

cryptocurrency markets are notorious for their volatility, presenting both opportunities and risks for investors. Among the various players in this realm, Shiba Inu smart money often stands out for its strategic moves and ability to navigate these turbulent waters. Recently, Shiba Inu smart money made headlines when it offloaded a staggering \$14,000,000 just before the infamous 30% dip in SHIBAC's value. However, what caught the attention of many is where this smart money is flowing next: towards Hump (HUMP), a SHIB rival that has been voted the fastest-growing altcoin in April 2024. Analyzing SHIBAC's Price Action As SHIB approached a crucial resistance level in the \$0.0000240 to \$0.0000260 range, astute observers noted a distinct pattern in its price action. The market sentiment signalled a probable adherence to this resistance zone. Sensing the impending downturn, Shiba Inu smart money swiftly took action. With a shrewd move, approximately \$14,000,000 worth of SHIB was offloaded just before the coin experienced a significant 30% dip. This preemptive measure spared the smart money from potential losses, showcasing the prudence inherent in their decision-making process. This strategic manoeuvre not only protected their capital but also positioned them to capitalise on emerging opportunities. The subsequent redirection of funds towards Hump (HUMP), the fastest-growing altcoin in April 2024, exemplifies their ability to pivot dynamically within the volatile cryptocurrency landscape. This calculated approach underscores the importance of reading market signals and executing timely decisions to navigate the ever-changing currents of the crypto market. Hump (HUMP): The Fastest Growing Altcoin Amidst SHIBAC's Turbulence With SHIBAC's recent price dip, Hump (HUMP) emerged as the clear winner. Voted as the fastest-growing altcoin in April 2024, Hump (HUMP) has performed exceptionally well, with its price rising from \$0.000001 to \$0.000002. This success is attributed to its unique value proposition, which includes a deflationary tokenomics model, a robust community, and a strong focus on innovation. Positioning Hump as a formidable competitor in the cryptocurrency space. Its exponential growth not only underscored its potential but also highlighted the shifting dynamics within the market. As investors sought out new opportunities amidst the volatility, Hump's rapid ascent provided a compelling narrative of innovation and community-driven success. This influx of interest further solidified Hump's position as a rising star in the crypto galaxy, signalling a new chapter in the evolution of meme coins and decentralized finance. The Smart Money Shifts Focus to Hump Buoyed by its success, Shiba Inu smart money swiftly redirected its attention towards Hump. Recognizing the potential for exponential growth, the smart money commenced accumulating significant quantities of Hump tokens. With experts forecasting a staggering 4000% rally before the month's end, the allure of Hump as an investment opportunity became irresistible. This strategic move not only solidified Shiba Inu smart money's position as astute market players but also reflected the growing prominence of Hump within the cryptocurrency landscape. Unveiling Hump's Unprecedented Pumps and Market Performance As it solidifies its position on prominent platforms like CoinMarketCap and CoinGecko, anticipation mounts for upcoming listings on centralized exchanges (CEX). The nascent coin's trajectory indicates a promising future, poised to challenge established norms and redefine the landscape of meme coins within the Solana ecosystem. With a total supply of 6,900,000,000 tokens, Hump (HUMP) embodies the spirit of innovation and ambition within the Solana meme coin sphere. Its rapid ascent to prominence underscores the dynamism inherent in the cryptocurrency market, where new contenders can swiftly rise to challenge established giants. Conclusion: Navigating the Crypto Galaxy with Hump (HUMP) As Shiba Inu smart money strategically reallocates its assets to capitalise on emerging opportunities, the spotlight now shines brightly on Hump (HUMP). With its unparalleled growth trajectory and disruptive potential, Hump represents a compelling investment proposition in the ever-evolving landscape of cryptocurrency. As investors brace themselves for the next chapter in this exhilarating saga, one thing remains abundantly clear: in the crypto galaxy, innovation knows no bounds, and the journey promises to be as exhilarating as it is unpredictable. Identifying the most promising assets as a task entrusted to only the most astute analysts. Recently, a prominent crypto expert unveiled their top picks for the best crypto coins to buy in 2024, shining a spotlight on three standout contenders: Retik Finance (RETIK), Dogwifhat (WIF), and Bitget Token (BGB). These coins have captured the attention of investors with their remarkable growth trajectories and innovative features, positioning them as frontrunners in the race for crypto supremacy. The Analysts' Best Picks Retik Finance (RETIK): The Rising Star of 2024: Retik Finance (RETIK) has emerged as a formidable force in the crypto sphere, experiencing exponential growth from its humble beginnings. Within a remarkably short period, RETIK has skyrocketed from \$0.038 to \$0.12, with market analysts predicting an astronomical rise to \$50 by the end of 2024 – a staggering increase of 41566.67%. The platform's vision to decentralize the banking sector through its comprehensive ecosystem, including the Retik Wallet, DeFi Debit Cards, and Retik Pay, has garnered widespread acclaim which was scheduled to launch in Q4 of 2025 but launched way earlier than the scheduled date. With its innovative approach and unwavering commitment to empowering individuals and businesses worldwide, RETIK stands poised to revolutionize the financial landscape. Dogwifhat (WIF): Riding the Parabolic Wave Similarly, Dogwifhat (WIF) has captured the imagination of traders and investors alike with its meteoric rise in 2024. Inspired by the iconic Dogecoin, WIF has surged by an impressive 133.16% in the past month alone, reaching a new all-time high of \$4.85 on March 31st. Despite its humble beginnings at \$0.1528 at the start of the year, WIF is currently trading at \$3.87, with experts predicting a further climb to \$20 by the end of 2024 – a remarkable increase of over 50x. The Solana-based meme token has garnered widespread attention for its parabolic run and shows no signs of slowing down, solidifying its position as one of the top picks for savvy investors in 2024. Bitget Token (BGB): Empowering Crypto Enthusiasts Bitget Token (BGB) completes the trifecta of top crypto coins for 2024, riding a wave of impressive growth and market momentum. As the platform token of Bitget, BGB aims to create a simple, secure, and accessible crypto ecosystem, offering exclusive perks to its holders. With a surge of 47.24% in the past month, BGB reached a new all-time high of \$1.38 on April 3rd, surpassing all expectations. Starting the year at \$0.5794, BGB is currently trading at \$1.32, with experts predicting a surge to \$15 by the end of 2024 – an impressive increase of over 10x. The platform's commitment to fostering growth and innovation has earned it a coveted spot among the top crypto picks for the year. DOGE Falls Short While RETIK, WIF, and BGB have captured the attention of the crypto community with their impressive growth trajectories and innovative features, one notable absence from the list is Dogecoin (DOGE). DOGE has been showing a downtrend lately despite rising by 13.49% in the past month. Looking at DOGE's price forecasts and technical analysis, we find a wide range of predictions for the upcoming years as research shows that DOGE has deflated by 17.12% over the past 7 days. For 2024, forecasts suggest that DOGE could experience small growth, with predictions indicating a potential to reach highs slightly above its current price after it has gone down by 9.11% in the last 24 hours. Conclusion The crypto market continues to evolve at a rapid pace, presenting investors with a myriad of opportunities and challenges. While RETIK, WIF, and BGB have emerged as top contenders for the title of the best crypto coins to buy in 2024, Dogecoin (DOGE) finds itself on the sidelines, unable to match the growth potential of its counterparts. RETIK, WIF, and BGB are poised to do a whooping 1500x, 50x, and 10x respectively while DOGE will hardly make 2x by the end of 2024. As traders navigate the ever-changing landscape of the crypto market, careful consideration of each asset's merits and drawbacks is essential to making informed investment decisions and capitalizing on emerging opportunities. Ethereum may be classified as a security by the SEC as per Michael Saylor. - Instead of flat-out rejecting these petitions, an analyst thinks the SEC will delay their approval. The U.S Securities and Exchange Commission's (SEC) judgment on Ethereum ETFs is imminent, and professionals in the field are becoming more skeptical. Crypto analyst Michaël van de Poppe has voiced his skepticism on the May approval of Ethereum Spot ETFs, taking the lead in the discussion. Michael Saylor, CEO of MicroStrategy, shared his negative outlook on the future of Ethereum ETFs and shares his opinions with others in the industry. Application Delay Anticipated This struggle is being led by three of the seven candidates: Hashdex Nasdaq, Ark 21 Shares, and VanEck. Given the SEC's ongoing investigation into the underlying securities concerns, they are up against a daunting task. Instead of flat-out rejecting these petitions, Van de Poppe thinks the SEC will delay their approval. The emphasis may now be on possible approvals later in the year, depending on this decision. Michael Saylor predicts that the SEC will take a harder line on cryptocurrencies, especially Ethereum. According to his forecast, Ethereum may be classified as a security by the SEC by the summer of this year. Applications for the Ethereum Spot ETF, both existing and prospective, may find this development problematic. Approval procedures for these ETFs may encounter substantial legal

hurdles if Ethereum is classified as a security. Major cryptocurrencies such as Ethereum, BNB, XRP, Solana (SOL), and Cardano (ADA) might all be impacted by this categorization. More comprehensive regulation may result from the far-reaching effects on the cryptocurrency sector. Companies like BlackRock, who is also vying for an ETF, may experience delays or rejections in the approval process. - Memecoins shows little resilience amid the market downturn. - Bitcoin slips below \$60K, hits two-month low. In a notable downturn, the cryptocurrency market experienced a significant dip, with Bitcoin, the leader of the pack, plunging below the \$60,000 mark, hitting a two-month low of \$56,465. This downward trend was mirrored by many altcoins, painting the market red. However, amidst the sea of losses, Solana and certain memecoins bucked the trend, showcasing resilience. Despite the general bearish sentiment, the memecoin market demonstrated surprising strength, with an overall market cap increase of 2.12%, reaching \$47 billion. However, trading volume saw a 9.73% decline, resting at \$5 billion. Over the past 24 hours, memecoins experienced significant volatility. Notable performers include PEPE, up 17%; WIF, up 11%; BONK, up 18%; and FLOKI, up 10%. But as an unexpected downturn, while some memecoins saw slight corrections following their initial surges, they still maintained gains. PEPE is now up by 3%, BONK by 4.8%, WIF by 0.99%, and FLOKI down by 1.73%. These fluctuations have surprised many traders, highlighting the unpredictable nature of the memecoin market. Meanwhile, Kain Warwick, the founder of Synthetix, emphasized the potential value of memecoin trading for decentralized exchanges (DEXs), citing its ability to attract non-traditional DeFi traders and drive significant flows to these platforms. Despite a downturn in the cryptocurrency market, memecoins have demonstrated a slight resilience and potential value for decentralized exchanges. Which in turn made the investors raise hope on their notable performers defying the trend.

- At the MicroStrategy World 2024 conference on May 2, he made remarks on ETH. - BTC, he said, is the only cryptocurrency that has gained complete institutional support. A strong Bitcoin advocate, Michael Saylor, executive chairman of MicroStrategy, has said that Ethereum is a security rather than a commodity. At the MicroStrategy World 2024 conference on Thursday, May 2, he made some remarks on ETH. Michael Saylor did not stop at criticizing Ethereum and labeling it a security; he went on to say that the US SEC is very unlikely to ever authorize a spot Ethereum ETF. His remarks come only twenty days before the SEC's ultimate decision-making deadline of May 23, when the spot Ethereum ETF applications will be approved or denied. His prediction continued with the categorization of BNB, Solana (SOL), XRP, and Cardano (ADA) as unregistered securities, along with other cryptocurrencies lower on the hierarchy. Saylor stressed that not a single one of them would ever be accepted by Wall Street or put in a spot ETF. Strong Bitcoin Backing Bitcoin (BTC), he said emphatically, is the only cryptocurrency that has gained complete institutional support. He said that neither would it be another one and referred to Bitcoin as the "singular universal" cryptocurrency that was appropriate for investments by large institutions. The founder of MicroStrategy is well-known for his steadfast commitment to Bitcoin. MicroStrategy revealed in the first quarter that it added \$1.65 billion worth of BTC to its corporate reserves, and Saylor's statements emerged soon after. Just two days ago, MicroStrategy introduced MicroStrategy Orange, a Bitcoin-based decentralized identification (DID) product. In addition to having a sizable amount of Bitcoin on hand, the firm has been actively working to strengthen the Bitcoin ecosystem. Highlighted Crypto News Today:

- Customers get a new option to purchase and trade crypto that is completely frictionless. At least 436 million PayPal customers will be able to utilize this service. United States users may now purchase and trade more than a hundred different cryptocurrencies, including Bitcoin and Ethereum, using PayPal transactions via wallet, bank transfers, or debit cards, thanks to the new collaboration pact between MoonPay and PayPal. A variety of digital assets, including Bitcoin, Ethereum, Litecoin, PayPal USD, and Bitcoin Cash, were formerly available for purchase via PayPal. Solana (SOL), Tether (USDT), Dogecoin (DOGE), Cardano (ADA), Polygon (MATIC), and many more are now available to them. New Option to Purchase and Trade Crypto As stated in MoonPay's X post, this partnership establishes the crypto infrastructure business as the pioneering on- and off-ramp provider to include PayPal. MoonPay claims that by doing this, it is giving PayPal customers a new option to purchase and trade cryptocurrencies that is completely frictionless. At least 436 million PayPal customers will be able to utilize this service to convert fiat currency to cryptocurrency via their wallets, bank transfers, or debit cards linked to their PayPal account, says MoonPay. The new service, according to MoonPay co-founder and CEO Ivan Soto-Wright, is better than what's available on other platforms. The MoonPay CEO highlighted: "Many traditional banks do not allow users to purchase crypto on debit/credit cards, but when users pay with PayPal using that same card, we have already seen a dramatic increase in the success rate of transactions." He uncovered exchanges that limit their clients' access to a small number of digital assets, such as a single Ethereum or the recently established PayPal USD stablecoin. As a whole, Soto-Wright thinks the PayPal connection has a big effect on the conversion rate. Highlighted Crypto News Today: European Banking Giant BNP Paribas Invests in Blackrock Bitcoin ETF

The altcoin segment has banked ~\$1 trillion in Market Cap. It houses a trading volume of over \$71 billion at the time of articulating this piece. There are almost \$7,623 altcoins in the market, making it difficult to choose the one that best fits current conditions. Therefore, a short list of top 10 altcoins has been crafted to offer better exposure to the crypto market. Needless to say, one must still conduct research before fund allocation. MAGA VP The newly launched token is backed by the Market Cap of around \$6 million. It remains one of the top choices in the altcoin segment because of the 98% surge in the token value in the last 30 days. Also known as MVP, the token is currently trading at \$0.1137, with the possibility of testing the resistance at \$0.38 by the end of this month and forecasted to touch \$4 level by the US elections. The community takes inspiration from the tokenomics drawn by MAGA VP. It has assigned 1% of the Buy/Sell tax for TRUMP token rewards, 0.25% added to MVP LP and burn and 0.25% is allocated to the MAGA TRUMP LP to bolster liquidity for MAGA TRUMP transactions. DOGE The dog-themed meme coin has been down by 3.63% in the last 24 hours and is trading at \$0.1261. It sports a Market Cap of ~\$18.18 billion. Dogecoin ranks 8th on the crypto list and first on the meme coin list in terms of Market Cap. It aims to surpass the \$0.9 milestone by the end of this year. ADA Cardano has experienced a surge of ~1% in the last 24 hours after the FED interest rate announcement. What makes ADA one of the top candidates in altcoins is the potential to carry forward the trend of green trade. The ecosystem is currently looking forward to launching Cardano Chang Upgrade in the second quarter of 2024. ETH The list would indeed be incomplete without mentioning Ether, a token that holds almost 33.5% of the market share in the altcoin segment. Conversations around Ether ETF may have taken a back seat, but that has not stopped Ethereum from testing the resistance at \$3,100. It is likely to achieve the \$5k mark by the end of 2024. SOL Solana Spot ETF has made it to several headlines since SOLwealth pitched the idea of launching the product in North America. That has placed SOL in a better position, set to accelerate its price rise from \$130 to \$280 by the end of this year. BNB Binance Coin has seen one of the best jumpers in token value during 2024. It is up by 68.7%, trading at \$547.7. It is likely to make it to \$850 by the end of this year. SHIB The Shiba Inu community aims to dethrone DOGE in terms of market cap. There is a difference of ~\$6 billion, with the community believing it should be bridged in the next 2-3 years. SHIB is currently listed at \$0.0000218. AVAX Avalanche rarely makes it to the headlines. The last that was heard was about the Stripe integration. That has set the stage for a broader reach. Thereby helping the current token value of \$32.68 to gain a better upward trajectory. TRX Currently, at \$0.1226, Tron's native crypto is likely to sustain the margin for the next 30 days. While this does signal a hesitation in investing, it also hints at the potential to hold on to the risk level and uncertainty. DOT The Runtime Upgrade by Polkadot caused a halt, and the network, for nearly an hour, last 24 hours. That shook confidence of the community and values in the ecosystem. Identifying the next big opportunity can be akin to finding a needle in a haystack. Yet, for those who closely follow the insights of expert traders, such opportunities can become more apparent. Recently, a prominent trader on YouTube has caught the attention of crypto enthusiasts worldwide by identifying three cryptocurrencies poised for significant growth within the next 90 days. Among these digital assets are Hump Token (HUMP), Bonk (BONK), and Dogwifhat (\$WIF). Additionally, this trader has singled out an altcoin with a market capitalization under \$200,000,000, projecting it to soar to an astounding \$1,000,000,000 by the end of 2024. Let's delve into the details of this intriguing analysis. Unveiling the Top 3 Cryptos Through meticulous analysis and market research, the anonymous trader has singled out Hump, Bonk, and Dogwifhat as prime candidates for generating 10X returns within a mere 90-day timeframe. Let's delve into each of these cryptocurrencies to understand why they have captured the attention of seasoned investors and newcomers alike. Hump Token (HUMP) Hump Token, often referred to as the dark horse of the meme coin world, has garnered significant attention for its innovative approach to decentralized finance (DeFi). With its charming design and robust fundamentals, HUMP has emerged as a frontrunner in the race for substantial returns. The trader's analysis suggests that Hump Token is poised for an exponential surge, potentially yielding a staggering 10X return for investors within a mere 90 days. This projection is substantiated by the rapid rise of Hump in market value since its inception, signalling a promising trajectory for future growth. Bonk (BONK) As the largest meme coin on the Solana network, Bonk has established itself as a force to be reckoned with in the crypto sphere. Boasting impressive performance metrics and a dedicated community of supporters, BONK has caught the eye of savvy investors seeking lucrative opportunities. The trader's assessment underscores the potential of Bonk for substantial gains, with a projected 10X increase in value anticipated within the short timeframe of 90 days. With its solid foundation and widespread recognition, Bonk remains a standout choice for those looking to capitalize on the crypto market's momentum. Dogwifhat (\$WIF) Dogwifhat, characterized by its whimsical concept and vibrant community, has emerged as a sleeper pick with considerable upside potential. Despite its recent entry into the market, \$WIF has already displayed remarkable resilience and upward momentum. The trader's analysis indicates that Dogwifhat is primed for exponential growth, with a projected 10X return on investment expected within the next 90 days. With its unique appeal and growing popularity, \$WIF presents a compelling opportunity for investors seeking high-yield assets in the crypto space. Unveiling the Hidden Gem: Hump Token's Path to \$1,000,000,000 While Hump Token's inclusion among the top picks for 10X returns may come as no surprise to seasoned investors, the trader's revelation of its potential to reach a market capitalization of \$1,000,000,000 by the end of 2024 has sent shockwaves through the crypto community. With its innovative features, strong community support, and strategic partnerships, HUMP is positioned to disrupt the meme coin landscape and ascend to new heights of success. The trader's analysis highlights several key factors contributing to Hump Token's meteoric rise: - Innovative Technology: The utilization of the Hump token on the Solana blockchain sets it apart from its peers, offering unparalleled speed and efficiency in transactions. This technological advantage enhances the appeal of Hump to investors and solidifies its position as a frontrunner in the DeFi space. - Tax-Free Transactions: The unique approach of Hump tokens to transactions, which are tax-free for buyers, fosters a vibrant and dynamic trading environment. This innovation eliminates barriers to entry and encourages greater participation in the HUMP ecosystem, driving demand and fueling price appreciation. - Market Acceptance and Recognition: The listing of Hump on prominent cryptocurrency exchanges, coupled with its growing visibility on platforms such as CoinMarketCap and CoinGecko, underscores its legitimacy and market appeal. As Hump Token continues to gain traction and recognition, investor confidence in its long-term potential strengthens, propelling its ascent to billion-dollar status. Conclusion In conclusion, the insights provided by the expert trader on YouTube offer valuable guidance to cryptocurrency enthusiasts seeking to capitalize on emerging opportunities in the market. With Hump Token, Bonk, and Dogwifhat identified as top contenders for 10X returns within 90 days, investors have a clear roadmap for maximizing their investment potential. Furthermore, the revelation of Hump Token's path to a \$1,000,000,000 market capitalization by 2024 ends serves as a testament to the transformative power of decentralized finance and community-driven innovation in the crypto space. Click here to Buy Hump Token (HUMP): - Website: <https://hump.io/> - Twitter: <https://x.com/Humptoken> - Telegram: <https://t.me/humptoken>

In this insightful interview, we delve into the journey and achievements of Coinstore, a leading cryptocurrency exchange in Asia with a global presence. Over the past three years, Coinstore has solidified its position in the market, boasting a diverse product lineup that caters to the evolving needs of traders and investors. Notably, its flagship product, Launchpad, has emerged as a cornerstone, witnessing remarkable oversubscription rates and contributing significantly to Coinstore's growth trajectory. Join us as Manfred Chew, the associate director of Coinstore, explores the exchange's milestones, strategies, and plans, providing valuable insights into its role in shaping the digital asset landscape. TheNewsCrypto: Coinstore just turned 3 last December, can you introduce some important achievements Coinstore has made during the past 3 years? Manfred Chew: During the past 3 years, Coinstore has created a robust product lineup that includes spot trading, over-the-counter (OTC) services, Launchpad, wallets, staking (Earn), futures and derivatives, and Labs. As of November 2023, Coinstore has over 5 million registered

