund, Solana Capital ROK Capital, 35 Ventures, Bluewatch Ventures, World Quant, Hard Yaka, and other angel investors and venture capital firms. To learn more about Cogni, visit <http://getcogni.com> or download our app on the App Store or Google Play. Contacts Bevel cogni@bevelpr.com

- Face Wallet allows Web3 game companies to user onboarding more easily and securely - LINE Games-backed nerdystar chose Face Wallet for its blockchain platform LUXON SEOUL, South Korea—(BUSINESS WIRE)—#Blockchain—Global Web3 infrastructure provider HAECHI LABS announced a partnership with nerdystar, a blockchain game company backed by LINE Games. HAECHI LABS now provides Face Wallet, an in-app and single sign-on wallet solution for LUXON, to nerdystar’s native Blockchain platform. To tackle the UX issues involved with wallet onboarding, Face Wallet reproduces the Web2 experience in Web3, reducing the friction associated with seed phrases and wallet signatures. Via Face Wallet, users create wallets using social media accounts, not by memorizing perplexing phrases. Users sign transactions with 6-digit PIN codes, not complicated blockchain signatures. Face Wallet supports SMS OTP recovery whereas previously, losing one’s seed phrase meant losing one’s account permanently. nerdystar is the studio behind LUXON and Web3 game DESPERADO B218. In 2022, nerdystar raised USD 10.8 million in an investment round led by Blocore and LINE Games. Alan Huh, CEO & co-founder of nerdystar, stated “with Face Wallet, we provide the most convenient and secure onboarding experience for Web3 games, so that users won’t notice a difference from conventional Web2 games.“ Based on LINE Games’ highly successful Exos Heroes, Desperado B218: The Scars of Exos is a turn-based battle RPG where players battle each other by controlling five-member squads. Geon-gi Moon, co-CEO of HAECHI LABS, said “we aim to become the global go-to Web3 wallet provider for game companies. We’ve learned how difficult the onboarding process can be for Web3 game companies and hope that HAECHI LABS can help them scale faster without sacrificing the security that characterizes blockchain technology.“ Founded in 2018 and accelerated by the Ethereum Foundation, HAECHI LABS offers Web3 auditing, treasury management, and trading solutions. HAECHI LABS has unveiled its latest product, Face Wallet, for its 500+ partners including Korea’s AAA game companies and Web3 game studios such as Netmarble, Com2uS, NPiXEL, NOD Games and more. HAECHI LABS is the trusted wallet partner of major global mainnets, including Polygon, Solana, BNB, NEAR, and Avalanche. HAECHI LABS has facilitated over USD 50 billion in transactions for its clients including Samsung, SuperRare, SushiSwap, 1inch, LG, SK, and Indodax. More information can be found here. - Debit card users will be able to use crypto or fiat payments at 90 million merchants worldwide. - Hi and Mastercard collaborated together in September. Polygon blockchain has collaborated with neobanking app hi and Mastercard to launch a platform that enables customers to generate customized, web3-focused NFT debit cards. Debit card users will be able to use crypto or fiat payments at 90 million merchants worldwide. Holders of NFT Debit Mastercards will also be able to personalize their cards without spending money on gas with any Polygon-based NFT. “3— COMPLETE FREEDOM TO #WEB3 CREATORS“ “3— “ Polygon Studios (@PolygonStudios) December 19, 2022 Polygon is proud to collaborate with @hi.com official to allow users to easily generate an NFT, using their favorite image, to customize a Debit @Mastercard. The best part? It’s a gasless minting experience. “https://t.co/quikkb7L8 pic.twitter.com/RTDC2JDMEB NFT Debit Mastercard Is Available in Four Options hi is a neobanking platform that accepts crypto and fiat transactions and offers savings, investments, payments, and lifestyle advantages. The Polygon blockchain is the basis of the Starbucks NFT loyalty rewards beta. Also underpins new blockchain gaming features from Solana’s biggest NFT marketplace, Magic Eden. Sean Rach, Co-founder of hi, stated “not only do the NFT cards look amazing this is a great way for people to show which online community they belong to, but in the real world.“ As per the announcement, customers must download the hi app, create an account, and select a card level of Silver or higher. After that, they will be able to design unique cards utilizing NFTs based on polygons. Who use this service are eligible for discounts on up to 20 digital subscriptions, travel benefits, and 10% Spend Rewards. In September, Mastercard and Hi collaborated to create customizable NFT debit cards. As a result of a January partnership between Mastercard and Coinbase, users of the company’s debit and credit card services can now purchase NFTs.

DeFi protocol Fluidity has said it will launch on the Ethereum mainnet on December 19. The fluid-wrapped asset on-chain transaction incentive layer, which pays users for swapping, trading or carrying out any on-chain transaction, will first be made available on Ethereum with Solana, Arbitrum, and Polygon to follow. Fluidity is a spend-to-earn protocol that completely dismantles the conventional yield-bearing model. Instead of lending, staking, or locking up digital assets for an extended period of time to earn yield, users receive large dividends and randomly paid yields that can range from cents to millions, just for sending, receiving, or swapping a Fluid-wrapped asset. “Four or five years ago, everybody said DeFi could be the use-case that brings in a billion users to crypto “ but it actually turned out to be NFTs and GameFi,“ says Fluidity Founder Shahmeer Chaudhry. “At Fluidity, we want to gamify how people think about spending money, and our long-term goal is to re-shape how people approach spending.“ The wrapped assets (Fluid Assets) offered by Fluidity are stablecoins, which means they are backed exactly by the underlying currency and are redeemable at any moment by users. Approximately 50—70% of all transactions, according to Chaudhry, will be yield-bearing, with incentives being distributed 80:20 between senders and recipients who may also include service providers. The protocol generates dividends based on the total yield produced by all primary tokens deposited and lent on the financial markets. By engaging in routine activities like paying for food, rent, or gas, interacting with a decentralized exchange (DEX) or NFT marketplace, or playing blockchain games, users of the spend-to-earn protocol may earn rewards. In order to stress-test the rapidly expanding DeFi protocol, 50,000 users (referred to as “Fluiders“) have been trading and transacting on both the Solana devnet beta and Ethereum testnet. Shahmeer Chaudhry, a game designer, came up with Fluidity in 2021. It has secured \$1.3 million in seed investment from investors including Multicoins Capital, Solana, Circle, and Lemniscap. The project received over \$100,000 in development grants from protocols including Compound, Solana, Polygon, Aave, Lido, and RMIT Blockchain Innovation Hub before to its investment rounds.

- Radium exchange portal hacked. - The exchange owner’s own account has been the target. - Losses mount to \$2.2 Million so far. Every then and there, occurs an incident, either a hack or an attack upon the crypto industry. The worst affected are always the exchanges, notably. In such terms, Radium, the best functioning Decentralized Exchange (DEX) upon the Solana (SOL) blockchain was hacked on December 16th, 2022. The hack took place directly upon the exchange owner’s very own account. Accordingly, so far the losses amount to a whopping \$2.2 million. As a result, Radium has halted their entire platform, and are carrying out extensive investigation. Radium and the Hack Behind The Radium is the best effortless DEX from the Solana blockchain. But apart from being any ordinary DEX, the Radium also functions as an Automated Market Maker (AMM). Though being built with the Solana blockchain, Radium operates using Solana’s Serum platform. The situation is getting even more far worse for Radium, as apart from this hack, the exchange indeed suffered serious losses due to the fall of the FTX exchange. This is due to the reason that the FTX was the main funder for Solana’s Serum platform. With the fall of the FTX exchange, so stopped the fundings for Serum. Eventually, Serum has been shut down completely, and currently Radium is operating upon the OpenBook, which indeed is a developed attribute directly from the Serum V3 program. In response to the hack, the team from Radium announced that the “authority over the AMM and farm programs has been all completely halted. The Radium team has assured that this indeed will be a temporary initiation. Investigations have revealed that \$2.2 million has been transferred via bridge to Ethereum (ETH) blockchain. In addition to all this the price of the native coin of the platform, RAY has plunged down deliberately ever since the hack. Currently, RAY is trading for the price of \$0.164 with the graphs down by 10.34% over the past 24 hours alone.

The Polkastarter GAM3 Awards December 19th announcement of the GAM3 winners for web3 gaming, announced its winners. The first time the greatest industry awards event bridged the lines between conventional and blockchain gaming, attracted the most interest. As for the Best Content Creator award, up until the last day of voting to decide who the best content creator was, 23 different web3 gaming content creators were nominated. Complete list of the winners: - Game of the Year: Big Time - Most Anticipated Game: Shrapnel - Best Graphics: Star Atlas - Best Action Game: Superior - Best Mobile Game: Thetan Arena - Best Adventure Game: Big Time - Best Casual Game: Blankos Block Party - Best RPG: Illuvium - Best Shooter Game: MetalCore - Best Strategy Game: Gods Unchained - Best Card Game: Gods Unchained - Best Multiplayer Game: EV.io - Best Esports Game: EV.io - Best Content Creator: Brycent - People’s Choice Award: League of Kingdoms - Games’ Choice Award: The Harvest Thanks to contributions, services, and grants from partners including Immutable X, Blockchain Game Alliance, Machinations, Ultra, Naavik, Galxe, Hacken, Venly, HackenProof, Shorooq, Elixir, Arcade, and Metacon, the winners will split rewards worth over \$1M. The members of the jury for the awards included Yoshihisa Hashimoto, Co-Founder of Lv.99, and Justin Kan, Founder of Fractal, as well as Urvit Goel, Head of Global Games at Polygon Studios, Itai Elizur, Managing Partner at Market Across, Rachel Levin, Director of Venture & Strategy at ImmutableX, and Matt Sorg, Head of Technology at Solana Foundation. The inaugural GAM3 Awards announcement took place on October 23. Since then, a huge number of web3 games have appealed to their audiences to nominate and vote for them in

various categories. With an estimated reach of over 11 million, thousands of social postings were made by partners, games, media outlets, content providers, and community members. More than 250,000 votes from the public were cast in favor of the final choices across all 16 categories. The #GAM3Awards hashtag was used in more than 13,000 tweets and by more than 40,000 different votes. The following factors were taken into consideration while ranking the games: core loop, graphics, accessibility, replayability, enjoyable aspects, and overall playing experience. Though the emphasis was on playability, games had to incorporate and make use of blockchain technology to be qualified. A worldwide panel of gaming, media and web3 outlets selected for their objectivity and quality emphasis picked the nominees for the categories. Each voting outlet filled out a confidential, unranked ballot with its top five choices in each category, based on the opinions of its diverse editorial staff as a whole. Exclusive video from highly anticipated web3 games including Blocklords, Mythic Protocol, Cards of Eternity, Mummy.io, and Elarium was also shown at the GAM3 Awards. Additionally, a number of other web3 games used the occasion to reveal new gameplay trailers and impending announcements.

DUBLINâ€“(BUSINESS WIRE)â€”“The â€œMexico NFT Market Intelligence and Future Growth Dynamics Databook â€” 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels â€” Q2 2022â€” report has been added to ResearchAndMarkets.comâ€”s offering. NFT industry in Mexico is expected to grow by 46.3% on an annual basis to reach US\$1123.7 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 33.4% during 2022-2028. The NFT Spend Value in the country will increase from US\$1123.7 million in 2022 to reach US\$5777.4 million by 2028. The non-fungible token (NFT) market is still in its early stages of development in Mexico. However, the growing popularity of the digital asset and the widespread adoption among the crypto community has driven the industryâ€”s growth over the last 12 months in the country. Several innovative NFT products have been launched over the last year which has supported the market growth in Mexico. Globally, several brands across different industry verticals have already entered the NFT space by launching their digital asset collectibles. These brands are using NFTs to better engage with their customers, drive brand awareness, and offer exclusive benefits to the owners. The publisher expects similar trends to evolve in the Mexican NFT market over two to three years. Several brands have already started to mix NFT in their marketing strategies with increasing frequency. This trend is expected to intensify in the country from the short to medium-term perspective as the awareness and adoption among customers continue to grow in Mexico further. The publisher, therefore, expects the rising adoption of NFTs among brands to drive the future growth of the market in the country. Music festivals are using NFTs as part of their marketing strategies in Mexico One such example is, Akumal, a small village in Mexicoâ€”s Yucatan peninsula region where things started to change when a local bakery owner, Jennifer Smith, launched Akumal Arts Festival in 2018. Over the last 12 months, the NFT popularity has grown continuously. In the growing talks about NFTs in Mexico, music festivals have started to use NFTs as part of their marketing strategies. In March 2022, Cerveza Tecate Paâ€”l Norte, one of the largest music festivals in Mexico, announced the creation and sale of NFTs. Notably, the NFTs created specifically for the event and loaded with lifetime benefits for the owners, was part of Cerveza Tecateâ€”s marketing strategy. Football leagues are launching NFT collectibles to generate a new source of income amid the pandemic impact on revenue. The global pandemic has had a severe impact on most industries across verticals. Notably, the Covid-19 pandemic also affected the sports business severely in Mexico. With the movement restrictions imposed and social distancing requirements, fans were not allowed to enter the stadiums and watch the football games. This resulted in high revenue loss for football leagues regarding ticket sales. To overcome these losses, football leagues in the country entered the NFT space and launched their collectibles to generate a new source of income. In April 2021, Liga MX, the top soccer league in the country, announced that it would launch the NFT collection at the beginning of the 21â€”/22â€” season, which was slated to start at the end of August 2021. To launch its NFT collection, Liga MX entered into a strategic collaboration with Bondly, the NFT marketplace which auctioned the NFTs. Notably, Liga MX is one of the first soccer leagues to launch NFT collectibles. Globally, several individual teams have entered the NFT space and announced the sales of their collectibles. Football clubs are entering into strategic partnerships with NFT platforms to launch NFT collectibles. Several global football clubs and clubs have entered the NFT space by launching their NFTs. In February 2022, the Atlas Futbol Club announced that the club has entered into a strategic partnership with Sorare, the French NFT platform, allowing fans to trade NFT cards of their favorite players. Under the collaboration with Sorare, the Atlas Futbol Club has launched an Atlas F.C. NFT auction, which comprises NFT cards of star players, including Luciano Acosta, Jairo Torres, and Martin Nervo, among others. With its partnership with Sorare, the Atlas Futbol Club became the second from Mexico to join the long list of established teams entering the digital asset collectibles market globally. NFTs are helping communities to rebuild an underserved Mexican village Because of its geographical location, Akumal, a small village in Mexicoâ€”s Yucatan peninsula region, most government funding for developmental projects failed to reach the village. This is why most of the region and the population remained underserved for many years. However, things started to change when a local bakery owner, Jennifer Smith, launched Akumal Arts Festival in 2018. Cryptocurrency exchanges are turning popular Mexican games into a Solana-based NFT experience Amid the growing number of use cases raising funds through NFTs is one of the most common. Many organizations globally are using NFTs to raise funds for non-profit organizations. Notably, similar trends are seen in Mexico, where cryptocurrency exchanges turn the famous Mexican game into a Solana-based NFT experience. In October 2021, FTX, one of the leading cryptocurrency exchanges, announced that the firm is turning the famous Mexican game Loteria into an NFT-centric game on Solana. Notably, the firm stated that the funds from the project would benefit the non-profit organization. The non-profit organizations that will benefit from the project include the Hispanic Heritage Foundation, the Rising Tide Network, and Latino Community Foundation. DUBLINâ€“(BUSINESS WIRE)â€”“The â€œPhilippines NFT Market Intelligence and Future Growth Dynamics Databook â€” 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels â€” Q2 2022â€” report has been added to ResearchAndMarkets.comâ€”s offering. NFT industry in Philippines is expected to grow by 46.0% on an annual basis to reach US\$2598.3 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 32.6% during 2022-2028. The NFT Spend Value in the country will increase from US\$2598.3 million in 2022 to reach US\$12796.4 million by 2028. In the Philippines, Luis Buenaventura II, the pioneering crypto entrepreneur, announced that he collaborated with a celebrity influencer, Heart Evangelista, on a non-fungible token (NFT) drop. This collaboration signaled a shift in the nascent but growing NFT industry in the Philippines. Notably, this was the first time someone from the local entertainment industry, with 9 million followers, entered the NFT space. The strategic collaboration between Luis Buenaventura II and Heart Evangelista was part of a social experiment to see where the Philippinesâ€” NFT market stood when the global NFT industry recorded strong growth. The NFT drop included two paintings Evangelista made over the global pandemic. The artwork was auctioned at OpenSea, the leading global NFT marketplace, fetching P3.5 million and P3 million each. In March 2021, graphic designer and NFT artist AJ Dimarucot minted and sold the artwork as NFTs on the Foundation NFT marketplace. As the NFT awareness continued to grow in the country, the space attracted a slew of other homegrown projects which promote Filipino culture. Along with Danella Yaptinchay, the Philippine National Book Development Boardâ€”s creative director for the Frankfurt Book Fair, created the first Philippine NFT book. Notably, this was the first NFT book to be launched at the 2021 Frankfurt Book Fair, which remains the oldest. The NFT book created for the official Philippine booth of the National Book Development Board is also the first government-commissioned NFT in the country. While the tech entrepreneurs benefited massively from the global lockdown, the surfing community in the Philippines was largely affected because of the movement restriction and travel limitations. With the NFT market growing rapidly, the surfing community in the Philippines adopted the NFT technology to make their life more pandemic-proof. Driven by necessity, the community launched an NFT project, LUSCCares, which aims to raise funds for the La Union Surf Club, the long-standing organization of surf instructors that looks out for the communityâ€”s needs. Over the last 12 months, the NFT adoption has surged significantly in the country. As more and more people discover how blockchain technology can be used to disrupt the traditional industries. The publisher expects more local and global firms to conduct NFT-focused events in the country over the next three to four years, which will drive the awareness and growth of the overall market from the short to medium-term perspective. The high literacy rate in the Philippines is expected to drive market growth in the Philippines, the literacy rate is much higher than in other countries globally. Whether it is a cryptocurrency, blockchain, or even the social media platforms back in the time, Filipinos have been one of the early adopters of new and emerging technology. This consumer behavior has driven the growth of the NFT market in the country and is expected to further drive the growth over the next three to four years. As the NFT awareness continues to grow in the country, the demand for NFTs is going to increase among the Filipinos, and if the NFT players can conduct workshops, exhibitions, and events to promote NFTs and spread awareness, the market can record strong growth over the next three to four years in the Philippines. NFT events and webinars are driving the awareness and growth of the market in the Philippines One of the key drivers driving the awareness of NFTs in the country is that several firms, both local and global, are conducting events and webinars in the Philippines. In March 2022, Union Bank of the Philippines (UnionBank), together with the non-profit Center for Art, New Ventures and Sustainable Development (CANVAS.PH), held a 2 part webinar centered on the NFTs to help artists, buyers, and collectors of digital art gain a better understanding of how the tokens work and how they can become a part of the NFT market. Similarly, in May 2022, AC Capital, CoinVoice, Asia Token Fund, and Block Tides conducted the first-ever NFT, GameFi, and Metaverse 2022 event on the largest indoor beach club in the Philippines. Filipinos turn to NFT video games to earn income during the global pandemic period in the Philippines During the global pandemic period, when Filipinos faced hardship because of the lockdowns, many Filipinos turned to playing video games. Notably, the gameplay, such as SkyMavis, created by Axie Infinity, allows players to earn income through NFTs and cryptocurrencies by breeding, battling, and trading digital pets called Axies. In May 2021, crypto consulting firm Emfaris and gaming firm Yield Guild Games published a mini-documentary on YouTube called Play-to-Earn shows that several Filipinos across different age groups and demographics started playing the game. As of May 2021, nearly 60,000 Filipinos were playing the Axie Infinity game in the country. Notably, these NFT-based games have driven the growth of the NFT market in the country over the last 12 months and are expected to further drive industry growth from the short to medium-term perspective. Scope This report provides in-depth, data-centric analysis of NFT Market in Philippines and below is the summary of key market segments: Philippines NFT Market Size and Future Growth Dynamics by Key Performance Indicators, 2019-2028 Philippines NFT Market Size and Forecast by Key Assets, 2019-2028 - Collectibles and Art - Real Estate - Sports - Gaming - Utility - Fashion & Luxury - Other Philippines NFT Market Size and Forecast by Key NFT Collectible Assets, 2019-2028 - Digital Art - Music & Sound Clip - Videos - Memes & Gif - Other Philippines NFT Market Size and Forecast by Currency, 2019-2028 - Ethereum - Solana - Avalanche - Polygon - BSC - Flow - Wax - Ronin - Other Philippines NFT Market Size and Forecast by Sales Channels, 2019-2028 - Primary - Secondary Philippines User Statistics, 2019-2028 For more information about this report visit <https://www.researchandmarkets.com/r/7605q9c> Contacts For ResearchAndMarkets.com Laura Wood, Senior Press Manager For E.S.T. DUBLINâ€“(BUSINESS WIRE)â€”“The â€œMalaysia NFT Market Intelligence and Future Growth Dynamics Databook â€” 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels â€” Q2 2022â€” report has been added to ResearchAndMarkets.comâ€”s offering. NFT industry in Malaysia is expected to grow by 40.9% on an annual basis to reach US\$2628.9 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 38.8% during 2022-2028. The NFT Spend Value in the country will increase from US\$38.9 million in 2022 to reach US\$38520.8 million by 2028. Non-fungible tokens (NFTs), which have recorded significant growth globally, also see phenomenal growth in Malaysia. Many Malaysian artists have ventured into the NFT space over the last two years as they seek to capitalize on the growing trend and earn financial freedom through NFTs. With NFTs helping industry players make art more accessible to the public and widening the pool of collectors, NFTs are expected to surpass the conventional art market auctions as it continues to gain wider acceptance and accessibility with buyers in art auctions. The growing NFT momentum in the country has disrupted the local art scene ecosystem. In 2021, Malaysian graffiti artist, Katun, made more than RM 1.6 million through the sale of the NFT collection, which was sold out within 24 hours. Since then, many artists have entered the NFT space in Malaysia as more and more people see NFTs as the future of ownership. In this growing awareness and adoption of NFTs, several local NFT marketplaces have emerged and have recorded strong growth in the country. There has been a significant spike in Malaysiaâ€”s NFT transaction value