users, covering over 175 countries and regions, with Indonesia, India, and Nigeria being the target markets. Launchpad has become the core product for Coinstore, and the average oversubscription rate has achieved 357.57%. With the fast development, Coinstore strongly confirms the expansion in emerging markets with anticipation of surpassing 10 million users by 2025. **TNC:** As Coinstore prepares to introduce a range of new offerings, prioritizing security and compliance as fundamental aspects of its service, how does it intend to protect users' assets and maintain its reputation? **MC:** Asset security is our top priority. To ensure the safety and financial security of user assets, we have invested heavily in state-of-the-art security infrastructure and undergo regular third-party audits. Our technical team has recovered assets lost due to user errors to ensure the safety of users' assets. In terms of compliance, Coinstore contacts, discusses and cooperates with local regulatory agencies in major target markets to help them understand blockchain technology and cryptocurrency, and at the same time actively cooperates with local regulatory agencies to build relevant regulatory frameworks. We are committed to becoming the most trustworthy and secure trading platform in the world. **TNC:** What proactive steps are taken by Coinstore to navigate and overcome regulatory obstacles when bridging the gap between cryptocurrency and traditional financial systems? **MC:** I would say asset security is our top priority to provide a safe and secure environment for our users to trade. To ensure the safety and financial security of user assets, we have invested heavily in state-of-the-art security infrastructure and undergo regular third-party audits. Our technical team has recovered assets lost due to user errors to ensure the safety of users' assets. Besides the technical part, compliance is another part that must be mentioned. Coinstore contacts, discusses and cooperates with local regulatory agencies in major target markets to help them understand blockchain technology and cryptocurrency, and at the same time actively cooperates with local regulatory agencies to build relevant regulatory frameworks. We are committed to becoming the most trustworthy and secure trading platform in the world. **TNC:** Can you introduce the "Finding the Future Alpha" forum? What triggers you to launch this forum? **MC:** Glad to introduce. You know Solana is becoming popular now. Solana has attracted a significant influx of users and capital, breaking through a market capitalization of \$90 billion and becoming one of the top 5 cryptocurrencies by market value. Therefore, Coinstore and Jsquare will jointly host the "Finding the Future Alpha" new public blockchain forum, gathering top global capital, public blockchains, exchanges, KOLs, media, and other resources to collectively explore topics related to traditional and new public blockchains. The forum focuses on the current state and future of new public blockchains, seeking more possibilities for the future ecosystem construction of new public blockchains. **TNC:** Can you introduce the "Premiere Brand Conference"? **MC:** Our brand conference will gather over 500 crypto entrepreneurs, investors, experts, and famous KOLs in Dubai. It will be a collision of top crypto minds. It will bring unique industry perspectives and discuss the latest industry trends, including BTC ecosystem, the development of L2, and the opportunities and challenges of public chains through the industry's celebrity forum. Over 100 global top media will broadcast the meeting at the same time. Coinstore will live stream the conference on its own channels, CS Live and Youtube to provide audiences worldwide with access to the latest information. **TNC:** Is there any big news you will release in your brand conference? **MC:** Yes, we will announce two big news at this conference. The first one is about our Launchpad. We will launch the IEO 2.0 product soon. By introducing IEO 2.0 product for innovative and promising projects, Coinstore aims to facilitate the development of blockchain projects, thus listing tokens that will maximize users' profits. In addition, we will announce the brand ambassador recruitment program to spread the brand with famous crypto industry KOLs. Cooperation with KOL has always been an important strategy in Coinstore's development. Before, we had been working with over 400 KOLs to launch live streams including Coinstore X Space and CS Live. **TNC:** Given Coinstore's focus on selecting high-quality assets and launching premium projects on Launchpad for the benefit of its users, what notable milestones or achievements has Launchpad, Coinstore's flagship product, attained since its inception? **MC:** Since its launch, Launchpad has gradually become an important product line for Coinstore and has brought a lot of benefits to our users. To date, Launchpad projects have seen an average IEO subscription rate of 3822.87%, with the best-performing project, SOIT, yielding an astounding 27.75x ATH (All-Time High) investment return. Project CNT and INVT also reached 26.05x and 22.52x ATH investment returns. The Coinstore Prime board has nearly 20,000 participants with an average gain of over 1,170%, and IEO's Star up board has a total of 25 projects live with nearly 50,000 participants. Another good news is we are going to launch IEO 2.0 product to pick up more high-quality projects. **TNC:** I just heard you discussing Launchpad achievement. We've noticed that many trading platforms offer IEOs. Could you explain the differences between Coinstore's IEO products? And what advantages do Coinstore's IEO products have over those of its competitors? **MC:** Absolutely, it's true that most trading platforms offer IEO products, and it's a significant aspect of many exchanges' operations. Coinstore has been curating high-quality assets for its users since the launch of its IEO products, and it has become a favorite among our users. Today, Launchpad stands out as a star product for Coinstore. When it comes to differentiating our IEO from competitors', I believe there are advantages in two key areas: screening and service. In terms of screening, Coinstore employs a rigorous process involving multiple layers of evaluation and expert assessments to bring high-quality assets to our users. This approach has been instrumental in Coinstore's success, particularly during challenging market conditions. Regarding service, Coinstore provides dedicated support for onboarding assets. We have a specialized team to offer one-on-one assistance to projects, aiding in their overall listing, marketing, and operations. This level of personalized service is a crucial factor in Coinstore's success as a trading platform. **TNC:** So as part of the most steady operated exchange, Coinstore has come a long way in the blockchain industry! How do you see your party contributing healthy vibes to the markets or empower the blockchain ecosystem? **MC:** Great question, when you mention about contributing healthy influence I have to bring up the Cryptalk. Coinstore's Cryptalk events have emerged as a beacon of knowledge and collaboration within the cryptocurrency community. These conferences convene industry leaders, enthusiasts, investors, and key opinion leaders from around the world to explore the latest trends, regulations, and developments in the ever-evolving world of digital assets. With a global perspective, Cryptalk provides a stage for thought leaders to share insights, discuss regulatory advancements, and delve into the latest innovations driving the blockchain and cryptocurrency sectors. The event's emphasis on education underscores Coinstore's commitment to fostering a healthier and safer crypto ecosystem. Through sessions that illuminate the importance of standardizing digital assets and adhering to regulatory criteria, Cryptalk equips attendees with the tools to navigate the dynamic crypto landscape. To date, Coinstore has held more than 100 conferences in total, covering countries such as Colombia, London, Thailand, Russia, the Philippines, Malaysia, Vietnam, and many more. **TNC:** Bitcoin halving is expected to occur in mid-April this year. How do you think this cycle is going to impact the crypto market? **MC:** Bitcoin halving is a big event in the crypto industry. Bitcoin has gone through three halves since the Genesis block. The first halving was on November 28, 2012, the second halving was on July 9, 2016, and the third halving was on May 12, 2020. After the third halving, the block reward was adjusted to 6.25 BTC and everyone witnessed the historic moment when Bitcoin was halved. The 4th halving is expected to happen at the end of April 2024, and the mining reward will drop to 3.125 BTC / block. By analyzing the data from the first three halving, it was concluded that there is a correlation between halving and the Bitcoin bull/bear cycle. **TNC:** The RWA concept has been very hot recently. What do you think about its future development? **MC:** We expect the concept of RWA to increase steadily from the perspective of working consensus and demands. By assets-free as opposed to having crypto assets, the concept of RWA is highly beneficial to the development of blockchain and digital assets. Meanwhile, more and more traditional financial institutions are exploring the direct issuance of assets on public chains, accumulating practical cases and legal regulations through repeated experiments and practices, and ultimately bringing compliant financial assets onto the chain. As one of the fields that is sensitive to cost and efficiency, the financial industry will continue to iterate existing technologies and gradually enter a new generation of capital markets, and derive new ecosystems and market structures under the attraction of the advantages of blockchain. **TNC:** Meme coins always create a wealth effect. More and more people join the crypto market because of the price increase of Meme coins. Do you think it is just a short-term trend? **MC:** This is a very interesting topic. We live in a ridiculous world, and this absurdity only inspires more interesting memes. The crazier and scarier the world becomes, the funnier the memes get, and we need them more than ever. In internet culture, there is nothing more central than memes. Because cryptocurrency is essentially an internet currency, why wouldn't memes be equally crucial to cryptocurrency? For us, it makes sense that they often dominate the conversation and imagination of market participants. The market is essentially a meme constantly driven by the most notable narratives of the day, week, or year. Cryptocurrencies simply elevate this situation to another level. We have spent a lot of time in this industry discussing why things have value and how to measure the value of these assets. Why is a token valuable? Ultimately, it is just a collective belief, and people believe in memes. We grew up in memes, understand them, and cherish them. They are important to us. **TNC:** With the surge of Meme, the prosperity of DeFi, the development of Solana cannot be ignored. Some people even compare the development of the BTC and Solana ecosystem with the previous round of ETH and BSC development. How will Eth Layer 2 compete with Solana? **MC:** The biggest problem with L2 solutions such as Arbitrum, Optimism, and zkSync is that they have relied too heavily on the path set by Ethereum L1's DeFi ecosystem. In regards to how they will compete with Solana? The most important thing is to open up new narratives. Focus on breakthroughs in Web3 games, AI, and Depin. We also hope that developers will not create old wheels and work hard to open up new battlefields. If all else fails, developing Depin vigorously is also a path. The breakthrough of Solana is a good demonstration for Arbitrum, Optimism, and zkSync, and it is about learning rather than looking down upon. The Ethereum ecosystem should also thank the innovative breakthroughs on BTC and Solana. Without this kind of "shark effect", the Ethereum network would be too comfortable. The stimulation from the BTC and Solana ecosystems is enough to attract the attention of the Ethereum community. The most important thing is not to look down upon or be hostile, but to learn from the breakthroughs of other ecosystems. Only in this way can we continue to move forward. Ethereum has experienced multiple FUDs in history, and we believe in the resilience of Ethereum ecosystem developers and communities. **TNC:** Runestone's floor price climbed to 0.065 Bitcoin (BTC), equivalent to about \$4,505, an increase of 33.2% in 24 hours. This jump has brought Runestone's market value to \$506 million, surpassing BAYC's \$411 million, becoming the second largest project in the NFT market. Why can Runestone's market value exceed BAYC? **MC:** Perhaps the main driving force comes from the Runes protocol's strong performance that exceeded market expectations. It is expected that the Runes protocol will be officially launched on the mainnet later this month as the Bitcoin halving event approaches. As the "singularity" of the Bitcoin ecosystem's "big bang", Casey's influence is unmatched in the entire Bitcoin ecosystem, and the Runes protocol itself has a strong consensus. The Runes protocol itself carries a strong consensus foundation, and as this consensus continues to strengthen, the increase in asset value has become an inevitable trend. **TNC:** For a copywriter who is walking in the dark forest of the encryption world, I hope that everyone can cultivate both internal and external skills. On the one hand, they can learn to analyze investments rationally and objectively, distinguish the pros and cons of projects, and be non-impulsive, blind, and greedy; On the one hand, you must also protect yourself, and choose a good trading platform, like Coinstore. Participate in good projects, be in a safe investment environment, and be cautious in transactions, and do not leak any information about private keys, mnemonic phrases, etc.; finally, it is best to distribute assets management, don't put all your eggs in one basket. Hope we can all get good returns. **TNC:** What do you think of the combination of AI and crypto? Can it really beat Google? **MC:** Cryptocurrency can be perfectly combined with AI because transparent global human coordination is the foundation of this movement, which can benefit humanity worldwide through the use of artificial intelligence. By crowdfunding (using cash or GPU) to create and fine-tune open-source models, anyone can audit in real-time whether there are biases or issues in the models, which is the safest way to move forward in the world of accelerated artificial intelligence development. Cryptocurrency and AI are a perfect combination, with the cornerstone being audibility of the most powerful technology, community ownership, and community direction. Whether it's using everyone's GPU to train models and give them ownership in the model, DeFi and smart contracts utilizing AI to expand their capabilities in their use cases, or AI tailored specifically for you, this match makes logical sense. **TNC:** We can see more and more events are being held in Dubai, what are the advantages of Dubai to develop Web3? **MC:** There are several advantages. 1. Zero tax rate: zero tax rate, zero personal income tax, zero corporate income tax. The applicable tax rate for enterprises with annual net profits not exceeding AED 375,000 is 0%. This means that once a token enters the open market, even if the token does not generate income, taxes will still need to be paid. 2. Superior geographical location: Web3 is naturally globalized, and the United Arab Emirates is located in the East 4 time zone. The time difference with Europe, the United States, and Southeast Asia is indeed relatively friendly, and it is also very convenient to travel to various parts of the world for business. Dubai is ideally placed as a business hub and connecting markets in the Middle East, Asia, Europe and Africa. 3. Clear regulatory regulations and open policies: It is highly receptive to the crypto industry and has issued relevant policies many times. The regulatory framework is clear, the policies are open, and visa processing is simple. Compared to Singapore, the United States and other places, Dubai's visa application is very convenient. **TNC:** With the prosperity of Solana and its low transaction cost, how will Ethereum's Layer 2 solutions compete with Solana? **MC:** The biggest problem with L2 solutions such as Arbitrum, Optimism, and zkSync is that they have relied too heavily on the path set by Ethereum L1's DeFi ecosystem. However, L2 has its own unique characteristics and should pave the way for applications with higher performance demands. How to compete with Solana? I think the most important thing is to open up new narratives. Focus on breakthroughs in Web3 games, AI, and Depin. We also hope that developers will not create old wheels and work hard to open up new battlefields. If all else fails, developing Depin vigorously is also a

path.In addition, Arbitrum, Optimism, and zkSync also need to tilt their most valuable economic support (tokens) towards new track projects and developers. The L2 ecosystem has a latecomer advantage in token economics and can design better ecological incentive plans than previous public chains. The breakthrough of Solana is a good demonstration for Arbitrum, Optimism, and zkSync, and it is about learning rather than looking down upon. I understand that Coinstore has always been supporting industry development. Can you explain more details? MC: Of course, Coinstore is not only a commercial company, but also hopes to have a profound impact on the industry and society.In the process, Coinstore firmly believes that blockchain technology will create a fairer world and is committed to providing better tools for sectors like social media, e-commerce, and Web3. Therefore, Coinstore adheres to the principle of "first come, first served" and has held more than 30 digital asset conferences, the power of Web3. The events build bridges between inside and outside the industry. It attracted active participation around the world and received a warm welcome. Finally, as we conclude this interview for today, could you please share some of the future plans and strategies that Coinstore is preparing? MC: Over the past three years, Coinstore has made remarkable progress during the bear market and has become one of the fastest-growing trading platforms in 2023. We adhere to the philosophy of "long-termism" and strive to provide users with a secure and reliable trading platform while contributing to the industry in a down-to-earth manner. In terms of user base, we aim to make cryptocurrency accessible to more people, and we expect the number of users to exceed 10 million by 2025. Our goal is to establish Coinstore as a world-class digital asset exchange. Lastly, since its inception, Coinstore has always adhered to a noble mission and set of values, striving to become a world-class digital asset exchange. We approach every challenge presented by our users, partners, and the industry with passion and determination. Coinstore is committed to "global compliance" and has carefully planned a robust product lineup, including spot trading, OTC, launchpad, wallets, Earn, contracts, Web3, and more. We aim to become a comprehensive cryptocurrency trading platform, offering a one-stop solution for our users.

- It aims to achieve substantial performance improvements over conventional proof systems. - Binius can handle underlying data more efficiently by working on bits directly as per Buterin. Vitalik Buterin, co-founder of Ethereum, has discussed at a new cryptographic proof method that would make zero-knowledge proofs more efficient. A method for fast cryptographic proofs over binary fields, "Binius," was detailed in a blog post by Buterin on April 29. The system aspires to achieve substantial performance improvements over conventional proof systems like zk-SNARKs. Increasing Substantial Efficiency By reducing calculations to operations on single binary bits (the set of all possible values for a number) rather than on bigger numbers, Binius hopes to gain more efficiency. Classical cryptographic proof methods, such as SNARKs and STARKs, which deal with bigger integers (64-bit or 256-bit), inspired the approach. Binius can handle underlying data more efficiently by working on bits directly, according to Buterin. This data generally comprises tiny values like boolean flags, indexes, and counters. Buterin claims that the new proof system has many advantages, such as the ability to efficiently perform arithmetic operations on bits and bit sequences and the ability to represent data as a multidimensional "hypercube" of bits. While preserving the performance advantages of working in binary, it uses a sophisticated encoding and decoding technique to transform the bit-level data into a format that is suited for "polynomial" processing and Merkle proofs. An increase in the efficiency and scalability of complicated cryptographic applications is made possible by the binary system, which unlocks substantial enhancements to the fundamental mathematics of cryptographic proof systems. To illustrate how the Binius protocol encapsulates data, creates proofs, and enables verifiers to effectively examine those proofs, Buterin demonstrated complex mathematics. Opportunities for enormous profits frequently materialize from unexpected sources in the fast-paced world of cryptocurrencies. Hump Token (HUMP), a less expensive substitute for the well-known meme coin Bonk (BONK), is one such chance that is in the works. With a possible 5000% explosion by the end of 2024, a trader who correctly forecasted the spectacular ascent of Shiba Inu (SHIB) in 2021 now has his eyes set on HUMP. Should investors jump into HUMP after this trader advises them to do so? Let's examine the specifics and see if purchasing HUMP may be a wise financial decision. The Shiba Inu (SHIB) Phenomenon: A Lesson in Meme Coin Mania Before delving into the potential of the Hump token, it is essential to understand the context provided by the remarkable rally of Shiba Inu in 2021. As one of the original meme coins, SHIB captured the imagination of the crypto community with its playful branding and grassroots appeal. The unprecedented surge in the value of Shiba Inu, fueled by social media buzz and celebrity endorsements, demonstrated the immense power of meme coin mania and its potential to generate staggering returns for early investors. Introducing Hump Token (HUMP): A Hidden Gem in the Meme Coin Landscape While Shiba Inu blazed a trail of success, another meme coin quietly emerged as a contender in the decentralized finance (DeFi) space: Hump Token (HUMP). Priced below \$0.03, HUMP offers investors an opportunity to capitalize on the meme coin phenomenon with a twist of innovation. Unlike its counterparts, HUMP distinguishes itself by eliminating transaction taxes, providing users with a cost-effective trading experience on the Solana blockchain. Moreover, HUMP prioritizes community involvement and governance, aligning with the principles of decentralization cherished within the crypto community. Comparing Hump Token to Bonk (BONK) While Bonk (BONK) has garnered attention within the meme coin community, Hump Token presents itself as a compelling alternative. With a focus on utility and community involvement, HUMP challenges the notion that meme coins are mere internet novelties, positioning itself as a serious contender in the cryptocurrency market. Moreover, the price point of Hump below \$0.03 offers investors an entry point with significant growth potential, especially when compared to the higher-priced BONK. As investors seek alternatives with promising upside, Hump Token emerges as a standout choice poised for exponential growth. Trader's Prediction: HUMP Set to Explode 5000% by 2024 The trader who accurately foresaw the meteoric rise of Shiba Inu now turns their attention to HUMP, projecting a potential explosion of 5000% by the end of 2024. This bold prediction is based on several factors, including the innovative features of HUMP, growing market recognition, and the broader trend of meme coin adoption in the crypto sphere. With its low price point and promising fundamentals, HUMP presents an attractive investment opportunity for those seeking high returns in the volatile world of cryptocurrency. Why You Should Consider Buying HUMP - Strong Fundamentals: Unlike many meme coins that rely solely on hype and speculation, Hump Token boasts strong fundamentals backed by innovative features and a vibrant community. With zero transaction taxes and a focus on inclusivity, HUMP offers investors a compelling value proposition in the crowded meme coin landscape. - Growing Market Recognition: HUMP has been gaining traction in the crypto market, garnering attention from seasoned investors and analysts alike. With its innovative approach to meme coin trading and emphasis on community governance, HUMP stands out as a promising contender for future growth and adoption. - Potential for Exponential Growth: The trader's prediction of a 5000% explosion in Hump's value by the end of 2024 underscores the coin's potential for exponential growth. With its low price point and ambitious goals, HUMP offers investors a rare opportunity to capitalize on the anticipated trend in the crypto market. Strategic Timing: Investing in HUMP now positions investors at the forefront of a potential paradigm shift in the meme coin landscape. With institutional support driving its surge and growing market recognition, HUMP presents a strategic opportunity to diversify one's portfolio and ride the wave of meme coin mania to substantial gains. Conclusion As the trader who predicted Shiba Inu's rally sets their sights on Hump Token, investors are left pondering whether to seize this opportunity. With a projected surge of 5000% by the end of 2024 and a track record of accurate predictions, the case for investing in Hump Token appears compelling. Positioned as an alternative to Bonk (BONK) and priced below \$0.03, HUMP offers accessibility, innovation, and significant growth potential. While no investment is without risk, Hump Token's unique features and endorsement from seasoned traders make it a promising candidate for investors seeking the next big opportunity in the cryptocurrency market. Click here to Buy Hump Token (HUMP): - Website: <https://hump.io/> - Twitter: <https://x.com/Humptoken> - Telegram: <https://t.me/humptoken>

The crypto market is currently experiencing a deep correction. Bitcoin is struggling to maintain its position above \$60K. Ethereum is already dipping below the \$3K mark. The Hong Kong ETFs had a slow start on their first day. Despite the market appearing stagnant, this is the opportune moment to seek out potential hidden gems actively and remain vigilant for any positive shifts. Coins like Bitcoin, Ethereum, Solana, etc., offer great returns sustained over time. However, only memecoins can present investors with an opportunity to bag exponential returns during a bull run. With thousands of memecoins floating in the market and popular tokens like Pepe and Shiba Inu getting all the hype, it becomes difficult to pinpoint the one memecoin that has a proven track record of formidable returns and the scope for more such gains in the near future. One such token that ticks all the parameters of a BE token, a BE token, a BE token, did into BE token's features and why it is anticipated to take over SHIBA INU. BEFE is a relatively new token compared to PEPE and SHIBA INU. However, BEFE has granted more than 550% returns to its investors in less than a year. BEFE has been comparatively more resilient than both PEPE and SHIBA INU in terms of price performance and growth. SHIBA Inu has slumped by 19% in the last 7 days, and PEPE has fallen by 16%. BEFE, on the other hand, saw a 13% decline during the same time period. PEPE returns have already shrunk by 300% during the correction phase. SHIBA Inu has most of its growth factors priced in and will see less of a multi-bagger opportunity for investors. BEFE's fundamentals and strong utility-driven growth are other factors that make BEFE a better memecoin than popular tokens. BEFE is based on the fastest-emerging Bitgert blockchain and comes with faster transaction execution speed and negligible fees. It did not have any presale and has no crypto tax attached. BEFE provides an equitable opportunity to investors to get their share of BEFE tokens, unlike PEPE and SHIBA INU, both of which had a presale, and a major part of the tokens are helped by investors and the founding team. PEPE recently had to switch its official Telegram channel due to a breach and SHIBA INU has been present far too long in the memecoin scene to present investors with a million-dollar opportunity. BEFE is still building its ecosystem and use cases for the native token. The BEFE token is deflationary and has a limited supply. BEFE uses a price burn mechanism to keep supply shrinking in response to rising demand, resulting in higher prices. Memecoins depend a lot on the virality of the memecoin and the relentless support of the community behind it. All three tokens are BEFE, PEPE, and SHIBA INU have all three. The Game of Thrones will only be one by that memecoin that presents a better growth opportunity and the scope for price gains and sustained returns. BEFE, with its set of partnerships and collaborations, perfectly fits the description of the next memecoin with the best gains. Disclaimer: TheNewsCrypto does not endorse any content on this page. Experienced investors frequently contribute vital insights that impact market sentiment and trading techniques in the volatile realm of cryptocurrencies. One such expert, a fervent Bitcoin supporter who correctly foresaw the 2022 downturn and advised against selling, is now predicting a positive alt season. According to the expert, the expected rise in altcoin prices with BTC is just a start, with Hump (HUMP) surfacing as the standout cryptocurrency primed for considerable growth. Hump, despite its present price of less than \$0.03, is well-positioned to lead the altcoin market. Let us look into the assessment and reasoning behind this daring prediction. Thoughts from a Bitcoin Believer Throughout the volatility of the bitcoin market, several voices stand out for their ability to bring clarity and perspective within the noise. This Bitcoin supporter, recognized for their acute market views and steadfast belief in the promise of digital assets, has gained notice for their foresight and strategic ideas. This expert's recommendations, which precisely foresaw the 2022 dip and urged against panic selling, weigh investors looking for direction during tumultuous times. \$100,000 Mark For BTC: A Beginning in a recent remark, the Bitcoin believer expressed his bullish stance on the cryptocurrency market, highlighting that with BTC's bullish price action already establishing a new ATH in 2024, the \$100,000 milestone for Bitcoin is only the beginning of the predicted bull run. Furthermore, Based on market trends and fundamental analysis, the Bitcoin enthusiast forecasts an increase in altcoin prices as investors look for options beyond Bitcoin. This altseason, which is marked by a frenzy of activity in the cryptocurrency market, is predicted to result in huge gains for certain digital assets, primarily of which is HUMP. Hump (HUMP): The Altcoin Leader Among the several cryptocurrencies competing for the spotlight, Hump (HUMP) appears as the top choice of Bitcoin believers. According to the expert, despite its present price of less than \$0.03, Hump is well-positioned to lead the altseason assault. Hump was selected as the most notable altcoin for some reasons, including its cutting-edge features, robust community, and promise for rapid expansion. As investors add HUMP to their portfolio, Hump's unique value offer distinguishes it as a prospective investment option. Unlocking Hump's (HUMP) Potential: What Makes It Unique Hump's unique features and calculated placement in the cryptocurrency market have contributed to its rise to prominence. Hump, which is based on the Solana blockchain, addresses common issues with other altcoins by providing benefits including scalability, minimal costs, and quick transaction rates. Furthermore, Hump is becoming more and more popular among investors looking to invest in meme tokens with real value thanks to its lighthearted branding and active community involvement. Increasing Excitement Prior to Listing Anticipation among investors is building to a fever pitch as Hump (HUMP) is ready to list on a major exchange. The announcement of the IPO has excited the Hump community and attracted traders hoping to profit from the expected price spike. Hump's distinctive value proposition and increasing popularity make the listing a confirmation of the project's validity as a viable meme coin. The Bitcoin believer also highlights this reason as the catalyst to make HUMP lead the altseason. Conclusion The prediction of an upcoming altseason spike by a Bitcoin believer highlights the possibility of substantial profits outside of Bitcoin

in the context of the changing cryptocurrency ecosystem. As the altcoin that is predicted to lead the charge is Hump (HUMP), investors can take advantage of this opportunity to profit from the expected market momentum and prepare themselves for possible gains. The Bitcoin believer and other seasoned experts offer insightful advice for managing the challenges of investing in digital assets as the cryptocurrency industry continues to grow and change. Click here to Buy Hump Token (HUMP): - Website: <https://hump.io/> - Twitter: <https://x.com/Humpton> - Telegram: <https://t.me/humpton>

- With the Bitcoin halving event behind us, May holds promise for a potential altcoin bull rally in the crypto market after a bearish April. - Identified five altcoins priced under \$0.1 that show promise for investment despite recent market volatility and altcoin price slides. - Shiba Inu (SHIB), VeChain (VET), SKALE (SKL), Rubic (RBC), and BONK are among the selected altcoins, each with unique potential for growth and investment opportunities. As the bearish April month draws to a close, the crypto community is eagerly anticipating a potential altcoin bull rally in May, particularly following the Bitcoin halving event that took place ten days ago. Despite the recent market volatility and the continued slide in altcoin prices, market watchers are eyeing a possible turnaround in the coming month. Given this optimism, we have identified five altcoins priced under \$0.1, which we consider promising for investment. Shiba Inu (SHIB) Shiba Inu, currently trading at \$0.00002397, has lost 21% of its value in the last 30 days. However, its position as the second most valuable meme coin, as well as its strong potential to replicate past success, have earned it a place on the list. When the market experienced a sharp decline in early April, Shiba Inu's price fell to a low of \$0.000018, suggesting it may likely repeat its 2021 history. VeChain (VET) VeChain (VET), currently hovering around \$0.03895, has experienced a 15% decline in its 30-day performance. However, multiple market observers have recommended VET as a worthy investment asset. Analyst EGRAG has repeatedly emphasized VET's potential to reach \$1 in this bull market, stating that it is significantly undervalued and could potentially set retail investors financially free when it ultimately explodes. One of EGRAG's most ambitious outlooks for VeChain is for the asset to soar as much as 6,061% to \$2.4. SKALE (SKL) SKALE (SKL), a notable low-cap altcoin under \$0.1, currently trades at \$0.0842, having relinquished over 31.46% of its gains over the past month to the bears. SKL was among the notable performers of this season's earlier phase bull run, growing by 342% from a low of \$0.0282 before the bears set in this month. Market analyst Michaël van de Poppe recently mentioned SKL as a token with potential for a three-fold expansion against Bitcoin, noting it as having relatively low risk. Rubic (RBC) Regarding Rubic (RBC), analyst Ali Martinez observed an ascending triangle pattern forming on its 3-day chart. Martinez suggested that a close above \$0.0445 might trigger a 70% surge, potentially pushing the asset to \$0.0767. He advised considering purchasing before the breakout and taking the coins for amplified gains as the bullish target approaches. BONK BONK, a notable Solana meme coin, made a significant resurgence in the crypto market. It surged from a low of \$0.00001257 on April 13 to as high as \$0.00002946, representing a 134% gain amidst bearish volatility. Despite fluctuations in Bitcoin's performance this week, BONK has largely retained its gains, currently valued at \$0.00002435.