and volume over the last 12 months. Corporations and associations have jumped onto the NFT bandwagon to mint their artwork. Amid this growing trend for NFTs in Malaysia, it has become crucial for art galleries to change their mindset and embrace digital assets, or they will be left behind. One Malaysian art gallery that has embraced NFTs is the Reliantan Art Gallery, featured on a local NFT platform, Pentas.io. With the NFT adoption rate being one of the highest in Malaysia, the growing popularity of digital assets among the general public is expected to further drive market growth over the next three to four years. Adoption of NFTs across different industries is expected to further drive market growth in Malaysia. The popularity of NFTs has surged significantly over the last 12 months among Malaysians. With the trend expected to continue from the short to medium-term perspective, the publisher expects more and more brands to enter the NFT space in Malaysia. Already, several different brands across industries, such as fashion and quick-service restaurants, have jumped onto the NFT bandwagon in the country. As the digital asset gains momentum and becomes mainstream in Malaysia, the publisher expects more firms across different industry verticals to adopt NFTs. This will subsequently promote innovation in the market, thereby driving higher transaction value and volume from the short to medium-term perspective. An increasing number of NFT marketplaces driving the market growth in Malaysia with the popularity of NFTs increasing among the general public, more and more startups are entering the NFT space by launching their own NFT marketplace. These marketplaces make it easier for Malaysians to buy, sell, and trade in NFTs, resulting in higher transaction value and volume over the last 12 months. As the demand for NFTs continues to grow in Malaysia and more and more brands enter the digital asset space, the publisher expects more local and global players to expand their footprint in the NFT sector over the next three to four years. This will keep promoting market growth and competition in Malaysia from the short to medium-term perspective. Malaysian artists turning to NFTs to gain financial freedom is driving market growth in the country. Before the global pandemic outbreak closed art and performing spaces in March 2020, the art galleries and festivals in Malaysia provided a lifeline and inspiration to the artists in the country. However, with the pandemic-caused disruption, most of the artists in the country struggled to survive financially. In the wake of this disruption, some artists started to venture into the newly emerging world of NFTs. While it was initially taken as a fun pastime, the market's growth has changed the way artists now see digital assets in Malaysia. Moreover, with some artists making hundreds of thousands of dollars in NFT sales, many artists have turned to NFTs as a financial freedom. In September 2021, a Malaysia-based graffiti artist, Abdul Hafiz bin Abdul Rahman, also known as Kean, sold his NFTs collection for RM1.58 million, becoming the most expensive batch of NFTs ever sold by an artist in Malaysia in one release at the time. Visithra Manikam, a Malaysian Indian artist, also found increasing success on the OpenSea NFT platform after facing criticism for more than six years. Termed Token Indian, the NFT collection gained widespread popularity in Malaysia. Notably, her art was snapped up online by Snoop Dogg. As of November 2021, her NFT collection has accumulated 91 Ethereum in volume traded, equivalent to RM1.58 million. The publisher expects more artists to enter the NFT space in Malaysia over the next three to four years as they continue to seek financial freedom. This will keep driving the overall market growth from the short to medium-term perspective in the country.

DUBLIN (BUSINESS WIRE) – The South Africa NFT Market Intelligence and Future Growth Dynamics Databook 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels Q2 2022 report has been added to ResearchAndMarkets.com's offering. NFT industry in South Africa is expected to grow by 50.2% on an annual basis to reach US\$1315.8 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 35.7% during 2022-2028. The NFT Spend Value in the country will increase from US\$1315.8 million in 2022 to reach US\$7420.2 million by 2028. Over the last 12 months, NFTs have increasingly drawn interest from various South African firms across different industry verticals. Many new developments are unfolding locally as blockchain technology continues to grow globally. While the NFT trend is still in its early stages of development locally, many South African firms are identifying huge potential in NFTs. From print media agencies to art galleries, firms across various industries have entered the South African NFT market. As firms in South Africa continue to become more innovative and identify growth opportunities in the local NFT space, the publisher expects the adoption of NFTs in a wide range of industries, including fashion, real estate, licensing and certifications, as well as in wildlife conservation where technology can be used to represent in-game assets typically represented by a type of wild animal. More marketplaces are expected to drive the growth of the South African NFT market. Over the next three to four years, the publisher expects that the growth in the South African NFT market will also be driven by the growing number of marketplaces where users can sell, buy, and trade NFTs. Many artists, musicians, fashion, sports, gaming, entertainment, and retail brands are producing NFTs to engage with customers, consumers, and fans. Consequently, buyers and sellers would be looking for innovative NFT marketplaces that make it easier to trade in NFTs. Digital artists and musicians are driving the NFT market in South Africa. As the South African NFT industry continues to grow, digital artists and musicians are driving the NFT market in the country. South Africans are fairly active in buying collectibles and selling art. This has supported the growth of the NFT market over the last 12 months in the country. Besides digital artists and musicians, tech-savvy charities have also jumped on the NFT bandwagon and are looking to raise funding by auctioning pieces of history in South Africa. However, the publisher believes that the key factor contributing to the sustainable growth of the NFT market in the country over the next three to four years is building a solid educational foundation among South Africans regarding NFTs. Prominent South African figures launching NFTs are driving the market growth and awareness. Globally, celebrities across different industries have entered the NFT space by launching their NFT collection. From film stars to singers and sports players, all have entered the NFT space globally; similar trends are visible in South Africa, where many prominent figures are launching NFTs. Some of the big names that have entered the South African NFT industry include cricketer AB de Villiers, influencer Diipa Khosla, musician Goldfish and the Kiffness, and filmmaker Dan Mace. The entry of these big names in South Africa has propelled the popularity of NFT among the general public, thereby driving the market growth over the last 12 months. The publisher expects the trend to continue from the short to medium-term perspective as more and more big names enter the NFT space in South Africa. Art galleries in South Africa look to capitalize on the global trend in the NFT market. In March 2021, Worldart, the South African art gallery, became the first in the country to auction the artwork as NFT. The artwork for sale was in a GIF file, with moving elements added to a painting of local artist Norman O'Flynn's acclaimed Timekeeper series. Firms are raising funding rounds to further accelerate their growth in South Africa. In November 2021, NFTfi, the firm that allows users to use their NFTs as collateral for loans, announced that it had raised US\$5 million to further accelerate its growth in the country. The funding round was led by early-stage crypto fund 1kx. Maven 11, Sound Ventures, Scalar Capital, and Kleiner Perkins were among the other investors. Auction houses are partnering with wine producers to offer wine NFT in South Africa. In April 2022, Strauss & Co, the principal South African auction house, announced that it had entered into a strategic collaboration with five of the most respected wine producers in South Africa. Under the strategic partnership, the auction house offered fine wine NFTs. Consisting of the past, present, and future vintages, the unique digital contracts encompass vertical collections of Meerlust Rubicon, Kanonkop Paul Sauer, Klein Constantia Vin de Constance, Mullineux Olerasay, and Vilafonte Series C. Notably, each of the NFTs holds between 20 and 50 vintages having collections from 66 to 288 bottles. Scope South Africa NFT Market Size and Future Growth Dynamics by Key Performance Indicators 2019-2028 South Africa NFT Market Size and Forecast by Key Assets, 2019-2028 - Collectibles and Art - Real Estate - Sports - Gaming - Utility - Fashion & Luxury - Other South Africa NFT Market Size and Forecast by Key NFT Collectible Assets, 2019-2028 - Digital Art - Music & Sound Clip - Videos - Memes & GIF - Other South Africa NFT Market Size and Forecast by Currency, 2019-2028 - Ethereum - Solana - Avalanche - Polygon - BSC - Flow - Wax - Ronin - Other South Africa NFT Market Size and Forecast by Sales Channels, 2019-2028 - Primary - Secondary South Africa User Statistics, 2019-2028 For more information about this report visit <https://www.researchandmarkets.com/r/drm3es> Contacts ResearchAndMarkets.com Laura Wood, Senior Press Manager For E.S.T Office Hours Call 1-917-300-0470 For U.S./ CAN Toll Free Call 1-800-526-8630 For GMT Office Hours Call +353-1-416-8900

DUBLIN (BUSINESS WIRE) – The India NFT Market Intelligence and Future Growth Dynamics Databook 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels Q2 2022 report has been added to ResearchAndMarkets.com's offering. NFT industry in India is expected to grow by 61.6% on an annual basis to reach US\$3394.2 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 44.1% during 2022-2028. The NFT Spend Value in the country will increase from US\$3394.2 million in 2022 to reach US\$27067.3 million by 2028. The emergence of NFTs has created a space for digital artists in India and has also offered them a more prudent way to reach the inaccessible audience. The NFT market has allowed artists who were previously working with brands and agencies to find a more independent option, creating endless possibilities for them. In India, many artists have sold their work on different NFT platforms, thus creating a new source of revenue. The NFT ecosystem is attracting people from all walks of life. Almost every talent management agency and entertainment company has been looking at the NFT space to find new revenue streams while also connecting with the fans better. In 2021, India's most celebrated stars such as Rajnikanth, Amitabh Bachchan, and Salman Khan had already launched NFTs. In the cricketer fraternity, Sunil Gavaskar, Rishabh Pant, and Yuvraj Singh have also become part of the growing NFT ecosystem in India. The growing NFT interest among Indian brands is expected to drive future growth in the country. In India, many brands are venturing into the NFT space. Businesses using NFTs as marketing tools to expand their operations to the digital world are expected to grow further over the next four to eight quarters. Few firms have already ventured into the space. Mahindra & Mahindra, one of the leading car manufacturers in India, experimented with NFT marketing. The firm auctioned four India NFT Market Intelligence and Future Growth Dynamics Report 2022: A \$27+ Billion Market by 2028 Indian Fashion Designers are Jumping on the NFT Bandwagon Amid the Growing Popularity ResearchAndMarkets.com NFTs, each priced at INR 2.6 million. The auction winner received a chance to enjoy an off-road experience to drive the Thar. Similarly, MakeMyTrip, one of the leading travel-focused firms, launched virtual vacation NFTs themed on the best travel destination in India. Each of the NFTs from the firm was valued at INR 14,999. MG Motor India also has plans to launch 1,110 NFTs at a starting price of INR 500. These NFTs are expected to have four themes: collaborative art, community and diversity, car-as-a-platform, and collectibles. Through these NFTs, the firm allows MG Motor fans to own a piece of the company. As more and more brands across industry verticals enter the Indian NFT space, the publisher expects the market to record growth over the next four to eight quarters. This will also promote further innovation in the NFT industry from the short to medium-term perspective. However, the digital asset interest among Gen Z is much higher compared to other demographics. Nearly two-thirds of the Gen Z consumers in India believe that an investment in digital assets, such as cryptocurrencies, will lead to better returns. The hype around cryptocurrencies and advertisements fuels this interest among Gen Z consumers. NFT exchanges are experiencing strong traction for their

cricket-based digital assets in India India is one of the most cricket-crazed countries globally, with more than 500 million fans. Leveraging this huge fan base in India, NFT exchanges are launching cricket-based collectibles and experiencing strong traction. In April 2022, GuardianLink launched cricket-based digital assets and experienced huge traction for the collectibles in the Indian market. Jump.trade, a GuardianLink brand, launched the Meta Cricket League NFTs in April 2022. Jump.trade announced that 55,000 collectibles were sold on the platform within nine minutes of the launch. Of these, 70% of the sales came from the Indian market, whereas the remaining 30% were from across the globe. Each of the NFTs was priced at US\$25. During the live drop, GuardianLink witnessed traffic of over one million enthusiasts. With its success in the cricket NFT space, Jump.trade is now planning to launch NFT collectibles for Chelsea fans. The NFT collection will include match-day programs, menus, tickets, signed postcards, and photographs. . Along with sports, the NFT platform is eager to collaborate with firms who have successfully converted unicorns into NFTs, similar to unicorn India. Indian fashion designers are jumping on the NFT bandwagon amid the growing popularity with Bollywood stars and sports celebrities getting success in the NFT space, top Indian fashion designers are also jumping on the NFT bandwagon amid the growing popularity in the country. Manish Malhotra, one of the top fashion designers in the country, dropped five NFTs in association with FDCI X Lakme Fashion Week. . The NFTs, which sold out in seconds, sparked a debate in the industry, and several designers have since entered the NFT market in India. Anamika Khanna, the Indian fashion designer that runs the brand AK-OK, also launched NFTs. With these NFTs getting sold within a few minutes after launch, an increasing number of designers have started to see NFTs as a credible source of income for their digital fashion collection. NFT auctions are gaining momentum in India while the NFT market in India is small compared to other countries, auction houses are forecasting huge NFT demand over the next three to four years. Consequently, auction houses are conducting NFT auctions in India to tap into the market early. In January 2022, Prinseps, the Mumbai-based gallery and auction house, initiated the NFT sale featuring 35 of Gobardhan Ashâ€™s rare works on paper â€” figurative, earth-washed images, which the pioneering artist produced between 1948 to 1951. The NFT collection was made available to buyers as the original physical works, as 1/1 NFTs, or both. While it was the first NFT art auction in the country, all lots of the Ash auction were sold, with some NFTs fetching prices between US\$12,500 and US\$35,000. Scope This report provides in-depth, data-centric analysis of NFT Market in India and below is the summary of key market segments: India NFT Market Size and Future Growth Dynamics by Key Performance Indicators, 2019-2028 India NFT Market Size and Forecast by Key Assets, 2019-2028 - Collectibles and Art - Real Estate - Sports - Gaming - Utility - Fashion & Luxury - Other India NFT Market Size and Forecast by Key NFT Collectible Assets, 2019-2028 - Digital Art - Music & Sound Clip - Videos - Memes & Gif - Other India NFT Market Size and Forecast by Currency, 2019-2028 - Ethereum - Solana - Avalanche - Polygon - BSC - Flow - Wax - Ronin - Other India NFT Market Size and Forecast by Sales Channels, 2019-2028 - Primary - Secondary India User Statistics, 2019-2028 For more information about this report visit <https://www.researchandmarkets.com/r/8Zkxq7> Contacts ResearchAndMarkets.com Laura Wood, Senior Press Manager For E.S.T. DUBLINâ€”(BUSINESS WIRE)â€”The â€”Indonesia NFT Market Intelligence and Future Growth Dynamics Databook â€” 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels â€” Q2 2022â€” report has been added to ResearchAndMarkets.comâ€”s offering. NFT industry in Indonesia is expected to grow by 50.8% on an annual basis to reach US\$2367.6 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 35.8% during 2022-2028. The NFT Spend Value in the country will increase from US\$2367.6 million in 2022 to reach US\$3394.7 million by 2028. The digital economy is going in the direction of Web3.0, Metaverse, and Decentralized Autonomous Organizations (DAO). As a result, artists from all walks of life use the growing momentum to enter this free-for-all creative space. Over the last 12 months, NFTs have allowed creators to have complete control over their content and have pushed interaction significantly with their communities. In Indonesia, artists are increasingly entering the NFT space as they continuously seek new ways to grow and leverage their talent. Notably, Art Moments Jakarta, one of the early adopters in the NFT space, has fully supported the Indonesian digital economy by taking a hybrid live-online approach to the exhibition in 2021. This event from Art Moments Jakarta brought together a community of more than 64 local and international artists, curators, and galleries. With the NFTs gaining constant momentum and popularity in Indonesia, authorities have also shown interest in examining the existence of blockchain technology. The publisher expects a more robust set of regulatory guidelines for the NFT sector in Indonesia from the short to medium-term perspective. Familiarizing the general public with blockchain-based services and NFTs is expected to drive market growth in Indonesia. The adoption of cryptocurrencies, NFTs, and blockchain is expected to become more widespread over Indonesiaâ€”s next two to three years. While digital literacy will also rise with NFT investment and usage, it is imperative to familiarize the general public with blockchain-based services and NFTs, given that Indonesians are relatively new to the technology. Influencers and celebrities have started creating their NFT projects in Indonesia. In the booming NFT trends in the country, influencers and celebrities have started creating their NFT projects as they seek to monetize their work and create new revenue streams. Syahrini, an Indonesian singer and socialite, is one of the celebrities in the country who created the NFT project and gained widespread popularity globally. Under Princess Syahrini, she created and launched the NFT collection on the Binance NFT marketplace. The NFT collection was sold out within eight hours of its launch on the Binance NFT marketplace. Luna Maya, another prominent figure in the Indonesian entertainment industry, created an NFT project. Luna Maya entered a strategic collaboration with Tokau, the Japanese art firm with NFT creation experience. The NFT collection was launched on the BakerySwap NFT marketplace. Influencers and celebrities are not just creating their own NFT collections, but they are also actively promoting various NFT projects. Actor Brendon Salim, renowned Indonesian chef Arnold Poernomo, and influencer Kiki D'Arca, among others, most of whom are from Jakarta, have launched their own NFT projects. In April 2022, the NFT project had a trading volume of 37,200 Ether. Cryptocurrency exchanges are organizing NFT fundraising campaigns to fight the Covid-19 pandemic in Indonesia. Globally, brands and businesses have found several innovative NFTs use cases. From using NFTs as a promotional tool to create brand awareness to using the digital assets to raise funds for some noble cause. In Indonesia, similar trends are visible wherein cryptocurrency exchanges are organizing NFT fundraising campaigns to fight against the global pandemic. Tokocrypto, one of the leading cryptocurrency exchanges in the country, partnered with Aldi Haryoprato â€” the ex-CEO of GoPay, Evan Tan â€” the NFT collector, and William Tan â€” NFT creator for Art Blocks NFT, and Chef Arnold Poernomo to organize the NFT fundraising campaign in Indonesia. Startups are using emerging Blockchain 5.0 technology to launch the NFT marketplace in Indonesia. Innovation in blockchain technology has been driving the growth of the NFT industry in Indonesia. Notably, startups are using the emerging Blockchain 5.0 technology to launch an NFT marketplace in the country. In March 2022, Relictum Pro, the digital world of applications, announced the launch of Relictum NFT in Indonesia. Notably, Relictum NFT is a public marketplace where users can choose any token format. The marketplace is developed and launched on the emerging Blockchain 5.0 Relictum Pro technology. Relictum has also introduced a stable coin â€” USDR â€” which is expected to rival USDT in support of global commerce, according to the firm. Scope This report provides in-depth, data-centric analysis of NFT Market in Indonesia and below is the summary of key market segments: Indonesia NFT Market Size and Future Growth Dynamics by Key Performance Indicators, 2019-2028 Indonesia NFT Market Size and Forecast by Key Assets, 2019-2028 - Collectibles and Art - Real Estate - Sports - Gaming - Utility - Fashion & Luxury - Other Indonesia NFT Market Size and Forecast by Key NFT Collectible Assets, 2019-2028 - Digital Art - Music & Sound Clip - Videos - Memes & Gif - Other Indonesia NFT Market Size and Forecast by Currency, 2019-2028 - Ethereum - Solana - Avalanche - Polygon - BSC - Flow - Wax - Ronin - Other Indonesia NFT Market Size and Forecast by Sales Channels, 2019-2028 - Primary - Secondary Indonesia User Statistics, 2019-2028 For more information about this report visit <https://www.researchandmarkets.com/r/7e8ju0> Contacts ResearchAndMarkets.com Laura Wood, Senior Press Manager For E.S.T. DUBLINâ€”(BUSINESS WIRE)â€”The â€”Italy NFT Market Intelligence and Future Growth Dynamics Databook â€” 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels â€” Q2 2022â€” report has been added to ResearchAndMarkets.comâ€”s offering. According to the Q2 2022 NFT Survey, NFT industry in Italy is expected to grow by 47.6% on an annual basis to reach US\$671.4 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 34.6% during 2022-2028. The NFT Spend Value in the country will increase from US\$671.4 million in 2022 to reach US\$3633.5 million by 2028. The emergence of NFTs in Italy became mainstream, with young Italian digital artists trading their works online with Ethereum. In July 2021, Cambi Auction House hosted the first crypto art auction in Italy. The collection entitled Dystopian Visions, curated by the Director and Co-Founder of the Museum of Contemporary Digital Art (MoCDA), features Italian artists selling their artwork in digital format, or NFTs. This auction signaled that NFTs were there to stay in Italy. The bold and unconventional designs created by contemporary artists who know that selling NFTs of their artwork will help them create art that is alive and help them connect with the viewer. Additionally, these NFTs are becoming a source of income generation for these artists. Italy, a pioneer in generating NFT artists, witnessed strong adoption of digital crypto art and NFTs, helping the country get the title of â€”crypto art Renaissance.â€” Moreover, Italy has ranked third globally for total gross sales in the main NFT market TremendousRare. Therefore, the publisher expects more Italian artists to enter the NFT arena with innovative works over the longer run, earning significant revenue and capturing the market. Future Outlook Since the NFTs have revolutionized digital artwork bringing security to the market, investors are attracted to Italyâ€”s unique and unrepeatable digital realm. This has created real-world opportunities in Italy, referred to as possibly a â€”New Renaissance Eraâ€” for Italian artists. Italian NFT artist Federico Clapisâ€”s work was bought for around 44.7 ETH (US\$80,000), whereas Hackataoâ€”s had fetched nearly 185ETH (\$575,000). Another, Milan-based DotBribeon, had bought NFTs for US\$250,000 on Nifty Gateway. Therefore, the publisher anticipates more such artists to enter the NFT space and generate revenue over the long run in the country. In March 2022, an Italian clothing brand, Diesel, entered the market with an NFT collection, D:VERSE, unique runway garments, and Metaverse wearables. The collection has only one token, with a unique physical and digital showpiece. Additionally, it offers a special access pass for the next In Real Life Diesel Runway Show. Through this NFT, the users can access unique runway showpieces, limited edition garments, sneakers and accessories, and many more. Not the Italian fashion brands, to attract the NFT fans and enthusiasts, various other sectors are diving into this space to earn revenue. A country that saw early adoption of NFT in 2018, much before the global market, the publisher expects to witness long series of meta-projects, collaborations, and initiatives between Metaverse and live events, NFTs, and the tangible world, over the next three to four years in the country. Italian luxury fashion houses are earning substantial revenue from the sale of their NFTs with the increasing hype of NFTs, fashion brands are building partnerships with NFT platforms to launch digital fashion NFTs, including clothing, shoes, jewelry, accessories, and many more. These unique collectibles are bought by fans, collectors, and enthusiasts, for which these brands are witnessing growth in their business. In September 2021, Dolce & Gabbana, an Italian luxury fashion house, launched a group of nine NFTs called Collezione Genesi in the NFT marketplace, UNXD. These NFTs, which depict illustrations and digital art of Dolce and Gabbanaâ€”s garments, are wearable in a hypothetical Metaverse. Notably, these NFTs were minted on layer 1 Ethereum and were auctioned in the Polygon network. Through the auction, â€”The Doge Crownâ€” NFT fetched the largest amount of roughly US\$1.3 million at current prices, while â€”The Glass Suitâ€” NFT fetched nearly US\$1 million. At the same time, each version of the â€”Dress from a Dreamâ€” fetched more than US\$500,000. People winning the auction received the NFT and the physical versions of the items. Additionally, the winners will also get access to Dolce & Gabbana events in the future. Italian luxury fashion houses are entering into a partnership with NFT platforms to launch a brand new NFT collection. In April 2022, after the successful launch of Collezione Genesi, Italian luxury fashion house Dolce & Gabbana partnered with UNXD, the NFT marketplace, and InBetweeners, a unique collection of collectibles stored on a blockchain, to launch a brand new NFT collection in the Italian market. The new NFT collection of 4835 â€”unrevealedâ€” boxes, called DGFamily boxes, are function tiered membership to access the unique Dolce & Gabbana universe. Additionally, the members of DGFamily would get unique digital, bodily, and experiential privileges within the Metaverse. Non-Profit NGOs are introducing VR and NFT initiatives in Rome in partnership with leading Metaverse developers. With the rising popularity of NFTs, non-profit NGOs are entering into strategic public-private partnerships with Metaverse platforms to identify and abolish impediments to human flourishing. In March 2022, Humanity 2.0, a Rome-based non-profit NGO, in collaboration with the Holy See (Vatican), signed a strategic public-private partnership with a Metaverse developer, Sensorium, that uses the latest AI, VR, and NFT. SAN FRANCISCOæ“(BUSINESS WIRE)æ“Outdefine, a San Francisco-based startup, announced its \$2.5 million fundraise to build a decentralized hiring community for web3 talent. The round was led by web3 investors TCG Crypto and Jump Crypto, with participation from Big Brain Holdings, Formless Capital, Blocore, Mask Eco Fund, crypto angels, and syndicates. In 2021, 51% of all knowledge workers globally went permanently remote, a shift accelerated by COVID-19. The ability to work remotely enabled talent to work flexibly and provide specialized skills to a variety of companies. In particular, it became apparent that the core ethos of developing in the web3 space is to be part of a community for growth, learning, and earning crypto rewards. However, the reality is that most of these job opportunities have gatekeepers who take up to 50% of the talentsæ“ salary. Outdefine is addressing that gap by prioritizing talent growth and experience. Outdefine is building a token-backed hiring marketplace on the Solana blockchain. Here, talent directly negotiates the scope and compensation of their jobs and receives token rewards. Talent earns Outdefineæ“s crypto token for referring friends, finding work, and contributing to the community. With its capability to offer rewards, incentivize network activity, and promote transparency, the token helps hiring companies, talent, and the marketplace form a fair partnership. Co-Founder and CEO Romil Verma formerly co-founded a venture-backed company and worked as an engineer at Google (NYSE: GOOG). He began his blockchain career at Stanford in 2014 when the overwhelming majority of people were diving into artificial intelligence. Across his various roles, Romil saw that the options available for hiring great talent lacked the necessary trust and transparency between companies and talent, and the network Romil has partnered with Co-Founder and COO Sanjay Verma, who served as several engineering services companies over the last decade. Sanjay had led several tech companies through growth, mergers, and geographical expansion while managing 25,000 people globally. Outdefine raised this round of funding during a difficult period for the crypto market. It speaks to the companyæ“s value proposition and real-world application for crypto. Jonathan Moore, an investor at TCG Crypto, says, æ“Outdefine has created a unique approach to hiring and incentivizing web3 developers, one that we believe will help solve the global shortage of technical blockchain talent. TCG Crypto is excited to support Romil and his team in their endeavors to solve a fundamental issue for the crypto industry and increase the consumer adoption of blockchain technologies.æ“ This capital will be used to develop the token and expand the web3 talent community. Read the whitepaper at: <https://www.outdefine.com/whitepaper> Contacts

DUBLINæ“(BUSINESS WIRE)æ“The æ“Denmark NFT Market Intelligence and Future Growth Dynamics Databook æ“ 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels æ“ Q2 2022æ“ report has been added to ResearchAndMarkets.comæ“s offering. The NFT industry in Denmark is expected to grow by 44.1% on an annual basis to reach US\$191.6 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 31.8% during 2022-2028. The NFT Spend Value in the country will increase from US\$191.6 million in 2022 to reach US\$919.0 million by 2028. Reasons to buy - Based on data and analysis, develop country-level strategies. - Identify investment opportunities in growth segments. - Exceed competition by incorporating forecast data as well as market trends. - Use the relationships between major data sets with valuable insights to improve strategy. - Appropriate for providing accurate, high-quality data and analysis to support internal and external presentations. - Metaplex implicated former Solana Labs employee Jordan Prince as a conspirator. - The B+J Studios that Prince later founded raised \$10 million in September. The epicenter for the current industry discussion about enforcing NFT creator royalties. As well as lengthy arguments between prominent participants in the area have now burst out into social media. As developers attempt to alter the trajectory of the Solana NFT market. Creator of the NFT standard for Solana, Metaplex, said in a Twitter thread on Thursday that prominent Solana marketplace Magic Eden was orchestrating a æ“coordinated pressure campaignæ“ to seize control of the standard. Clash of the Titans Tokens, in this instance non-fungible tokens (NFTs) having attributes that make them incompatible with other NFTs, are defined by a standard that specifies their parameters and operation. Metaplex, as the creator of the token standard for NFTs on Solana, has a hand in the creation of every NFT ever created on the network and so has access to the keys. Today, in a series of tweets, Metaplex implicated former Solana Labs employee Jordan Prince, who worked on the original Metaplex protocol with Magic Eden, as a conspirator. The B+J Studios that Prince later founded raised \$10 million in September to build up the NFT infrastructure. Metaplex, which has been accused of monopolizing the Solana market for NFTs, has announced today that it will publish plans to decentralize control of its standard, saying that it æ“[agrees] with the root need to decentralize the program.æ“ However, the company stressed that it will not do so æ“haphazardly to appease a group that is acting in bad faith.æ“ Next, Magic Eden tweeted back at Metaplex, saying the latter æ“falsely accused us of trying to take control over the NFT standard on SOL.æ“ Recommended For You: Warner Music Group Partners With LGND Music To Offer Music NFTs

DappRadar, the worldæ“s largest dapp store, has released its latest industry report, which demonstrates the blockchain industryæ“s fortitude in the face of recent setbacks like the FTX exchangeæ“s closure and an increase in hacks, frauds, and vulnerabilities in the decentralized financial sector. Though one would expect consumers to flee in massive numbers in the wake of such news, DappRadaræ“s November Business Report highlighted the resilience of a segment of the crypto industry used to negative reviews. Daily unique active wallets (UAWs) linked to blockchain dapps totaled 1.9 million in November, down by just 5% month-over-month. DappRadar concludes that the minimal outflow shows that the blockchain business can weather the storm of uncertainty rather well. Blockchain gaming activity was affected by the events, falling from 45% to 42% of all UAWs, but still totaling 807,000 dUAW. DappRadar said that although gaming on the blockchain saw a dip, the DeFi industry saw a rise in interest. BNB Chain

DUBLINâ€“(BUSINESS WIRE)â€“The â€œAustria NFT Market Intelligence and Future Growth Dynamics Databook â€“ 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels â€“ Q2 2022â€“ report has been added to ResearchAndMarkets.comâ€“s offering. DUBLINâ€“(BUSINESS WIRE)â€“The â€“France NFT Market Intelligence and Future Growth Dynamics Databook â€“ 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels â€“ Q2 2022â€“ report has been added to ResearchAndMarkets.comâ€“s offering. The NFT industry in France is expected to grow by 36.9% on an annual basis to reach US\$989.5 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 26.8% during 2022-2028. The NFT Spend Value in the country will increase from US\$989.5 million in 2022 to reach US\$3810.8 million by 2028. The popularity of non-fungible tokens has skyrocketed over the last 12 months to become a global phenomenon. Amid this growing global popularity, France has emerged as the hub driving innovation and growth in the NFT market. As more and more consumers become aware of the NFTs, the publisher expects the number to grow over the next four to eight quarters, pushing the NFT transaction value and volume from the short to medium-term perspective further. Notably, several innovative NFT startups in the country are driving the marketâ€“s growth. Moreover, many brands across industry verticals are entering the NFT space to raise funding for social causes and drive brand awareness and growth, among other use cases. The popularity of NFT is expected to increase as more celebrities in the country continue to launch their NFT collection further. Presence of several NFT trading platforms driving the market growth in France Several different startups have emerged in the NFT space in France over the last 12 months. Notably, the presence of these players and their NFT trading platforms have made it easier for the general public to buy and sell their collections in the country. This increased transaction value and volume over the last 12 months in France. French football star enters the NFT world The NFT popularity has surged significantly globally over the last 12 months. One of the major reasons behind the growing popularity of NFTs is the rising number of celebrities that are entering the space. Notably, the trends are similar in France as well. In November 2021, Paul Pogba, the French football superstar, announced his entry into the NFT market. Through a strategic collaboration with CryptoDragons, the blockchain-based dragon Metaverse project which allows users to collect, sell, breed, and battle NFT dragons, Paul announced that he is planning to buy NFTs. Notably, Paul Pogba is not the only football player to enter the NFT space globally. Others, such as Lionel Messi, have pushed and even launched their NFT collection for football fans throughout the world. Auction houses are conducting NFT auctions in France with the growing popularity of NFTs in the digital art segment, many auction houses in the country are seeking to conduct an auction of in France works in France. In March 2022, FauveParis, one of the leading auction houses in the country, conducted the first-ever NFT auction in France. The auction house introduced 47 lots

or NFTs for auction at the event. Notably, the exhibition featured various formats of virtual artworks, which were displayed on tablets and screens in the auction room. At the event, 60% of the lots were sold for a total transaction amount of â‚¬120,000. French NFT startups are raising funding rounds to expand their footprint in the global markets. In 2021, the global NFT industry recorded strong growth, and the market is expected to keep growing over the next four to eight quarters. In the midst of this growing industry globally, French NFT startups are raising funding rounds to expand their footprint in the global markets to boost their market share further. In September 2021, Sorare, one of the leading NFT startups in France, announced that the firm had raised US\$680 million at a valuation of US\$4.3 billion. Notably, this is the largest fundraising round raised by any startup in the French tech sector. Founded in 2018, the firm has become one of the most valuable startups in the country, with international football stars among its investors. French startups are launching NFT sneakers in the form of mystery boxes. Globally, brands are finding innovative use cases of NFT. From using NFT to raise funding for charity organizations to use them for driving brand awareness, innovation is driving the market growth. Notably, similar trends are visible in France, where startups are entering the NFT space to drive brand awareness and consumer engagement. In February 2022, Sneakart, the French startup dedicated to streetwear, launched the first collection of NFT sneakers. The firm announced that Metakicks, the NFT sneakers, will be distributed in the form of mystery boxes. This means that buyers will not know beforehand which pair of basketball shoes they will get inside. For the first drop, the firm has made a total of 6,250 Metakicks. The firm has created 15 unique 3D animated sneaker designs using different textures, shapes, colors, and materials. These designs have been classified on various levels of rarity. These include epic, super rare, rare, and normal. DUBLINâ€“(BUSINESS WIRE)â€“The â€œBrazil NFT Market Intelligence and Future Growth Dynamics Databook â€“ 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels â€“ Q2 2022â€“ report has been added to ResearchAndMarkets.comâ€™s offering. The NFT industry in Brazil is expected to grow by 48.4% on an annual basis to reach US\$2967.6 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 34.8% during 2022-2028. The NFT Spend Value in the country will increase from US\$2967.6 million in 2022 to reach US\$16176.8 million by 2028. The non-fungible token (NFT) market in Brazil has undergone strong expansion over the last year. The presence of Brazilian sports players on NFT marketplaces has supported the widespread adoption of NFTs among the general public. In addition to this, the adoption of NFT in the art industry has also grown significantly in the country. Adoption by visual artists and some well-known names in the music industry are supporting the growth of the NFT industry in Brazil. The publisher expects the trend to continue from the short to medium-term perspective as more and more gamers become aware of NFT-based games in the country. Moreover, the rise of the traditional online gaming industry is also expected to drive the interest in NFT-based games over the next four to eight quarters in Brazil. Consequently, the publisher expects more NFT-based online gaming platforms to launch over the next four to eight quarters in the country, subsequently supporting the overall industry growth. NFT marketplaces are partnering with Brazilian football legends to drive their growth in the country. With the NFT industry recording strong growth over the last four quarters in Brazil, NFT marketplaces are looking to tap into the high growth market potential. Consequently, firms are entering into strategic partnerships with Brazilian football players, who have millions of fans across the country and globally, seeking to drive their growth in the NFT market. In July 2021, INFLUXO, a Rio-based NFT marketplace, announced that the firm had entered into a strategic collaboration with Ronaldinho. Under the partnership, the firm auctioned seven NFTs depicting Ronaldinho. Notably, the starting bid for the NFTs was placed at 20,000 USDT. Similarly, in May 2021, SportsIcon, a sports-focused NFT platform, announced that the firm had entered into a strategic partnership with Brazilian soccer star Roberto Carlos. Under the collaboration, the firm brings the NFTs of the legendary FIFA World Cup winner to its platform. As the competition among NFT platforms continues to grow in Brazil over the next two to three years, the publisher expects more NFT marketplaces in Brazil to sign exclusive partnership agreements with iconic sports players from the short to medium-term perspective. Sports in Brazil see NFTs as a new source of revenue. Globally, many sports teams have launched their NFT collection to generate an additional revenue stream, as the popularity of NFTs among the general public continues to grow quarter on quarter. In June 2021, the Brazilian Football Federation announced that it had entered into a multi-year contract with Turkish blockchain startup, Bitci, to launch NFTs and fan tokens on BitciChainâ€™s platform. With the national team having the most fans worldwide, the availability of NFTs and fan tokens on the Bitci platform will allow fans to feel more engaged and connected with the team. As the popularity of NFTs continues to gain rapid momentum globally, the publisher expects an increasing number of sports teams to collaborate and launch NFTs from the short to medium-term perspective. NFT marketplaces are choosing an eco-friendly way to drive their growth in Brazil. With artists and collectors getting alarmed by crypto artâ€™s ecological footprint, NFT marketplaces in Brazil are choosing an eco-friendly way to attract more artists to their platform, which will subsequently help them to drive their growth. Hic et Nunc, one of the leading Brazil-based NFT marketplaces for artists globally, mints artwork on the Tezos blockchain, which consumes only a fraction of the energy of its rival blockchains, such as Ethereum. In addition to this, the energy-efficient Tezos blockchain costs only 30 cents compared to the US\$200 for conducting a single transaction on the Ethereum blockchain. As the popularity of NFTs continues to grow globally, Brazilian startups and artists are creating NFT collections and raising millions of dollars by selling them. In March 2022, Lumx Studios, one of the leading startups from Rio de Janeiro that develops experiences in the metaverse, announced that the firm had earned R\$2million by entering the NFT market with the 55Unity collection. To date, the 55Unity collection remains to be the largest collectibles project, having sold 3,000 tokens in 28 hours. In September 2021, Monica Rizzolli announced that the generative art NFT collection, Fragments of an infinite field, was sold for R\$28.35 million in an auction. Notably, the generative art pieces are generated during the minting process; therefore, neither the artists nor the collectors can know what the final result of the work will look like. Scope Brazil NFT Market Size and Future Growth Dynamics by Key Performance Indicators, 2019-2028 Brazil NFT Market Size

DUBLINâ€“(BUSINESS WIRE)â€“The â€œAustralia NFT Market Intelligence and Future Growth Dynamics Databook â€“ 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels â€“ Q2 2022â€œ report has been added to ResearchAndMarkets.comâ€™s offering. The NFT industry in Australia is expected to grow by 46.2% on an annual basis to reach US\$659.5 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 33.8% during 2022-2028. The NFT Spend Value in the country will increase from US\$659.5 million in 2022 to reach US\$3459.1 million by 2028. The Australian cryptocurrency market surged significantly in 2021. According to the Q1 2022 Global NFT Market Survey, more than one in ten Australians hold some form of digital currency. This growing popularity in the Australian cryptocurrency market has also propelled the growth of the Non-Fungible Tokens (NFTs) industry in 2021. Public interest in NFTs, a unique digital asset like a special release album or artwork created with the technology that underpins cryptocurrencies, surged in 2021. In Australia, there are more NFT buyers than sellers. This trend is in line with the global NFT market, where more demand than supply. According to the publisher, in any given month of 2021, there were approximately 30% more buyers than sellers. This shows that people in increasing numbers are collecting NFTs globally, as well as in Australia. In the global market, this gap decreased to a modest 4% between buyers and sellers in March 2022. However, in Australia, there are approximately 800 digital crypto artists and an estimated 6,000 to 10,000 NFT collectors, the number which is rising quarter on quarter. As the interest in NFTs among the general public continues to grow, the publisher expects more new collectors to be on-board, with increased spending from existing collectors. Brands and retailers across different industries are looking to tap into the growing craze for NFTs. As a result of this, global gaming retailers are entering into strategic partnerships with Australian blockchain startups to launch the NFT marketplace. In February 2022, GameStop, one of the leading gaming retailers globally, announced that the firm had entered into a strategic collaboration with Australian blockchain startup, Immutable, to launch the NFT marketplace. Notably, Immutable is expected to help GameStop by developing an NFT marketplace on its carbon-neutral platform, Immutable X. GameStop announced that the firm is also planning to create a fund of up to US\$100 million with Immutable, which will be distributed to developers for creating NFTs for its marketplace. The publisher expects the US\$100 million to fund to further reduce the demand and supply gap in the Australian and global NFT market, which will also drive higher transaction value and volume. The publisher expects more such strategic partnerships in Australia over the next three to four years, thereby supporting the growth of the overall NFT industry from the short to medium-term perspective. Beauty brands are launching NFT collectibles to build deeper relationships with customers in Australia. In Australia, brands across industry verticals are entering the NFT space by launching their collections. Notably, beauty brands in the country are using NFTs to build deeper relationships with customers, thereby driving their growth and revenue. In November 2021, Sunny Skin, the Australian beauty brand, announced that the firm had launched its first NFT collection in the metaverse. The NFT collection, Aussie Angles, based around iconic Australian animals, was launched on the Openseas.io NFT open marketplace. Notably, the firm launched the NFT collection as part of its brand strategy, through which the firm aims to build deeper relationships with customers in Australia. Its inaugural digital character, Kali the Koala, is linked to the firmâ€™s SPF50+ product and is designed to appeal to Gen Z and millennial women who understand and prioritize skincare. As the interest in NFT continues to grow among the public in the country, the publisher expects more such beauty brands in Australia to launch NFT collections to boost their growth from the short to medium-term perspective. NFT marketplaces are launching new products to further gain market share in Australia. As the NFT industry continues to record strong growth in Australia, NFT marketplaces are developing and launching innovative products to gain market share in the country. In November 2021, NFT STARS announced the firm is planning to launch an innovative product, NFT Radio, which the firm claims to be a big breakthrough in the music industry. Notably, the NFT Radio is a radio station that streams unique content 24 x 7 and sells all audio content as NFTs. The radio station powered by blockchain and NFT technologies aims to address the various issues musicians and creators face in the country. Notably, the platform consists of two parts â€“ a radio station that streams the unique content and an audio marketplace where listeners can purchase NFT tracks. Notably, NFT Radio is not the first product aimed at musicians and fans in Australia. Startups have launched innovative platforms before. In August 2021, Serenade, a local music startup in Australia, announced the launch of an eco-friendly NFT platform, which aims to simplify the crypto industry for artists and music fans. The platform allows artists to sell everything from unreleased to new music, behind-the-scenes footage, and other visual assets. One of the differentiating factors is that Serenade allows Australians to purchase NFTs using debit and credit cards. With the competition among NFT marketplaces intensifying, the publisher expects more such innovative product launches which use blockchain and NFT technologies over the next four to eight quarters in Australia. Reasons to buy - Based on data and analysis, develop country-level strategies. - Identify investment opportunities in growth segments. - Exceed competition by incorporating forecast data as well as market trends. - Use the relationships between major data sets with valuable insights to improve strategy. - Appropriate for providing accurate, high-quality data and analysis to support internal and external presentations. - Senator Elizabeth Warren, a crypto skeptic, is working on a crypto bill. - The billâ€™s aims include taxation, regulation, national security, and

climate. According to the CEO of Intercontinental Exchange Inc (ICE), Jeffrey Sprecher, and Senator Elizabeth Warren, most cryptocurrencies are likely to be regulated as securities in the United States. Sprecher, whose ICE oversees the New York Stock Exchange, asserted confidently on Dec. 6 at the Goldman Sachs Group Inc financial services conference that crypto assets are "going to be regulated and transacted like securities." ICE Chief Executive Jeffrey Sprecher added: "What does that mean? It means more transparency; it means segregated client funds; the role of the broker as a broker-dealer will be overseeing and the exchanges will be separated from the brokers. The settlement and clearing will be separated from the exchanges. Sprecher also noted that additional regulation isn't always necessary for crypto because the legal frameworks for securities are already in place and are "essentially going to be implemented more severely." No Specifics on the Bill Disclosed Senator Elizabeth Warren, a crypto skeptic, is working on a crypto bill that would give the Securities and Exchange Commission (SEC), chaired by Gary Gensler, the majority of regulatory authority over the crypto industry. Warren is claimed to be interested in imposing regulatory duties, such as audited financial statements and bank-like capital requirements. Earlier, MicroStrategy founder and Bitcoin maximalist Michael Saylor have called for the shutdown of all crypto assets other than BTC, claiming that they are "committing securities fraud." And also, Saylor maintained his belief that Ripple, ETH, and Solana are all unregistered securities because they were issued and controlled by centralized institutions.