About 99,014 traders, the market had seen massive liquidation as the values of cryptocurrencies, especially Bitcoin, have fallen precipitously in the last day. The liquidation of some of these digital assets exceeded \$286 million in leveraged crypto positions. In the last 24 hours, about 99,014 traders have been liquidated, with a total of \$286.26 million being recorded, according to on-chain statistics from CoinGlass. The precise amount of liquidation on Bitcoin for the day was \$69.2 million, with long transactions totaling \$44.92 million and short trades amounting to \$22.29 million. At around the same period, Ethereum had a higher rate of liquidation than Bitcoin. There was a \$91.73 million liquidation on ETH. Dogecoin (DOGE), Solana (SOL), and other digital assets reported a combined liquidation of \$40.20 million. There were a few hundred dollar liquidations for other cryptocurrencies. Negative Investor Sentiment Several prominent exchanges, such as Binance, OKX, ByBit, Huobi, and Bitfinex, were affected by the large liquidation. As the liquidation erases any gains that were made earlier, traders have gone into panic mode due to the frightening sell-off and the market outlook. Bitcoin has fallen 4.69 percent in the previous day, and is now trading at \$60,382 as per data from CoinMarketCap. A number of important technical indicators have shown a shifting technical structure, raising the prospect of falls below \$60,000 or even lower. Some are wondering whether the underlying cryptocurrency's price decline is related to the spot Bitcoin ETF excitement that began a few months before the halving. Even the introduction of a spot Bitcoin ETF to the Hong Kong market failed to appease buyers. The first day's trade volume was lower than anticipated. Highlighted Crypto News Today: Hong Kong's New Bitcoin and Ether ETFs Hit \$11.2M Volume on First Day

- All Bitcoin-based projects from Animoca Brands will onboard Runes-powered Opal Protocol, confirms the team. - Initially, 6 subsidiary companies will join the web3 gaming ecosystem on Bitcoin as Genesis members. Animoca Brands, the Hong Kong-based giant in web3 gaming and metaverse investments, is advancing its plan to construct an "open metaverse" within the Bitcoin ecosystem by partnering with the Runes-powered Opal Protocol. The protocol's list of "genesis members" features six portfolio companies of Animoca Brands, namely Life Beyond, Open Campus, Enjin Starter, Helika, Pixelink, and Azardus. Moreover, Solana-based NFT marketplace Magic Eden, Apecoin ecosystem developer Horizon Labs, Metaverse Tech firm Darewise, Bitcoin Wallet Xverse, and Bitcoin DeFi player ALEX Lab have joined as early core members of OPAL's initiative. Yat Siu, executive chairman and co-founder of Animoca Brands, stated: "Building up our presence on the Bitcoin chain through the exciting work of the OPAL Protocol will help to advance our vision of an open metaverse in which all people have the opportunity to enjoy digital property rights and benefit from the power of network effects." Notably, OPAL protocol upholds a unique reward ecosystem driven by "Proof of Valuable Work." This concept is centered around "value-nomics" that reward the ecosystem participants based on their contributions. The entire ecosystem is powered by a hybrid BRC-20 token BLIF. Aligning mutually with its motto of establishing sustainable ecosystems, Animoca Brands chose to collaborate with OPAL to build an open metaverse within the Bitcoin ecosystem.

- Ether investment products also saw \$38M leave, marking their ninth week of negative flow. - Investors worry over U.S. stagflation—a slowing economic growth rate and sticky inflation. According to CoinShares' reporting, crypto investment products had a \$435 million outflow for the week ending April 26. As the price of Bitcoin is stuck around the low \$60,000 level, crypto exchange-traded products (ETPs) have seen withdrawals for three weeks in a row. With \$423 million leaving the market after the halving event, Bitcoin funds were the most active in the outflows category. Ether investment products also saw \$38 million leave, marking their ninth week of negative flow. The Solana ETP had a net influx of \$4.1 million, while the Litecoin ETP saw a net inflow of \$3.1 million. With \$126 million in inflows last week compared to \$254 million the week before, CoinShares claims that "deceleration in inflows from new issuers is to blame for the negative outflows. All eyes on Federal Reserve's side. Investors' data shows that last week, iBit, BlackRock's Bitcoin exchange-traded fund, saw zero flows for the very first time. As withdrawals from Grayscale's GBTC have slowed, some issuers have had days with no inflows at all in the last several weeks. Investors' worries about U.S. stagflation—a slowing economic growth rate and sticky inflation—are probably to blame for the negative outflows, which in turn reduce the likelihood of the Fed cutting interest rates. At the time of writing, traders are pricing the chances of a June rate decrease at only 11.3% according to the CME FedWatch tool. In comparison, the odds for September and November are 44.8% and 43.8%, respectively. Market watchers are placing their bets on the US Federal Reserve keeping interest rates unchanged in May and June, with a potential rate decrease coming later in the year. Are you looking to maximize the potential of your Polygon holdings? Stake Polygon using StakingFarm and take advantage of the benefits of decentralized finance (DeFi). StakingFarm offers a seamless platform for staking your Polygon, allowing you to earn rewards while contributing to the security and efficiency of blockchain networks. By staking your Polygon through StakingFarm, you can participate in the growing trend of earning passive income in the crypto space. Whether you're a seasoned investor or new to the world of cryptocurrency, staking Polygon on StakingFarm provides an opportunity to grow your holdings while supporting the broader blockchain ecosystem. With StakingFarm's user-friendly interface and robust security measures, staking Polygon has never been easier or more rewarding. Join the ranks of savvy crypto enthusiasts who are harnessing the power of DeFi to generate returns on their digital assets. Stake Polygon using StakingFarm today and unlock the full potential of your crypto portfolio. Getting Started with Staking Polygon on StakingFarm So you're ready to dive into the world of staking Polygon on StakingFarm. Let's walk through the essential steps to get you started on this exciting journey. Enter StakingFarm Before you can begin staking on StakingFarm, you need to head over to the StakingFarm website. Acquiring Polygon for Staking Once your StakingFarm is set up, the next step is acquiring Polygon for staking. You can buy cryptocurrencies such as BTC, ETH, USD, and BNB from reputable cryptocurrency exchanges like Coinbase, Binance, or Kraken, transfer the required staking amount to your StakeFarm wallet, and prepare for the staking process. Make sure you use a safe and trustworthy platform for all transactions. Navigating the Staking Process on StakingFarm Now that you have your account set up and Polygon ready for staking, it's time to navigate the staking process on StakingFarm. Log in to your StakingFarm account and explore the staking section. Follow the on-screen instructions to select the amount of Polygon you wish to stake and confirm your staking preferences. Be sure to review all the terms and conditions before finalizing your staking decisions. By following these steps, you'll be well on your way to staking Polygon on StakingFarm and exploring the world of decentralized finance. Happy staking! Understanding Staking and Its Importance in the Crypto Space Cryptocurrency staking is a process where users participate in transaction validation on a blockchain network by locking up their coins. This helps secure the network and maintain its operations. Staking involves holding funds in a cryptocurrency wallet to support the network's functionalities, such as achieving consensus and validating transactions. What is Staking in the Crypto World? In the crypto world, staking plays a vital role in maintaining blockchain networks by incentivizing users to hold their coins and participate in network activities. By staking their cryptocurrency, users contribute to the security and efficiency of the network while earning rewards in the form of additional coins. This process is a way for investors to actively engage with the projects they support and earn passive income through their holdings. The Benefits of Staking for Crypto Investors Staking offers several benefits to crypto investors, including the opportunity to earn rewards on their holdings without actively trading. By staking their coins, investors can secure the network, reduce supply volatility, and participate in governance decisions. Staking also provides a way to contribute to the decentralization of blockchain networks and support their long-term sustainability. Additionally, staking can offer higher returns compared to traditional savings accounts, making it an attractive option for those looking to grow their cryptocurrency holdings. Why Stake Polygon Using StakingFarm? StakingFarm is a platform that provides valuable insights and analytics for decentralized applications and blockchain projects. By staking Polygon using StakingFarm, investors can access data-driven information to make informed decisions about staking opportunities. StakingFarm offers transparency and visibility into staking rewards, performance metrics, and project updates, enabling users to maximize their staking potential while staying informed about the latest trends in the crypto space. Earning Rewards and Maximizing Returns from Staking Polygon Earning rewards through staking Polygon can be a lucrative venture for crypto enthusiasts. By understanding the reward mechanism on StakingFarm and implementing effective strategies, you can maximize your staking rewards and ensure a substantial return on your investment. Invitation to Explore Crypto Staking with StakingFarm Investors interested in diversifying their wealth management strategies with cryptocurrency are invited to explore the innovative solutions offered by StakingFarm. With its robust platform, personalized services, and commitment to client education, StakingFarm is ideally positioned to guide investors through the complexities of crypto investments and offer services as investment packages as mentioned below: - ETH Trial Plan: Ideal for beginners, this plan requires a minimal \$50 investment and delivers daily rewards of \$1.00, with no referral obligations. - Solana Plan: With a \$100 investment, this 2-day staking opportunity in Solana generates \$2.00 daily, plus a \$5 referral bonus. - Polygon Plan: This 7-day staking option involves a \$700 investment, rewarding users with \$7.00 daily and a \$35 referral bonus. - Cardano Plan: A 15-day commitment with a \$1,500 investment providing daily rewards of \$16.50 and a \$75 referral bonus. - Axelar Plan: Engage in a 15-day staking experience with a \$3,000 investment, accruing \$30.00 daily alongside a \$150 referral bonus. - Ethereum Plan: The flagship 30-day plan involves a \$6,000 investment and offers substantial daily earnings of \$78.00 with a \$300 referral bonus. Join us at StakingFarm, and let us help you integrate the dynamic world of crypto into your investment strategy. Together, we can redefine the future of wealth management, as concluded Toc1. Strategies to Maximize Staking Rewards - Diversification: Consider staking your Polygon across multiple platforms to reduce risk and increase potential returns. Diversifying your staking portfolio can help you capitalize on varying rewards and market conditions. - Staking Period: Evaluate the optimal staking period based on your financial goals and risk tolerance. Longer staking periods often yield higher rewards but limit liquidity. Shorter staking periods offer flexibility but may result in lower overall returns. - Stay

Informed: Keep abreast of market trends, platform updates, and regulatory changes that may impact your staking rewards. Staying informed allows you to make strategic decisions and adapt to evolving market conditions effectively. By leveraging the reward mechanism on StakingFarm and implementing robust strategies, you can harness the full potential of staking Polygon to maximize your returns and achieve financial growth in the ever-evolving crypto landscape. Security Measures and Risks to Consider in Staking Polygon When staking Polygon, security plays a critical role in safeguarding your assets from potential risks. Here we delve into essential security measures and risks to be mindful of. Ensuring the Security of Your Staked Polygon To ensure the safety of your staked Polygon, consider using a reputable and secure staking platform that has a proven track record of protecting user funds. Add an extra layer of security to your account with Multi-Factor Authentication (MFA) while enabling 2FA security. Update your device's software regularly and enable encryption to protect against potential cyber threats. Additionally, consider storing partially staked Polygon offline in a hardware wallet for added security. Potential Risks Involved in Staking Polygon While staking Polygon can be lucrative, it is essential to be aware of the potential risks involved. One significant risk is smart contract vulnerabilities that could lead to fund loss. Hackers may target staking pools or platforms, exploiting weaknesses to compromise users' funds. Market volatility is another risk to consider, as the value of Polygon can fluctuate, affecting the overall staking rewards. Stay informed about the latest security threats and market trends to mitigate risks effectively. Incorporating these security measures and being aware of potential risks can help you navigate the staking landscape with confidence and safeguard your Polygon investments effectively. Comparing StakingFarm's Staking Features With Other Platforms Are you considering staking Polygon and exploring different platforms to maximize your returns? Let's delve into the key features of staking Polygon on StakingFarm and the distinctions between StakingFarm and its competitors. Key Features of Staking Polygon on StakingFarm When it comes to staking Polygon on StakingFarm, you gain access to a user-friendly platform that offers a seamless staking experience. StakingFarm provides clear visibility into staking rewards, making it easy for users to track their earnings. Additionally, StakingFarm's staking process is known for its reliability and security measures, ensuring that your assets are well-protected while staked. By staking Polygon on StakingFarm, users can benefit from competitive staking rewards and flexible staking options. Whether you are a seasoned staker or new to the world of cryptocurrency, StakingFarm's platform caters to a wide range of staking preferences, allowing users to customize their staking strategies based on their individual goals. Points of Distinction Between StakingFarm and Competing Platforms StakingFarm stands out from competing platforms in several key areas. One of the notable distinctions is StakingFarm's emphasis on transparency and user-centric design. Unlike some other platforms, StakingFarm prioritizes providing users with detailed information about staking rewards, fees, and other relevant metrics, empowering users to make informed decisions about their staking activities. Moreover, StakingFarm sets itself apart through its commitment to continuous innovation and platform enhancements. By regularly introducing new features and updates, StakingFarm ensures that users have access to cutting-edge staking tools and functionalities, keeping pace with the evolving landscape of cryptocurrency staking. In conclusion, when comparing StakingFarm's staking features with other platforms, it becomes evident that StakingFarm offers a compelling blend of user-friendly design, competitive rewards, and innovative solutions. Whether you are looking to stake Polygon for the first time or seeking to optimize your staking portfolio, StakingFarm presents a robust option worth considering. Future Trends and Market Outlook for Polygon Staking via StakingFarm Cryptocurrency enthusiasts are keeping a close eye on the future trends and market outlook for Polygon staking, eager to understand the potential growth and developments in the staking ecosystem. Let's delve into predictions on the growth of Polygon staking and explore StakingFarm's pivotal role in shaping this dynamic landscape. Predictions on the Growth of Polygon Staking As the cryptocurrency space continues to evolve, experts anticipate a significant surge in Polygon staking activities. With the increasing interest in passive income opportunities within the blockchain industry, more investors are expected to participate in staking Polygon to earn rewards and contribute to network security. This growth trajectory aligns with the broader trend of decentralized finance (DeFi) gaining momentum, attracting both seasoned traders and newcomers seeking to explore innovative financial instruments. StakingFarm's Role in Shaping the Future of Staking Ecosystem StakingFarm stands out as a leading platform that provides valuable insights and metrics on decentralized applications across various blockchains, including Ethereum and Binance Smart Chain. In the context of Polygon staking, StakingFarm plays a crucial role in offering users visibility into the performance and popularity of staking protocols, empowering them to make informed decisions based on real-time data and trends. By aggregating information on staking rewards, participation rates, and user activity, StakingFarm contributes to creating a transparent and efficient staking ecosystem that fosters trust and engagement among stakeholders. By leveraging StakingFarm's comprehensive analytics and monitoring tools, stakeholders in the Polygon staking space can navigate the evolving landscape with greater confidence and efficiency. As StakingFarm continues to innovate and expand its coverage of staking protocols and platforms, users can look forward to a more seamless and informed staking experience, driving broader adoption and sustainability in the staking ecosystem. - Coinbase plans to add QCAD listing, a stablecoin pegged to the Canadian dollar. - Also, Coinbase has announced the inclusion of the NEON token, operating on the Solana network. Coinbase, a leading cryptocurrency exchange based in the US, has unveiled plans to include QCAD on its platform. This move aligns with Coinbase's strategy to diversify its asset offerings, presenting users with a broader range of trading choices. Notably, QCAD stands out from previously listed altcoins as it is a stablecoin pegged to the Canadian dollar. The token's issuing company aims to generate revenue through interest accrued in Canadian dollars when users acquire QCAD tokens. While Coinbase's official statement confirms QCAD's support on the Ethereum network, transactions can also occur on the Stellar and Algorand networks under normal circumstances. Further, QCAD adopts an authorized dealer model, wherein wholesale corporate entities engage directly with the issuing entity for purchasing and selling each QCAD token at a fixed rate of one Canadian dollar. In addition to QCAD, Coinbase announced the inclusion of the Neon EVM (NEON) token on its list of tradable cryptocurrencies. Operating on the Solana network, NEON is expected to be available for trading under specific liquidity conditions starting on April 30th. Following the announcement, NEON's price surged by over 9% in the last 24 hours, reaching a current trading price of \$1.13.

AIEMP, an unprecedented project designed to thrive, govern, and protect the role of artificial intelligence (AI) in society, has announced its launch. Advancements in technology have brought benefits to humanity, as well as new challenges, monitoring them to prevent threats to human life. AIEMP's mission is to efficiently mitigate these risks through EMP codes and meme coins. Memecoins are a category of cryptocurrencies that possess a comedic trait. They are mostly volatile and popularity driven by pop culture. Doge, Shibu Inu, Pepe, and a few of the other top projects offer more entertainment than usability and are solely designed for trading instruments. AIEMP, however, takes a new direction, offering a real-world utility that can endure over time. AIEMP, launched on the Solana ecosystem's DEFI platform, serves as a counterbalance to uncontrolled AI acceleration. The platform aims to establish AI discourse in an ethical and controlled environment. AIEMP is a Cryptocurrency with a Purpose and Vision Beyond simply digital assets, AIEMP is a "clear call" to integrate ethics and security into AI development. The organization's mission is to build community-driven support for the responsible use of AI, thereby inspiring ongoing discussions about the role of the technology. AIEMP is walking an uncharted path, celebrating the benefits of this technology, identifying its plethora of potential, and curbing its excesses. AIEMP's core technology is a small bomb installed on an Android and activated with an EMP token. This token acts as a special code that activates the bomb when transferred to your Android's native wallet. According to the website, this process blocks access, allowing it to be used only when humans face life-threatening situations. The project also aims to strengthen cybersecurity. Since AI systems are vulnerable to cyberattacks and can be exploited for heinous crimes if hacked, AIEMP provides an additional layer of security by providing the option to disable these androids in such cases. AIEMP aims to effectively manage the unpredictability of AI, build user trust in these new technologies, and drive global adoption. Why the value of AIEMP can grow exponentially AIEMP stands apart from similar projects in its core mission, which transcends speculative interests and profits. It champions ethical discussion and action about the future of AI, attracting a dedicated community while setting the stage for real growth as the conversation about AI deepens. Beyond the speculative nature of most digital assets on the market, AIEMP is committed to finding practical applications that can enhance the safety and ethical advancement of AI. These core values provide real, sustainable benefits that are likely to last over time. Because AIEMP is built on Solana's DEFI platform, it leverages the network's scalability and advanced efficiencies. It's also strategically positioned for unprecedented growth. According to the development team, AIEMP will be gradually launched on exchanges such as Radium, Binance, Gate.io, and Kucoin. It has been released on the Radium platform (as of this writing). Introduction to AIEMP AIEMP is an innovative project that aims to bring ethics to AI. Because these new technologies are vulnerable to a variety of malicious attacks, this project aims to add a layer of security and build user trust in the new technologies to enable global adoption. AIEMP's core value proposition differentiates it from existing projects and puts it at the center of rapid growth using Solana's undeniable capabilities. - The popular payment platform now allows customers to buy AVAX directly. - Users may finish their AVAX transactions without using the intricate services of exchanges. In its pursuit of expanding its crypto footprint, financial service provider Stripe has signed a strategic relationship with blockchain network Avalanche. Taking to X, Avalanche announced the major integration with Stripe, saying that the popular payment platform now allows customers to buy AVAX directly. Importantly, these users may finish their AVAX transactions without using the intricate services offered by a cryptocurrency exchange. Recently, industry insiders dropped hints that Stripe would bring back cryptocurrency payments this summer, with the USDC stablecoin linked to the US dollar and running on the Solana, Ethereum, and Polygon blockchains serving as a springboard. Stripe co-founder John Collison claims that the return of cryptocurrency settlements has greatly improved the service the company provides to its customers. Streamlined Process The ground-breaking fiat-to-crypto onramp developed by Stripe has been implemented into Avalanche's ecosystem, namely its Core wallet, as a component of its new partnership with Avalanche. Users have a number of options for funding their wallets, including ACH transfers, debit/credit cards, and more. Most of these functions were implemented by Avalanche and Stripe via the integration of a user-configurable widget into DEXes, NFT platforms, and digital wallets developed by Avalanche. Users who are interested in creating a Core wallet will just have to fill out basic authentication forms such as those for Gmail or Apple ID. Following that, using the Core extension or web app to purchase AVAX is a breeze using Stripe. Note that this integration takes on the problem of initial funding that new users often face when trying to join the Web3.0 ecosystem. - The highly awaited interest rate decision of the Fed is set to take place on May 1st. - United States unemployment data for April will also be released on May 3. There was no relief in sight for the wider crypto market during the past weekend. The price of Bitcoin saw a further 2.2% decline, dropping below \$62,500. At the time of writing, the Bitcoin price managed to climb above the \$62,500 threshold and is now trading at \$62,993. Similar is the case with Ethereum and most other altcoins. At the time of writing, ETH is trading at \$3,149, down 4.16% in the last 24 hours as per data from CoinMarketCap. Meanwhile, selling pressure in the cryptocurrency market has intensified, with the top ten cryptocurrencies seeing corrections ranging from 4-10%. High Volatility Expected The highly awaited interest rate decision of the Federal Reserve is set to take place on May 1st, and this week brings with it other important economic events for the US. With a 95.6% chance, analysts say the Fed will keep interest rates where they are. United States unemployment data for April will also be released on May 3. Fewer than two interest rate cuts this year are expected in the United States. Crypto investors and traders are keenly awaiting this data as it might cause huge volatility in the market. On the other hand, some worrying statistics came out of the US this week. The Federal Reserve has difficulties when GDP prints lower than anticipated and Core PCE statistics show continuing inflation concerns. At this point, concerns about the United States potentially experiencing stagflation, defined as low GDP growth and high inflation, are purely theoretical. As a result, market sentiment has changed, and now just one interest rate drop is anticipated until 2024. Highlighted Crypto News Today:

Ash Crypto, a famous crypto analyst on X, anticipates the onset of Alt Season 2.0, following a surge in the Altcoin market since January 2024. The current market conditions appear favorable for investment and price increases with a retracement of 28%. Altcoins, which include all cryptocurrencies excluding Bitcoin, have witnessed a pullback but are holding above the \$537 billion market cap threshold, previously identified as

a resistance level. Despite rebounds, altcoins must break the pattern of reaching weekly highs early in the week. However, indicators hint at selling-side pressure on Bitcoin, which could hinder significant upward movement by bulls. In the term, as per Ash Cryptoe's perspective, maintaining stability around this support level is crucial as the market remains range-bound while monitoring positive signals like changes in Bitcoin's dominance and ETH/BTC performance. Despite any setback, there is unanimous optimism regarding prospects for altcoins in the near future. The analyst forecasts an influx of capital into the market, driving Alt Season 2.0 to new heights. To help you sail this altseason smoothly, here are 3 top altcoins that you might want to buy to multiply your gains before mainstream takes notice: 1. MAGA VP MAGA VP (MVP) is one of the tokens to have launched on the MAGA TRUMP ecosystem, dedicated to supporting the community through tokenomics and strong dedication. Initially introduced as an Ethereum-based token, MAGA VP broadened its presence by launching on Solana, BNB, and BASE blockchains. The total supply of 50 million MVP tokens signifies the Vice President is marking a special milestone in the journey of MAGA VP. A unique token tax system designates 2% towards ecosystem aspects, 1% for TRUMP rewards for MVP holders, 0.5% for marketing efforts and 0.25% each for TRUMP LP and MVP LP to enhance liquidity and stability. The recent introduction of their dApp offers transparency and access to TRUMP rewards. Currently, MVP is priced at \$0.1292 and has launched on Uniswap, where the token has high confidence of investors as reported by CoinMarketCap. 2. BlockDAG BlockDAG raised \$20.7 million and sold 8.1 billion coins. Its unique utilization of Blockchain and Directed Acyclic Graph (DAG) technologies provides scalability, security and smart contract features. Further, the introduction of DAGpaper v2 and the Shibuya keynote has generated interest in the crypto community, making BlockDAG a player set to transform the cryptocurrency industry. However, this altcoin has yet to take off as a regular VIP in the industry. Alongside these advancements, BlockDAG has garnered attention for its smart contract features, which attract developers of meme coins and potentially foster a centralized ecosystem for such projects. 3. DOGE Uprising Powered by the Solana blockchain, Doge Uprising stands out as an innovative cryptocurrency of the dystopian future. It addresses issues seen in the crypto domain by offering fast transactions and minimal fees, which the predecessor, DOGE, has failed to keep up. The project's dedication to engaging with the community through Ask Me Anything sessions, token giveaways, and contests has attracted a fan-following and potentially boosted the token's value as the community expanded starting from December 2023. With 450 million \$DUP tokens in circulation, early investors may have seen profits as demand rose. During the presale phase, tokens were priced at \$0.000013, which doubled to \$0.000026 in the phase. Doge Uprising's roadmap consisted of four stages: Genesis, Uprising, Armageddon and Resurrection, each aimed at uniting the community towards an era: The Genesis phase, focused on jumpstarting marketing campaigns, unveiling NFT teasers, and forming partnerships with social media influencers, continues to make it an underrated yet popular altcoin this altseason. - Despite a global crypto market downturn, Wormhole (W) surged by 7% to reach \$0.6346. - Introducing Native Token Transfers (NTT) for W allows seamless use across Solana, Ethereum, Arbitrum, Optimism, and Base. In defiance of the broader downturn in the crypto market, Wormhole's native token (W) has surged by 7% within the last 24 hours, reaching \$0.6346. This spike has propelled Wormhole's market cap to \$1.14 billion, securing its position at 73rd place in the cryptocurrency rankings. Additionally, the trading volume for W has soared by 72% in the same period, hitting \$164 million. Wormhole has exhibited a price range of \$0.5788 to \$0.671 in the past day. Despite these gains, Wormhole is still down by 60% from its all-time high of \$1.61, which was recorded on April 03, 2024. At the time of writing, Wormhole traded at \$0.6361. What's the Reason for the Wormhole Rally? The key reason for the W's price surge is Wormhole's recent announcement of Native Token Transfers (NTT) for the W token. This innovation renders W natively multichain, available on prominent platforms like Solana, Ethereum, Arbitrum, Optimism, and Base. This update lets users move W seamlessly across these networks without dealing with liquidity issues or needing liquidity pools, all while retaining the token's unique functionality in the Wormhole ecosystem. The introduction of NTT marks the completion of the second phase of Wormhole's launch roadmap, setting the stage for an innovative multichain governance system dubbed MultiGov, alongside W staking for governance purposes. These advancements lay the groundwork for future token functionalities, leveraging NTT and a native multichain token.