LONDON & LOS ANGELES (BUSINESS WIRE) – Animoca Brands Corporation Limited (Animoca Brands), the company advancing digital property rights for gaming and the open metaverse, has taken a majority stake in Pixelynx, Inc. (Pixelynx) through its controlled subsidiary. PIXELYNX is a music metaverse gaming platform founded by musicians and technologists (Joel Zimmerman) and Richie Hawtin (Plastikman) along with music and gaming industry veterans Ben Turner, Dean Wilson, and Inder Phull. PIXELYNX is a Los-Angeles-based music and gaming entity operating across five countries. It is creating a physical and digital ecosystem for artists and fans by building products that blur the lines between music, gaming, and Web3 (a decentralized ecosystem based on blockchain technologies). PIXELYNX's ecosystem will provide artists control over how they build experiences with fans, partners, and platforms to create new ways for music lovers to develop, share, and monetize music. Animoca Brands has acquired a majority stake in PIXELYNX to build, invest in, and acquire studios, infrastructure, and technologies that will power the future of the music industry through integration with gaming and Web3 technologies and communities. PIXELYNX operates LynxLabs, a new investment program to develop the next wave of music and entertainment ventures by offering them access to funding, artists, celebrities, token design, and technical support. LynxLabs has already invested into Volta XR and Oorbit. PIXELYNX's upcoming debut game ELYNXIR is a next-generation mobile gaming platform that will bring fans closer to their favorite artists through exclusive music content, in-game collectibles, and playable immersive experiences. Powered by Niantic Lightship AR technology, ELYNXIR leverages advanced augmented reality and geolocation for players to discover games, music, artists, collectibles, and community-made content. As an entirely new level of creative immersion and gameplay in the music metaverse, ELYNXIR aims to facilitate a new type of artist-to-fan collaboration that will transform how the music industry engages communities and monetizes content, giving fans the opportunity to be collectors, collaborators, influencers, and investors. The global music revenue is expected to reach US\$131 billion by 2030 (source: Goldman Sachs, 2022). From a strategic perspective, Animoca Brands and PIXELYNX will focus on developing new formats of music consumption that can unlock new revenue streams and provide access to the global network of platforms, infrastructure, and rights-holders in the field of entertainment. PIXELYNX's ELYNXIR will be integrated into the Animoca Brands ecosystem with an emphasis on interoperability, open standards, and new interactive audio-visual formats. Yat Siu, co-founder and executive chairman of Animoca Brands, commented: "PIXELYNX is one of the new wave of companies that are paving novel pathways for the music industry amid a major technological shift from centralized to decentralized ownership. We are thrilled to welcome PIXELYNX to the growing family of Animoca Brands and we look forward to helping to shape the forefront of the music industry while building new and innovative experiences for people around the world." Inder Phull, CEO of PIXELYNX, commented: "Animoca Brands has established itself as a dominant player in building the shared vision of an open metaverse. This deal marks the beginning of a new era in the music industry in which Web3, gaming, and transmedia content will unlock new formats, revenue streams, and business models that support artists, fans, and labels." Animoca Brands had previously led a seed funding round of funding for PIXELYNX in December 2021 with participation from Solana Ventures, Alumni Ventures Blockchain Fund, Hyperedge Capital Republic Realm, Sfermion, and others (see announcement of 6 December 2021). -END- About PIXELYNX PIXELYNX was founded in 2020 by iconic musicians and technologists Joel Zimmerman aka deadmau5, Richie Hawtin aka Plastikman, and music industry visionaries Ben Turner (Graphite; IMS: International Music Summit; AFEM: Association for Electronic Music), Dean Wilson (Seven20 Entertainment; mau5trap), and Inder Phull, a music metaverse futurist. The company, based in London and Los Angeles, is focused on building a music metaverse ecosystem that will transform the way artists connect and engage with their fans through gaming experiences. Its debut mobile game, ELYNXIR, began limited access tests in October 2022, with new features to be revealed and tested with iconic partners and community members. The full beta of ELYNXIR will be available in the first half of 2023. For more information visit <https://pixelynx.io> or <https://elynxir.game>. About Animoca Brands Animoca Brands, a Deloitte Tech Fast winner and ranked in the Financial Times list of High Growth Companies Asia-Pacific 2021, is a leader in digital entertainment, blockchain, and gamification that is working to advance digital property rights and contribute to the establishment of the open metaverse. The company develops and publishes a broad portfolio of products including the REVV token and SAND token; original games including The Sandbox, Crazy Kings, and Crazy Defense Heroes; and products utilizing popular intellectual properties including Disney, WWE, Snoop Dogg, The Walking Dead, Power Rangers, MotoGP, Formula 1, and Formula E. It has multiple subsidiaries, including The Sandbox, Blowfish Studios, Quidd, GAMEE, nWay, Pixowl, Forj, Lympo, Animoca Brands Japan, Grease Monkey Games, Eden Games, Darewise Entertainment, Notre Game, TinyTap, Be Media, and Pixelynx. Animoca Brands has a growing portfolio of more than 380 investments, including Colossal, Axie Infinity, OpenSea, Dapper Labs (NBA Top Shot), Yield Guild Games, Harmony, Alien Worlds, Star Atlas, and others. DUBLIN (BUSINESS WIRE) – The United Kingdom NFT Market Intelligence and Future Growth Dynamics Databook – 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels – Q2 2022a report has been added to ResearchAndMarkets.com's offering. NFT industry in United Kingdom is expected to grow by 48.7% on an annual basis to reach US\$1725.2 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 34.5% during 2022-2028. The NFT Spend Value in the country will increase from US\$1725.2 million in 2022 to reach US\$9257.0 million by 2028. The non-fungible tokens (NFT) market has recorded significant growth over the last 12 months globally, and the trends are similar in the United Kingdom. With the growing popularity of digital assets among people across different age groups, the market has recorded strong transaction value and volume. This trend is expected to accelerate as innovative startups with strong business models continue to enter the United Kingdom NFT industry. The NFTs have grown into prominence across different industry verticals in the United Kingdom. From sports to real estate and even entertainment, every industry finds an innovative NFT use case. This NFT uses cases to support the growth of the market in the country. Moreover, as NFT startups continue to innovate and develop differentiated NFT products, these startups are also raising funding rounds in the country to further accelerate their growth. The United Kingdom NFT industry is also getting support from the government. Notably, the support from the government towards the development of the NFT industry is a testament to the high growth potential of the NFT market in the United Kingdom. With the NFT market just getting started in the country, the publisher expects the industry to record strong growth over the next three to four years. NFT marketplaces are raising funding rounds to drive their growth in the NFT industry. The global NFT industry is expected to record strong growth over three to four years. In the growing prominence and popularity of the NFT market in the United Kingdom, NFT startups are raising funding rounds to further accelerate the growth of their marketplaces. In March 2022, KnownOrigin, one of the leading NFT marketplaces in the United Kingdom that allows users to discover rare art, announced that the firm had raised US\$4.85 million in its Series A funding round, which was led by venture capital firms GBV and Sanctor Capital. Some other investors who participated in the funding round include Pluto Digital, Cultur3 Capital, LD Capital, and D1 Ventures. The NFT startup is planning to use the funding round to further improve its NFT digital art marketplace, to allow creators to benefit from emerging technologies such as Metaverse and Web 3. According to the founder, the funding round will help the firm grow, innovate, and build an NFT ecosystem that will further accelerate the market's growth. To achieve this goal, the firm has also collaborated with big brands, including Netflix, Adidas, and Adobe. As of March 2022, the NFT marketplace has more than 5,000 creators on the platform and has generated sales of over US\$30 million over the period of the last 12 months. The NFT marketplace has built a new royalties system, allowing creators to receive the royalties instantly after each sale. Venture Capital investment firm acquires 50% stake in the UK-based NFT startup. With the NFT market expected to record strong growth over the next three to four years, venture capital firms are increasing their stake in NFT startups in the United Kingdom to get a major share of the market. In April 2021, Codebase Ventures Inc. (Codebase) announced that the firm had acquired a 50% stake in the UK-based NFT startup, InstaCoin. Notably, the 50% stake acquired by Codebase represents an investment of £100,000 in the NFT startup. Notably, InstaCoin allows users to connect their social media profiles to the blockchain and create instant NFT tokens using their content. NFT platform that allows social media users to connect their profile to blockchain and create NFTs launched in the United Kingdom. Millions of social media users have looking for ways to monetize their content online. Targeting such users, NFT startups are creating innovative products which allow social media users to create NFTs and monetize their content. InstaCoin, an innovative NFT startup in the United Kingdom, allows users to connect their social media profiles to the blockchain and instantly create NFT tokens from their content. This allows social media users to start monetizing the content they have created on social media platforms. Once the NFT tokens are created, followers and fans connect in the open market for immediate sales. InstaCoin has positioned itself as the first-ever self-serve social NFT platform. With a cost of US\$1 per NFT, the simple business model of the InstaCoin platform is targeting millions of existing social network users to create sales and drive revenue. Moreover, users also receive a lifetime commission on selling their NFT tokens in the secondary market, thereby generating more income for social media users. - Alibaba Cloud will be joining as a validator support and infrastructure provider. - Alibaba's plug-and-play infrastructure as a service would make it simple for new parties. Recently, Alibaba Cloud has announced a number of partnerships with prominent networks and institutions; however, what the partnerships will do for the crypto space is not clear. However, it is not clear if the crypto space will be able to benefit from the partnerships. According to the official statement, this agreement will allow customers to build validator nodes through the service, as well as have access to computing, storage, and distribution capabilities offered by Alibaba Cloud. Forays Into Crypto Sector Alibaba's plug-and-play infrastructure (IaaS) as a service would make it simple for new parties to build new Avalanche validators, thereby strengthening the avalanche ecosystem. Avalanche claims that during times of high user activity, app developers may scale up their cloud infrastructure to meet the demand. As a way of showing their appreciation for the Avalanche network's creators, Alibaba Cloud will be giving them credits to go toward any of their services in honor of the new integration. Over the last several months, Google Cloud has been on a roll, striking up partnerships with almost every major blockchain platform in the cryptocurrency industry. Whether it's Ethereum, Solana, or Hedera, Google Cloud has been a pioneer in offering robust cloud infrastructures for cryptocurrency firms. China's largest e-commerce platform, Alibaba, has announced a huge push into the cryptocurrency market by forming a collaboration with Avalanche. With its introduction in 2009, Alibaba Cloud has become the digital technology and intellectual backbone of the Alibaba Group, and Gartner has recognized it as the leading IaaS provider in the Asia Pacific region. - The OCP expands upon the Metaplex SPL token norm for Solana-based NFTs. - Magic Eden's OCP is similar to OpenSea's latest Ethereum toolset. There is a potential danger to creator royalties in the NFT arena. Particularly on Solana, where almost all major markets have ceased mandating that traders pay the costs. Magic Eden, the most popular Solana marketplace, has recently taken action toward establishing a more stable method to

enforce creator royalties. The startup with a valuation of \$1.6 billion has just introduced the Open Creator Protocol (OCP). An open-source tool that will help guarantee that developers of new Solana NFT projects would get royalties anytime their assets are transferred on secondary markets. It expands upon the Metaplex SPL token norm for Solana-based NFTs. Income on Secondary Sales The creator royalties on an NFT transaction are fees paid by the seller. They are normally between 5 and 10 percent of the selling price. And the money goes into a cryptocurrency wallet managed by the NFT project's developers. If an NFT project generates a lot of secondary trading activity, these fees might be a valuable source of income. Magic Eden's OCP is similar to OpenSea's latest Ethereum toolset. Intending to enable NFT developers to blacklist markets that do not pay royalties on approved assets, in other words, if a trading platform does not comply with OCP's need to impose royalties for OCP-enabled NFTs, then that platform will be added to the OCP's blacklist and the NFTs will not be tradable on it. Magic Eden's CEO Jack Lu has said that although the company would keep a record of restricted markets, producers have the option to make further adjustments if they so desire. Moreover, any Solana NFT marketplace that wants to respect royalties on OCP projects may back the open-source tool when it becomes accessible to users on Friday. Chainlink (LINK) re-enters the Bitwise 10 Large Cap Crypto Index and the Bitwise 10 ex Bitcoin Large Cap Crypto Index; Balancer (BAL) enters the Bitwise Decentralized Finance Crypto Index SAN FRANCISCOâ€“(BUSINESS WIRE)â€“Bitwise Index Services, the indexing subsidiary of Bitwise Asset Management, today announced the results of the monthly reconstitution of the Bitwise Crypto Indexes, which took place on November 30, 2022, at 4 p.m. ET. The Bitwise 10 Large Cap Crypto Index had the following changes as a result of the November 30, 2022 reconstitution: Chainlink (LINK) re-entered the index and Cosmos (ATOM) exited. As of November 30, 2022, at 4 p.m. ET, the Bitwise 10 Large Cap Crypto Index held the following constituents: 61.66% Bitcoin (BTC), 29.29% Ethereum (ETH), 2.08% Cardano (ADA), 1.51% Polygon (MATIC), 1.20% Polkadot (DOT), 1.05% Litecoin (LTC), 0.94% Solana (SOL), 0.83% Uniswap (UNI), 0.73% Avalanche (AVAX), and 0.70% Chainlink (LINK). The Bitwise Decentralized Finance Crypto Index had the following changes as a result of the November 30, 2022 reconstitution: Balancer (BAL) entered the index and 0x (ZRX) exited. As of November 30, 2022, at 4 p.m. ET, the Bitwise Decentralized Finance Crypto Index held the following constituents: 55.05% Uniswap (UNI), 11.67% Aave (AAVE), 7.41% Maker (MKR), 4.46% Lido DAO (LDO), 4.41% Curve DAO Token (CRV), 3.88% Loopring (LRC), 3.69% Convex Finance (CVX), 3.43% Compound (COMP), 3.08% NeoFinance (NFI), 2.65% and 1.25% of Balancer (BAL). The Bitwise 10 ex Bitcoin Large Cap Crypto Index had the following constituents: 76.41% Ethereum (ETH), 5.43% Cardano (ADA), 3.93% Polygon (MATIC), 3.14% Polkadot (DOT), 2.75% Litecoin (LTC), 2.44% Solana (SOL), 2.16% Uniswap (UNI), 1.91% Avalanche (AVAX), and 1.83% Chainlink (LINK). The Bitwise Crypto Indexes are reconstituted on a monthly basis according to the rules of the Bitwise Crypto Index Methodology as applied by the Bitwise Crypto Index Committee. Minutes of the November 2022 Bitwise Crypto Index Committee meeting are publicly available here. The Ball Multicoin Bitwise Metaverse Index reconstitutes in February, May, August, and November, and had no changes as a result of the November 30, 2022 reconstitution. As of November 30, 2022, at 4 p.m. ET, the Ball Multicoin Bitwise Metaverse Index had 25 constituents. The following were the 10 largest constituents of the Ball Multicoin Bitwise Metaverse Index: 13.09% Polygon (MATIC), 10.06% Ethereum (ETH), 7.56% Filecoin (FIL), 7.56% Chainlink (LINK), 6.15% Arweave (AR), 5.91% Binance Coin (BNB), 5.91% Uniswap (UNI), 5.14% Solana (SOL), 4.33% Aave (AAVE), and 4.14% Ethereum Name Service (ENS). The index methodology for the Ball Multicoin Bitwise Metaverse Index is available here. The Bitwise Crypto Innovators 30 Index of equities reconstitutes quarterly and as a result had no changes as of November 30, 2022. As of November 30, 2022 at 4 p.m. ET, the following were the 10 largest constituents of the Bitwise Crypto Innovators 30 Index: 11.02% MicroStrategy (MSTR), 10.60% Coinbase Global Inc. (COIN), 7.19% Hut 8 Mining (HUT CN), 4.94% Bakkt Holdings (BKKT), 4.86% Galaxy Digital Holdings (GLXY CN), 4.70% Canaan Inc. (CAN), 4.62% Riot Blockchain (RIOT), 4.54% Northern Data (NB2 GR), 4.36% HIVE Blockchain (HIVE CN), and 4.12% CleanSpark Inc. (CLSK). The index methodology for the Bitwise Crypto Innovators 30 Index of equities is available here. The Bitwise Blue-Chip NFT Collections Index reconstitutes quarterly and as a result had no changes as of November 30, 2022. As of November 30, 2022, at 4 p.m. ET, the Bitwise Blue-Chip NFT Collections Index held the following constituents: 29.73% Bored Ape Yacht Club, 29.55% CryptoPunks, 11.58% Mutant Ape Yacht Club, 7.68% CloneX, 5.01% Chromie Squiggle, 4.79% Azuki, 3.74% Moonbirds, 3.08% Doodles, 2.57% Meebits, and 2.27% VeeFriends. The index methodology for the Bitwise Blue-Chip NFT Collections Index is available here. About Bitwise Asset Management Based in San Francisco, Bitwise is one of the largest and fastest-growing crypto asset managers. As of year-end 2021, Bitwise managed over \$1.3 billion across an expanding suite of investment solutions. The firm is known for managing the world's largest crypto index fund (BITWCX-BTW) and pioneering products spanning Bitcoin, Ethereum, DeFi and crypto-focused equity indexes. Bitwise focuses on partnering with financial advisors and investment professionals to provide quality education and research. The team at Bitwise combines expertise in technology with decades of experience in traditional asset management and indexing, coming from firms including BlackRock, Blackstone, Facebook and Google, as well as the U.S. Attorney's Office. Bitwise is backed by leading institutional investors and asset management executives, and has been profiled in Institutional Investor, CNBC, Barron's, Bloomberg and The Wall Street Journal. RISKS AND IMPORTANT INFORMATION Carefully consider the investment objectives, risk factors, and charges and expenses of any Bitwise investment product before investing. Investing involves risk, including the possible loss of principal. There is no guarantee or assurance that the methodology used by Bitwise or any of the Bitwise investment products will result in any Bitwise investment product achieving positive investment returns or outperforming other investment products. There is no guarantee or assurance that an investor's investment objectives will be met through an investment into any Bitwise investment product, and an investor may lose money. Investors into any Bitwise investment product should be willing to accept a high degree of volatility in the price of such investment product and the possibility of significant losses. Bitwise investment products involve a substantial degree of risk. Certain Bitwise investment products may be available only to institutional and individual accredited investors. Certain of the Bitwise investment products may be subject to the risks associated with investing in crypto assets, including cryptocurrencies and crypto tokens. Because crypto assets are a new technological innovation with a limited history, they are a highly speculative asset. Future regulatory actions or policies may limit the ability to sell, exchange or use a crypto asset. The price of a crypto asset may be impacted by the transactions of a small number of holders of such crypto asset. Crypto assets may decline in popularity, acceptance or use, which may impact their price. The technology relating to crypto assets and blockchain is new and developing. Currently, there are a limited number of publicly listed or quoted companies for which crypto assets and blockchain technology represent an attributable and significant revenue stream. NFTs are an extremely new artistic and cultural phenomenon, and interest in such artwork could wane. If the demand for NFT artwork diminishes, the prices of NFT items could be negatively affected. The market for NFTs can be subject to shallow trade volume, extreme hoarding, low liquidity and high bankruptcy risk. NFTs are also subject to risks and challenges associated with intellectual property rights and fraud. In general, Metaverse protocols do not operate on a native blockchain, but rather are built and operated on other public blockchain networks. As a result, a Metaverse protocol does not control the blockchain network on which it operates. Any adverse impacts or changes on the underlying blockchain network could have a negative effect on the operation of the Metaverse protocol and, as a result, could impact the price of the Metaverse protocol's digital asset. Such adverse impacts can include, but are not limited to, technical bugs, hacks, 51% attacks or network congestion due to, among other issues, high fees. According to a report published today by DappRadar, the global dapp store, the blockchain gaming sector demonstrated remarkable resilience all through the month of November, despite negative force on the wider crypto industry due to the shutdown of the once-popular FTX cryptocurrency exchange. Nearly Half of All Blockchain Activity May Be Attributed to Blockchain Gaming According to DappRadar's most recent Blockchain Games Report, the actions at FTX were mostly ignored by the gaming community on the blockchain. In November, there was an average of 800,875 daily unique active wallets (UAW), down from just over 900,000 UAW in October and September. Overall, blockchain gaming accounted for 46% of all blockchain activity, assuring that this subset of the crypto ecosystem is still the largest, surpassing even decentralized finance. Wax remained the most popular gaming blockchain, with an average of 944,284 UAWs per day in November, a growth of more than 4% from October. In October, BNB Chain averaged 171,269 dUAW, making it the second most popular gaming protocol. However, its popularity suffered a major knock in November, dropping by 35%. Hive overtook BNB Chain as the second most popular gaming protocol in November, with an average of 156,369 dUAW despite an 8% decrease from October. The aftermath of the FTX crash, however, had a negative impact on a number of blockchains. Specifically, the gaming industry on the Solana blockchain, which was fundamentally connected to FTX, looks to have suffered a major impact. Its daily average of Unique Active Users (UAWs) dropped to 2,326 in November, the lowest monthly total ever recorded. Most Popular Games Are Picking Up Steam, While Metaverses Are Taking a Financial Blow The top 10 games in terms of monthly active users all had solid performances during the month. For example, Alien Worlds, a game built on the platform Wax, had a 25% increase in its user base, resulting in 212,000 daily active users (dUAWs), making it the most popular game overall. Positioned at #2, Splinterlands gained 5% month-over-month to 169,000 dUAWs. Even metaverse gamers had a busy November, with The Sandbox finishing up Alpha Season 3, its most anticipated event to date, which attracted over 353,000 unique players over 98 brand-generated experiences. The Sandbox's NFT trade volume dropped by around 33 percent last month, reaching a little over \$1 million, but the month concluded with the announcement of a significant property transaction. With 1,967 LANDS up for auction, including 50 estates, 695 standard LANDS, 134 premium LANDS, and 19 unique LANDS, the forthcoming sale is shaping up to be a major event. The LAND sales, both regular and premium, will be divided up using a blind vote technique. In essence, the deals began on November 24 and will go on until the beginning of the New Year, thus next month's trade volume in The Sandbox is likely to increase dramatically. The popular metaverse Decentraland had its sales drop by almost 23% and its trade volume fall by 54% in November. Things at FTX very probably contributed to a reduction in land trade volume that had already begun in July, explaining why the price of land in the metaverse has fallen. It remains to be seen whether The Sandbox's recent LAND sale would be able to stem the bleeding. Although metaverse sales have dropped, the blockchain gaming industry as a whole seems to be doing well, particularly in light of the large sums of funds being poured into it by investors. According to the data, the blockchain gaming industry and metaverse initiatives together raised \$534M in November. Fenix Games, a Web3 games publisher, is making headlines this month because it secured \$150 million to buy, invest in, and distribute its portfolio of blockchain games.