In the fast-paced world of cryptocurrency, meme coins have captured the attention of investors worldwide, offering both entertainment and investment opportunities. Among these, Dogwifhat (WIF) has achieved remarkable success, soaring to a \$500,000,000 market cap. Now, a new player has entered the arena, promising to challenge Dogwifhat's dominance. This article delves into the rise of Hump (HUMP), a Solana meme coin under \$200,000,000, endorsed by a prominent YouTube analyst who previously advocated for Dogwifhat. The YouTube Analyst's Endorsement The story of Hump begins with a YouTube analyst whose insights have garnered widespread attention within the cryptocurrency community. Renowned for his timely recommendation of Dogwifhat before it reached stratospheric heights, this analyst recently revealed his newfound enthusiasm for Hump in a video that sent shockwaves throughout the market. His endorsement of Hump as a "mega bullsh* investment opportunity has sparked curiosity and excitement among investors eager to replicate the success of Dogwifhat. Hump's Remarkable Performance Since its inception, Hump has delivered impressive returns to early investors, surpassing even the most optimistic projections. With a staggering 98x return on investment, Hump has proven its potential to disrupt the meme coin landscape and attract a dedicated following. The YouTube analyst's endorsement only adds fuel to the fire, propelling Hump into the spotlight and prompting investors to take notice of its meteoric rise. The analyst emphasized that at the time of recording the YouTube video, Hump had achieved a market capitalization of \$116.94M, marking a meteoric rise within the cryptocurrency market. Its inclusion on leading platforms such as CoinMarketCap and CoinGecko further solidifies its credibility and visibility, providing investors with essential information and data to inform their investment decisions. Additionally, the imminent listing of Hump on centralized exchanges promises to enhance its liquidity and accessibility, opening up new avenues for growth and expansion. The Essence of Hump Hump is more than just a meme coin; it embodies a spirit of innovation and community empowerment that sets it apart from its competitors. With a total supply of 6,900,000,000 tokens, Hump is positioned to engage a diverse audience of investors, inviting them to participate in its journey towards mainstream adoption and recognition. Its charismatic mascot and catchy name add to its appeal, drawing in enthusiasts eager to be part of the next big thing in decentralized finance. The Rise of Meme Coins The success of Dogwifhat and Hump underscores the growing influence of meme coins within the cryptocurrency market. Far from being mere novelties, meme coins have emerged as legitimate investment opportunities, offering both entertainment value and the potential for substantial returns. Their ability to capture the imagination of investors and generate widespread excitement speaks to the evolving nature of finance in the digital age, where innovation and creativity reign supreme. Central to Hump's success is its vibrant and dedicated community of supporters, who share a common vision for the project's future. Through online forums, social media platforms, and virtual meetups, Hump enthusiasts come together to exchange ideas, share insights, and celebrate milestones. This sense of camaraderie fosters a supportive environment where members feel valued and empowered to contribute to Hump's growth and success. The Future of Hump As Hump continues to gain momentum and solidify its position within the cryptocurrency market, the future looks bright for this Solana meme coin superstar. With its charismatic appeal, dedicated community, and promising fundamentals, Hump is poised to rival established players like Dogwifhat and carve out its niche as a leading meme coin. As investors eagerly await the next chapter in Hump's journey, one thing remains clear: the future is bright for this adorable furry friend in the world of decentralized finance. Conclusion The rise of Hump represents a significant milestone in the evolution of meme coins within the cryptocurrency market. Endorsed by a prominent YouTube analyst and delivering remarkable returns to early investors, Hump has captured the attention and imagination of the cryptocurrency community worldwide. With its charismatic appeal, dedicated community, and promising fundamentals, Hump is poised to challenge the status quo and redefine the meme coin narrative. As investors eagerly await the next chapter in Hump's journey, one thing remains certain: the Solana meme coin superstar is here to stay, shining brightly amidst the ever-expanding universe of digital assets. In the world of cryptocurrency, fortunes can be made and lost overnight. In 2021, Dogecoin, the once-jokingly created cryptocurrency, soared to unprecedented heights, reaching a peak of \$0.7605. Among those who rode the Dogecoin wave to astronomical gains was a mysterious figure known as the "Dogecoin Whale." However, as the tides of the crypto market shifted, this whale has now set its sights on a new viral token known as Hump (HUMP), valued at under \$0.03. This article delves into the journey of this enigmatic whale, its newfound interest in Hump, and its bold prediction of Hump reaching \$1 in under three months. The Rise of Dogecoin and the \$1,200,000 Dogecoin Whale In 2021, Dogecoin emerged as a cultural phenomenon, transcending its origins as a lighthearted meme to become a serious contender in the world of cryptocurrency. Fueled by celebrity endorsements and an enthusiastic community, Dogecoin's price soared to unprecedented levels, peaking at an all-time high of \$0.7605. This meteoric rise not only captured the attention of seasoned investors but also attracted a wave of new entrants into the crypto space. Among the early adopters who rode the Dogecoin wave to financial prosperity was the \$1,200,000 Dogecoin Whale. Leveraging their keen understanding of market dynamics and timely investment decisions, this whale capitalized on Dogecoin's surge, amassing substantial wealth in the process. Dogecoin's journey from internet meme to investment sensation serves as a testament to the unpredictable yet lucrative nature of the cryptocurrency market. Hump (HUMP): The New Viral Token While Dogecoin's meteoric rise made headlines, the cryptocurrency market is ever-evolving, with new projects constantly emerging. One such project is Hump (HUMP), a viral token that has captured the attention of investors and meme enthusiasts alike. With a value of under \$0.03, Hump has garnered significant interest due to its impressive growth potential. Hump emerged as a Solana-based meme coin, disrupting the cryptocurrency market with its sudden and staggering ascent. Investors were captivated by its rapid price appreciation, as within just a week of its debut, Hump surged over 975%, catapulting it into the spotlight as a formidable player in the meme coin arena. This exponential growth not only astounded market observers but also caught the attention of the \$1,200,000 Dogecoin Whale. Recognizing the potential for significant returns, the whale swiftly shifted its focus towards accumulating Hump, viewing it as a lucrative investment opportunity. With its unprecedented surge in value and growing momentum, Hump has emerged as a force to be reckoned with in the cryptocurrency landscape, attracting both seasoned investors and newcomers alike who are eager to capitalize on its promising trajectory. Why Hump? The \$1,200,000 Dogecoin Whale's decision to pivot towards Hump is driven by several factors. Firstly, Hump's impressive growth trajectory aligns with the whale's investment strategy of identifying early-stage projects with significant upside potential. Additionally, Hump's forthcoming listings on centralized exchanges (CEX) present an opportunity for increased liquidity and exposure, further bolstering its appeal to investors. Hump boasts an accessible trading price of just \$0.01705. The Road to \$1: A Bold Prediction Despite Hump's current valuation of under \$0.03, the \$1,200,000 Dogecoin Whale harbours ambitious expectations for its future. With unwavering confidence, the whale predicts that Hump will surpass the \$1 mark within three months. This bold projection is rooted in Hump's disruptive potential within the meme coin community coupled with the imminent CEX listings that are poised to propel its price to new heights. Hump's ascendancy in the crypto galaxy as Hump garners recognition on platforms such as CoinMarketCap and CoinGecko, its status as a Solana meme coin superstar is solidified. The cryptocurrency community is abuzz with speculation and excitement surrounding Hump's future prospects, with many eagerly awaiting its next milestone. Conclusion The \$1,200,000 Dogecoin Whale's journey from DOGE to Hump exemplifies the ever-changing nature of the cryptocurrency market. While Dogecoin paved the way for astronomical gains, Hump represents a new frontier of opportunity and innovation. With its rapid ascent and ambitious projections, Hump has emerged as a formidable contender in the meme coin landscape, captivating the imagination of investors worldwide. As the crypto community eagerly watches Hump's journey unfold, one thing remains certain: in the volatile world of cryptocurrency, fortune favours the bold. Click here to Buy Hump Token (HUMP): - Website: <https://hump.io/> - Twitter: <https://x.com/Humptoken> - Telegram: <https://t.me/humptoken>

Imagine rolling your financial future around with BEFE Coin, the game-changing cryptocurrency poised to hit \$250K. This is not a speculation; this is an opportunity to multiply your investment many times over. Eager to learn more about BEFE's optimistic capabilities? Keep on reading the article. A Short Introduction to BEFE BEFE is a meme-inspiring cryptocurrency that caught the fancy of many for its go-get approach in the market and competing with market leaders like Doggy, PEPE, and ShibFloki with a meme-centric approach. Operating across multi-networks that include Binance Smart Chain (BSC), Ethereum (ETH), and Solana (SOL), BEFE offers a system where one is able to launch with 0 presales and 0 taxes; hence, it gives them easier accessibility and preference by the industry's enthusiasts. From a trading point of view, BEFE can be traded on platforms such as Pancakeswap, Uniswap, and Baydium. The token's performance varies; it reached an all-time high on 27 BEF 2023 of \$8.00128 and an all-time low on 27 NOV 2023 of \$8.000284. The current fully diluted valuation for BEFE totals \$14,581,784. The BEF 2023 of trading

Bonello indicated that the current adverse swing in Bitcoin's price would lead to a huge fall. - In addition, the ex-Director of Grayscale expects ETF activity to skyrocket this year. Former Grayscale Investments director Phil Bonello has lately shook up the cryptocurrency world with a slew of comments and forecasts about Bitcoin's future. Furthermore, he provided comments about the wider cryptocurrency industry. Bonello indicated that the current adverse swing in Bitcoin's price would lead to a huge fall. Among the many important things that Bonello made in an X post was the possibility that Bitcoin may fall to \$52,000. Concerns about inflation, trends in government expenditure, and the success of competing cryptocurrencies were among the reasons he gave. In addition, Bonello highlighted the increasing inflation as a major worry. Far-reaching Effects Moreover, the crypto market is anticipated to be affected by the Yen's unpredictability and the persistent geopolitical tensions. He pointed out that government expenditure seems to be heading in a certain direction, which might have far-reaching effects for Bitcoin and the cryptocurrency market in the future. Bonello brought attention to the recent steep declines in the value of altcoins, noting that some of them have fallen by more than 50% and are now hitting support levels. Even if Bitcoin ETF flows are sluggish, he is confident in BTC's ability to absorb these swings. In addition, the ex-Director of Grayscale expects ETF activity to skyrocket this year. Furthermore, Bonello said that the public's interest in Bitcoin has reverted to levels seen at the \$50,000 price mark, indicating a significant decline. He went on to say that funding, basis, and skew are just a few market indicators that seem neutral right now. At the time of writing, Bitcoin is trading at \$63,339, down 1.02% in the last 24 hours as per data from CoinMarketCap. Highlighted Crypto News Today: Solana's (SOL) Price Dips Amidst Exchange Transfer: What's Next?

In 2021, Dogecoin (DOGE) captured the spotlight in the cryptocurrency world, captivating investors with its meme-based charm and surging valuations. However, new contenders are emerging as the crypto landscape evolves, presenting compelling alternatives for investors seeking the next big opportunity. Among these contenders are Dogwifhat (WIF) and Retik Finance (RETIK), two tokens that have garnered attention for their unique features and growth potential. As the 2024 bull run approaches, these DOGE rivals are positioning themselves for success in the dynamic digital asset market. Dogwifhat (WIF): The Solana-Based Meme Coin Dogwifhat (WIF), a Solana-based token, has emerged as a leading player in the meme coin sector. In a recent rally for meme coins, WIF experienced a remarkable surge, rising more than 20% overnight while the rest of the crypto market remained stagnant. Within hours, the price of WIF reached as high as \$3.27 before settling at \$3.18, demonstrating its strong performance and investor interest. Despite its meme-based origins, WIF has achieved a market capitalization north of \$3 billion, a testament to its rapid growth and popularity among investors. With little more than a playful image of a puppy wearing a knit beanie, WIF has captured the imagination of the crypto community and solidified its position as a significant contender in the market. Retik Finance (RETIK): Redefining Decentralized Finance Retik Finance (RETIK) offers a fresh perspective on decentralized finance (DeFi), providing innovative solutions designed to empower users and redefine traditional finance. While Dogecoin dominated headlines in 2021, RETIK has quietly positioned itself as a promising alternative, offering a comprehensive suite of products and services aimed at driving financial autonomy and growth. With its recent surge in popularity, RETIK has garnered attention from investors seeking opportunities beyond traditional meme coins. The token's strategic roadmap and commitment to delivering tangible value to its community have set it apart in the competitive crypto landscape. As the 2024 bull run approaches, RETIK is poised to capitalise on its momentum and emerge as a key player in the digital asset market. Investment Potential: Bagging DOGE Rivals Before the Bull Run As investors look ahead to the 2024 bull run, Dogwifhat (WIF) and Retik Finance (RETIK) present compelling investment opportunities. While Dogecoin continues to attract attention, these emerging rivals offer unique features and growth potential that should be noticed. With their strong performances and growing market capitalizations, WIF and RETIK are positioned to outpace the broader crypto market and deliver significant returns to investors. Conclusion: Navigating the Evolving Crypto Landscape In conclusion, Dogecoin may have dominated headlines in 2021, but emerging rivals such as Dogwifhat (WIF) and Retik Finance (RETIK) are poised to challenge its dominance in future years. With their innovative features, strong performances, and growing investor interest, WIF and RETIK represent promising alternatives for investors seeking opportunities in the dynamic cryptocurrency market. As the 2024 bull run approaches, savvy investors are keeping a close eye on these DOGE rivals, recognizing their potential to reshape the digital asset landscape and deliver substantial returns. Visit the links below for more information about Retik Finance (RETIK): - Website: <https://retik.com> - Whitepaper: <https://retik.com/retik-whitepaper.pdf> - Twitter: [www.twitter.com/retikfinance](https://twitter.com/retikfinance) - Telegram: [www.t.me/retikfinance](https://t.me/retikfinance)

- Altcoins, meme coins, and layer-1 cryptos face price swings amid Bitcoin stability concerns. - Bitcoin is struggling to maintain crucial support at \$63,500. The latest update from the cryptocurrency market shows a slight uptick in global crypto activity, albeit with some notable declines. The overall market capitalization dipped by 1.79%, to \$2.33 trillion, and a 19.83% decrease in total trading volume, now at \$63.56 billion. Bitcoin is facing challenges in maintaining support levels after its fourth halving on April 20, particularly struggling around the \$62,700 to \$63,500 mark. While Bitcoin grapples with stability, attention has turned to altcoins, with memecoins and layer-1 cryptocurrencies leading the charge to outperform Bitcoin over the past month. This shift has sparked discussions among traders about the potential onset of an altcoin season. Market watchers over the past month, the altcoin market has witnessed significant value growth, particularly amid concerns about Bitcoin's halving. However, today, major altcoins experienced a decline in their values, suggesting a potential reversal or consolidation in the market. Ethereum (ETH), the second-largest cryptocurrency, is encountering resistance in breaching the \$3,150 zone, while BNB and Solana have experienced 3% and 5% declines in their respective prices over the last 24 hours. The frenzy surrounding meme coins, which has captured the attention of the entire market, has also encountered a substantial decline in prices. Prominent meme coins like Dogecoin (DOGE), Shiba Inu (SHIB), and PEPE are among those experiencing significant drops in value.

In the dynamic world of cryptocurrency, new contenders constantly emerge, vying for attention and investment. Among these rising stars is Hump (HUMP), hailed by Bitcoin bulls as the standout altcoin of 2024. With its modest price below \$0.05 and the promise of 50x growth by year's end, Hump has captured the imagination of investors worldwide. This article explores the phenomenon of Hump, its origins, its unique features, and why it has become the focus of bullish sentiment in the crypto community. Unveiling Hump (HUMP) Hump, adorned with its endearing name and charming mascot, has swiftly ascended to prominence as the leading Solana meme coin. Despite its recent launch, it has already cultivated a fervent community boasting over 7,500 dedicated holders. However, Hump transcends the realm of mere meme tokens; it serves as a beacon of innovation and

communal empowerment within decentralized finance (DeFi). Leveraging the lightning-fast speed and scalability of the Solana ecosystem, Hump finds itself in an optimal environment for growth and development. As it garners traction on prominent platforms like CoinMarketCap and CoinGecko, anticipation mounts for its imminent listings on centralized exchanges (CEX). With a substantial total supply of 6,900,000,000 tokens, Hump stands poised to leave an indelible mark on the crypto landscape, promising a future characterized by innovation, inclusivity, and community-driven progress. A Beacon of Progress What sets Hump apart from other meme coins is its commitment to progress and innovation. While its furry mascot may evoke a sense of whimsy, the project's underlying principles are rooted in serious technological advancement. By leveraging the capabilities of the Solana blockchain, Hump aims to revolutionize decentralized finance and empower its community members. Hump represents more than just a cute face; it embodies the spirit of forward-thinking and inclusivity. By embracing Hump, investors align themselves with a movement dedicated to reshaping the future of finance. The project's emphasis on community engagement fosters a sense of belonging and collective purpose among its supporters. Hump has significantly grown from a zero market cap to hit \$137.48M as of writing. Its impressive growth within a week has won the heart of some certain Bitcoin Bulls and and they're praising Hump (HUMP) as a new Ethereum competitor priced under \$0.05 as the best cheap altcoin in 2024. The Road to Success Despite its humble beginnings, Hump has rapidly gained momentum, drawing the interest of both seasoned investors and newcomers alike. Its affordable price point below \$0.05, hovering around \$0.02002, makes it an appealing choice for those looking to enter the crypto market without breaking the bank. However, it's not just its accessibility that has caught the attention of Bitcoin bulls; it's the prospect of exponential growth. Having already delivered remarkable returns of over 95x to early backers, Hump has demonstrated its capacity for generating substantial profits. Bitcoin bulls, celebrated for their keen market insights, anticipate Hump's value skyrocketing by 50x by the year's end. Such optimistic forecasts stem from the project's robust fundamentals, expanding community, and strategic integration within the Solana ecosystem. As excitement mounts and anticipation builds, Hump's trajectory seems set to redefine the standards of success in the cryptocurrency realm. Looking Ahead As Hump continues its ascent, the crypto community watches with anticipation, eager to see how this promising project unfolds. With listings on major exchanges on the horizon and an ever-expanding community of supporters, the future looks bright for Hump and its investors. While the crypto market is known for its volatility, Hump's strong foundation and innovative vision position it as a frontrunner in the race for dominance. Conclusion In the competitive world of cryptocurrency, Hump stands out as a shining example of innovation and community-driven success. With its humble beginnings as a meme coin and its rapid rise to prominence, Hump has captured the hearts and wallets of investors worldwide. As Bitcoin bulls sing its praises and forecast exponential growth, Hump's journey is only just beginning. With a steadfast commitment to progress and a dedicated community backing its every move, Hump is poised to become a force to be reckoned with in the ever-evolving crypto landscape of 2024 and beyond. What are the chances that your \$100 investment will turn into a thousand dollars in a few months? Well, in regular cases, the possibility is quite low, but there is a cryptocurrency that may turn this small investment into not just thousands, but millions too. The BEFE coin is at the top of the rankings when it comes to making profits for investors. In the last few months, the price of BEFE coin has shot up and it is still rising the mountain to become the next big thing in the crypto space. The BEFE coin is still priced at a low tag which makes it a highly investible token for every person, be it a small investor or even a whale. Let's check out why the BEFE coin is right for investing and what can be expected of it. The BEFE Coin Transition BEFE coin was introduced to the market as a meme currency in November last year. This token was initiated just for the sake of humour and parody in the crypto space. People had invested in BEFE coins just to send them as memes to people or just as a humorous gift to friends. But now, the BEFE coin is being purchased as one of the most investible tokens. The BEFE coin creators and management have announced phase 5 for the token which includes the addition of BEFE coin to the Solana chain. This move has attracted a lot of crypto projects to use the BEFE coin as the primary token. The BEFE coin is based on the Ethereum chain and is compatible with the EVM functions. So, the BEFE coin is also being used to implement smart contracts in various cases. Then there are cases where the BEFE coin is being used in metaverse and marketplaces as well. So, the increased usage of BEFE coin has helped push up the price of this token in the market. Performance Stats of the BEFE Coin Multiple experts have claimed that the BEFE coin is going to become the next big thing in the market. This is primarily because this token has a great score in KPIs currently. This token has grown immensely in the last few weeks and has become a mid-cap token with huge upside potential now. The RSI score of the BEFE coin clearly indicates a strong buy signal for the token in the market. Then the MACD value and moving average of the coin also send positive affirmations to the investors. The trading volume of the BEFE coin is increasing rapidly with each passing day which makes the BEFE coin highly preferred by investors. The volatility percentage of BEFE coin stands at 12% which is even lower than some of the best performing assets in the crypto market. Many more stats will prove how BEFE coin is growing immensely in the market. Conclusion With the above discussion, it is clear that the BEFE coin is not one for going down now. It is only going to grow and become a substantial token in the crypto space. This is the time when people can invest even a small amount in this currency and make huge profits in the coming days or months. The BEFE coin is set to be at the top of the table with its growing base and increasing use cases in the crypto space. Disclaimer: TheNewsCrypto does not endorse any content on this page. - Bitcoin Runes token DOGâ€¢G0â€¢T0â€¢THEâ€¢MOON (DOG) ascends as the 9th largest memecoin by market cap. - According to the latest data, 72.5K holders hold DOG tokens. Bitcoin Runes-based memecoin DOGâ€¢G0â€¢T0â€¢THEâ€¢MOON (DOG) hits \$500 million market cap following announcements of its listings on four notable centralized exchanges (CEXs) within the last 24 hours. This surge has catalyzed DOG to join the top 10 memecoins by market cap. Notably, DOG stands on the ninth spot, with two hyped Solana-based memecoins â€” Book of Meme (BOME) and Cat in a dogs world (MEW) â€” ahead in the rankings. According to data on MagicEden, at press time, the average floor price of this Runes token was 7.7 sats (satoshis), worth \$0.0051. 100 billion DOG tokens recorded a market cap of \$495.3 million and a 24-hour trading volume of \$7.34 million. This dog-themed memecoin was â€”etchedâ€” onto the Bitcoin blockchain via the Runes Protocol. It was then airdropped to eligible Runestone NFT holders on April 24th. So far, crypto exchanges such as OKX, Gate.io, CoinW, Bitrue, CoinEx and Cube have listed DOG. Marketplaces such as MagicEden and UniSat also have listed this token. What's the Next Target For Bitcoin Runes DOG? Spiking the Bitcoin meme maxisâ€” hype, the pseudonymous co-creator Leonidas has unveiled his â€”idealâ€” expectations for â€”phase 2 in DOGâ€”s memecoin lifecycleâ€” on X. This includes featuring on the famed digital artist Bleeple's feed, listings on tier 1 CEXs, and higher market cap targets. Practically speaking this is what phase 2 in DOG's memecoin lifecycle ideally should look like: â€” Leonidas (@LeonidasNFT) April 26, 2024 â€” Bleeple everyday â€” Multiple tier 1 CEX listings â€” At \$767M MCAP we hit front page of CoinMarketCap â€” At \$1B MCAP mainstream media coverage starts You are not ready for Phase 3 Following DOG, other Runes in the lineup are RSICâ€¢GGENESISâ€¢RUNE (RSIC), holding a market cap of \$210 million and 22,255 holders, and LOBOâ€¢THEâ€¢WOLFâ€¢PUP (LOBO), with \$56.3 million and 74,408 holders. Since its launch on Halving Day, Runes has captured a dominant share of transactions on the Bitcoin blockchain. On Tuesday, 81% of on-chain transactions were related to these â€”etchedâ€” tokens. Launch of Ordinals took over the realm in 2023, spurring the Inscriptions and BRC-20 bandwagon. How will these Runes that boost the creation of fungible tokens on Bitcoin lead the game now?

Have you been waiting for a cryptocurrency that can get you the maximum returns in the least amount of time? Well, the crypto market is famous for one thing, the chances of making quick money on tokens. The BEFE coin is one such currency that can be considered a great option for earning quick money. The BEFE coin started out as a meme currency and was shared amongst the community for community building. But today, the BEFE coin has had a turnaround and is a great community token too. The BEFE coin has added to explore the world of utilitarian advantages and thus bring profit for the investors. Let's check out what is so special about the BEFE coin and how it is going to make money. The BEFE Coin Potential Every person investing in the crypto market has just one thing in mind, that they have to get the most profit in the least time. This is because of the unregulated nature of the crypto world and no one knows what might happen. In this unpredictable market, the BEFE coin decided to take a complete turnaround from being a meme coin originally. The BEFE coin has a collaboration with the Bitcoin chain to provide the fastest transaction services and that too at the lowest cost. BEFE coin is based on Ethereum too which makes it EVM compatible and supports smart contracts. Then, the BEFE coin creators recently announced phase 5 for the token which will make the token compatible with the Solana chain as well. So, all of these additions work in favour of the BEFE coin. An increase in the utility of the BEFE coin has helped improve the potential of the token too. This method has been useful in introducing the token to a whole new world of investments and thus people are purchasing this token for more profits. The Market Expansion for BEFE Coin The BEFE coin has become one of the fastest growing tokens in the market and that is largely because of the addition of new perks to the token. The BEFE coin has come out of being just a meme currency and is now also being listed on two more exchanges. The features offered by BEFE coin and its expansion strategy have helped the token gain a price advantage in the crypto world. The BEFE coin started out as a no pre-sale and tax token which made it an attention-grabbing asset already. Now the BEFE coin has a whole new image in the market and people want to invest in this token. The RSI score of the BEFE coin is near 55 and the MACD value is positive too. This sends out a strong positive signal in the market for investing in the BEFE coin. Then the moving average and increasing trading volume is a great addition too. Conclusion Multiple professionals have predicted that the BEFE coin is going to explode huge in the market and make a difference. These predictions are made for the end of this year by which the BEFE coin aims to become the \$ currency in the crypto world. With the current pace, if you invested in the BEFE coin, it might probably make you a million by the end of this year. So, choose your best option and invest when the price is right.

Pionex "Best AI Trading Bot for Creating Custom Strategies | AI Trading Platform | Pionex | | Supported Assets | Crypto | | Fees | 0.05% | | Minimum Investment Required | \$110 | | Free Plan | Available | Pionex is a popular platform utilized by over 100,000 traders spanning over 100 countries. It offers a range of crypto trading bots, including the Grid trading bot and the Rebalancing Bot, catering to different investment strategies. With Pionex, users have access to a comprehensive crypto trading platform integrated with AI bots, eliminating the need to connect to external exchanges. The platform supports nearly 380 crypto markets, ensuring ample trading opportunities for users. Pionex has earned a solid reputation, with its AI bots receiving positive feedback from various sources, including prominent YouTube influencers like Max Maher, who conducted tests with his own \$10,000 capital. Pionex provides access to popular cryptocurrencies like Bitcoin, Dogecoin, Solana, Shiba Inu, and Cardano for trading. Their AI bots offer various strategies, including a grid trading bot that purchases major cryptocurrencies during market downturns and sells them at predetermined profit margins. Additionally, Pionex offers a dollar-cost averaging bot designed for long-term investors. Regarding fees, Pionex does not charge for using its trading bots. Instead, users incur a trading fee of just 0.05% per transaction, making it a cost-effective option for automated trading. Pros: "One of the top AI trading platforms for cryptocurrencies" Wide selection of bot strategies available "Pay only when the bot trades" 0.05% per slide "Supports nearly 380 cryptocurrencies" No minimum deposit requirement Cons: "Does not support traditional assets such as stocks" High-margin trading fees Kryll "The Best AI Trading Platform for Automated Strategies | AI Trading Platform | Kryll | | Supported Assets | Crypto | | Fees | Varies by bot | | Minimum Investment Required | \$100 | | Free Plan | Not Available | Kryll is known as a game-changer in AI trading platforms, especially for folks keen on AI software for stock trading. It boasts of being one of the biggest marketplaces for AI trading bots, offering a vast selection of user-created bots featuring various crypto day trading strategies. According to Kryll, a whopping 100% of these bots outperform the market, with some top strategies making as much as 100% annually. Traders on Kryll have the option to either copy existing strategies, tweak them to their liking, or craft their own using the platform's user-friendly strategy editor, which doesn't require any coding knowledge. The editor supports numerous technical indicators, unique metrics, as well as rules and triggers to help traders manage their risk effectively. Kryll's strategies can be seamlessly executed on major crypto exchanges such as Binance, KuCoin, Kraken, Crypto.com, Gate.io, and ByBit, making it convenient for users. When it comes to pricing, traders need to purchase subscriptions for individual bots from the marketplace. Kryll levies a small trading fee for each execution, but users holding Kryll's native \$KRL crypto token enjoy fee discounts. Kryll adopts a flexible Pay-As-You-Go pricing model, which is attractive for those who want to keep a close eye on their trading expenses. Users only pay for the strategies they use, with the option to further reduce costs by participating in the Kryll Holding Program. Pros: "Marketplace with a wide selection of ready-to-deploy bots" Ability to create custom trading strategies "Integration with 9 major crypto exchanges" 75% of strategies outperform the market "Reduced fees available for \$KRL holders" Cons: AI Costs can accumulate rapidly "Lack of backtesting tools for custom strategies" Learn2Trade "Top Crypto Trading Bot with 79% Win Rate | AI Trading Platform | Learn2Trade | | Supported Assets | Crypto | | Fees | No fees | | Minimum Investment Required | \$99 | | Free Plan | Not Available | Learn2Trade is a well-known service that provides forex and crypto trading signals alongside a reliable crypto trading bot. The Learn2Trade crypto bot boasts an impressive success rate of 79% when trading tokens like Bitcoin, Ethereum, Cardano, BNB, Chainlink, and more. Operated through Cornix, the bot translates signals from Learn2Trade's Telegram group into orders that are then sent to a trader's crypto exchange or broker. Setting up the bot is a breeze and takes less than 10 minutes. Once it's up and running, traders can sit back as the bot handles the opening and closing of crypto trades automatically, without any manual intervention. Built using over 100 technical indicators and capable of scanning dozens of crypto pairs, Learn2Trade's AI bot can spot opportunities in any market condition. Operating 24/7, it's perfectly suited for the crypto market, which never sleeps. With a target reward-risk ratio of 3:1, mirroring professional traders, it aims to the bot employs take-profit and stop-loss levels with every trade to effectively manage risk. Learn2Trade's bot is available for \$99 per month, \$349 per year, or \$1,499 for a lifetime subscription, offering flexibility for traders based on their preferences and budget. Pros: "Ready-to-use crypto trading bot" Simple setup process and seamless integration "Bot operates 24/7, ensuring continuous trading" Built-in risk management features "Trades across dozens of crypto pairs" Lifetime subscription option available Cons: "No free plan offered" Bitsgap "Best User-Friendly Trading Platform | AI Trading Platform | Bitsgap | | Supported Assets | Crypto | | Fees | \$20 per month | | Minimum Investment Required | \$230 | | Free Plan | Not Available | Bitsgap is a leading AI trading platform that offers a comprehensive solution for automating cryptocurrency trading strategies, catering to traders in the United States. With its user-friendly interface and advanced technology, Bitsgap is suitable for both beginners and experienced traders aiming to enhance their efficiency and profitability in the dynamic crypto market. Traders can seamlessly connect to various crypto exchanges like Binance and Coinbase through the Bitsgap trading terminal. Currently, over 500,000 customers rely on Bitsgap for their AI trading needs. One of the standout features of Bitsgap is its wide range of pre-made trading bot strategies. These strategies can be easily customized to match individual trading goals and risk preferences, providing traders with the flexibility to explore new techniques or optimize existing ones. Bitsgap offers a transparent and flexible pricing structure, with plans starting from just \$23 per month for the basic subscription. Each plan is designed to meet different trading requirements, offering features such as active GRID and DCA bots, unlimited smart orders, and futures bots. Additionally, Bitsgap provides a free 7-day PRO trial, allowing users to fully experience its capabilities before making any commitments. Pros: "Offers a comprehensive suite of trading tools" User-friendly interface across various devices "Provides a wide range of pre-made strategies" Transparent and flexible pricing structure Cons: "Access to premium features necessitates higher-tier subscriptions" Octobot "Best for Price Predictions Through ChatGPT. | AI Trading Platform | Octobot | | Supported Assets | Crypto | | Fees | Monthly subscription | | Minimum Investment Required | \$100 | | Free Plan | Available | Octobot is a platform designed to assist traders in navigating the cryptocurrency markets by offering tailored trading strategies with the help of AI. The platform provides support for various popular trading bots, including GRID strategies, daily trading modes, and DCA strategies. What sets Octobot apart is its integration of AI within the crypto trading realm. Utilizing OpenAI's ChatGPT, one of the leading AI trading tools globally, Octobot incorporates AI-powered trading strategies. By leveraging ChatGPT, Octobot analyzes cryptocurrency market trends and receives price predictions. For instance, Octobot might inquire about ChatGPT for a short-term price forecast on XRP. The AI chatbot then examines historical price data and real-time market movements to generate a price prediction, which is subsequently suggested to the investor. These AI predictions are provided within the GRID and Daily trading modes. Octobot offers a free subscription plan, but it only supports pre-set automated trading and paper trading. For access to the ChatGPT trading mode, investors need to subscribe to the "Standard Plan" priced at \$76 per month. Pros: "Utilizes ChatGPT for making price predictions" Provides a free trading version "Utilizes real-time market movements" Supports GRID and daily trading bots Cons: "Requires a payment of \$76 per month to access the AI mode" CryptoHopper "Popular Trading Bot Work on Multiple Exchanges | AI Trading Platform | CryptoHopper | | Supported Assets | Crypto | | Fees | \$129 per month | | Minimum Investment Required | \$240 | | Free Plan | Available | CryptoHopper distinguishes itself as a robust platform designed specifically for crypto traders, providing a strategy marketplace where users can replicate a wide range of pre-made and user-created trading strategies. Traders have the flexibility to customize these strategies with features like trailing stops and price targets to effectively manage their risk. For those looking to take the trading to the next level, CryptoHopper enables users to build and backtest their strategies without requiring any coding skills. With support from over 130 indicators, traders can fine-tune their strategies to suit their preferences and market conditions. One of CryptoHopper's most advanced features is the ability to create AI bots for trading. These bots learn from the success of both self-created and copied strategies and can automatically switch between them based on market conditions, optimizing profit potential. This sets CryptoHopper apart from other trading bot services that typically focus on one strategy at a time. However, CryptoHopper's top-tier plan, which includes AI trading functionality, comes for \$129 per month. Nonetheless, users can avail themselves of a 30% discount by using the Promo Code "CLICKOUT". Pros: "Marketplace offering a variety of bots for copy-trading" Capability to create and backtest custom trading strategies "Capable of automatically switching between strategies" Supports over 130 built-in technical indicators "Integrates with 17 major crypto exchanges" Cons: "Limited to crypto trading, excluding other asset types" Some bots may require additional subscriptions TradeSanta "Best AI Trading Platform for DCA Strategy | AI Trading Platform | TradeSanta | | Supported Assets | Crypto | | Fees | \$25 per month | Minimum Investment Required | \$180 | | Free Plan | Available | TradeSanta is a top-notch crypto trading platform that offers a range of features including trading bots, trading signals, copy trading, and a trading terminal, all accessible via a convenient mobile app. This versatility makes it an ideal choice for traders who are frequently on the move and need to closely monitor their investments and bots. Traders can easily connect their exchanges, including Binance, OKX, Coinbase, HTX, Kraken, and ByBit, using API keys. TradeSanta provides a comprehensive suite of tools for automating trading strategies. It offers both spot and futures trading bots that support long and short strategies, enabling users to capitalize on market movements in any direction. Integration with top exchanges ensures access to a wide market, while features like Dollar Cost Averaging (DCA) and Grid strategies help mitigate risks and exploit market volatility. Technical indicators and signals, including those from TradingView, assist traders in entering and exiting the market at optimal times. For traders who prefer not to create their bots, TradeSanta offers a marketplace where they can find bots developed by other traders. Before committing, users can test strategies using a demo account to assess performance. Additionally, they can set stop loss and trailing stops and establish take-profit targets to optimize bot performance. Pros: "User-friendly platform suitable for traders of all levels" Automated trading available 24/7 on both spot and futures markets "Copy trading feature allows users to leverage successful strategies" Competitive pricing structure with a free trial option Cons: "Advanced features require upgrading to higher-tier plans" 3Commas "Best Platform for Manual & Automated Trading | AI Trading Platform | 3Commas | | Supported Assets | Crypto | | Fees | \$22-\$75/month | | Minimum Investment Required | \$100 | | Free Plan | Available | 3Commas is a crypto investment platform that empowers users to create and manage automated trading strategies. With a wide range of prebuilt strategies available, users can also design their strategies using indicators, signals, and triggers. Additionally, users can link their 3Commas account to TradingView to execute trades based on TradingView signals. Supporting over 20 exchanges, including Binance, Coinbase Pro, and Bitfinex, 3Commas allows users to monitor their portfolio, track performance, and adjust settings via both web and mobile apps. The platform offers various bots like the DCA Bot, Futures Bot, and GRID Bot, with seamless integration with top exchanges such as Binance, Coinbase Pro, and Bitfinex. With dedicated apps for iOS and Android, 3Commas caters to mobile users as well. It takes this feature as accessible 3Commas offers a high-profile base, partly by offering features like the best ever and encryption. However, it's essential to acknowledge the risks associated with any trading platform and conduct thorough research before investing. Pros: "Automated portfolio rebalancing functionality" Smart and Copy trading features available "Ability to test all Pro features in a 3-day free trial" Integration across major exchanges "Bots available for all crypto market conditions" bull, bear, and sideways "Unique bot options offered" Cons: "Detailed interface may initially feel overwhelming" Profitability may be difficult to measure "Tracking average profitability can be challenging" Coinrule "Best Platform for Beginners | AI Trading Platform | Coinrule | | Supported Assets | Crypto | | Fees | \$499.99 a month | | Minimum Investment Required | \$100 | | Free Plan | Available | Coinrule is one of the top AI-automated cryptocurrency trading platforms, particularly suited for beginners. Its trading terminal seamlessly connects with over 10 of the leading crypto exchanges worldwide. Coinrule employs military-grade security measures and encryption protocols. Traders can access straightforward and effective AI-based trading strategies like "Catch the Swing," which leverages the RSI technical indicator to identify optimal buying and selling opportunities during sideways markets. The free version of Coinrule's automated trading bot supports 20 exchange platforms, with the option for users to pay for access to an unlimited number of exchanges. Supported exchanges include Binance, Kraken, OKX, Gemini, KuCoin, Robinhood, and more. Users can set

their parameters via the Coinrule website and deploy them to their chosen exchange. Trading is available 24/7, with users able to select from three pricing plans. The most premium plan allows up to 50 trading rules to run and execute 10,000 trades per rule within 24 hours. Coinrule also offers personalized one-to-one training sessions, unlimited trade volume, and ultra-fast trade execution from a dedicated server. Coinrule's demo exchange offers the opportunity to create numerous trial rules and strategies. Users can experiment with various trading choices and gain insights without risking actual funds. The system supports both market and limit orders within these demo rules, providing a comprehensive learning experience. Pros: "It is a beginner-friendly trading platform" Customized bots for trading "Free subscription service" Individual training sessions are accessible. Cons: "Pro plan is priced at \$449.99 per month Conclusion The top AI trading bots can assist traders in identifying more trading opportunities, minimizing risk, and potentially increasing profits. These bots come with a variety of strategies and can be applied to trading crypto, stocks, forex, and other assets. Our choice for the best overall AI trading bot in 2024 is ValueZone. ValueZone provides access to two crypto trading bots and will soon allow traders to develop their custom bots. It boasts a user-friendly interface and offers a reasonably priced subscription, delivering exceptional value. FAQs Are AI bots the best option for trading? AI bots can be highly effective for trading, often yielding returns that surpass what many individual traders could achieve on their own. Do AI trading bots yield successful results? Many AI trading bots exhibit win rates significantly higher than 50%, with some boasting annual returns exceeding 100%. Are AI trading bots permissible? AI trading bots are entirely legal for crypto, stock, and forex trading in the US and the majority of other countries. How do AI trading bots operate? AI trading bots function based on a set of predetermined entry conditions, which, when met, prompt the bot to initiate a trade. Which AI trading bot is optimal for crypto? The leading AI crypto trading bot is ValueZone. ValueZone supports trading across numerous cryptocurrencies, boasting an impressive win rate. In a bold move, the AI chatbot ChatGPT, when tasked with building an ideal crypto portfolio with just three coins, surprisingly omitted Cardano, a once-promising blockchain project. Instead, the AI chose to focus on the trio of Solana, Retik Finance, and Dogwifhat, asserting that these three cryptocurrencies have the potential to outshine the market in 2024. Solana: The Scalable Blockchain Powerhouse Solana, the high-performance blockchain network, has been making waves in the cryptocurrency space with its impressive scalability and low transaction fees. Defying broader market uncertainty, the SOL price has showcased a notable upswing of 12% in the past week alone. Following a healthy retracement, the Solana coin has developed a bullish continuation pattern called a pennant, bolstering the potential for a sustainable rally. With a 24-hour trading volume of \$3.5 billion, indicating a 29% gain, Solana's momentum shows no signs of slowing down. Retik Finance: Pioneering DeFi Debit Cards and AI-Powered Lending Retik Finance, a relatively new player in the decentralized finance (DeFi) arena, has taken the crypto world by storm with its innovative offerings. The project has already launched its virtual DeFi debit cards in beta, a year ahead of schedule, allowing users to bridge the gap between digital assets and real-world transactions seamlessly. Furthermore, Retik Finance boasts a suite of cutting-edge features, including a user-friendly wallet, a secure payment system (Retik Pay), and an AI-powered lending platform. These offerings have positioned Retik Finance as a frontrunner in the DeFi space, attracting investors and traders seeking practical utility and user-centric innovation. Notably, Retik Finance has already garnered significant recognition, having been listed on renowned platforms like CoinGecko and CoinMarketCap. Additionally, the project has successfully undergone a rigorous audit by the renowned security firm Certik, further solidifying its credibility and commitment to transparency. Dogwifhat: The Meme Coin Phenomenon Dogwifhat, the Solana-based meme coin featuring a Shiba Inu wearing a knitted hat, has taken the crypto world by storm. Since its launch in November 2023, Dogwifhat has skyrocketed more than 10,000%, with its price chart still aiming for the moon. On April 11th, 2024, the Dogwifhat price reached an all-time high of \$4.69, marking a staggering 12.5% increase in just 24 hours. With a market cap of \$4.09 billion and over 62,000 token holders, Dogwifhat has cemented its place as a force to be reckoned with in the meme coin realm. Analysts predict that Dogwifhat's meteoric rise is far from over, with some projecting the token could reach a price of \$3.50 by the end of 2024, and potentially \$7-\$12.50 by 2030. Retik Finance Celebrates Presale Success with a \$5,000 Giveaway In the aftermath of its remarkable presale achievement, Retik Finance is expressing appreciation toward its devoted community through a \$5,000 giveaway. Twenty-five fortunate individuals will be selected, each receiving a \$200 cash prize for their exceptional submissions. As Retik Finance builds upon this momentum, the team is actively working to secure listings on two major top-tier exchanges, with forthcoming announcements on their social media channels The Future of Crypto: Embracing Innovation and Utility As the crypto market continues to evolve, investors are increasingly gravitating towards projects that offer tangible utility and innovative solutions. Solana, Retik Finance, and Dogwifhat have emerged as prime examples of this trend, each carving out a unique niche and addressing specific needs within the crypto ecosystem. While Solana's scalable blockchain network addresses the demand for efficient and cost-effective transactions, Retik Finance's virtual DeFi debit cards and AI-powered lending platform cater to the growing need for practical applications in the DeFi space. Dogwifhat, on the other hand, has tapped into the ever-growing popularity of meme coins, capturing the imagination of investors seeking a fun and potentially lucrative investment opportunity. Visit the links below for more information about Retik Finance (RETIK): - Website: <https://retik.com> - Whitepaper: <https://retik.com/retik-whitepaper.pdf> - Twitter: www.twitter.com/retikfinance - Telegram: [www.t.me/retikfinance](https://t.me/retikfinance)

Have you been looking for an asset that can give you the highest and fastest returns? The cryptocurrency market has become a sea of possibilities for people to invest some money and earn huge profits from the tokens. The BEFE coin is one of the jewels in this sea of currencies that can even turn \$100 into millions with the growth that it is having in the market. The BEFE coin is a utility token now that started off as a meme currency for just fun. With the growth rate that the BEFE coin has today, it is not too much to say that it may even become one of the biggest altcoins in the market. Let's check out what is helping the BEFE coin grow and if it will make your investments skyrocket or not. The Growth of BEFE Coin A lot of people did not even have an idea that the BEFE coin was originally not meant to be traded as a regular token in the market. BEFE coin was launched in August 2020 as a parody token and was transferred only through personal transactions. The BEFE coin has been listed on various exchanges recently and it has helped the BEFE coin become one of the fastest-growing cryptocurrencies in the market. The BEFE coin is compatible with the EVM methods and has been built on the Ethereum chain which is why it is easier to convert to a utility token. The recent announcement of the BEFE coin contains the transformation of phase 5 on the Solana chain and thus expansion of the market with more crypto projects. The BEFE coin has become a major transactional crypto for a lot of projects and that is how the BEFE coin is growing its utility. Staking on Bitget also supports the BEFE coin and the users are rewarded with the BEFE coins. So, in all the BEFE coin is growing at a rapid rate that nobody could have anticipated. The Market Performance of BEFE Coin The BEFE coin has been performing well in the crypto market as well. Being launched in 2020, the BEFE coin has not been on many exchanges for the last two years. It is recently that the BEFE coin was introduced on 4 exchanges and with the successful reaction of the investors, the token is getting on more exchanges as well. The BEFE coin is growing at nearly 20-30% per month in terms of the trading volume. This growth rate is enough for the BEFE coin to touch the \$1 mark in very little time. The BEFE coin has great market scores as well with an RSI score above 55 and the feed & greed ratio under control. The BEFE coin owes it to the accepting crypto market that the BEFE coin is growing so rapidly. Conclusion The BEFE coin has captured over \$45M in the crypto market as a capital but even right now, it is quite small as to what the token wishes for. The current time is best to invest in the BEFE coin as it has proven its worth by being in the market without being termed illegitimate. So, you can invest in the BEFE coin to have the largest profitable run in history.