DUBLINâ€“(BUSINESS WIRE)â€“The â€@United States NFT Market Intelligence and Future Growth Dynamics Databook â€“ 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels â€“ Q2 2022â€ report has been added to ResearchAndMarkets.com's offering. NFT industry in United States is expected to grow by 49.5% on an annual basis to reach US\$14,453.2 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 35.1% during 2022-2028. The NFT Spend Value in the country will increase to US\$79,604.3 million by 2028. Non-fungible tokens (NFT) have become increasingly mainstream over 12 months. This growth in the global NFT market has been largely led by the popularity of NFTs in the United States. In 2021, a token representing a collage by Bleepie, the United States-based digital artist, was sold for a record US\$69 million at the Christie's auction. This, along with other popular collections, such as the Bored Ape Yacht Club, has constantly driven the popularity of the digital assets among the general public and celebrities, including Jimmy Fallon and Snoop Dogg. While the market recorded strong

growth last year, the publisher expects the trend to continue in 2022 and beyond, from the short to medium-term perspective. Over the last 12 months, the digital asset class has grown substantially in popularity in the United States. Moreover, as the awareness continued to increase, more and more Americans started to see NFTs as a safe investment. This shows that the awareness is increasing among the Americans, but more and more people are willing to invest in the asset class. As the trend grows in the United States, the publisher also expects the NFT sector to record strong NFT transaction value and volume growth over the next three to four years. Consequently, the publisher expects the United States NFT industry to record strong growth from short- to medium-term perspectives. Big brands entering the NFT space are driving the popularity among the general public in the United States. Over the last 12 months, several major brands across different industry verticals have entered the NFT market. Adidas, Nike, Coca-Cola, Louis Vuitton, McDonald's, and even Lamborghini have announced their presence in the NFT market. In addition to these, other big brands like designer eyewear firm Ray-Ban has announced their entry into the NFT space. With all of these global brands entering the digital assets space, the NFT popularity has skyrocketed among the general public in the United States. The publisher expects more global brands to launch their NFT collectibles, which will further boost the popularity of NFTs among the general public in the country from the short to medium-term perspective. Artists selling their work for millions of dollars have driven the growth and popularity of the NFT market in the United States. An increasing number of artists in the United States are turning to NFTs to create a new source of income. Los Angeles-based digital artist Sarah Zucker started selling NFTs of her work in 2019. By 2021, NFTs will become the major source of her income. From January 2021 to May 2021, Zucker sold NFTs worth US\$274,000. Similar to Zucker, many of the artists in the country have turned NFTs into a major source of their income. Bleeple's NFT, 'Everydays: The First 5000 Days', was sold for more than US\$69 million. With artists raising millions of dollars in NFT sales, the market's popularity has surged substantially in the United States. This has been one of the key drivers of the growth of the NFT industry in the country. Additionally, celebrities such as NFL player Rob Gronkowski, musician Shawn Mendes, and executives like Elon Musk have all entered the NFT space. The presence of all these big and well-known names in the NFT market is driving the popularity of the digital asset class in the country. NFT marketplaces are entering into strategic partnerships to develop innovative products in the United States. In April 2022, Nifty Gateway, the Gemini Trust Company LLC-owned premier marketplace for NFTs, announced that the firm had entered into a strategic partnership with Samsung to develop the first-ever smart TV NFT platform, which will allow exploring, trading, and purchasing digital art and collectibles. - Leveraging the technology of the two leaders in their respective industries, consumers will be able to seamlessly browse and interact with NFTs directly on their smart TVs. Moreover, consumers will also get access to over 6,000 pieces of NFTs from the top and emerging artists such as Daniel Arsham, Bleeple, Pak, and more. Several leading brands in the United States are jumping on the NFT bandwagon. In December 2021, Nike announced that the firm acquired RTFKT, a virtual shoe studio, as it seeks to enter the NFT space by launching a digital collection of sneakers. The firm plans to launch the digital sneakers within the NikeLand, a free 3D space that the firm has created within the Roblox gaming platform. Coca-Cola, another leading brand in the United States, has its presence in the NFT market. In May 2021, the firm sold NFT on the OpenSea NFT platform for more than US\$575,000. Auctioned as a single loot box over 72 hours, the four multi-sensory, friendship-inspired NFTs placed Coca-Cola on the growing NFT landscape in the United States. Scope United States NFT Market Size and Future Growth Dynamics by Key Performance Indicators, 2019-2028 United States NFT Market Size and Forecast by Key Assets, 2019-2028 - Collectibles and Art - Real Estate - Sports - Gaming - Utility - Fashion & Luxury - Other United States NFT Market Size and Forecast by Key NFT Collectible Assets, 2019-2028 - Digital Art - Music & Sound Clip - Videos - Memes & Gif - Other United States NFT Market Size and Forecast by Currency, 2019-2028 - Ethereum - Solana - Avalanche - Polygon - BSC - Flow - Wax - Ronin - Other United States NFT Market Size and Forecast by Sales Channels, 2019-2028 - Primary - Secondary United States User Statistics, 2019-2028 For more information about this report visit https://www.researchandmarkets.com/reports/5636021/united-states-nft-market-intelligence-and-future?utm_source=BW&utm_medium=PressRelease&utm_code=x4jgv4&utm_campaign=1783191+United+States+NFT+Market+Intelligence+and+Future+Growth+Dynamics+Report+2022%3a+Market+is+Expected+to+Grow+by+49.5%25+to+Reach+%2414%2c453.2+Million+in+2022+Forecast+in+2022&utm_source=ResearchAndMarkets Laura Wood, Senior Press Manager For E.S.T Office Hours Call 1-917-300-0470 For U.S./ CAN Toll Free Call 1-800-526-8630 For GMT Office Hours Call +353-1-416-8900

DUBLIN (BUSINESS WIRE) – "The South Korea NFT Market Intelligence and Future Growth Dynamics Databook" 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels Q2 2022 report has been added to ResearchAndMarkets.com's offering. NFT industry in South Korea is expected to grow by 47.3% on an annual basis to reach US\$938.6 million in 2022. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 33.8% during 2022-2028. The NFT Spend Value in the country will increase from US\$938.6 million in 2022 to reach US\$4902.2 million by 2028. South Korea has long been known as a trend-setter and leader in technological research. This is now getting translated into the blockchain realm as the non-fungible token (NFT) adoption grows exponentially in South Korea. The country has been ranked among the top 10 nations on Global Innovation Index by the World Intellectual Property Organization. Big tech firms such as LG and Samsung and gaming giant Krafton are driving innovation in the country. These firms are now entering the growing NFT space by dropping new collectibles to customers. Moreover, these firms are also launching separate divisions of their firms that are dedicated to developing NFTs. Notably, there are several reasons behind these firms introducing NFTs to retail customers and the general public in South Korea. NFTs have found various use cases that quickly translate into growing popularity among South Koreans, from raising brand awareness to creating better customer engagement. Among the reasons why the adoption of NFTs has surged significantly over the last two years in South Korea is that there is no tax on digital assets. The tax on cryptocurrencies has been put off until 2023, which is expected to be pushed back again by the new President-elect, Yoon Seok-yeol. Moreover, while the Financial Services Commission (FSC) is working to implement new rules, none are currently in place for the NFT market. This has kept the market open for innovative marketplaces to emerge from cryptocurrency exchanges like Bithumb and Upbit and from gaming giants like Krafton looking to benefit from NFTs. An increasing number of South Korean firms developing and issuing NFTs is driving the market growth in South Korea, many firms across different industry verticals are developing and issuing NFTs. The NFT trend has gained widespread momentum among South Korean companies using digital assets for various purposes. From using NFTs to drive brand awareness to create better customer engagement, NFT utilization has grown substantially over the last 12 months. Zero tax on digital assets has propelled the adoption of NFTs, thereby driving the market growth in South Korea. Among the other reasons that have driven the growth of the NFT market in South Korea is that the country does not impose taxes on the trading of NFTs and cryptocurrencies. This lack of taxes on digital assets has propelled market growth as more and more people have entered the space of buying and selling NFTs. In South Korea, everyone is getting into the NFT sector, whether their business is crypto-related or not. NFTs have increasingly become a marketing tool for firms looking to appeal to the younger demographics, from mobile carriers to manufacturers. In March 2022, Kia sold 60 NFTs it issued within 15 seconds of launch. The NFTs were inspired by the electric vehicle models. Each NFT was priced at 350 Klay, Kakao's crypto coin. The firm launched the NFTs on Klay Drops, the NFT marketplace run by GroundX. Big names enter the NFT space to remain competitive as traditional marketing agencies face a sharp decrease in demand. Innovative and emerging technologies are having a significant impact on businesses across industries. Because of the global pandemic, marketing channels such as social commerce and metaverse have diversified. Consequently, the importance of tech-based content has greatly increased. As a result, big names in the industry are entering the NFT space to remain competitive as traditional marketing agencies face a significant decrease in demand. In March 2022, Cheil Worldwide, a subsidiary of Samsung, announced that the firm was entering the NFT market. The marketing agency will not only mint NFTs but will also create an NFT marketplace, allowing users to trade digital assets. The firm is expected to partner with the entertainment industry and has plans to promote intellectual property from K-Drama, performances, music, exhibitions, and games as NFTs. Notably, Samsung has been one of the early adopters of the Web3 craze, which saw the firm making several deals and strategic partnerships in 2021. The firm also launched a metaverse, My House, and a virtual store on Decentraland. Samsung also partnered with Theta Network to give NFT from Theta Labs to South Korean consumers on the pre-orders of Samsung Galaxy S22 and Tablet S8. Scope South Korea NFT Market Size and Future Growth Dynamics by Key Performance Indicators, 2019-2028 South Korea NFT Market Size and Forecast by Key Assets, 2019-2028 - Collectibles and Art - Real Estate - Sports - Gaming - Utility - Fashion & Luxury - Other South Korea NFT Market Size and Forecast by Key NFT Collectible Assets, 2019-2028 - Digital Art - Music & Sound Clip - Videos - Memes & Gif - Other South Korea NFT Market Size and Forecast by Currency, 2019-2028 - Ethereum - Solana - Avalanche - Polygon - BSC - Flow - Wax - Ronin - Other South Korea NFT Market Size and Forecast by Sales Channels, 2019-2028 - Primary - Secondary South Korea User Statistics, 2019-2028 For more information about this report visit <https://www.researchandmarkets.com/r/7166rp> Contacts ResearchAndMarkets.com Laura Wood, Senior Press Manager press@researchandmarkets.com For E.S.T Office Hours Call 1-917-300-0470 For U.S./ CAN Toll Free Call 1-800-526-8630 For GMT Office Hours Call +353-1-416-8900

DUBLIN (BUSINESS WIRE) – "The Global NFT Market Intelligence and Future Growth Dynamics Databook" 50+ KPIs on NFT Investments by Key Assets, Currency, Sales Channels Q2 2022 report has been added to ResearchAndMarkets.com's offering. Global NFT industry is expected to grow by 51.0% on an annual basis to reach US\$46157.4 million in 2022 on global scale. The NFT industry is expected to grow steadily over the forecast period, recording a CAGR of 37.1% during 2022-2028. The NFT Spend Value in the country will increase from US\$46157.4 million in 2022 to reach US\$278475.3 million by 2028. The NFT market witnessed significant growth recently. The NFT market is booming since NFTs are an innovation that establishes property rights in the digital zone for the first time, and this uniqueness is driving the value of NFTs. The increasing impact of celebrities on NFT adoption, the modernising of the gaming business, and the modest but steady rise in demand for digital artworks are all major elements propelling the pace of NFT growth. Moreover, as NFT startups continue innovating and developing differentiated NFT products, it will further accelerate their global growth. The United Kingdom NFT industry is also getting support from the government. Notably, the government's support for developing the NFT industry is a testament to the high growth potential of the NFT market in the United Kingdom. The NFT space has gained traction from major institutions, including public and private. As the industry continues to record strong growth on the back of rising interest among the general public toward digital assets, government institutions globally have their perception of NFTs. In the United Kingdom, the government has adopted a forward-looking approach by announcing the plans to create an NFT as it seeks to lead the way in crypto. In April 2022, the United Kingdom Finance Minister asked the Royal Mint to create and issue the NFT by the summer. In addition, the government announced steps to bring digital assets under more regulatory scrutiny. The publisher expects that the forward-looking approach adopted by the government in the United Kingdom will drive the next growth phase for the NFT industry in the country. The non-fungible token (NFT) market in Latin America has undergone strong expansion over the last few years. In addition, the adoption by visual artists and some well-known names in the music industry is supporting the growth of the NFT industry in Brazil and Mexico. NFT marketplaces are looking to tap into the high-growth market potential. Consequently, firms are entering into strategic partnerships with Brazilian football players who have millions of fans across the country and globally, seeking to drive their growth in the NFT market. The emergence of NFTs has created a space for digital artists in the Asia Pacific region and offered them a more prudent way to reach the inaccessible audience. The NFT market has allowed artists previously working with brands and agencies to find a more independent option, creating endless possibilities for them. In India, many artists have sold their work on different NFT platforms, thus creating a new source of revenue. Several major Chinese companies have jumped on the NFT bandwagon. These include internet tech giants, blockchain startups, retail brands, and art auction houses. In the Middle East and Africa region, particularly in the UAE, there has been an uptake in NFT-related activities. In 2022, Art Dubai – the largest contemporary art fair in the MENA region – welcomed nearly 100 international and local art dealers and a digital collection of 17 platforms and galleries dedicated to showcasing and selling NFTs. While more and more countries are seeking to impose strict regulatory measures on NFTs, there has been a notable surge in the buying, selling, and creation of the NFTs in the UAE. Several innovative NFT marketplaces have also emerged in the country, which has made it relatively easy for the general public to buy, sell, and trade in NFTs. From NFT startups to cryptocurrency exchanges, several players are entering the Middle East and Africa NFT market; the presence of several NFT marketplaces has also supported the rise in NFT trading transaction value and volume, the trend expected to gain further momentum globally. Among the factors that have driven the popularity of NFTs among the general public include the tech-savvy nature of consumers and the country's high smartphone and internet penetration rate. The publisher expects the trend to continue over the next four to eight quarters as more and more players, including the government, are entering the NFT sector. This will subsequently drive the popularity of NFTs among the general public, thereby supporting the overall market growth from the short to medium-term perspective. Scope NFT Market Size and Forecast by Key Assets, 2019-2028 - Collectibles and Art - Real Estate - Sports - Gaming - Utility - Fashion & Luxury - Other NFT Market Size and Forecast by Key NFT Collectible Assets, 2019-2028 - Digital Art - Music & Sound Clip - Videos - Memes & Gif - Other NFT Market Size and Forecast by Currency, 2019-2028 - Ethereum - Solana - Avalanche - Polygon - BSC - Flow - Wax - Ronin - Other NFT Market Size and Forecast by Sales Channels,

- Serum, with its fork named OpenBook, offers a ray of hope. - The decision was made to fork the chain ultimately by Mango Max. Serum (SRM), a decentralized cryptocurrency exchange financed by FTX, informed its 215,000 Twitter followers that the project is ~~defunct~~ after the spectacular collapse of FTX and directed the fork of the project Serum with its fork named OpenBook offers a ray of hope. The forks already daily throughout for over 21 million being processed on the Solana blockchain thanks to the community-led forks. Although Serum's once-vigorous volume and liquidity have dwindled to almost nothing. Serum's coding security may have been breached when the FTX exchange was hacked for almost \$500 million earlier this month. Survival Key in Tough Times One reason for this is because only trusted employees of the FTX exchange have ~~update~~ authorization to the system's core code. Until recently, the FTX exchange has been using its decentralized equivalent, Serum, for trading and liquidity. While the vulnerability was quickly discovered, it was impossible to safely patch the Serum in time. A number of developers, including Solana's co-founder Anatoly Yakovenko, responded by suggesting a ~~fork~~ of the code. The decision was made to fork the chain ultimately by Mango Max. He is the creator of the lending project Mango Markets. Furthermore, the business discussed the fate of its native Serum (SRM) token. Stating that its future is ~~uncertain~~ and that developers have advised abandoning it due to its exposure to FTX and its sister trading company, Alameda Research. A minority of suggestions have suggested using it for community-driven taxes and discounts. FTX filed bankruptcy recently following a \$88 hole in its book.