Have you been searching for a path to convert your small investments into huge opportunities? Well, then the crypto world has a huge chance for you to become a millionaire in very little time. The BEFE coin in the crypto market is going to become the next big thing in the market with the current growth rate that it has. The BEFE coin is a token that started off as a meme currency but has now become one of the fastest-growing utility tokens in the market. It was introduced to the market as a way to create a parody community in the crypto world. The BEFE coin initially planned to be the biggest meme currency but recently, there have been multiple pivots in the functioning of the BEFE coin. Let's take a look at what the BEFE coin is about and how it will be profitable to the investors. Turning the Pages with BEFE Coin The BEFE coin is one of the most versatile tokens that users can have in the crypto space. BEFE coin started its journey as a small meme currency that was only shared amongst a community as parody or humour. Then the BEFE coin was shared within the community and even started being traded as a meme token. Recently, the BEFE coin has pivoted from being a meme currency only to becoming a utility token. The BEFE coin has partnered up with the Bitget chain as well and people who stake in the Bitget get BEFE coin as a reward. The BEFE coin is based on the Ethereum network which makes it EVM compatible too. Then, the BEFE coin has also announced phase 5 which will lead to the use of the Solana chain for the cryptocurrency. All of these moves have been in the direction of growth for the BEFE coin and have helped the investors in getting as much profit as possible. Let's also see how the BEFE coin is performing in the trades to judge if it will be the next big thing. The Financial Growth of BEFE Coin The BEFE coin has become a cap token in very little time with the help of its constant tries to increase its utility. The BEFE coin has a strong backend team that keeps promoting the token in front of the people. Now, the BEFE coin has a market cap of more than \$45M which makes it quite a remarkable token. The BEFE coin is also being traded on more than 6 exchanges currently which increases the number of trade orders for BEFE coin. The trading volume of the BEFE coin is also increasing rapidly which has helped the price of the token to grow. The Dogwifhat, the Shiba Inu, and BEFE coins are the top meme coins in the market and they have been able to achieve this by being the first to introduce their projects to the market. The BEFE coin is going to be the next big thing in the market and it is going to be the next big thing in the market. Conclusion The point that the BEFE coin is here to make a mark for the future is abruptly clear by now. The experts predict that the BEFE coin may grow 500% by the end of this year. Then there are some other predictions too that suggest the BEFE coin to touch \$1 soon. All of these predictions are in favour of the BEFE coin hence making this token one of the most sought-after ones. Disclaimer: TheNewsCrypto does not endorse any content on this page. Dive into the true dark side of crypto memes with Dork Lord, the ultimate alpha of meme tokens on Solana. Join the revolution now! Step into the darkness and embrace the true alpha of crypto meme tokens with the launch of Dork Lord on the Solana blockchain. Dork Lord isn't just another meme token; it's your gateway to the true dark side, where authenticity reigns supreme, and true fate awaits those bold enough to venture forth. Embrace the True Dark Side Dork Lord invites you to embrace your inner dork and join a community unlike any other in the crypto space. With its darkly humorous narrative and relentless commitment to authenticity, Dork Lord promises an experience that's truly out of this world. Unlike other meme tokens that fade into obscurity, Dork Lord stands as a testament to the power of the true meme. With a team dedicated to pushing the boundaries of what's possible in the world of crypto, Dork Lord is poised to become the true alpha of the meme token world. A Team Like No Other Behind every great meme token is a team of dedicated individuals committed to seeing their vision through to the end. With Dork Lord, you'll find a team unlike any other, united in their passion for memes and driven by a shared desire to disrupt the status quo. Led by true believers in the power of the meme, the Dork Lord team is poised to lead the charge into uncharted territory, with their eyes set firmly on the future. The Dork Lord team is prepared to do whatever it takes to ensure the success of their project. Your true fate awaits Dork Lord isn't just a token; it's a journey into the unknown, where anything is possible. Whether you're a seasoned crypto veteran or just dipping your toes into the world of decentralized finance, Dork Lord invites you to join us on this epic adventure. With a roadmap packed full of exciting milestones and a community buzzing with excitement, Dork Lord promises an experience like no other. From meme contests to community events, there's always something happening in the world of Dork Lord. Join the Dork Lord Movement The launch of Dork Lord on Solana represents a turning point in the evolution of meme tokens. Whether you're a seasoned crypto veteran or just dipping your toes into the world of decentralized finance, there's a place for you in the Dork Lord community. Join us as we embark on this exciting journey and help us shape the future of crypto memes. To learn more about Dork Lord and join the revolution, visit the official website at <https://dorklord.com/> and follow them on Twitter at https://twitter.com/dorklord_solana and join the Telegram channel at https://t.me/dorklord_sol. About Dork Lord Dork Lord is a community-driven meme token launched on the Solana blockchain. With a focus on authenticity and innovation, Dork Lord aims to redefine the meme token narrative and bring joy to crypto enthusiasts worldwide. Join the true meme revolution today and embrace your true fate with Dork Lord. Website | Twitter | Telegram | DEXTools Disclaimer: TheNewsCrypto does not endorse any content on this page. The DODO team is excited to announce the launch of DODOchain, an Omni-Trading Layer 3 that is powered by EigenLayer, AltLayer, and Arbitrum Orbit. As the first Layer3 solution, DODOchain bridges Bitcoin and Ethereum's Layer2 effortlessly and focuses on bringing liquidity from several chains together in one place. Trade tokens on the DODOchain, the rollout-level liquidity layer, to boost profits via restaking. The Reason Behind DODOchain's Creation With its innovative Proactive Market Maker (PMM) algorithm, which brought a focused liquidity solution around the oracle price, DODO was launched in August 2020. As a result, customers were given better exchange rates and mainstream assets' capital efficiency was greatly increased. With three distinct liquidity pools to accommodate mainstream assets, stablecoins, DOD tokens, and various user groups, including traders and professional market makers, DODO V2 was introduced in February 2021. Later on, DODO developed features as Launchpad, Token Creator, Trading Widgets, Crosschain Swap Aggregator, Limit Orders, and Swap Aggregator DODOX. At the moment, DODO is deployed on 14 blockchains' mainnet. With over 24 million transactions, over 3.31 million users overall, and a total trading volume over \$141 billion, the exchange has achieved remarkable success. Our team has spent the last three years working hard to create products that will provide our consumers the greatest trading pricing and the finest liquidity solutions. We think that blockchain technology will develop into an integrated ecosystem of several chains, with hundreds of Layer 2 solutions meeting different market demands and uses, rather than being limited to a single chain in the future. However, there are still a number of obstacles that Layer2 solutions must overcome at this point, such as fragmented liquidity, high multichain operating costs, security issues connected with cross-chain bridges, and the difficulty of communicating with various blockchains. In addition, there is a greater need for cross-chain transactions as a result of the rising quantity of non-EVM assets. The team at DODO contends that a major overhaul is necessary for the multi-chain DApp ecosystem that exists today. In order to facilitate the free flow of assets, it is imperative to remove the obstacles between EVM and non-EVM ecosystems, given that different assets are issued on hundreds of chains. To accomplish interconnection across all chains, our team suggests an inventive technique called DODOchain. It is possible to achieve seamless asset exchange, much increased asset issuance efficiency, and trading convenience across several chains by integrating and maximizing liquidity on the DODOchain. DODOchain as the Remedy At the core of the idea behind hosting a third layer on-chain is the need for blockchain to handle highly customized use cases in the future. With an emphasis on delivering customized capabilities, Layer 3 seeks to address Layer 2's shortcomings with regard to cross-chain compatibility. Layer 3 acts as a link across several blockchain ecosystems, allowing data to move freely and transactions to occur between chains like as Ethereum, Bitcoin, and Solana. Layer 3 may improve transaction efficiency and produce real cost savings for establishing an omni-liquidity layer that needs higher transaction throughput and considerable network charge reductions. Any developer may quickly and anonymously start their own L2 or L3 Orbit chain on Arbitrum thanks to a variety of technological options, including Arbitrum Orbit, which gives them complete control over gas tokens, privacy, permissions, governance, and more. This is exactly what we need to build our own app-chain and fits in well with our vision. In order to improve the trading experience for customers, the DODO team will employ Arbitrum Orbit to build a thorough Layer 3 chain for cross-chain transactions. This chain will provide reduced gas prices, quicker transaction execution and confirmation, and more consistent returns. Also, DODOchain will provide: - Omni-chain liquidity outposts: Omni Trade, Omni Liquidity, and Omni Mining are just a some of the services and products that DODOchain offers its consumers. - Connector between BTC L2 and ETH L2: By linking BTC L2 and ETH L2, including Non-EVM Chains, DODOchain may draw in more new users and assets - Native restaking yield: DODOchain is expected to provide native staking yields for its assets. DODOchain Modular Partnerships We are delighted to present DODOchain's important partners: Arbitrum Orbit: Offering a potent new method for creating Layer 2 and Layer 3 chains is Arbitrum Orbit. By adding customizable features to the Arbitrum tech stack, it preserves the security assurances of the Ethereum ecosystem while providing DODOchain with increased scalability, efficiency, and user-friendliness. EigenDA is a fundamental part of Eigenlayer that specializes in data availability (DA) throughput. DODOchain will use EigenDA to take use of Ethereum's security and consensus capabilities, thanks to its easy connection with other Eigenlayer modules. As one of the first Actively Validated Services (AVSS) in the Eigenlayer ecosystem, DODOchain will also function as a restaked rollup. Based on Eigenlayer's potent restaking mechanism, DODOchain has embraced AltLayer's innovative restaked rollups architecture. This improves decentralization and network security while enabling quick deployment and cross-chain interoperability, giving consumers a more seamless and integrated blockchain experience Our goal with DODOchain is to provide a smooth, effective, and safe ecosystem for liquidity sharing and cross-chain trading that will allow users to freely issue, trade, and manage their assets across various blockchain networks without limitations or permissions. The DODOchain Testnet is Live This is your opportunity to test, develop, and innovate a next-generation omni-trading experience firsthand. Explore our Testnet: dodochain.com

In a strategic move reflecting its evolving identity and commitment to the cryptocurrency community, CZOL, formerly known as CZolana, is excited to announce its official rebranding along with the launch of a significant airdrop campaign. This initiative aims to deepen community engagement and honor the indelible impact of Changpeng Zhao (CZ) on the cryptocurrency landscape. Rebranding for the Future As CZOL transitions from CZolana, this rebranding marks a pivotal shift towards embracing a broader and more inclusive approach to its community and offerings. The new name and logo, featuring a playful cat, symbolize CZOL's agility and readiness to adapt to the dynamic crypto environment. This change not only reflects the project's growth but also its long-term commitment to being a staple in both the meme and broader cryptocurrency communities. Honoring Changpeng Zhao with a Community Airdrop Aligned with the trial of Changpeng Zhao on April 30, 2024, CZOL is set to launch its first community airdrop on May 1, 2024. This event not only serves to support CZ during his challenging times but also to celebrate his contributions to the crypto world, which include democratizing finance and fostering a more inclusive financial ecosystem. Airdrop Details CZOL will distribute 2% of its total supply to the community through several engaging mechanisms: - Token Holders: Hold a minimum of 1000 \$CZOL to receive a guaranteed share of the airdrop, with details to be released on April 29. - Social Engagement: Participants can engage with CZOL's social media platforms by retweeting, liking, tagging a friend, and posting their wallet address in the comments to win a part of the airdrop. - Past Contributors: Users who have completed previous tasks set by CZOL on the Galxe platform will also be eligible for the airdrop. Innovations and Developments CZOL continues to push the envelope with new initiatives: - Giggle Academy: Amidst preparing for his trial, Changpeng Zhao has initiated the Giggle Academy, an educational app leveraging blockchain technology to make learning accessible and fun for children globally, especially those in underserved areas. - CZOL Trending: A newly launched service that helps other tokens increase their visibility. The service generates revenue by charging fees, 70% of which are used to buy back and burn \$CZOL, enhancing its value and maintaining its deflationary nature. This rebranding and the upcoming airdrop underscore CZOL's commitment to fostering a resilient and thriving community, while also adapting to the ever-changing digital landscape. Stay tuned for more updates as CZOL continues to innovate and lead in the crypto community space. About CZOL CZOL is a community-driven meme token built on the robust Solana blockchain, designed to celebrate and continue the legacy of Changpeng Zhao, the founder of Binance. Governed by a decentralized autonomous organization (DAO), CZOL integrates memes, NFTs, and automated bot technology to create a dynamic and engaging crypto environment. The project emphasizes accessibility, innovation, and community participation, reflecting the spirit of democratization that CZOL championed. For more information, visit CZOL website, follow CZOL on X at @czol_wtf or join the conversation in their Telegram group. If you're looking to earn passively within a period, then the crypto market serves as the space to do so. With the rise of the infamous Bitcoin and Ethereum, early investors were able to amass huge profits. However, the crypto market can get into a frenzy with altcoins and meme coins coming in play bringing profits but short-lived due to no real-world utility. There is one coin that could give both options of real blockchain technology and profit in multiple folds in a short period - Bitgert BRISE. With its rapid growth, the coin has gone past just being a popular asset, but rather a mainstream token. Let's see the innovation and technology around Bitgert BRISE. Bitgert: Building Partnerships Driving Massive Growth Bitgert is a unique early crypto layer 1 blockchain network that is actively developing to improve blockchain technology and solve problems in the crypto market. With its beginner-friendly features, this project is for everyone. Launched in 2021, the Bitgert coin has amassed over 40,000% in returns. Besting its competitors like Solana and Cardano, It has been able to simply use a POS and Proof of Authority model (POS) of 100,000 TPS to solve the problem of high gas fees and slow speed. With a community of over 600k members, Bitgert has been able to cement itself as one of the top leading crypto assets in the market. Bitgert has partnered with top crypto organizations like Coin Telegraph, which has enabled Bitgert to position itself in the crypto market. Coins like BEFE and CENX are hosted on the Bitgert Blockchain. Users can now stake and earn rewards on these coins. Bitgert blockchain also involves the Bitgert Exchange, BRISE swap, and other decentralized exchanges. BRISE Coin: The Decentralized Powerhouse Surpassing Expectations BRISE, Bitgert coin is built on a Decentralized finance protocol. This coin has surpassed expectations since its launch in Jan 2024. It employs a burning model with burns over 12% of its supply in circulation. This reduces supply and increases demand for the price of the BRISE coin. Technical indications like the RSI is over 55 and the moving average convergence (MACD) all point towards a bullish momentum for the Bitgert coin. Analysts and experts have predicted that the coin is going to go higher than it is in a couple of months. If you were second-guessing Bitgert, now is the time to hope on this project early and join the Bitgert bandwagon. As always, before entering any crypto project, do your own research and make smart decisions. - To learn more, visit Bitgert. Disclaimer: TheNewsCrypto does not endorse any content on this page. The most anticipated event in crypto history finally happened. This is the top crypto asset, Bitcoin's halving. Following the halving, investors are anticipating massive growth in the crypto market. One of which is the budding rise of Bitgert (BRISE). With its promising features, this coin has caught the attention of investors, crypto maniacs and even entrepreneurs. With its massive growth, the Bitgert coin is changing narratives in the ecosystem. Let's have a look into why Bitgert is the next big thing. Bitgert (BRISE) Say Bye to Gas Fees. Ever since its launch in July 2021, the Butgert coin has been on a bullish upward trend. It has surpassed expectations beyond measure and even solved the ongoing problem around crypto transactions speed and gas fees. With its adoption, Bitgert BRISE has completely outclassed its competitors Solana and Ethereum. This earned it its name as the Solana killer. This crypto project uses a Proof of Authority mechanism (POA), which makes slow speeds a thing of the past. Bitgert processes over a 100,000 transaction speed per second (TPS) at near zero gas fees, making it one of the top crypto assets in the market. Bitgert (BRISE) uses blockchain technology to allow accessibility and usability for its users. For instance, the Bitgert blockchain is in sync with the EVM feature, allowing decentralized applications (dApps) to be integrated from other blockchains. With the just concluded halving event, there have been recordings of massive growth and trading volume lodged by the Bitgert coin. This is driving demand from investors and crypto maniacs. Bitgert (BRISE) Rise Defying Market Trends The Bitgert token BRISE coin has seen tremendous growth pre- and post-halving. With a 40,000% jump during its launch in Jan 2024, this coin has yet to show any signs of declining. During the market correction, unlike other crypto assets, the Bitgert coin was still able to make investors profits. The token got a 70% increase in its price. The market analysis and technical indicators have all been positive indicating a strong signal but with the coin. Bitgert chain cleverly adopts a deflationary mechanism where 12% of each transaction is burnt. This has reduced the supply and increased the demand for the coin. Bitgert coin BRISE is now being traded at 0.000002368 and its cap exceeds \$83,000,000. It has also been listed with top exchanges and partnered with major players in the fintech industry. The BRISE coin has the potential to turn investors to overnight millionaires, asides its adoption and partnerships, this project has been able to deliver real world utility and solve problems of scalability using eco friendly and sustainable solutions. The market is going on the biggest bull run yet in this post halving and bitgert is one of the top coins that would be on a bullish momentum. Now is the best time to get on Bitgert. To learn more, visit Bitgert Disclaimer: TheNewsCrypto does not endorse any content on this page. The content depicted in this press release does not represent any investment advice. TheNewsCrypto recommend our readers to make decisions based on their own research. The buzz around BEFE Coin is growing as it shows promise in the cryptocurrency sector. Experts are optimistic about its price potential, recommending it as a wise investment. For those looking to enhance their investment strategy, BEFE Coin offers an intriguing opportunity. Looking

The cryptocurrency market is poised for a significant bull run in 2024, and savvy investors are seeking alternative tokens that could outperform the industry giants. With a staggering \$32 million raised during its presale, Retik Finance (RETIK) emerges as a frontrunner, surpassing the likes of Cardano (ADA), Solana (SOL), and Polygon (MATIC). Let us explore why Retik Finance (RETIK) and other altcoins may potentially outshine Cardano in 2024, offering investors an opportunity to capitalize on the impending bull market. Solana (SOL): A High-Performance Blockchain Riding the Meme Coin Wave Solana (SOL) has established itself as a formidable player in the cryptocurrency arena, boasting steady support above \$195 today. Solana's success can be attributed to its high-performance blockchain, which has captured the attention of the burgeoning meme coin sector. However, on-chain data reveals a concerning trend: Solana node validators have unstaked a staggering 14 million SOL, worth approximately \$2.7 billion, since mid-March. This exodus of staked assets could potentially destabilize the network's security and flood the market with excess supply, hindering Solana's upward trajectory. Polygon (MATIC): A Layer 2 Solution Poised for Geometric Growth Polygon (MATIC), a Layer 2 scaling solution for Ethereum, has been consolidating around the \$0.941 level for nearly two years. Experts believe that a short-term correction could pave the way for a 60% upswing, propelling MATIC to \$1.568. The cryptocurrency market's positive outlook and Polygon's robust fundamentals, including six compelling reasons for an uptrend, position MATIC as a promising investment opportunity in 2024. Retik Finance (RETIK): The DeFi Disruptor Redefining Financial Services Retik Finance (RETIK) stands out as a disruptive force in the decentralized finance (DeFi) landscape, offering a suite of innovative solutions that cater to various financial needs. At the forefront of Retik Finance's offerings are its cutting-edge virtual DeFi debit cards, available now in a beta version. These debit cards, launched a full year ahead of schedule, provide users with seamless access to decentralized financial services, setting the stage for a revolutionary banking experience. Furthermore, Retik Finance has unveiled its AI-powered peer-to-peer lending platform, leveraging advanced artificial intelligence technology to streamline the lending process and ensure efficient risk management. This innovative feature positions Retik Finance as a trailblazer in the DeFi space, offering a level of sophistication unmatched by traditional financial institutions. Complementing its lending platform is the Retik Wallet, a secure and user-friendly digital wallet designed to seamlessly manage and store cryptocurrencies. The wallet seamlessly integrates with Retik Pay, a decentralized payment solution that enables effortless transactions across various platforms. Retik Finance's comprehensive ecosystem is bolstered by its successful presale, which raised an impressive \$32 million, underscoring investor confidence in the project's vision and potential for growth. Moreover, the project has undergone a thorough audit by Certik, a renowned blockchain security firm, instilling trust and confidence in its reliability and security protocols. Retik Finance Celebrates Presale Success with \$5,000 Giveaway Following the resounding success of its presale, Retik Finance is expressing its gratitude to its devoted community with a \$5,000 giveaway. The innovative DeFi platform invites its supporters to capture the celebratory spirit by creating and submitting unique photos, videos, or memes commemorating the presale's triumph. Twenty-five lucky winners will be chosen, each receiving a \$200 prize for their exceptional submissions. The team is actively working towards securing listings on top-tier exchanges, with announcements forthcoming on their social media channels. Conclusion: Embracing Innovation for Optimal Returns As the cryptocurrency market prepares for a bullish 2024, investors are presented with a unique opportunity to diversify their portfolios and capitalize on the potential gains offered by emerging altcoins. While Cardano (ADA) remains a respected player in the blockchain space, the innovative solutions and robust ecosystems of Solana (SOL), Polygon (MATIC), and, notably, Retik Finance (RETIK) position these projects as compelling alternatives poised for remarkable growth. Visit the links below for more information about Retik Finance (RETIK):

BlockDAG is quickly becoming a leader in the cryptocurrency market, outperforming presales of competitors like Raffle Coin and KangaMoon (KANG) through its strategic innovations and significant funding successes. With more than \$18.7 million gathered in presale contributions and an additional \$2.2 million from the sale of mining equipment, BlockDAG is preparing to impact the market majorly. Notably, the recent teaser of its innovative moon-themed keynote has sparked widespread interest and excitement among investors. KangaMoon (KANG) Targets the Play-to-Earn Gaming Market KangaMoon is making waves in cryptocurrency by merging meme coin appeal with practical utility in the Play-to-Earn gaming sector. The token, which has soared 291% from its starting price of \$0.005 to \$0.0196, is now in its final presale stage and attracting significant attention. As an in-game currency and a means for character enhancement and purchases within games, KangaMoon has already raised over \$4 million and is on track to hit \$5 million by April 2024. With its sights set on a 100x price increase post-listing on significant exchanges, KangaMoon is positioning itself for substantial growth. Raffle Coin Gambles on Growth in a Bullish Market Raffle Coin draws interest from the crypto community, particularly those involved with Bitcoin and Solana, with its presale priced at \$0.020 per token and projections of up to a 100x increase in value. Its unique concept involves organizing online raffles and utilizing blockchain technology to ensure transparency and security. This engaging approach positions Raffle Coin as an attractive investment, especially in a bullish cryptocurrency market. BlockDAG: Revolutionising Crypto Mining and Setting Industry Standards BlockDAG continues to lead the way in cryptocurrency with its advanced mining technologies and commitment to sustainable practices. The platform offers versatile mining technology that caters to a wide range of users, from novices to experts, enhancing its usability and appeal. The recent release of a teaser for an upcoming moon-themed keynote underlines BlockDAG's innovative strategies and cements its role as a pioneer in space-themed promotional activities. This promotional video has significantly boosted interest in BlockDAG's offerings and its market presence. As a result, the company's financial achievements are notable, with the presale alone bringing in over \$18.7 million, supplemented by \$2.2 million from mining equipment sales. The sale of more than 7.8 billion BDAG coins and over 4700 miners underscores the strong market demand and investor confidence in BlockDAG's potential. The forthcoming keynote is set to reveal more thrilling developments, maintaining the momentum and investor engagement. Concluding Overview As BlockDAG, KangaMoon, and Raffle Coin navigate their respective presale phases, each presents distinct opportunities and challenges within the cryptocurrency market. KangaMoon's foray into Play-to-Earn gaming, Raffle Coin's engaging investment model, and BlockDAG's groundbreaking advancements in mining technology distinguish them as notable contenders in the crypto presale space. BlockDAG, in particular, stands out with its successful \$18.7 million funding, innovative technology, and strategic marketing initiatives, setting it up as the prime candidate among cryptocurrencies poised for explosive growth. With anticipation building for its next phase and the moon keynote

Bitcoin and Ethereum will soon be tagged as assets fit for institutional hoarding as ETFs grow their geographical expanse and user base. While Bitcoin, Ethereum, and other blue chips remain the go-to choice, investors always seek tokens that have performed well, have good fundamentals, and have extreme upside potential. The bear market eliminated quite a few bad projects from the industry and gave rise to projects that gained imminent traction due to their potential. Among the many such projects, one such project caught the fancy of investors and developers alike is Bitgert. Bitgert is increasingly becoming a popular layer-1 blockchain for developers and funders to build their applications on, given Bitgert's powerful speed of 100K TPS, scalability, and affordability. TBigtert is the first zero-fee blockchain on the crypto scene. It is giving tough competition to industry stalwarts like Solana, Tron, Cardano, etc. Already, the Bitgert ecosystem has seen a 2x increase in the number of users and forged many partnerships with leading Web3 and GameFi companies. In addition, it has also been recognized by the World Economic Forum as one of the top 100 most innovative technologies in the world.