- The company claims that a simple self-custodial wallet is vital. - Phantom and Polygon collaborated closely to provide a premium wallet experience. Earlier today, Phantom, one of the most widely used cold storage wallets for Solana-based decentralized applications and NFTs, announced that it will be expanding to include Ethereum and Polygon. Phantom is available for PC, iOS, and Android. When compared to centralized exchanges and firms that manage sensitive user data. The company claims that a simple self-custodial wallet is vital. In a statement, Phantom's CEO and co-founder Brandon Millman expressed his company's eagerness to make the Phantom experience available to the entire Web3 community. Unique Premium Wallet Experience The business claims that its goal is to solve major issues with usability and security in the digital collectibles industry. By unifying access to the three main blockchain ecosystems in one place. Developers, users, and collectors of Solana can already interact with decentralized finance (DeFi) protocols and non-fungible tokens using the Phantom wallet. Ryan Wyatt, CEO of Polygon Studios stated: "The Polygon ecosystem has been growing exponentially, and we are excited about bringing more people into the Web3 ecosystem. Working with Phantom will allow us to deliver a feature-rich wallet that's ready for mainstream consumers to use when interacting with apps powered by Polygon." Phantom claims that it and Polygon collaborated closely to provide a premium wallet experience. Which has resulted in the addition of more than 3 million active users. The company's goal is to increase crypto adoption. By providing a user-friendly wallet that can store and display assets from any blockchain. A private multi-chain beta is set to start in the coming weeks. And a public release is expected later this year, the business said. Recommended For You:

- New crypto derivatives exchange combines the performance advantages of a CEX with the user security and control offered by a non-custodial DEX. - Ankx satisfies new investor appetite for full transparency, including real-time verification of proof of reserves. - Ankx waitlist opens today, with the full launch expected next year. Pre-register for first access and news. PANAMA CITY (BUSINESS WIRE) - "QRDO #Ankx" Ankx announces the launch of a new kind of hybrid crypto derivatives exchange which offers sophisticated trading and transparency from the secure self-custody of a decentralized wallet. The launch comes at a time when recent events have shattered investor confidence and drawn attention to the major security and performance trade-offs that investors are forced to accept when trading on either centralized or decentralized cryptoasset exchanges. Whilst centralized exchanges typically offer deeper liquidity, lower latency, and tighter spreads, investors are forced to surrender their funds to an exchange-managed wallet which is vulnerable to hacking or malpractice. Ankx's hybrid model removes this trade-off, enabling high-performance trading from secure self-custody, one of the main benefits of decentralized exchanges. When trading on Ankx, user assets remain in secure wallets (vaults) protected by Qredo's decentralized MPC (dMPC) and located on its Layer 2 blockchain. Because no assets are locked on the exchange, users can maximize capital efficiency by deploying funds instantly from their Vault to other trading and Web3 opportunities as they arise. Other Ankx user benefits include real-time verification of proof of reserves across all exchange participants, and comprehensive proof of liquidation reporting. Ankx has been built by a team of experienced professionals from other cryptoasset exchanges. The project received incubation support from Qredo's investment arm, Qredo Ventures. The exchange is expected to launch next year, with the waitlist opening today, to register for first access and further news. "Given the events of recent weeks, there is a new appetite for sophisticated exchange capabilities without the need to trust a third party or cede control of your assets," said Alex Petryk from Ankx's Marketing team. "Ankx's new hybrid approach resolves this trade-off and gives investors the best of both centralized and decentralized worlds. We're delighted that Qredo's dMPC and Layer 2 architecture is playing such an important part in this game-changing new platform." About Ankx Ankx's team of experienced technologists is ready to change the way you trade crypto derivatives. Designed for investors of every size, Ankx is a new kind of hybrid exchange that combines the advantages of a centralized trading venue, with the security, control, and transparency offered by non-custodial, decentralized exchanges. Watch this space. Follow Ankx on Twitter and <http://ankx.com/> About Qredo Qredo is a decentralized digital asset management infrastructure and product suite designed to unlock new opportunities for institutional investors in digital assets and decentralized finance. Its Layer 2 blockchain protocol enables users to seamlessly transfer and settle BTC, ETH, BNB Chain, Solana, Polkadot and ERC-20 tokens. Assets are secured by Qredo's advanced Gen 2.0 multi-party computation (MPC), which provides tier-1 bank security and institutional-grade governance. Follow Qredo on Twitter and LinkedIn Contacts

- The DAO considers its milestone-based funding an essential financing mechanism. - \$100 million will be dispersed at a pace of \$20 million per year over the next five years. Game7, a Web3 gaming DAO, launched a grant programme with a \$100 million allocation. Funding such as this is intended to encourage developers to improve and expand the infrastructure necessary for Web3 gaming. According to a recent tweet from crypto and blockchain analyst WuBlockchain. The DAO plans to enhance smart contract standards, tools, interoperable wallets, and scaling solutions. To promote the widespread use of Web3 games throughout the world. Essential Financing Mechanism Game7 is a San Francisco-based DAO backed by the BitDAO and Forte communities. Due to the bearish market, and economic depression, the blockchain gaming businesses really need this in the current conditions. The Game7 has allocated the whole \$100 million to be dispersed at a pace of \$20 million per year over the next five years to fund initiatives in the areas of technology, events, diversity, education, and research. In addition, the DAO considers its milestone-based funding an essential financing mechanism for the Web3 gaming and metaverse ecosystem since it is founded on the principle that such infrastructures should be publicly available, open-source, and interoperable. Furthermore, Game7 has received a \$500 million investment from BitDAO and Forte together. Game7, BitDAO, and Forte will establish guidelines for the gaming industry and determine how the monies will be allocated. Moreover, Game7 polled one hundred creators of Web3 games and found that chain election, wallet custody, and sustainability are among the most pressing concerns. Projects that are working on potential solutions to these issues will get funding as part of this initiative. At now, the cross-chain funding programme is compatible with games developed for the Polygon, Solana, Immutable, and Arbitrum ecosystems; support for other blockchains is planned over the following months. - Trading of Serum tokens will be allowed on Binance until November 28. - Jupiter also told its customers that it would be suspending its usage of Serum's liquidity. In a recent announcement, Binance said that it will no longer support trading pairings involving the SRM token issued by Serum including against the Binance exchange token (BNB), Bitcoin (BTC), and Tether's stablecoin (USDT). Serum is the token used for governance on the decentralized Solana-based exchange backed by FTX and Alameda Research in August 2020. Trading of Serum tokens will be allowed on Binance until November 28. Despite being advertised as decentralized, several prominent developers, including Max Schneider, the co-founder of cryptocurrency exchange Mango Markets, believe that someone at FTX may have held keys to the exchange. This has cast a pall of doubt over Project Serum. Serum Pays the Price Solana founder Anatoly Yakovenko said on Twitter that the devs that depend on Serum are forking the program because the upgrade key to the current one is compromised. The loss of \$400 million from FTX caused widespread panic, and as a result, numerous DeFi applications and developers turned off access to the Serum project, including NFT marketplace Magic Eden. Speculation persists that the disappearance was the result of an insider hack, which raises serious concerns for the security of the Serum platform in the future. At least part of the monies were said to have been moved with the help of the Bahamas officials. Solana-based DEX aggregator exchange Jupiter also told its customers that it would be suspending its usage of Serum's liquidity due to security concerns about upgrade authorities, and it urged all of its integrators to do the same. As a result, several of Serum's most important developers began working on OpenBook, a community-driven ~~hard fork~~ of Serum. The token has dropped 20% in the last 24 hours as per CMC. The games that have been shortlisted for the GAM3 Awards in 2022 have been made public. The first Polkastarter Gaming GAM3 Awards will take place on December 15, 2022, and will cover 16 categories. The jury members selected their best 5 games from each of the 13 categories represented by the 186 unique games that were submitted in the first round of voting. The final candidates were reduced via this procedure to 32 unique games, which represent the pinnacle of web3 gaming. The top 3 networks, Polygon, BNB Chain, and Solana, were each represented in 3 of the first 186 games, which were spread among 13 chains. The final 32 nominations showed a distribution of web3 games throughout several chains. With 8 games each, Polygon and Immutable are tied for first place in web3 gaming, with Solana and Gala coming in second and third, respectively. Without honoring the Best Content Creator, the GAM3 Awards would not have been possible to organize. They are the key proponents of adoption and they are the ones who enlist the support of their devoted communities. Web3 gaming has a large and diverse community of content producers from different countries, cultures, and languages. Because of this, the Best Content Creator award will be decided entirely by community voting. Each nominee should ask their supporters to cast votes for them at gam3awards.com. The Games' Choice Award is where games honor games but in a more literal manner. Each game nominates their favorite web3 title from outside of themselves in the fifteenth category of the GAM3 Awards. It serves as a gesture of deference and demonstrates that all of the games in the first area are regarded in friendly rivalry to advance the web3 gaming sector as a whole. On November 16th, the People's Choice Award was made available for a public vote. This is the first game-specific award that is entirely chosen by public vote, and it inspired a movement across all genres and chains of games. 38 games with a total social following of over 3 million sent tweets and announcements to their individual communities. From the more than 5K unique votes cast on the platform, this approach alone qualified more than 50 games for the award. The contenders for Game of the Year at the GAM3 Awards demonstrate how far web3 gaming has come. Five of the top games now available consistently straddle the border between conventional and web-based gaming quality while highlighting the value of digital asset ownership and other blockchain components. The Harvest, Gods Unchained, Big Time, Illuvium, and Superior. Whoever wins the GOTY award will be the outcome of the game studio's commitment, effort, and hard work in creating an impenetrable community. The GAM3 Awards and its proactive endeavor to keep web3 game creators inspired to go on were well-received throughout the nomination stage by both games and judges. Omar Ghanem, Polkastarter's Head of Gaming, summarizes comments as follows: "We would like to thank each and all of the 39 jury members involved in the first round of the GAM3 Awards voting. A 100% voting participation despite the task at hand with over 100 game titles to go through, is further proof of how excited everyone is to see the web3 gaming sector's development and growth. The majority of jury members shared positive feedback on how pleasantly surprised they were to discover a number of hidden gems in the industry and this was further proof the GAM3 Awards is doing what it set out to do, recognize quality web3 games for their work." The following comment from Urvit Goel, Head of Global Games at Polygon Studios, highlights the significance of gaming's contribution to the development of blockchain technology: "It is an amazing list of quality games that really showcase what is coming in the blockchain gaming space. The GAM3 Awards has shown how many quality blockchain games are being built, and the passion of those builders. It's also clear that Polygon continues to be the leader when it comes to both quality, quantity, and diversity of web3 games." A number of factors, including the basic loop, visuals, accessibility, factor for replayability, fun components, and overall gaming experience, will be taken into consideration while judging games. The game in question must have a live, playable version that demonstrates the aforementioned requirements in order to be eligible for any of the awards, with the exception of Most Anticipated Game. Yoshihisa Hashimoto, the

former CTO of Square Enix and the director of Sonic: Unleashed, and Final Fantasy XIV Online, as well as the former Senior Director of Partnerships at Electronic Arts (Edward Chang), make up the all-star jury. The duo have decades of combined gaming expertise. For a complete list of the jury members that cast votes for the GAM3 Awards, be sure to visit gam3awards.com. Justin Kan, the founder of Fractal, Urvit Goel, the head of global games at Polygon Studios, Itai Elizur, managing partner at Market Across, Rachel Levin, the director of venture & strategy at ImmutableX, and Matt Sorg, the head of technology at the Solana Foundation are the judges whose votes will determine which studios win a prize. The jury's decision will be given 90% of the vote's weight, while the remaining 10% will be determined by community vote. In the event of a tie, the community's vote will be used to determine the winners for all categories. On December 15, 2022, all of these announcements will be published Livestream on official social media handles. The full list of nominations is as follows: Game of the Year - Illuvium - Big Time - Gods Unchained - The Harvest - Superior Most Anticipated Game - Illuvium: Overworld - Shrapnel - Star Atlas - Ember Sword - The Treeverse Best Graphics - Illuvium - Star Atlas - Metalcore - Big Time - My Pet Hooligan Best Action Game - Big Time - Illuvium - Metalcore - Guild of Guardians - Superior Best Mobile Game - Guild of Guardians - Splinterlands - Blast Royale - Thetan Arena - Skyweaver Best Adventure Game - Big Time - Earth from Another Sun - My Pet Hooligan - The Sandbox - Aurora Best Casual Game - Blankos Block Party - Thetan Arena - My Pet Hooligan - Axie Infinity Origins - Legends of Venari Best RPG - Big Time - Illuvium - Aurora - SIPHER - Phantom Galaxies Best Shooter Game - Metalcore - EV.IO - Undead Blocks - Belysium - Earth from Another Sun Best Strategy Game - Gods Unchained - Cross the Ages - Skyweaver - Immortal Game - Cards of Eternity Best Card Game - Gods Unchained - Splinterlands - Axie Infinity Origins - Skyweaver - Cards of Eternity Best Multiplayer Game - Blankos Block Party - My Pet Hooligan - Metalcore - Big Time - EV.IO Best Esports Game - EV.IO - Metalcore - Gods Unchained - Planet Mojo - Spider Tanks

- Bullish FIDA price prediction is \$0.6529 to \$4.0103. - The FIDA price will also reach \$5 soon. - FIDA bearish market price prediction for 2022 is \$0.2074. In Bonafida (FIDA) price prediction 2022, we use statistics, price patterns, RSI, RVOL, and other information about FIDA to analyze the future movement of the cryptocurrency. Bonafida (FIDA) Current Market Status According to CoinGecko, the price of Bonafida (FIDA) is \$0.481608 with a 24-hour trading volume of \$45,044,323 at the time of writing. However, FIDA has decreased to 7.7% in the last 24 hours. Moreover, Bonafida (FIDA) has a circulating supply of 60,328,384 FIDA. Currently, FIDA trades in cryptocurrency exchanges such as Binance, Coinbase, Bybit, MEXC, Coinw, OKX, and CoinTiger. What is Bonafida (FIDA)? Bonfida is a product suite that provides a user-friendly front-end experience for Serum and Solana. Serum is a decentralized exchange (DEX) built on Solana that offers cross-chain support. Bonfida's user interface interacts with Serum's API, allowing traders to view charts and execute market orders. FIDA is an SPL token compliant with the Solana network. FIDA holders can vote on, and draft, governance and product proposals on the Bonfida platform. FIDA tokens are also used to purchase .sol domain names, and can be used as payment for trading bot subscriptions on the Serum DEX. Bonafida (FIDA) Price Prediction 2022 Bonafida (FIDA) holds the 515th position on CoinGecko right now. FIDA price prediction 2022 is explained below with a daily time frame. The above chart of Bonafida (FIDA) laid out the horizontal channel pattern, also known as the sideways trend. In general, the horizontal channel is formed during the price consolidation. In this pattern, the upper trendline, the line which connects the highs, and the lower trendline, line which connects the lows, run horizontally parallel and the price action is contained within it. A horizontal channel is often regarded as one of the suitable patterns for timing the market as the buying and selling points are in consolidation. Currently, Bonafida (FIDA) is at \$0.481608. If the pattern continues, the price of FIDA might reach the resistance level of \$0.5358, and \$0.7992. If the trend reverses, then the price of FIDA may fall to \$0.3608. Bonafida (FIDA) Support and Resistance Levels The chart below shows the support and resistance levels of Bonafida (FIDA). From the above daily time frame, we can clearly interpret the following as the resistance and support levels of Bonafida (FIDA). | Resistance Level 1 | \$0.6529 | | Resistance Level 2 | \$1.4999 | | Resistance Level 3 | \$4.0103 | | Support Level 1 | \$0.2074 | The charts show that FIDA has performed a bullish trend over the past month. If this trend continues, FIDA might run along with the bulls overtaking its resistance level at \$4.0103. Accordingly, if the investors turn against the crypto, the price of the FIDA might plummet to almost \$0.2074, a bearish signal. Bonafida (FIDA) Price Prediction 2022 æ" RVOL, MA, and RSI The Relative Volume (RVOL) of Bonafida (FIDA) is shown in the below chart. It is an indicator of how the current trading volume has changed over a period of time from the previous volume for traders. Currently, the RVOL of FIDA lies below the cutoff line, indicating weak participants in the current trend. Moreover, the Moving Average (MA) of Bonafida (FIDA) is shown in the above chart. Notably, the FIDA price lies above 50 MA (short-term), so it is completely in an upward trend. Currently, FIDA is in a bullish state. There is a possibility of a reversal trend of FIDA at any time. Meanwhile, the relative strength in FIDA (RSI) of the FIDA is at a level of 63.26. This means that FIDA is in a nearly overbought state. However, this gives confidence to the traders to trade without any fear. Bonafida (FIDA) Price Prediction 2022 æ" ADX, RVI Let us now look at the Average Directional in FIDA (ADX) of Bonafida (FIDA). It helps to measure the overall strength of the trend. The indicator is the average of the expanding price range values. This system attempts to measure the strength of price movement in the positive and negative directions using DMI indicators with ADX. The above chart represents the ADX of Bonafida (FIDA). Currently, FIDA lies in the range of 38.0585, so it indicates a strong trend. From the above chart, the Relative Volatility in FIDA (RVI) of Bonafida (FIDA). RVI measures the constant deviation of price changes over a period of time rather than price changes. The RVI of FIDA lies below 50, indicating low volatility. In fact, FIDA's RSI is at 63.26, thus confirming a potential sell signal. Comparison of FIDA with BTC, ETH The below chart shows the price comparison between Bitcoin, Ethereum, and Bonafida (FIDA). From the above chart, we can interpret ETH, BTC, and FIDA are moving in a similar trend. This indicates that when the price of BTC increases or decreases, the price of ETH and FIDA also increase or decrease respectively. Bonafida (FIDA) Price Prediction 2023 If the declining price action completely slows down in momentum and the trend reverses, Bonafida (FIDA) might probably attain \$5.8 by 2023. Bonafida (FIDA) Price Prediction 2024 With several upgrades in the network, Bonafida (FIDA) might enter a bullish trajectory. If the coin grabs the attention of major investors, FIDA might rally to hit \$6.5 by 2024. Bonafida (FIDA) Price Prediction 2025 If Bonafida (FIDA) sustains major resistance levels and continues to be recognized as a better investment option among the investors for the next 3 years, FIDA would rally to hit \$7. Bonafida (FIDA) Price Prediction 2026 If Bonafida (FIDA) sustains major resistance levels and continues to be recognized as a better investment option among the investors for the next 4 years, FIDA would rally to hit \$7.6. Bonafida (FIDA) Price Prediction 2027 If Bonafida (FIDA) sustains major resistance levels and continues to be recognized as a better investment option among the investors for the next 5 years, FIDA would rally to hit \$8.3. Bonafida (FIDA) Price Prediction 2028 If Bonafida (FIDA) holds up a strong stance as a better investment option for the next 6 years, it might witness significant price rallies. Thus, by 2028, FIDA would hit \$9. Bonafida (FIDA) Price Prediction 2029 If investors flock in and continue to place their bets on Bonafida (FIDA), it would witness major spikes. FIDA might hit \$9.5 by 2029. Bonafida (FIDA) Price Prediction 2030 With greater advancements in the Bonafida ecosystem, the crypto community might continue to invest in Bonafida (FIDA) for the next 8 years and drive significant price rallies for the token. Hence, Bonafida (FIDA) might hit \$10 by 2030. Conclusion With continuous improvements in the Bonafida network, we can say that 2022 is a good year for FIDA. For this reason, the bullish price prediction of Bonafida (FIDA) in 2022 is \$4.0103. On the other hand, the bearish price prediction of Bonafida (FIDA) for 2022 is \$0.2074. Furthermore, with the advancements and upgrades in the Bonafida ecosystem, the performance of Bonafida (FIDA) would rise to reach above its new all-time high (ATH) of \$18.77 very soon. But, it might also reach \$5 if the investors believe that FIDA is a good investment in 2022. FAQ 1. What is Bonafida (FIDA)? Bonafida (FIDA) is the native cryptocurrency of Bonafida, a peer-to-peer (P2P) decentralized payment network that was launched in 2014. 2. Where can you purchase Bonafida (FIDA)? Bonafida (FIDA) has been listed on many crypto exchanges which include Binance, Coinbase, Bybit, MEXC, Coinw, OKX, and CoinTiger. 3. Will Bonafida (FIDA) reach a new ATH soon? With the ongoing developments and upgrades within the Bonafida platform, Bonafida (FIDA) has a high possibility of reaching its ATH soon. 4. What is the current all-time high (ATH) of Bonafida (FIDA)? On Nov 03, 2021, Bonafida (FIDA) reached its new all-time high (ATH) of \$18.77. 5. Is Bonafida (FIDA) a good investment in 2022? Bonafida (FIDA) seems to be one of the top-gaining cryptocurrencies this year. According to the recorded achievements of Bonafida in the past few months, FIDA is considered a good investment in 2022. 6. Can Bonafida (FIDA) reach \$1? Bonafida (FIDA) is one of the active cryptos that continues to maintain its bullish state. Eventually, if this bullish trend continues then Bonafida (FIDA) will hit \$1 soon. 7. What will be the Bonafida (FIDA) price by 2023? Bonafida (FIDA) price is expected to reach \$5.8 by 2023. 8. What will be the Bonafida (FIDA) price by 2024? Bonafida (FIDA) price is expected to reach \$6.5 by 2024. 9. What will be the Bonafida (FIDA) price by 2025? Bonafida (FIDA) price is expected to reach \$7 by 2025. 10. What will be the Bonafida (FIDA) price by 2026? Bonafida (FIDA) price is expected to reach \$7.5 by 2026. Disclaimer: The opinion expressed in this chart is solely the author's. - Litecoin (LTC) price surged by over 35% in the past week. - Litecoin overtakes Shiba Inu and Solana in terms of market cap. In the midst of the turmoil caused by Solana's insolvency in the cryptocurrency market, Litecoin (LTC) is starting to shine and climbed 15% this month, from \$54 to \$62. LTC price momentum may be a cryptocurrency market recovery signal. In the past 24 hours, the price of LTC has increased by 35% ahead of Bitcoin's halving, which will cut the rewards or LTC paid to miners for recording transactions on Litecoin's blockchain from 12.5 LTC per block to 6.25 LTC per block. Further, the LTC price climbed to \$81 in the morning, which is the highest price level in 6 months. Hence, Litecoin keeps moving up on the market cap ranks. This price level elevates LTC into the top 10 to rank 9th place in terms of market cap and overtaking Shiba Inu and excluding stablecoins. At the time of writing, LTC traded at \$78.98 with a market cap of \$6 billion, higher than Shiba Inu (SHIB) and Solana (SOL). Moreover, Litecoin surged by more than 30% in the last 24 hours and around 48% in the preceding month, as per CoinGecko. However, the two market leaders, Bitcoin (BTC) and Ethereum (ETH) have fallen 15% this month. Recommended for you