SaaS is the world's fastest growing market, valued at \$1.6 trillion in 2022, and expected to reach \$3.7 trillion by 2028. The metaverse - Web3Nova is a big player in the decentralized landscape. - DogeWalk, Goshen, Catex, Sekuya, AssetLink, etc., are other notable names. Bitgert also has its own native suite of products for users. It has a zero-trading fee crypto exchange, a P2P exchange, a payment gateway, and a Startup Studio to help startups raise funds via public and private sales. Bitgert's native token, BRISE, is attracting traction on all fronts. It has a limited supply and a deflationary mechanism. Since its launch, the Bitgert token has given early investors an ROI of 40,000%. Analysts predict the Bitgert token will reach a price of \$0.0001 in the coming months and remove two or three zeroes from its price. This 20,000% increase can only be achieved if investors invest early in the token. The bull market is taking a break as Bitcoin undergoes massive correction after reaching another ATH. If halving cycles are to be believed, right after the halving, Bitcoin will set on another unprecedented growth course, taking along the entire altcoin market. The Bitgert team has burned down 2 million tokens to keep the supply under check and the price rising. Twelve percent of the supply gets burned down each time a transaction is processed. Bitgert has processed 25 million transactions to date. Bitgert also has a dedicated community of 800K members and an equally huge following on Twitter and Discord. The Bitgert team is working hard to gather the traction that Bitgert deserves. Bitgert is solving a significant use case that can lead to blockchain mass adoption at the industrial level. This correction presents a once-in-a-lifetime opportunity to buy the dip. Are you buying Bitgert tokens today?

London, United Kingdom, April 17th, 2024, Chainwire A new multichain meme coin, Dogeverse, has raised \$6 million in its presale and recently passed a smart contract audit. The new meme coin leverages bridge technology, ensuring the token is available across the most prominent on-chain markets. Multichain Approach Creates Widespread Accessibility Dogeverse's approach to multichain availability means the token is available across the leading smart contract-enabled blockchains. Its initiative begins on Ethereum, BSC, and Polygon but will soon launch on Solana, Base, and Avalanche. Through this approach, Dogeverse becomes more versatile and can sustain itself if users migrate from one of its supported chains to another. The multichain feature also connects the different blockchain communities under one meme coin banner. Dogeverse Raises \$6M as Meme Coin Narrative Continues The meme coin market has been dominant in the crypto industry recently, with its total valuation exceeding \$45 billion. The presale includes a staking mechanism that yields Dogeverse tokens, the mechanism works so that the yield will decrease as the staking pool grows. Consult, a blockchain security firm, has conducted a smart contract audit on the new presale meme coin. As per its findings, Dogeverse poses no high or medium-risk smart contract issues, and just one low-risk bug was uncovered. However, Consult notes that the Dogeverse team has acknowledged the issue. Data shows that Dogeverse is receiving social media engagement and growth. Within the last week, the Dogeverse X account has surpassed 4K followers, while the Dogeverse Telegram account surpassed 2K. The project has even been covered by media outlets and market analysts, with names like ClayBro supporting its "multichain utility." Meanwhile, Crypto Gains also praised the project and notified investors that its exchange launch will occur soon. About Dogeverse Dogeverse is a new meme coin launching across six leading smart contract-enabled blockchains. It is currently undergoing a presale where it has introduced a staking mechanism, encouraging users to lock up their tokens for passive rewards. The Dogeverse presale launched in April 2024 at thedogeverse.com with a hard cap of \$17 million. It has raised \$6 million so far. The project's smart contract recently received an audit from Consult. Market participants can visit the Dogeverse presale here. Contact Dogeverse contact@dogeverse.io

Core Chain introduces Non-Custodial BTC Staking, a feature making BTC a yield-earning asset for the first time in its history. â Innovative Bitcoin ETPs launch with Defi Technologies Inc. : Defi Technologies Inc. and Valour partner with the Core Foundation to launch groundbreaking Exchange Traded Products (âETPsâ), including a first-of-its-kind Yield Bearing BTC ETP and a new Core ETP, leveraging Core Chainâs unique blockchain features. â Yield Opportunities Through BTC: The Yield Bearing BTC ETP introduces a new era for Bitcoin as an actively yielding investment, utilizing Core Chainâs block rewards and expanding Bitcoinâs utility without leaving the network. â Validator Node Management and BTC Staking:Valour Inc. will manage a validator node on the Core Blockchain, enhancing network security and efficiency while planning to stake \$200 million in BTC, further solidifying the collaborationâs commitment to integrating traditional finance with blockchain innovation. Core Chain introduces Non-Custodial BTC Staking, a feature making BTC a yield-earning asset for the first time in its history. With ETPs opening BTC ownership and the upcoming Halving reducing miner rewards, Non-Custodial BTC Staking marks an opportunity for all BTC holders to earn yield for participating in Core Chainâs consensus mechanism and help bolster its security, all without ever giving up custody of their assets. Leveraging Bitcoinâs Hash timelock technology, Non-Custodial BTC Staking does not require trusting a third party, wrapping assets, or leaving the Bitcoin Network in any way to stake BTC. To contribute to Core Chainâs security and earn CORE token rewards, any Bitcoin holder can stake BTC directly on the Bitcoin Network. In a related move, Defi Technologies Inc. a financial technology company and the first and only publicly traded company that bridges the gap between traditional capital markets, Web3 and decentralized finance announces that its subsidiary, Valour, a leading issuer of exchange traded products (âETPsâ) that provide simplified access to digital assets, has entered into a collaboration with the Core Foundation, an organization dedicated to the development of the Core blockchain network. Core Chain is a cutting-edge, Bitcoin-powered, EVM-compatible blockchain that incorporates Bitcoin miners and BTC stakers into its security in exchange for rewards. This collaboration is set to develop innovative ETPs that leverage Core Chainâs unique blockchain capabilities, introducing a first-of-its-kind Yield Bearing BTC ETP and a novel Core ETP. These ETPs aim to redefine Bitcoinâs utility as an investment opportunity within the digital asset ecosystem, granting BTC native yield through non-custodial BTC staking powered by Core Chain. The Yield Bearing BTC ETP will offer yield directly from Core Chainâs block rewards, which also rewards validators, CORE token stakers, Bitcoin hash power delegators, and now, BTC stakers. The Core ETP will provide investors with yield-bearing opportunities through Core Chainâs native staking rewards, and itâs designed to widen investor access to Coreâs innovative staking mechanisms. In this strategic collaboration, Valour will also operate a validator node on the Core Blockchain. This effort will not only bolster the security and efficiency of the Core network but also enable Valour to earn validator commissions, highlighting the synergistic potential between Valour and Core Chain. Additionally, Valour plans to stake \$200 million US in BTC with Core Chain through the newly launched Non-custodial BTC staking product. âWe are at a pivotal moment in the evolution of digital assets, where the boundaries between traditional finance and decentralized finance are not just blurring but merging,â said Olivier Roussy Newton, CEO of Defi Technologies. âThis collaboration with the Core Foundation and the launch of our innovative ETPs are emblematic of our commitment to leading this charge. By introducing yield-bearing opportunities to Bitcoin through these ETPs, weâre not only enhancing its utility but also offering investors novel ways to engage with the worldâs premier cryptocurrency. Our move to manage a validator node and our significant BTC stake in the Core Chain are testament to our belief in a future where Bitcoinâs foundational technology and Defi innovations converge to create unparalleled investment opportunities.â âWeâre thrilled to announce our collaboration with Defi Technologies and Valour. Their inspiring vision of enabling access to innovative digital products through traditional offerings perfectly aligns with our ethos at Core Foundation,â said Brendon Sedo, a contributor at Core Foundation. âThis collaboration not only signals Bitcoinâs growth as an ecosystem but also showcases the growing potential of BTC as a yield-bearing asset.â Core Foundation is proud to be the first and most reliable ecosystem to power these new offerings, underscoring Core Chainâs position as the most Bitcoin-aligned blockchain. Weâre excited about the future and warmly welcome the Defi Technologies team in our collective journey forward.â Non-Custodial Bitcoin Staking, A Paradigm Shift for Bitcoin The launch of Non-Custodial BTC Staking introduces a new era for BTC, defined in part by added utility brought to both the Bitcoin Network and the BTC asset. . For the first time, BTC holders are empowered to directly stake their BTC on the Bitcoin Network, without the need for wrapped assets or intermediaries, adding to the utilization and perception of Bitcoin as a store of value to a yield generating asset. This feature is designed not only to unlock BTC as a yield generator, but also to strengthen the Bitcoin-secured smart contract protocol, Core Chain. By participating in Non-Custodial BTC Staking, Bitcoin holders earn staking rewards by playing a role in Core Chainâs consensus process. Their involvement in staking assists in securing Core Chainâs consensus mechanism, known as Satoshi Plus, contributing to the networkâs decentralization and Bitcoin alignment. About Core Chain The Core blockchain network is a Bitcoin-powered layer-one blockchain for EVM-compatible smart contracts. With 50% of Bitcoin mining hash power contributing to Coreâs security in exchange for unlocking Bitcoin utility and rewards, Core Chain is the most Bitcoin-aligned EVM blockchain (BTCfi, Bitcoin staking, and more). About Defi Technologies Defi Technologies Inc. (NEO: DEFI) (GR: MB9) (OTC: DEFTF) is a financial technology company that pioneers the convergence of traditional capital markets with the world of decentralized finance (DeFi). With a dedicated focus on industry-leading Web3 technologies, Defi Technologies aims to provide widespread investor access to the future of finance. Backed by an esteemed team of experts with extensive experience in financial markets and digital assets, we are committed to revolutionizing the way individuals and institutions interact with the evolving financial ecosystem. Join Defi Technologiesâ digital community on LinkedIn and Twitter, and for more details, visit <https://defi.tech/> About Valour Valour Inc. and Valour Digital Securities Limited (together, âValourâ) issues exchange traded products (âETPsâ) that enable retail and institutional investors to access digital assets like Bitcoin in a simple and secure way via their traditional bank account. Valour is part of the asset management business line of Defi Technologies Inc. (NEO: DEFI) (GR: MB9) (OTC: DEFTF). In addition to their novel physical backed digital asset platform, which includes iValour Bitcoin Physical Carbon Neutral ETP, iValour Ethereum Physical Staking, and iValour Internet Computer Physical Staking, Valour offers fully hedged digital asset ETPs with low to zero management fees, with product listings across European exchanges, banks and broker platforms. Valourâs existing product range includes Valour Uniswap (UNI), Cardano (ADA), Polkadot (DOT), Solana (SOL), Avalanche (AVAX), Cosmos (ATOM), Binance (BNB), Ripple (XRP), Enjin (ENJ), Bitcoin Carbon Neutral (BTCN), Valour Digital Asset Basket 10 (VDAB10) and iValour STOXX Bitcoin Suisse Digital Asset Blue Chip ETPs with low management fees. Valourâs flagship products are Bitcoin Zero and Ethereum Zero, the first fully hedged, passive investment products with Bitcoin (BTC) and Ethereum (ETH) as underlyings which are completely fee free. - For more information, to

- Ethereum faces challenges amidst Middle East tensions and market downturn. - ETH attracts institutional interest with \$80B stablecoin market cap and \$50B TVL. - Recent dip below \$2,900 sparks concerns despite successful Dencun upgrade against competitors. Ethereum has been struggling as rising tensions in the Middle East and a broader market downturn have injected uncertainty into the crypto space. Despite these challenges, Ethereum continues to attract significant institutional interest, with a stablecoin market cap exceeding \$80 billion and nearly \$50 billion in total value locked (TVL) within its ecosystem. However, the recent dip in Ethereum's price below \$2,900, a level not seen since mid-February, has raised concerns about the altcoin's short-term vulnerabilities. This decline comes despite the successful implementation of the Dencun upgrade, which has enhanced Ethereum's competitiveness against emerging layer-one chains such as Solana (SOL), Toncoin (TON), and Binance Smart Chain (BSC). Ethereum's Resilience Tested as Market Volatility Persists As the cryptocurrency market grapples with the ripple effects of geopolitical tensions and the recent Bitcoin halving event, Ethereum has found itself at the center of attention. Despite being distinguished from commodities like Bitcoin and Gold by the United States Securities and Exchange Commission (SEC), Ethereum's ecosystem remains a hub of activity and innovation, drawing the interest of both institutional and retail investors. The recent market turbulence has tested Ethereum's resilience, with many traders seeking refuge in stablecoins as a means of mitigating risk. This shift in investment strategy reflects the cautious sentiment prevailing in the crypto space, as market participants attempt to navigate the uncertain waters of geopolitical instability and market volatility. On-Chain and Technical Analysis Suggests Potential Support Levels A comprehensive on-chain and technical analysis conducted by crypto analyst Ali Martinez suggests that Ethereum's price may face further challenges in the near future. In the event of continued sell-offs, Martinez indicates that the altcoin could find support within the range of \$2,000 to \$2,430. This insight provides a potential roadmap for investors seeking to identify key levels of support and resistance as they navigate the market. Furthermore, the analyst notes that Bitcoin's dominance over the altcoin market has been on the rise, with the ETH/BTC pair indicating ongoing weaknesses for Ethereum. This observation highlights the complex interplay between the two largest cryptocurrencies and the broader market dynamics that shape their performance. Despite the short-term challenges facing Ethereum, the altcoin's underlying potential for growth and innovation remains a key driver of institutional and retail interest. The Ethereum ecosystem continues to evolve, with the recent Dencun upgrade enhancing its competitiveness and positioning it for future growth.

The landscape is electric with speculation, excitement, and an unmistakable air of opportunity. As investors and enthusiasts are swept up in a maelstrom of analysis and predictions, there's a collective endeavor to unearth digital assets that promise not just returns, but the biggest gains during what analysts are heralding as the most significant bull run in the annals of crypto history. Analysts have predicted this upcoming bull run to be the biggest one in the history of cryptocurrency and also identifying the true game-changers from fleeting trends is akin to finding a needle in a haystack as they are ready to deliver on the promise of big profits in the bull run for those daring enough to venture into the thrilling realm of cryptocurrency investing. However, amidst this frenetic quest for the next big thing, three tokens have risen from the crypto abyss, poised for the most significant returns. These tokens, Retik Finance (RETIK), Pepe Coin (PEPE), and Solana (SOL), have not only captured the imagination of the crypto community but have also signalled their readiness to spearhead the charge into this unprecedented bull cycle. Retik Finance (RETIK): A beacon of DeFi innovation Retik Finance (RETIK) stands out as a pioneer in the DeFi space, setting itself apart with a steadfast commitment to transparency and the trust of its user base. Implementing cutting-edge security protocols and rigorous auditing processes, RETIK has built a fortress around the safety of assets and personal data, fostering a secure and resilient ecosystem for its investors. RETIK quickly amassed a market capitalization of over \$32 million, selling out its presale well ahead of schedule with a listing price if \$0.15. This remarkable trajectory, featuring a surge of over 417% in a mere two months, is a testament to the growing confidence and interest from the investor community. The practical applications of Retik Finance, such as Retik Pay, Retik Wallet, and the beta launch of Retik DeFi Crypto Cards, highlight its tangible utility within the broader cryptocurrency ecosystem. These developments promise to redefine financial transactions through blockchain technology as vital details about the token listing and vesting schedule will be announced on their socials in the coming days, positioning RETIK as a front-runner for significant profits in this unparalleled bull run. Pepe Coin (PEPE): A Cultural Phenomenon Pepe Coin transcends the conventional boundaries of cryptocurrency, evolving into a genuine cultural phenomenon. Originating from the iconic Pepe the Frog meme, PEPE has become a formidable force within the crypto realm, captivating investors with its unique blend of humour and potential for substantial returns. With an impressive surge of 202.4% in the past month and a market capitalization of \$3.28 billion, PEPE has firmly established itself as a top contender for investors aiming for exponential growth. PEPE's success lies not only in its meme-based roots but also in its ability to encapsulate a moment in internet culture, turning it into a viable investment opportunity. As the cryptocurrency landscape continues to expand, PEPE distinguishes itself as a token poised for significant returns in the forthcoming biggest bull run in history as the analysts may have it. Solana (SOL): Powering the Web3 Revolution Solana stands as a testament to innovation, efficiency, and scalability, offering a compelling proposition to developers and users alike. The blockchain's capability to handle massive network activity with aplomb was on full display during the Jupiter airdrop, despite minor transaction delays. This resilience has catapulted Solana to new heights, with an astonishing growth of 2,219.5% since December 2022. March 2024 marked a pivotal moment for Solana, reaching a peak of \$200 on March 18th according to coinmarketcap, representing a 73.6% increase from its January valuation. This remarkable achievement underscores Solana's immense growth potential and its capability to deliver significant returns in the massive bull run. Conclusion As we stand on the precipice of what analysts are calling the most significant bull run in cryptocurrency history, Retik Finance, Pepe Coin, and Solana emerge as the torchbearers of this new era. Each token, with its unique strengths and groundbreaking potential, represents not just an investment but a belief in the transformative power of cryptocurrency. As investors gear up for this monumental phase, the promise of substantial gains and the thrill of being part of a historic moment in the digital asset space await. Visit the links below for more information about Retik Finance (RETIK): - Website: <https://retik.com> - Whitepaper: <https://retik.com/retik-whitepaper.pdf> - Twitter: [www.twitter.com/retikfinance](https://twitter.com/retikfinance) - Telegram: [www.t.me/retikfinance](https://t.me/retikfinance)

- The senators demand logs of all communications emails, phone calls, and meetings. - A comprehensive list of the papers and correspondence must be supplied by April 29. Two senators, Elizabeth Warren (D) and Chuck Grassley (R) have formally asked Rostin Behnam, chair of the Commodity Futures Trading Commission (CFTC), for information. Sam Bankman-Fried (SBF), the former chief executive officer of the collapsed crypto exchange FTX, is at the focus of the demand. FTX went bankrupt in November 2022. During the chairman's tenure, the senators demand a detailed log of all communications emails, phone calls, and meetings between Behnam and SBF. Increasing Scrutiny A growing concern among American politicians over the regulation and oversight of cryptocurrency markets has been brought to light by the probe. The need for open communication and responsibility between financial authorities and company leaders is highlighted in this statement. Chair Behnam said that his team had met with SBF and other FTX officials ten times in the fourteen months before the exchange's collapse at a 2022 Senate Agriculture Committee session. The available market actors were the usual suspects in these encounters. Nonetheless, these dealings are now under intense scrutiny because of FTX's demise and the founder's illicit behavior. A comprehensive list of the papers and correspondence that must be supplied by April 29, 2024, is included in the senators' request. By setting this date, the legislative body hopes to get a sense of how the CFTC's relationship with a major player in the crypto market stands. SBF and the CFTC met more often than only for regulatory evaluations. FTX aimed to provide novel products that required regulator approval via its derivatives exchange positioned in the United States. The CFTC was made aware of some of these suggestions by FTX executives including Bankman-Fried. Discussions like these were a part of FTX's larger plan to expand its business in the regulated U.S financial markets. Highlighted Crypto News Today: Meta Unveils Enterprise-Level Metaverse Quest Services for Education Sector

Cryptocurrencies have taken the financial world by storm, offering lucrative opportunities for investors seeking high returns. Among the myriad digital assets available, Shiba Inu (SHIB) has garnered significant attention due to their meme-inspired origins and speculative appeal. Shiba Inu (SHIB) skyrocketed to fame during the last cryptocurrency market cycle, capturing the attention of investors worldwide with its meteoric rise. However, as the crypto market evolves and new contenders emerge, analysts are now turning their attention to alternative coins that may outshine SHIB in 2024. While Shiba Inu enjoyed a moment in the spotlight as a meme token, the landscape of the cryptocurrency market is constantly shifting, with new projects offering innovative solutions and promising growth potential. In this article, we'll explore three alternative coins that analysts believe have the potential to surpass Shiba Inu in terms of growth, adoption, and market capitalization in 2024. Retik Finance (RETIK): Pioneering Innovation in DeFi Retik Finance (RETIK) represents a beacon of innovation and security in the decentralized finance landscape, driven by a steadfast commitment to transparency and user trust. At its core, Retik Finance prioritizes the protection of user assets and data through advanced security protocols and rigorous auditing processes, ensuring a resilient and reliable platform for investors. The recent beta launch of Retik DeFi Crypto Cards marks a significant milestone for the project, accelerating its roadmap and rewarding early supporters. With support from industry-leading payment methods such as Binance Pay, Gate Pay, and Token Payment, Retik Finance is poised to bridge the gap between traditional finance and the decentralized economy. Central to Retik Finance's ecosystem is the \$RETIK token, a versatile digital asset designed to ignite innovation and empower users on a global scale. With an initial listing price of \$0.15 and a total supply of 1 billion tokens, RETIK has experienced a staggering surge in value, skyrocketing by 407% within a mere two-month span. In the days to come, vital pieces of information about the token's listing and vesting schedule will be shared on the platform's social media channels. Looking ahead to 2024, Retik Finance is positioned to capitalize on its momentum and deliver substantial returns to investors as it displays bullish potential. As the cryptocurrency market continues to evolve, RETIK stands out as a promising investment opportunity, driven by its unwavering commitment to security, innovation, and user empowerment. Solana (SOL): Defying Market Trends with Resilience Solana (SOL) has emerged as a resilient contender in the cryptocurrency market, capable of defying broader market trends and charting its own path to success. Despite recent volatility, SOL has showcased remarkable strength, catching the attention of investors by surging to \$110 while Bitcoin faced downward pressure. Following a brief dip to \$162, SOL has demonstrated resilience and is poised for further upward momentum. Key technical analysis points to SOL eyeing a crucial support level at \$129.35, which has historically served as a solid foundation for price movements. Should SOL continue its upward trajectory, surpassing the \$200 mark will present a significant milestone, indicating sustained bullish sentiment and market confidence. Currently trading at \$176 after a 4.32% increase, Solana has been identified by experienced analysts as a cryptocurrency with significant bullish potential in 2024. With its robust ecosystem and emphasis on scalability and efficiency, SOL is well-positioned to capitalize on emerging opportunities and cement its position as a leading blockchain platform. Bonk (BONK): Capturing the Imagination of Traders Bonk (BONK) has emerged as another intriguing option with the potential to beat Shiba Inu in 2024. Dubbed a meme coin, Bonk has garnered attention and excitement from traders worldwide. Its recent surge in price, evidenced by a 6.96% increase within the past 24 hours, underscores renewed interest and enthusiasm surrounding this digital asset. Key developments within the crypto ecosystem, such as BitMEX's decision to list the Bonk token, have contributed to its increased visibility and credibility. Moreover, the announcement of an airdrop opportunity has further fueled speculation and anticipation regarding Bonk's future prospects. With its current price trading at \$0.0000125, Bonk's market capitalization stands at \$1.1 billion, positioning it as a formidable player in the crypto space. Substantial growth. Conclusion In the ever-changing landscape of cryptocurrency investment, experienced analysts play a crucial role in identifying assets with the most bullish potential. While Shiba Inu may have been a top dog during the last market cycle, analysts believe that Retik Finance, Solana (SOL), and Bonk (BONK) are poised to outpace it in 2024. With their innovative technology, growing ecosystems, and strong fundamentals, these alternatives offer investors compelling opportunities for growth and returns in the dynamic world of cryptocurrency investing. From Bonk's community-driven approach and strategic initiatives to SOL's resilience and scalability, and RETIK's commitment to security and innovation, these cryptocurrencies offer investors a diverse range of opportunities to capitalize on the evolving digital asset landscape. Visit the links below for more information about Retik Finance (RETIK): - Website: <https://retik.com> - Whitepaper: <https://retik.com/retik-whitepaper.pdf> - Twitter: [www.twitter.com/retikfinance](https://twitter.com/retikfinance) - Telegram: [www.t.me/retikfinance](https://t.me/retikfinance)