- Ankr's Sui Testnet RPC connects wallets, command-line interfaces, and dApps to the Sui blockchain. - Sui is a Layer-1 chain that uses the proof-of-stake mechanism. Ankr, one of the world's leading Web3 infrastructure providers, has become one of the Sui blockchain's first RPC (Remote Procedure Call) providers. It is the permissionless Layer-1 blockchain designed to let creators and developers generate Web3 experiences for the next billion consumers. Josh Neuroth, Ankr's Head of Product, said that "Sui's innovative technology and Move-based development, along with Ankr's simple blockchain connectivity, will offer a building environment that is simple and intuitive enough to accept a growing amount of new developers and projects. We are very excited to work with Sui to help Web3 developers build faster on what is seeming like a great new ecosystem." Pros of Collaboration Sui is a Layer-1 chain that utilizes the proof-of-stake mechanism and the Move programming language. It is intended to provide high throughput and low latency, executing over 120,000 transactions per second. Sui has attracted a wide range of DEXs, DeFi protocols, launchpads, NFT projects, social networks, wallets, and much more. Sui Testnet RPC by Ankr connects wallets, command-line interfaces, and dApps to the Sui blockchain. It functions as a messenger or blockchain router, relaying on-chain information between Sui nodes, dApps, and, ultimately, end users, to perform critical operations such as transactions, the wallet balance population, and ownership information retrieval. Ankr will add support for the Sui mainnet with additional docs, features, and tools to help Web3 developers expedite building once it is online. The Ankr Network provides tried-and-true, high-performance RPC node infrastructure to handle any request demand, significantly extending Sui's public RPC resources. Ankr is providing a geo-distributed and decentralized Sui RPC composed of several independent blockchain nodes running globally for low latency and reliable connections. To strengthen the global Sui network. Following this collaboration, Ankr is now the preferred RPC provider for 39+ blockchains and testnets. It includes Ethereum, BNB Chain, Solana, Polygon, and Avalanche. An RPC allows different apps to interface with the blockchain.

- The corporation did not disclose the exchanges or wallet addresses associated. - Recently the hacker started swapping 30K ETH for BTC and RenBTC. On Sunday, FTX reached out to other cryptocurrency exchanges for assistance, explaining that stolen monies were being moved from the compromised exchange to third-party wallets. The insolvent firm, now run by John J. Ray III, CEO of FTX, requested that its competitors "take all measures" to recover the money and return it to the bankruptcy estate. Though they did not call it theft outright, FTX did say that the money had been moved "without authorization" from FTX Global. Furthermore, the corporation did not disclose the exchanges or wallet addresses associated with the transfers. Worth Over \$650M A day after FTX filed for Chapter 11 bankruptcy in Delaware, the aforementioned money was stolen from the firm. ZachXBt, a pseudonymous blockchain investigator well respected by the DeFi community, estimated the worth of the hack to be over \$650 million. According to ZachXBt, a part of the stolen FTX money were split between two wallets. One on Solana and the other on Ethereum. Moreover, according to blockchain explorers, several of the coins were eventually bridged to other blockchains, such as Binance Smart Chain, Polygon, and Avalanche. Furthermore, as of Sunday, the Ethereum wallet associated with the lost FTX money had a balance of around \$258 million. It has 200,735 ETH and 8,184.9 PAXG tokens, with a total market value of \$238M and \$14M, respectively. Twenty other cryptocurrencies were stored there, all worth less than \$100. Recently the hacker started swapping 30K ETH for BTC and RenBTC. Following the deal alongside bearish market scenario, FTX went down 8% in last 24 hours. Recommended For You:

- An NFT royalty is a percentage of the profit made from a sale on the secondary market. - X2Y2 lauded OpenSea for finally standing up for creator royalties. A few weeks ago, it seemed as if the majority of the NFT market was rapidly moving away from accepting creator royalties in any form. OpenSea, the largest online marketplace, contemplated making them voluntary. However, resistance from creators ultimately led to OpenSea keeping royalties. And now another Ethereum marketplace is stating it would do the same. Launched this year and seeing heavy trade volume over the summer, X2Y2 has recently stated that it would be strictly enforcing creator-set royalties on all NFT collections. Including both ongoing and future endeavors on NFT. In fact, the percentage of the profit made from a sale on the secondary market, usually between 5 and 10 percent, OpenSea leads the way. Each day, X2Y2 has a similar royalty model that gives artists and collectors a say in how severely royalties were enforced in the marketplace. However, the option to completely enforce royalties was only available for particular sorts of NFT projects, such as artwork and access cards. Projects using a profile picture (PPF) were not permitted to choose this alternative. In a conversation on Twitter today, X2Y2 lauded OpenSea for finally standing up for creator royalties. And revealed that many freshly released projects were utilizing OpenSea's blacklist code. To prevent their NFTs from being sold on marketplaces that don't completely enforce royalties. In a recent blog post, X2Y2 said that, although it would no longer allow Flexible Royalty to be enabled for new projects using the OpenSea blacklist code, it will begin enforcing royalties for any previously enabled NFT projects. OpenSea replied on Twitter that it has removed X2Y2 from its marketplace blacklist. Allowing NFTs made by developers using the OperatorFilter code to be sold on X2Y2. Recommended For You:

- The court granted preliminary clearance for the sale of Voyager Digital's assets to FTX. - Although the deal could not be completed due to the fall of FTX. Binance U.S. is going to resubmit a bid. After FTX filed for Chapter 11 bankruptcy, the agreement with Voyager fell through. Voyager's exposure to FTX was \$3 million as well. It has been reported that Binance U.S. will recommence its offer to acquire defunct cryptocurrency lender Voyager Digital. As a result of FTX's Chapter 11 bankruptcy filing last week, Voyager cancelled the latter's offer to purchase the firm. Voyager said that in spite of selling its assets to FTX US for \$1.42 billion, no assets were transferred to the latter. More importantly, Voyager has a total of \$3 million in locked LUNA2 and locked SRM at FTX. Reviving the Sector Moreover, Patrick Hillmann, head of communications at Binance, has said that the company takes great responsibility as a market leader and the duty that comes with it, which is to help revive the cryptocurrency sector. Furthermore, the court granted preliminary clearance for a sale of Voyager Digital's assets to FTX last month. Most Voyager customers could have switched to FTX if the company's creditors had given their consent. As a result, 72 percent of clients' crypto holdings would be recoverable if bankruptcy was filed. Following the news that Binance.US would resubmit the offer, the price of Voyager Token (VGX) soared by more than 50% in a matter of hours. CoinMarketCap reports that one VGX token is presently worth \$0.433, with trading volume increased by almost a factor of ten. Within a day, the low was \$0.28 and the high was \$0.44. Shockwaves were felt across the cryptocurrency markets, Web3, and the dapp industry with the sudden demise of the FTX exchange and all of its associated entities. From business as usual to bankruptcies and fraud probes took less than a week. The whole Web 3.0 sector saw the effects of this happening. The Web3 sector was taken aback by the precipitous fall of FTX and its related coins, which had a value of \$32 billion at one point. A bank run on their stored assets, a withdrawal freeze, a potential takeover proposal from Binance (quickly withdrawn), investigations by the SEC, suspicious transfers of a large number of FTX tokens, the hack, and a global bankruptcy declaration for FTX and all affiliated parties all occurred in the span of a week in November 2022. In this report, DappRadar explains how the FTX fall affected the dapp market as a whole. Key Takeaways - FTX and Alameda Research had \$1.7 billion and \$177.3 million on November 8th respectively. At the time of this writing, there has been a 94% and 69% decline in the total value of the two wallets. - DeFi activity reached its high on November 9 and 10, hitting approximately 500,000 UAW on both days. DeFi activity has now returned to previous month's levels (400K dUAW). - There doesn't seem to be much of an impact from the FTX breakdown on gaming dapps and gaming chains like EOS, Hive, Wax, Ronin, and IMX, where gaming UAW peaked on November 10 at almost 900,000. - The DeFi TVL is down 20.60% since November 1st, falling from \$83b to \$65b. - Solana dropped its dUAW by 6.53% (46K) and the transactions count by 18.42% (1.5M) since October 31; its activity peaked on November 8 with 65K UAW. TVL in Solana fell by 18% in SOL terms and by 66% in TVL in USD terms. - Solana's NFT trading volume has grown by 380% since November 1, and the number of NFT sales has grown by 396%. The floor price of DeGods fell by 24.01% in SOL and by 69.11% in USD, while the number of listed NFTs rose by 58.04%. - On November 13, rumors circulated that Crypto.com would be going bankrupt, and since then, on November 20, Cronos has seen 15,000 dUAW in activity and 25,000 in transactions. The TVL is down 19% in US dollars but up 45% in CRO. - Since November 1st, NFT trading volume as a whole has declined by 68.60%, while the number of sales has fallen by 24.50%. The value of blue-chips collections has been stable, falling by just 9.78% in ETH terms on average and only 30% in USD terms. Conclusion: To sum up, cryptocurrency exchanges provide a far higher level of risk to investors and depositors than do more conventional financial institutions and markets. To complete a transaction, cryptocurrency exchange customers must first transfer ownership of their assets (meaning they are no longer depositors but creditors). Traders in cryptocurrencies should thus not keep their funds on a centralized exchange. If the price of a cryptocurrency decreases significantly, investors may be unable to sell their holdings on an exchange due to the high volatility of the cryptocurrency market. Clients may have a harder time regaining access to their digital currency if this occurs. Despite FTX's demise, blockchain technology is alive and well, serving as the backbone for numerous novel initiatives that will forever revolutionize our financial system and economies. Without flinching, the technology continued to serve all users and facilitate the transfer of assets between them.

- Apple Pay is the second most popular digital wallet in the United States. - Circle claims that conventional stores would profit from Apple Pay integration. Circle, the issuer of the USDC stablecoin pegged to the US dollar, has introduced support for Apple Pay in an effort to bring the crypto and conventional payment systems closer together. In a blog post published on November 15th, Circle made the news and projected that it may increase sales for crypto-native companies by allowing users to "buy crypto using Apple Pay on their preferred exchange." Circle claims that conventional stores would profit from Apple Pay integration because it will enable them to shift more retail payments to digital currency. More Options For Consumers Apple states that setting up Apple Pay for a company is a straightforward procedure and that consumers who use Apple Pay at stores that accept the payment method may use either Face ID or Touch ID to complete their purchases. Apple CEO Tim Cook said in the company's Q1 2022 earnings call that the company had over 1.8 billion active devices throughout the globe. Reports show that Apple Pay is the second most popular digital wallet in the United States, just behind PayPal. After Tether USDT, USDC is the most valuable stablecoin in terms of market capitalization. However, investors were scared off by Tether's modest depeg from the USD in the aftermath of the FTX collapse. On September 28 Circle announced that it would roll out its stablecoin across Polkadot (DOT), Optimism (OP), Near Protocol (NEAR), Arbitrum, and Cosmos (ATOM) blockchains. As the damage from the collapse of one of the world's top crypto exchanges extends across the sector, Tether and Circle have both denied having any exposure to FTX and Alameda. Recommended For You:

Tel Aviv, Israel, 15th November, 2022, Chainwire First-of-its-kind Web3 gaming event to connect the community, gaming studios, and influential industry participants to reward selected winners from over 200 games for 16 unique categories Echoing the rapid growth of blockchain-based gaming and rising investment inflows, Polkastarter will be hosting the first-ever GAM3 Awards to showcase the industry's progress in constructing engaging, entertaining Web3 games. To handle the award show's coverage, publicity, and promotion, MarketAcross is collaborating with Polkastarter and other leading industry participants as the event's official media partner. Slated for a Twitch broadcast on December 15, 2022, the GAM3 Awards are designed to highlight the best Web3 games delivering a fun and engaging experience for players instead of concentrating on token economies and gamification typical of blockchain gaming titles. The event's judges will evaluate over 200 Web3 games across 16 categories before doling out \$300,000 in prizes to the winning teams. Prizes are sponsored by a consortium of crypto's biggest names, including the Blockchain Game Alliance, Immutable X, Machinations, and Ultra, among others. Besides its role as the official event media partner, MarketAcross Managing Director John Itai Elizur will be serving as a judge on the awards panel. He will join over 30 other industry creators, investors, and experts who command extensive experience across both the Web2 and Web3 gaming landscapes to evaluate the nominated projects based on the quality of their gaming experiences before voting for the winners. The community and studios will also participate in selecting winners in award categories such as People's Choice, Games' Choice, and Best Content Creator. Joining the judging process are Ancient8 Co-Founder Nathan N, Animoca Brands Senior Manager Jesper Lindquist, Avalanche Head of Gaming Edward Chang, Avocado DAO CEO Brendan Wong, BNB Chain Business Development Director John Izaguirre, Fractal Founder Justin Kan, Lv.99 Co-Founder Yoshihisa Hashimoto, Polygon Studios Head of Global Games Urvit Goel, Sfermion General Partner Dan Patterson, Solana Foundation Tech & Product Leadership Matt Borg, VGG Head of Partnerships Sarutobi Sasuke, and many others. MarketAcross Managing Director John Itai Elizur is concluding the success of Web3 gaming ultimately depends on competing with AAA gaming titles to attract and engage a broader gamer audience. We truly appreciate the approach the GAM3 Awards embodies of basing awards on gameplay instead of tokenomics. While many play-to-earn titles are entering the space, we argue that any Web3 gaming triumph will be the function of great storylines, stunning graphics, and engaging gameplay, which is why this event's core philosophy is so indispensable. "We called it the "GAME" awards, with a 3, to keep the focus on the actual games themselves, get rid of the web3 jargon and negative connotation, while still paying tribute to the

underlying web3 tech that we believe will help shape the future of gaming. The GAM3 Awards is set to highlight the high quality of web3 games in the space and showcase the true potential of blockchain technology integration, without jeopardizing the quality of the games themselves.â€ stated Omar Ghanem, Head of Gaming at Polkastarter. About MarketAcross Established in 2013, MarketAcross is an accomplished public relations and marketing firm offering superior global coverage to ambitious blockchain-based projects. Through its ongoing efforts, MarketAcross has collaborated with the industryâ€™s leading exchanges and blockchains, including Binance, Polkadot, Polygon, and Solana. In addition to helping clients advance their missions through awareness campaigns, MarketAcross positions clients in front of relevant cryptocurrency and blockchain audiences worldwide. About GAM3 Awards GAM3 Awards 2022 is the inaugural edition of the annual web3 gaming awards. Hosted by Polkastarter Gaming, Polkastarterâ€™s first step at reimagining the future of blockchain gaming, which has grown to a community of over 70,000 gamers across the globe. The awards celebrate the highest quality web3 games, with the event boasting industry leaders, ecosystems and media outlets and rewards the top games developers and content creators with monetary prizes and services valued at over \$300,000. - FTXâ€™s FTT price surged by over 30% in the last 24 hours - Sam Bankman-Friedâ€™s Serum (SRM) witnessed a price increase of over 54%. The entire crypto industry is gossiping about everything related to Sam Bankman-Friedâ€™s FTX. Also, the global crypto community and regulator bodies are constantly keeping a close eye on the bankrupt FTX and its trading company Alameda Research. In the aftermath of the crypto exchange collapse, the overall cryptocurrency market witnessed a massive downtrend. At the time of writing, the global cryptocurrency market cap is \$883 billion, which is decreased by over 69% in the last year. Further, the cryptocurrency exchange FTX is about to get hit with a hammer. Also, the market is about to fall into this, it might be heavier than before which is caused by Do Kwonâ€™s Terra LUNA. However, FTXâ€™s native token FTT, and its connected tokens Serum (SRM) and Solana (SOL) are gaining some positive price momentum in the global crypto market. Letâ€™s look into it. FTX (FTT) Cryptocurrency exchange FTXâ€™s FTT, which sent shock waves in the global market, indicates a bullish trend in the last 24 hours. At the time of writing, FTT traded at \$1.95 with a price surge of over 30%. FTT has a market cap of \$598 million, which increased by around 20% in the last day but its trading volume decreased by 60%, as per CoinMarketCap. Serum (SRM) Project Serum is a decentralized exchange invented by Sam-Bankman-Fried, also the largest asset listed on the FTX balance sheet was \$2.2-billion worth of SRM. Alameda Research and the Solana Foundation are, as well, part of the Serum initiative. However, the balance of Solanaâ€™s DeFi Infrastructure Serum (SRM) traded at \$0.2974, soaring up by more than 54% in the last 24 hours. SRM has a market cap of \$78 million which climb by 51% in the last day and its trading volume has risen by 61% to \$263 million. Solana (SOL) Sam Bankman-Friedâ€™s sister company Alameda Research holds a huge volume of Solana tokens SOL. As a result of the FTX crash, Solana was in a trouble, although, Solanaâ€™s (SOL) price surged by around 4% in the last 24 hours and traded at \$14.67. SOL had a market cap of \$5 billion, rising by 4%. Still, Solanaâ€™s 24 hours trading volume declined by 20% to \$955 million.

Berlin, Germany, 15th November, 2022, Chainwire with a pitch contest, curated networking sessions and a dedicated mobile app to link people, projects and investors. Next Block Expoâ€™s ambition is to become the most promising networking opportunity for the European Blockchain Community in 2022. The first edition of the Next Block Expo event with a few thousand attendees will be held at the Berlin Station venue on 23 and 24 of November, linking the most influential people and projects in the web3 space. Brands that joined the event include: Ethereum Foundation, Binance Chain, Cosmos, Polygon, Near, Tezos, Solana, Aleph Zero and others. With presentations and talks at the main stage, roundtables, workshops and fireside chats, NBX is an excellent opportunity for startups and already established blockchain companies to discuss current challenges and new trends. For blockchain community it will be a unique opportunity to meet that many well-known brands under one roof. â€We know the value of networking and collaboration in blockchain. Our goal is to facilitate the process and create friendly space and innovative tools for everyone to connect, discuss and share ideas, as well as help startups to raise capital and investors to find golden opportunitiesâ€ says Next Block Expo co-founder, Tom Kopera. All Next Block Expo attendees will get access to a smart networking app dedicated to the event where they can: Find a list of attendees that fit their needs based on match-making algorithm Chat & schedule 1:1 meetings with other conference participants Create own, personal agenda for the conference by picking relevant sessions - Learn about promos, special offers and side events prepared by companies attending NBX and partners. Organizers, in collaboration with blockchain communities, prepared several special experiences, including: - Dedicated content and networking coffee for Women in Web3 - NFT Exhibition by Tezos & NFT Club Berlin - On-site podcast studio for interviewing founders run by Wom3n.DAO - Christmas Networking Session by TheStandard.io & DAO Researcher - Luxury cars exhibition by MetaDrivers One of the unique events planned to link investors looking for opportunities with startups seeking financing is the pitch contest. It is designed for early stage web3 projects to present their idea and solution they are building to a group of specialists. Web3 founders will be able to quickly pitch their idea to a group of angel investors, venture capital firms, software houses and industry veterans. At the end of the pitch contest, 3 best projects will be revealed by the jury. â€This is a unique opportunity for founders to pitch their ideas, gather worthy feedback, make valuable connections and acquire funding for their future ventures.â€ â€ says Tom Kopera. About Next Block Next Block Expo is an extension of the previous event series held under the name Cryptocurrency World Expo over the last six years. The 2022 edition will be held on a scale of a few thousand attendees and 100+ speakers. Berlin Station venue, where the event will be held, will offer 6 content themes for attendees related to DeFi, blockchain gaming and GameFi, scaling and infrastructure, web3 discovery and fundraising and investing. For more information, check out the website <https://nextblockexpo.com/> and follow NBX on social media: <https://twitter.com/nextblockexpo/> Resources for participants, sponsors and exhibitors: <https://linktr.ee/nextblockexpo/> Contact Kacper Juraszek kacper@nextblockexpo.com

Trust Wallet, the market leader in self-custodial and multi-chain wallets, has released a new browser extension wallet. All EVM chains and Solana are supported, and it works with popular web browsers like Chrome, Brave, and Opera. Trust Walletâ€™s mobile wallet is a leading crypto mobile wallet in the world, with over 60 million downloads and over 10 million monthly active users. The browser extension is designed to work in tandem with the mobile wallet. Trust Wallet, in both its desktop and mobile versions, provides improved web3 accessibility and a more unified wallet experience across platforms. Over 8 million tokens from every EVM chain and Solana may be safely stored, sent, and received with the Trust Wallet browser extension. Ethereum, BNB Chain, Polygon, and Avalanche are all supported, and users may request support for more EVM chains. The addition of other non-EVMs is expected to be announced in the following months. Trust Wallet Extension further enhances the extension walletâ€™s support for several blockchains. With network auto-detection, dApp users donâ€™t have to worry about manually adding networks to their setup. Since there is no longer any need to manually add tokens, asset tracking is enhanced, and there are enough tokens to go around (up to 8 million). The browser extension offers an enhanced dApp experience for users to efficiently find items outside of centralized exchanges (CEXs), such as Web3 games, metaverse, DeFi, tokens not available on CEX, and more, by combining all these advantages. Trust Wallet CEO Eowyn Chen said: â€Our usersâ€™ number 1 request is the browser extension and they want one with the same good user experience as the Trust Wallet mobile app and the multi-chain coverage. We build for users to empower them whichever device they prefer, to continue to access the exciting dApps on different chains. This is our initial step, and we will listen to users and developersâ€™ feedback to improve.â€ The Trust Wallet browser extension will soon have the same functionality as the mobile app, including support for multiple wallets, NFTs, fiat on-ramp providers, and non-EVM blockchain integrations. But there are special features, like support for hardware wallets that will debut on the extension first.

The GAM3 Awards are the first of their kind and have already attracted the attention of some of the biggest names in the web3 gaming sector. Polkastarter Gaming will be hosting the event on December 15 to award the top web3 games of the year based on votes from industry professionals and the community. In all, there are 18 awards up for grabs, and theyâ€™re all going to deserving web3 game and content makers. Justin Kan, Founder of Fractal; Urvit Goel, Head of Global Games at Polygon Studios; Itai Elizur Managing Partner at Market Across; Rachel Levin, Director of Venture & Strategy at ImmutateX and Matt Sorg, Head of Technology at Solana Foundation, are among the judges who will decide which studios win awards. Ex-Square Enix CTO Yoshihisa Hashimoto, who oversaw the production of Sonic: Unleashed and Final Fantasy XIV Online, and ex-Senior Director of Partnerships at Electronic Arts (Edward Chang) are just two of the many gaming industry heavy hitters on the all-star jury. There are a number of high-ranking alums of companies including Electronic Arts, Riot Games, Zynga, Xbox Game Studios, Amazon Gaming, and Unity Technologies on the jury, including: - Sarutobi Sasuke, Head of Partnerships at YGG - Dan Patterson, General Partner at Sfermion - Brendan Wong, CEO at Avocado DAO - Jesper Lindquist, Senior Manager Web3 Gaming at Animoca Brands - Marco van den Heuvel, Co-Founder & CEO at Merit Circle - David Hanson, Founder & CEO at Ultra - John Izaguirre, BD Director at BNB Chain - Abhimanyu Kumar, Co-Founder at Naavik - Nathan N., Co-Founder at Ancient8 The GAM3 Awards were created to celebrate the finest web3 games and to demonstrate blockchainâ€™s positive impact on the gaming industry; they will be aired live on the Twitch, YouTube and Polkastarter Gaming channels to guarantee a comprehensive and comprehensive audience. The event will involve a jury of over 30 gaming and web3 thought leaders, ecosystem partners, and media outlets. Winners of the first GAM3 Awards will get not just fame and glory, but also prizes totaling \$300,000 from companies including ImmutateX, Blockchain Game Alliance, Machinations, Naavik, and Ultra. The event will highlight the top games available on the web3 platform and award the creators that work tirelessly to provide innovative and engaging games. The categories for â€Bestâ€ awards are as follows: action game, mobile game, adventure game, casual game, RPG, shooter game, graphics, strategy game, card game, multiplayer game, esports game, graphics, and content creator. The Most Anticipated Game, the Gamesâ€™ Choice, and the Peopleâ€™s Choice will all get prizes, with additional categories planned for future editions. The juryâ€™s decision will count for 90%, while the remaining 10% will be determined by community vote. Only the Peopleâ€™s Choice and Best Content Creator categories will be voted solely by the community, while the Gamesâ€™ Choice category will be decided by game companies voting for their own version of Game of the Year. Midway through November, Polkastarter Gaming will open its website for public voting in anticipation of the final results being announced in December, after the jury has announced its nominated shortlist by announcing its top five picks in each category. The core loop, graphics, accessibility, replayability factor, fun elements, and overall playing experience, are all going to be considered by the jury. In order to be considered for the prizes, games must include and make use of blockchain technology without compromising the quality of the core gaming experience. Justin Kan, Founder of Fractal, the awardsâ€™ content partner stated: â€We are excited to partner with Polkastarter Gaming on this event, it is truly a step in the right direction for the industry, and the first of its kind in web3 gaming.â€ The event also aims to honor the next generation of web3 gaming creators by encouraging game studios to submit nominations of their own employees, developers, and professionals from all fields who they believe best represent the future of web3 gaming and deserve to be included in the first â€GAM3 Changersâ€ list. The GAM3 Awards are designed to shine a light on cutting-edge web3 gaming and demonstrate the actual potential of blockchain technology integration without compromising the gamesâ€™ quality. Omar Ghanem, Head of Gaming at Polkastarter stated: â€We called it the â€GAMEâ€ awards, with a 3, to keep the focus on the actual games themselves, get rid of the web3 jargon and negative connotation, while still paying tribute to the underlying web3 tech that we believe will help shape the future of gaming.â€ Given the scope of the event and the ambitious nature of the initiative as shown by the high-caliber, internationally-representative judges and partners, these awards have the potential to become yearly rituals for the sector as a whole.

Seoul, South Korea, 14th November, 2022, Chainwire ARGOS ID is delighted to introduce the worldâ€™s first Travel Rule solution for crypto wallets. The service brings full coverage on verifying unhosted wallets which virtual asset service providers (VASPs) find challenging in the current stage. As of the FATF guidance on verifying the originator and beneficiary information on virtual asset transactions, knowing the identities of the crypto wallet holders have been required. In order to comply with the FATFâ€™s guidance regarding unhosted wallets, jurisdictions have started applying enforcement and supervisory measures to local VASPs. To jurisdictions looking for a simplified Travel Rule solution, especially for personal crypto wallets, ARGOS ID plays a key role. ARGOS ID brings the following benefits to VASPs: Easy connection to unhosted wallets With ARGOS ID, crypto wallet holders can easily verify the information of their multiple crypto wallets. Creating a crypto wallet is done without submitting any personal information. In order to verify the holder of the crypto wallet, it is necessary to verify the identity information of the wallet holder. ARGOS ID helps on identifying the unhosted wallet users to both the originator and the beneficiary. After the creation of the ARGOS ID users can connect to multiple crypto wallets such as MetaMask, Phantom, WalletConnect, and more with just a one-time identity verification process (KYC). Digital ID suitable for Web 3 environment ARGOS ID provides an ideal environment where individuals can manage information by themselves. It is suitable for the Web 3 environment as ARGOS ID users can decide which information to delete or revise after completing crypto wallet verification. Information includes SMS login, verified crypto wallet, and photos submitted for ID and selfie during the KYC. The owner of the wallet can manage his or her

personal information as ARGOS ID is a self-sovereign digital ID. Simplified procedure for verifying multiple personal wallets Connect multiple crypto wallets with one-time KYC (Know Your Customer). The KYC process must be completed after creating ARGOS ID. Currently, ARGOS ID supports 5 blockchain networks æ” Ethereum, Solana, Binance Smart Chain, Polygon, and Klaytn æ” and more will be added in the future. Post creating ARGOS ID with social login, KYC is performed. Once KYC is completed, multiple crypto wallets such as MetaMask, Phantom, and WalletConnect can get connected and verified through ARGOS ID. Virtual asset transactions available to the Third Party ARGOS ID lets virtual asset transactions be possible for a third party, which means sending the virtual asset to non-VASP customers is also possible. For example, when a VASP customer wishes to send virtual assets to a third party, a person who is not a VASP customer, ARGOS ID can also be applied. Crypto wallet verification is available with ARGOS ID to both VASP customers and non-customers. Once both crypto wallets are verified, exchanging virtual assets between customers and non-customers becomes possible. As both the senderæ”s crypto wallet and the receiveræ”s wallet have been verified including KYC, it is expected to alleviate the inconvenience of numerous virtual asset exchanges in the current stage. ARGOS ID is a digital ID suitable for the Web 3 environment. Apply ARGOS ID solutions to your service as it supports you in meeting regulatory compliance on sending and receiving virtual assets. Safely secure the necessary senderæ”s and receiveræ”s information with ARGOS ID. With simple API and Web SDK, get ARGOS ID in your service ready without any delay. Experience the simple, fast, and easy integration. About ARGOS ARGOS has started the business aiming to provide seamless KYC. With the advent of Web 3 and the rise in the crypto industry, ARGOS has expanded its business into ARGOS ID. ARGOS ID aims at providing a Travel Rule solution for verifying unhosted wallets. Make Unhosted Wallets Compliant. For more information, visit: Website | Twitter | LinkedIn | Medium Contact Marketing Manager Jieun Lina Kim Fullstack Inc. jieunkim@argoskyc.com 82-10-6480-3423

- Serum built over the Solana network has undergone forking for development. - Tough times in the crypto market have pulled in various builders to stabilize the Defi. FTXæ”s hack on November 12th has seemingly compromised many Defi platformæ”s in assistance with the organization. Serum, the crypto lending hub built over the Solana network has undergone forking for development. This is relatively a recompensive measure by the Solana developers. Solana co-founder, Anatoly Yakovenkoæ”s tweet: Afaik, the devs that depend on serum are forking the program because the upgrade key to the current one is compromised. This has nothing to do with SRM or even Jump. A ton of protocols depend on serum markets for liquidity and liquidations. æ” toly 0ÿ?0ÿ†, (@aeyakovenko) November 12, 2022 FTX filed an asset report for bankruptcy, and one of the assets listed was \$2.2 billion of cryptocurrency in the overall \$9.6 million assets. And as per Anatolyæ”s tweet, the Serum DAO is not the one that is accessing the upgrade key rather it is switched to the FTX. Post these all happening, many halted or pulled temporary pause over the Serum for liquidity option. Jupiter, the crypto aggregator announced the stoppage via their Twitter account. Jupiter stated: æ”Confirming that we turned off @ProjectSerum as a liquidity source a few hours ago due to security concerns about upgrade authorities, and we also encouraged all our integrators to do the same.æ” Defi Stabilization The whole of Solana and its relative programmers are dedicated to regaining the serumæ”s decentralization. Tough times in the crypto market has pulled in various sector of technical intelligence to withhold the originality of decentralized finance. Builders of the defi network are holding each otheræ”s back and showing their support. æ”Decentralization doesnæ”t mean an absence of leaders, but an abundance of themæ”, Raj Gokal, the co-founder of Solana has emphasized the important part played by developers. The immediate response by those coders stabilized the decentralized finance during difficult situations. Recommended For You

- The hacker is converting his or her crypto holdings to unfreezable cryptocurrencies. - Anyone using the FTX app is asked to refrain from updating or installing it. The FTX cryptocurrency exchange is seeing millions of funds disappear from user wallets. Nearly \$600 million in unusual transactions were recorded in only a few hours, with some withdrawals including a shift from Tether to DAI. Moreover, the drainer is allegedly withdrawing STETH Solana, BNB, LINK, AVAX, MATIC, and other tokens as well. The hacker is converting his or her crypto holdings to unfreezable cryptocurrencies like DAI and ETH. Furthermore, the admin of the FTX Community Chat channel sent a message in the Telegram group. Claiming that the FTX network had been compromised and that the FTX applications were malicious software. Update Allegedly Started? Users were told that visiting the FTX website might result in the installation of Trojans. And that they should uninstall the software immediately. Yet it is unclear whether the administrator has quit. On November 12, a substantial quantity of money abruptly moved out of FTX and FTX US accounts and into a single wallet. Sparking rumors that bankruptcy proceedings had begun. Moreover, the on-chain data and reports revealed that FTX wallets had been compromised. And exploiters have received insider aid to achieve root access. Furthermore, with the 4byte selection æ”0x3d24a1ff,æ” which is the hash of the name of the function æ”Rug Pull All,æ” Foobar verified that an on-chain message was delivered to the recipientæ”s account. Moreover, an update was allegedly started with the intention of disclosing all private keys, leading some to conclude that this was an inside job. Anyone using the FTX app is asked to refrain from updating or installing it. Recommended For You:

From FTX alone 800 million SHIB was transferred with just three transactions. The total amount of SHIB burned in the last 24 hrs reached nearly 12 billion. SHIBA Inu (SHIB), the meme token with a Japanese guard dog representation has become the talk of the town again. The dogecoin killer coin was one among the many other altcoins that suffered due to the dog of FTX.com. A few days back, whales shifted off nearly 1.5 trillion SHIB from different exchanges. From FTX alone 800 million SHIB was transferred with just three transactions containing huge lumps of Shiba Inu. As of Coinbase, 183 billion SHIB was sent to an unknown wallet. Additionally, 108 million SHIB was transferred from one anon wallet to another. SHIB overtook Solana (SOL) in the market capitalization rank, but it was not long-lasting as SHIB drifted from its long-held \$0.00001 value. Currently, the value of the token is \$0.00009751, and the trading volume in the past 24 hrs is \$301 million, as per CMC data. Optimistic Shiba Inu Community Though the crypto market situation is not very favorable for the SHIB, the community still holds on. They are very confident about the bounce back from the FTX crash. Shiba Inuæ”s technical team is also expanding the origin. SHIBBURN is prominent among the SHIB members, as itæ”s their go-to solution for maintaining the tokenæ”s balance. In the last 24 hrs, the total amount of SHIB burned reached nearly 12 billion. In the past 24 hours, there have been a total of 11,999,999 \$SHIB tokens burned and 2 transactions. Visit <https://t.co/t0eRMnxz3T> to view the overall total of \$SHIB tokens burned, circulating supply, and more. #shibarmy æ” Shibburn (@shibburn) November 12, 2022 The recent release of ShibaEternity has also backed a huge fan base, and the L2 Shibaarium is all around the corner. The Shibaarium Layer two blockchain is under development for over a year, Shytoshi Kusama has also hinted at its launch by the start of this month.

Blockchain Crypto Investment Group, LBank Labs, announces the establishment of their new crypto investment fund targeted towards web3 development in Africa. LBank Labs plans to establish a series of regional development funds, including regions such as Korea, South East Asia, and more. This is the first of the sequence of new investment funds from LBank Labs. Africa is one of the areas with a lot of untapped potential for blockchain expansion. With new member Czhang on board LBank Labs, the investment institution is looking globally. Czhang is currently visiting many countries in North Africa and followed by other regions in the continent. Throughout November, Czhang, as a representative of LBank Labs, will be talking with potential African collaborators. æ”I think the future is in Africa,æ” said Czhang, æ”in terms of blockchain adoption, LBank Labs hopes to provide support for local communities and give local projects the push that they need to start up. æ” LBank has been pushing educational efforts in the MENA region for some time, having community managers in Nigeria, Ghana, Tunisia, and more. æ”Africa is a diverse place. We believe the key to blockchain development in Africa, and anywhere really, is education. Giving people the tools to understand blockchain technology will help them to see why it is such a world-changing thing. We really hope to have a strong bond with locals. æ” a representative said. LBank has also expanded to other areas, recruiting community managers in Cameroon, Kenya, and so on. About LBank Labs LBank Labs is an independent blockchain investment institution under the top global crypto exchange LBank. LBank Labs currently has a total fund size of 50 million USD. Registered in Asiaæ”s crypto hub Singapore, LBank Labs includes Venture Capital, Hedge Funds, and also Fund of Funds. Since its inception, LBank Labs invested in many publicly early stage public-chain projects such as VEC and NEO. Starting in 2020, LBank Labs invested in nearly 100 ecological projects, such as Polkadot, WIF, and Solana. About LBank LBank is one of the top crypto exchanges, established in 2015. It offers its users specialized financial derivatives, expert asset management services, and safe crypto trading. The platform holds over 7 million users from more than 210 regions worldwide. LBank is a cutting-edge growing platform that ensures the integrity of usersæ” funds and aims to contribute to the global adoption of cryptocurrencies. - Kris emphasized that transparency is more vital than ever during the current industry crisis. - OKX, PoloniX, Kucoin, Huobi Global, and Binance are shifting into Proof-Of-Reverse. As a result of the collapse of the competitor exchange FTX, Crypto.com CEO Kris Marszalek has become the newest cryptocurrency corporation to pledge to æ”audited Proof-Of-Reserve.æ” We share the belief that it should be necessary for crypto platforms to publicly share proof of reserves and <https://t.co/pF4q2P9nFR> will be publishing our audited proof of reserves. æ” Kris | Crypto.com (@Kris) November 10, 2022 According to Kris, transparency is more crucial than ever during the industryæ”s current crisis, and user and fund safety and security are of the utmost importance. On November 8, CZ tweeted that Binance has begun to switch to Proof-Of-Reserve in an effort to increase transparency. The CEO of Crypto.com instantly expressed his opinion following the companyæ”s decision to halt USDC and USDT deposits and withdrawals through the Solana network. By assuring its users in the email that they could still withdraw USDC and USDT at any moment via other aided networks such as Crossover and Ethereum, the exchange gave the impression that other mentioned networks had not been damaged by recent industry trends. The Exchange is shifting to Binance, Gate.io, Koinex, PoloniX, Bitget, Huobi, OKX, Deribit and Bybitæ”re shifting into Proof-Of-Reverse.

Goldman Sachs, PayPal Ventures, Amex Ventures, Citi Ventures and other leading financial institutions and their venture capital divisions participated in the financing, supporting TRMæ”s mission to create a safer blockchain ecosystem SAN FRANCISCOæ” (BUSINESS WIRE)æ”TRM Labs, a leading blockchain intelligence company, has announced a \$70 million expansion to the companyæ”s Series B funding round, bringing the raise to \$130 million in total. The investment was led by Thoma Bravo, a leading software investment firm, with participation from Goldman Sachs and previous TRM investors including PayPal Ventures, Amex Ventures, Citi Ventures, and others. The expansion follows TRMæ”s \$60 Million Series B Raise in December 2021 led by Hedge Global. TRMæ”s blockchain intelligence solutions are utilized by law enforcement agencies, regulatory bodies, tax authorities and financial intelligence units worldwide to support investigations and analysis of crypto-related fraud and financial crime. TRMæ”s private sector clients include some of the most prominent organizations in the crypto and financial services space, including businesses like Circle, Shopify, MoonPay, OpenSea, Uniswap and others who use TRMæ”s blockchain intelligence platform to detect illicit or fraudulent financial activity and meet sanctions and anti-money laundering (AML) regulatory requirements. With this funding round, TRM expects to make additional strategic investments in product development and talent to deliver the most effective, accessible tools to counter illicit finance and fraud in the crypto space and to meet demand for its Incident Response services and training programs. æ”Demand has never been stronger for solutions that help protect crypto users, impede illicit actors, and support blockchain-based innovation,æ” said Esteban CastaÃ±o, co-founder and CEO of TRM. æ”As the industry continues to mature, TRM is setting the standard for data products and training that empowers enterprises and governments to combat fraud and financial crime, even as new threats emerge.æ” æ”TRM has differentiated itself as a premier enterprise-grade blockchain intelligence solution to the public and private sector, with a unique breadth of asset coverage, cross-chain analytics, and level of product innovation,æ” said Christine Kang, a Principal at Thoma Bravo. æ”In a rapidly evolving regulatory landscape, TRMæ”s capabilities are ever more critical to helping organizations scale and adapt risk management needs. Weæ”re excited to partner with Esteban and his team to support their goal of creating a safer, more inclusive, financial ecosystem.æ” Since launching in 2018, TRM has grown revenue 490% year-over-year and expanded its team from four people to more than 150, with significant growth in teams across the United Kingdom, Singapore, Australia, Brazil and the UAE over the last two quarters. Members of TRMæ”s team include former law enforcement officers from the UKæ”s National Crime Agency, Australian Federal Police, IRS-Criminal Investigation, HSI, FBI, U.S. Secret Service, U.S. Department of Justice, U.S. Department of the Treasury, DEA, and others. Since the initial Series B round in December 2021, the company has also: - Acquired the UK-based investigations and training firm CSITech, a global leader in crypto and blockchain investigative training founded by Nick Furneaux, an internationally renowned expert in blockchain forensics - Launched Chain Abuse, a free community-powered scam reporting platform that empowers anyone in the crypto economy to warn others about scams, hacks or other fraudulent activity as they encounter it - Integrated with additional blockchains including Solana, Polygon, and Avalanche to