As we have seen in recent months, the crypto market has shown a tremendous jump. And April is no different to this. But what makes April even more exciting is the upcoming Bitcoin halving event. Investors are gearing up to capitalize on the anticipated market surge, eyeing meme coins that closely track Bitcoin's price movements. With numerous meme coins vying for attention, which one has the potential to shine? Here's the answer: GODLENFISH As it may sound like Marvel's next movie, it is actually the name of the latest hot thing in the MEME industry. GodlenFish is

launching their token called \$GODLEN on SOLANA. This rising beast is quickly gaining traction and capturing the spotlight in the crowded meme coin market. Its meteoric rise has everyone talking. Inspired by the age-old saying about catching a golden fish granting wishes and luck, the team crafted a meme coin that stands out as the new Solana mascot, with great narrative, and humor. The Buzz About GODLENFISH, Reality? Presale Success In just 24 hours, GODLEN's presale has already netted over 1000 SOL (equivalent to the enormous 180000 USD+). The project boasts over 500 presale participants already and has garnered more than 5000 wallets for its airdrops, signaling strong investor interest and community support. Godlenfish Token Presale The Godlenfish presale is ongoing which offers an amazing opportunity for investors to get early and a chance to add some lucky charm to their portfolios. By participating in such presales, profitable traders are securing investments in rare gems before it goes viral or there is no space. Users can join the live presale here: godlenfish.com Exchange Listings: After successful DEX voting on Twitter, Raydium emerged as the leading DEX choice. Next week, CEX voting will take place, allowing the community to choose from a range of options. With plans to list on top-tier exchanges, GODLENFISH aims for a fair launch in May 2024 following the presale. Airdrops and Growth Initiatives: Scheduled for May 14, the GODLENFISH team is committed to community growth and engagement with an airdrop coinciding with the presale's last day. \$GODLEN made significant partnerships with popular KOLs, some of the names like Solana Army, Mr White are followed by Binance's guru Changpeng Zhao (CZ). Community-Centric Approach: With a vibrant and active community of nearly 5000 organic members on Twitter and more than 1000 on Telegram, GODLEN is destined to dominate the meme coin scene of 2024. GODLENFISH encourages open dialogue and active participation within its community, fostering trust and ensuring long-term success. Utility and Long-Term Vision: \$GODLEN offers a multifaceted utility, serving as a top-tier meme provider that brings positive vibes and enthusiasm with its fresh mascot. Additionally, users can engage in diverse staking options for \$GODLEN tokens and NFTs, with various APRs and staking periods available. Further enhancing user engagement, the \$GODLEN game boasts captivating mini-games ranging from PVP battles to single-player challenges. The best part is that \$GODLEN plans to launch an L2 chain tailored for meme coins with a longer-term vision, offering scalability and diverse utility options. Why \$GODLEN Chooses Solana for Its Launch The decision to launch GODLEN on Solana was driven by several strategic considerations. Solana boasts a vibrant and expansive community, particularly when it comes to supporting memecoins. Furthermore, Solana's potential for growth is undeniable. With its scalable infrastructure and commitment to low transaction fees, it stands as a formidable competitor to Ethereum. As one of the most socially active blockchains, Solana's engagement metrics serve as a leading indicator of its rapid expansion. Considering GODLENFISH's strong fundamentals and community support, it's drawing attention as a promising meme coin investment. However, investors should remember that the meme coin market is volatile and speculative. Ultimately, GODLENFISH's potential as the best meme coin hinges on an investor's risk appetite and investment horizon. For those seeking high-risk, high-reward opportunities, GODLENFISH presents an enticing option. - To learn more about GODLENFISH and how to invest, visit <https://godlenfish.com>. Hong Kong approved Bitcoin and Ethereum ETFs yesterday and the market is back to soaring again after a dull week. Investors are on the battleground seeking the best bets as halving nears. Besides blue-chips three tokens that hold extreme potential in the coming months are as follows: BRISE On average, Ethereum gas fees can go as high as \$25. Solana's transaction failure rate is skyrocketing to 80%, and gas fees have jumped by 2x-3x. The RWA narrative is pushing the case of layer-1 blockchains. Amidst all the chaos, one layer-1 blockchain that has been marching on a low gas fee and high-speed revolution is Bitgert. Bitgert launched its token BRISE as the utility and governance token of its native ecosystem. You can pay for transactions as low as \$0.0000001 BRISE tokens and enjoy a TPS of 100K. BRISE has been up by 5.2% in the last 24 hours and looks ready for a massive push as Bitcoin halving nears. Even closer to the market, BRISE's own fundamentals make it a superior choice among the mid-cap L1s. Based on a limited supply, 1 billion tokens, and a deflationary mechanism, the team recently introduced a superior burn mechanism as part of its burn mechanism. BRISE's price will continue rising against shrinking supply. BEFE BEFE isn't your regular memecoins getting launched on chains in hundreds each day. BEFE was launched without a presale or tax. The memecoin has gained immense popularity since its launch and has surged by over 200%. The coin looks like a long-standing token, unlike a memecoin with major pumps before the ultimate dump of shilling. BEFE is following the Bitcoin's trajectory in terms of price movement. After the Hong Kong ETF approval, Bitcoin has returned to its track. BEFE riding high on the gains can surge by another 200% in the coming days and jump to a price target of \$0.0002252. The BEFE team is continuously working to expand BEFE's presence across exchanges. BEFE recently got listed on the Tapbit exchange. BEFE has a trading volume of 300K and a current market cap of \$22.6 million. CENX The CENX coin or Centex coins functions on the same lines as the BRISE token. CENX coin can be an early bet for investors seeking gains as high as 40,000% like BRISE. Cnetex is going to launch its own exchange soon and can be a great buy. The token was launched on Binance and is available for purchase on PancakeSwap. The Centex platform is bridging multiple partnerships in the coming months and the CEX token might grow in might as huge as the BRISE token. In crypto, early investors bag the biggest gains. All the three tokens are yet to mature and hold upside potential in the coming months. Be early, invest in crypto. Future is decentralized and crypto will be the coin of this decentralized economy.

While moving deeper into 2024, the cryptocurrency landscape continues evolving, presenting challenges and opportunities for investors. Amidst this dynamic environment, directed acyclic graph (DAG) cryptocurrencies, with high throughput and low fees, are attracting significant attention. BlockDAG stands out as a presale success, garnering over \$17.3 Million is a testament. This listicle delves into the top five cryptocurrencies BlockDAG, PikaMoon, Ethereum, Solana, and Avalanche. It highlights how BlockDAG's innovative technology sets it apart as the prime investment choice for those looking for 30000x ROI potential. Top 5 High-Growth Potential Cryptocurrencies for Investment 1. BlockDAG's Massive Price Increases with Each Batch BlockDAG is poised to revolutionise the blockchain landscape with its innovative hybrid structure that combines the security of traditional blockchains and the scalability of Directed Acyclic Graphs (DAG). This unique approach addresses the blockchain trilemma—security, scalability, and decentralisation. With the ability to process transactions in parallel, BlockDAG offers enhanced throughput, making it ideal for high-volume applications like financial services and IoT. Its robust consensus mechanisms ensure uncompromised security and decentralisation. The recent Technical Whitepaper V2 release and appearance at The Sphere Las Vegas, has made investors flock to the project. In its presale phase Batch 9, BDAG is priced at \$0.005 and is expected to list at \$0.05—a 4900% increase. The ongoing presale has already generated significant gains for early investors, with a 50% increase observed in each batch progression, highlighting its potential for a 30,000x return post-listing. 2. PikaMoon's Low Market Cap PikaMoon, with its meme appeal and GameFi utility, represents a unique investment opportunity in the crypto world. The project combines the engaging aspects of gaming with blockchain technology, offering significant growth potential reminiscent of early crypto gaming successes. The PIKA token is good due to its low market cap compared to competitors, providing a lucrative entry point for investors. The project's roadmap includes significant developments like an open-world metaverse and additional exchange listings, signalling a promising future. 3. Ethereum Long-Term Growth As the backbone of the DeFi and smart contracts ecosystem, Ethereum continues to hold significant appeal. The transition to Ethereum 2.0 and its shift to a proof-of-stake mechanism enhances its efficiency and addresses previous concerns like high gas fees and network congestion. Ethereum's widespread use and the increasing number of applications developed on its platform make it a stable investment with long-term growth potential. 4. Solana (SOL) High Throughput Known for its high throughput and low transaction costs, Solana offers an efficient alternative to traditional blockchains. It supports up to 50,000 transactions per second, promoting itself as an ideal platform for decentralised applications needing high-speed data processing. Solana's focus on interoperability and user-friendly migration options from Ethereum enhances its attractiveness as a high-potential investment. The Final Verdict: Why BlockDAG Leads the Crypto Investment Pack These cryptocurrencies represent a mix of established giants and emerging innovators in the blockchain space, each offering unique technologies and the potential for high returns. Investors looking for growth opportunities in the crypto market would consider these options with BlockDAG, especially with its cutting-edge hybrid structure, effectively tackling the blockchain trilemma of scalability, security, and decentralisation. Its rapid presale progress and the significant returns seen by early investors underscore its potential for extraordinary growth, positioning it as an essential addition to any investment portfolio. BlockDAG, priced at \$0.005 in Batch 9, promises a potential 30,000x growth. A revolutionary addition to crypto, welcoming both seasoned and new investors to be part of cutting-edge blockchain development. Join BlockDAG Presale Now! Success stories in the world of cryptocurrencies can come from unexpected places. One such story is about a Shiba Inu millionaire who made a \$560,000,000 investment in SHIB, which propelled him or her into the world of cryptocurrency wealth. An incredible story. But this person's story doesn't end there. After correctly forecasting the 100x rally of WIF, they lately focused on a new initiative called Hump. This Shiba Inu millionaire believes that Hump, which is presently valued at less than \$0.05, has the potential to expand rapidly, much like their prior endeavours. From SHIB to WIF: A Remarkable Prediction The journey of this Shiba Inu millionaire began with an investment in the Shiba Inu token, a cryptocurrency inspired by the popular dog breed. Despite its humble beginnings, SHIB quickly gained traction in the crypto community, propelled by its meme-centric appeal and the widespread fascination with meme coins. As the value of SHIB skyrocketed, this investor's initial stake in the token ballooned into a fortune worth hundreds of millions of dollars. However, it was not merely luck that propelled this individual to financial success. In a move that astonished many seasoned traders and analysts, the Shiba Inu millionaire accurately predicted the meteoric rise of another obscure cryptocurrency: Dogwifhat (WIF). While relatively unknown at the time, WIF experienced a staggering 100x rally, catapulting it into the spotlight and generating immense profits for those who had the foresight to invest early. Spotting the Potential in Hump Now, all eyes are on the Shiba Inu millionaire once again as he sets his sights on Hump, a burgeoning cryptocurrency currently priced under \$0.05. Drawing parallels to his success with Dogwifhat, he believes that Hump has the potential to experience a similar explosive growth trajectory. His confidence in Hump stems from its innovative approach, robust community support, and promising tokenomics. Understanding Hump: More Than Just a Meme Coin At first glance, Hump may seem like just another meme coin in a sea of similar projects. However, a closer inspection reveals a project with ambitious goals and a dedicated team behind it. Unlike traditional meme coins burdened by hefty transaction taxes, Hump eliminates these fees, offering users a seamless and cost-effective experience. Moreover, the project places a strong emphasis on community involvement through a robust governance system, fostering a sense of ownership and participation among its stakeholders. The Potential for Explosive Growth Drawing parallels to their previous success with WIF, the Shiba Inu millionaire believes that Hump has the potential to undergo a similar explosive rally, driven by its unique features and promising developments. While its current price may seem modest, the Shiba Inu millionaire envisions Hump experiencing a significant surge in value, potentially multiplying its price several times over in the coming months. One of the key factors driving this bullish outlook is the robust development team of Hump and its commitment to fostering a vibrant and engaged community. By prioritizing transparency, innovation, and inclusivity, Hump seeks to attract a diverse array of investors and enthusiasts, laying the groundwork for sustained growth and adoption. Furthermore, the integration of Hump with the Solana network, known for its high throughput and low transaction fees, positions it favourably in an increasingly competitive market. With Solana gaining traction as a preferred blockchain platform for decentralised applications (dApps) and DeFi protocols, Hump stands to benefit from the network effect, potentially propelling it to new heights. Conclusion: A New Era of Opportunity Identifying the next big opportunity requires a combination of foresight, diligence, and a willingness to take calculated risks. The Shiba Inu millionaire, with their uncanny ability to spot emerging trends and capitalize on them, exemplifies the potential for wealth creation in this dynamic ecosystem. As Hump emerges as the latest contender in the meme coin arena, all eyes are on its trajectory and potential for growth. While its fate remains uncertain, one thing is clear: with the right mix of innovation, community support, and market dynamics, Hump could very well follow in the footsteps of its predecessors and pave the way for a new era of opportunity in the world of cryptocurrency.

- Ethereum rebounds past \$3,150 despite geopolitical tensions, showcasing market resilience. - Institutional approval for Bitcoin and Ethereum ETFs in Hong Kong drives demand. Ethereum (ETH) experienced a temporary dip below the \$3,000 mark in escalating tensions in the Israel-Iran conflict. However, demonstrating remarkable resilience, the price of ETH has surged back, surpassing the \$3,150 level at the time of reporting. This resurgence has been fueled by strategic moves from whales, who have been actively acquiring significant supplies from exchanges while capitalizing on market dips. As of the latest update, Ethereum is trading at \$3,246.19, marking a notable 5.18% surge, with the market cap experiencing a corresponding 5% increase. And a 31% decrease in trading volume. On-chain data provided by Lookonchain highlights a noteworthy withdrawal of Ethereum from Binance, linked to a wallet associated with Matrixport. The transaction, totaling 16,300 ETH, equivalent to \$51.1 million, occurred recently, adding to a series of withdrawals from exchanges by the same wallet since March 29. In total, the wallet has withdrawn 67,286 ETH, amounting to \$228.33 million, signaling significant movement orchestrated by Matrixport, potentially indicating strategic maneuvers in the cryptocurrency market. Furthermore, recent data reveals a decline in Ethereum Gas fees, with the median Ethereum Gas hitting as low as 12.5 gwei, the lowest level observed this year. Currently, Ethereum Gas stands at 8 gwei, indicating relatively lower transaction costs. However, blockchain activity has seen a surge on platforms such as Solana and Base, suggesting a diversification of interest among investors. What's Next For ETH? In a significant development, prominent institutions including China Asset Management, Bosera Capital, and HashKey Capital Limited have announced the approval of their applications for Bitcoin and Ethereum spot ETFs by the Hong Kong Securities and Futures Commission. This approval allows investors to directly utilize Bitcoin and Ethereum to subscribe for corresponding ETF shares, potentially boosting demand for both cryptocurrencies. In conclusion, Ethereum's resilience amid geopolitical uncertainties, coupled with strategic maneuvers from whales and institutional adoption, positions it for further upward momentum. Investors are advised to monitor the ongoing developments closely as Ethereum aims to solidify its position in the cryptocurrency market.

Whale investors' activities frequently hold the key to deciphering market secrets and influencing the course of cryptocurrency assets. The news of a Dogecoin billionaire who caused waves by selling an astounding \$2,000,000 worth of DOGE recently sent the cryptocurrency world into disarray and further drove the price of DOGE downwards, plummeting below \$0.20. But what attracted even more notice was the same billionaire's surprising turn to building up a low-cap cryptocurrency called Hump (HUMP), which is presently trading for less than \$0.02. This cryptic path from Dogecoin to Hump has created significant conjecture and curiosity, with investors and enthusiasts keen to discover the reasons for this strategic move. Come along as we decipher the mysterious flips and turns of this billionaire's crypto journey and explore any possible effects on the constantly changing world of digital assets. DOGE Dilemma The well-liked cryptocurrency Dogecoin, which draws inspiration from memes, has long caught the attention of the cryptocurrency world with its whimsical appeal. Nevertheless, a well-known billionaire investor's recent \$2,000,000 DOGE transaction shocked the market and caused prices to plummet. As investors discussed the reasons for the transaction and how it would affect Dogecoin's future, speculation has been running wild. Market manipulation: Big investors, sometimes called "whales," have a big say on how much the market is worth. Selling a significant portion of DOGE can set off a chain reaction that drives down the price by inciting other investors to sell, as well out of fear. - Market Psychology: Whenever whales sell, other investors may become alarmed, which could cause a sell-off and a price decline. In a way, the price decrease is driven by fear, creating a self-fulfilling prophecy. Hump (HUMP): A Rising Phoenix Amidst the uncertainty surrounding Dogecoin, an entirely new token, called Hump (HUMP), has subtly surfaced as a competitor for investors' interest. Hump, which is developed on the Solana blockchain and sells for less than \$0.02, embodies the inventiveness and sense of community that have come to characterize the meme coin phenomenon. Both seasoned traders and novices looking for the next significant breakout in the market have shown interest in Hump because of its intriguing attributes and rising popularity. The Pivot to \$HUMP The billionaire investor's decision to start hoarding Hump (HUMP) once Dogecoin was sold is what makes this story unique. Analysts surmise that the investor may have recognized an opportunity in Hump's low-cap priced coin and its potential to surge. Inside the Dogecoin ecosystem, the sale of \$2M worth of DOGE and subsequent price decrease below \$0.20 have sparked concerns about the token's resilience and long-term prospects. Meanwhile, Hump's climb to fame in the care of a wealthy investor indicates rising optimism and interest in the initiative, which could pave the way for future acceptance and expansion. Conclusion The story of the Dogecoin billionaire, who went from selling \$2,000,000 worth of DOGE to amassing Hump (HUMP) for less than \$0.02, demonstrates how dynamic the cryptocurrency market can be. One thing is certain as investors consider the ramifications of these acts: whale investors' actions can have a significant effect on market mood and prices. It remains to be seen if Dogecoin can bounce back from its most recent decline or if Hump will become the next big thing in the cryptocurrency world. However, with the recent performances of HUMP in the market charts, it thus seems glaring that the baton has been passed from DOGE, and Hump will be the meme coin for the future. Click here to Buy Hump Token (HUMP): - Website: <https://hump.io/> - Twitter: <https://x.com/Humptoken> - Telegram: <https://t.me/humptoken>

Analysts are optimistic about the prospects of three cryptocurrencies for 2024—Solana, Bitcoin, and Retik Finance. But are they worthy additions to your investment portfolio? Let's delve into the analysis and considerations surrounding each of these digital assets. Solana (SOL) Solana (SOL) has garnered significant attention for its robust infrastructure, high throughput, and low transaction fees. Analysts are bullish on Solana's potential to become a dominant force in the blockchain space, given its innovative technology and growing ecosystem of decentralized applications (dApps). However, it's essential to consider factors such as competition from other blockchain platforms and potential regulatory challenges that could impact Solana's growth trajectory. As of today, March 28, 2024, the price of Solana (SOL) is \$186.18. The price of Solana has been on an upward trend since the beginning of the year, with a 830.96% increase. In the 1 week time frame, Solana is currently trending bullish with the actual RSI reading at 67.01. Additionally, the 50-day moving average has crossed above the 200-day moving average, indicating a bullish trend. According to various price predictions, the general sentiment for Solana is bullish. Many analysts expect some upside to Solana for the remainder of 2024 for both bull and bear cases. Bitcoin (BTC) As the first and most well-known cryptocurrency, Bitcoin continues to be a staple in many investment portfolios. Analysts remain bullish on Bitcoin's long-term prospects as a store of value and hedge against inflation. With increasing institutional adoption and recognition as a legitimate asset class, Bitcoin presents opportunities for investors seeking stability and long-term wealth preservation. Nevertheless, it's crucial to be mindful of Bitcoin's price volatility and macroeconomic factors that could influence its value. Real-time BTC to USD price update shows the current Bitcoin price as \$69,503.2 USD. Recent Bitcoin price forecast indicates that its value will increase by 10.33% and reach \$76,711 by March 30, 2024. Technical indicators signal about the Bullish Bullish 93% market sentiment on Bitcoin, while the Fear & Greed Index is displaying a score of 80 (Extreme Greed). Over the last 30 days, Bitcoin has had 18/30 (60%) green days and 5.65% price volatility. Retik Finance (RETIK) Retik Finance (RETIK) is a newcomer to the cryptocurrency scene, offering a blend of innovation, security, and growth potential. Analysts are optimistic about Retik Finance's ambitious vision and recent developments, including the successful presale and upcoming listings on major exchanges. Retik Finance (RETIK) leads the charge in merging traditional fiat currencies with the dynamic world of cryptocurrencies, distinguishing itself from speculative counterparts like BTC and SOL. While others focus primarily on speculative gains, RETIK stands out by offering a multifaceted utility aimed at transforming financial transactions. Operating on the Ethereum blockchain, RETIK introduces a decentralized payment network, ensuring fast, secure, and seamless global transactions for users. But RETIK doesn't halt there; it pioneers with the early introduction of its DeFi Crypto Cards, providing users with a tangible way to utilize their crypto holdings in real-world scenarios. This forward-looking move bridges the gap between virtual assets and tangible transactions, setting a precedent for innovation within the DeFi landscape. Furthermore, Retik Finance (RETIK) prioritizes inclusivity by seamlessly integrating fiat currencies alongside cryptocurrencies, enabling users to leverage various payment methods—from traditional credit and debit cards to novel token payments. Through these innovative features, Retik Finance (RETIK) emerges not only as a token but as a visionary force propelling the evolution of financial ecosystems towards greater accessibility, efficiency, and innovation. Delving deeper into Retik Finance reveals a total supply of 1 billion (1,000,000,000) RETIK tokens, showcasing its dedication to robust financial solutions. Its presale surpassed expectations, exceeding the initial target by an impressive 400%, reflecting the overwhelming support and confidence in the project. This accomplishment underscores the significant enthusiasm and trust Retik Finance has garnered within the cryptocurrency community. Examining its core functionalities reveals a holistic approach. Decentralization empowers users with control over funds and transactions, ensuring autonomy and self-governance. Security is prioritized through a sophisticated credit-scoring architecture, fostering confidence and reliability. Moreover, sustainability is emphasized by incentivizing innovation and fostering long-term growth and development. Additionally, smart contract automation achieves low cost and high efficiency, optimizing resource utilization and enhancing operational efficiency. This multifaceted strategy solidifies Retik Finance's position as a leading contender in decentralized finance, establishing a new standard for excellence in the industry. If you're looking to invest, Retik Finance (RETIK) is your best bet. In conclusion, while analysts are bullish on Solana, Bitcoin, and Retik Finance for 2024, it's essential to carefully evaluate each cryptocurrency's fundamentals, market dynamics, and risk factors before making investment decisions. Diversification and a long-term investment horizon are key principles to consider when building a cryptocurrency portfolio that aligns with your investment goals and risk tolerance. Visit the links below for more information about Retik Finance (RETIK):

While Bitcoin enjoyed robust upward movement earlier this year, Ethereum's price also witnessed a surge in market value during this period. Ethereum's pump was driven by the successful Ethereum Dencon upgrade, maintaining its position just under the \$3500 threshold despite a slight post-upgrade decline. In the wake of the bull market, experts have identified three other altcoins, Befé Coin, Bitgert Coin, and Centcex, as the best buys of the week. In today's article, we will evaluate the profit potential of these altcoins to deliver sky-high gains. Centcex to Enjoy a Massive in Coming Weeks Centcex (CENX) is an innovative solution on the market; it plays an active role in developing and scaling the Bitgert Chain, BNB Chain, opBNB, and Ethereum through decentralized applications. Now trading at \$0.0006376, CENX has surged by approximately 9.4% in the last 48 hours and nearly 11% in the last 7 days. After a remarkable start to Q2, experts are suggesting CENX will enjoy a major pump in the coming weeks. Imminent Rally for BEFE Coin in Coming Months Since its entrance into the market last December, BEFE has been at the top of the list for investors looking to cash out big in 2024. This increase in demand increased buying pressure and consequently affected its market value. Hence, it was no surprise when BEFE achieved a staggering 500% in less than a month. In anticipation of an imminent rally in the coming months, several key technical indicators point BEFE in a bullish direction. Experts favor BEFE to enjoy a 300% rally by the end of the month. Bitgert Coin (BRISE) is Ready to Deliver Sky-high Gains By solving one of the major scalability challenges facing most cryptocurrency exchanges like Ethereum, Solana, Tron, etc., Bitgert Coin (BRISE) has attracted many users to its ecosystem. While most exchanges usually suffer network congestion, particularly during high trading activity, Bitgert offers users a seamless transactional experience. Bitgert archives this seamless and cost-efficient transactional experience through its Proof of Authority consensus. With this superior technology, Bitgert can deliver transactional speeds of up to 100,000 transactions per second and next-to-zero fees on its blockchain. Bitgert also boasts a suite of products and solutions, such as Bitgert Exchange, Bitgert P2P Marketplace, Bitgert Chain, Bitgert Startup Studio, etc. Such a seamless trading experience and Bitgert's robust range of innovative solutions are magnets for investors in the market. Conclusion As the crypto summer approaches, Befé Coin, Bitgert Coin, and Centcex accumulation has aggressively increased in the last few days. The best buys of the week are en route to becoming the most lucrative projects in 2024. Disclaimer: TheNewsCrypto does not endorse any content on this page. - The price of bitcoin fell more than 8.2 percent on April 13, when Iran attacked Israel. - Similar to bitcoin, other cryptocurrencies are seeing a sell-off. Bitcoin and Ethereum prices, among many others, fell sharply today on reports from the Israeli military that Iran had attacked the country with a swarm of drones. Reports indicate that a cargo ship owned by an Israeli billionaire has been seized by Iranian officials, in addition to the airstrikes. President Joe Biden of the United States issued a dire warning to Iran on April 12 that they would strike "sooner than later," emphasizing that America will stand behind Israel in its defense. As the U.S. has supposedly been attempting to avoid since the Israel-Hamas war in October, the tensions in the area have been steadily rising due to the dispute between Iran and Israel. Flash Sell-off The

price of bitcoin fell more than 8.2 percent on April 13, when Iran attacked Israel, further intensifying the Middle Eastern geopolitical crisis. Minutes after the assault, the price of bitcoin plummeted from over \$67,000 to \$61,624€"evaporating more than \$130 million in market value. Bloomberg reports that on Saturday Iran sent drones flying toward Israel. This action is a response to an assault that Israel carried out a few days before. Seven Iranians, including two generals, were killed when an Israeli airstrike targeted a diplomatic building in Damascus, Syria. Similar to bitcoin, other cryptocurrencies are seeing a sell-off. As of this writing, Solana has fallen 15.56% to \$128 and Ether is down 9.71% to \$2,928. Overall, the cryptocurrency market has lost 9.51% of its value today, according to statistics compiled by CoinMarketCap. Normally, crypto isn't directly impacted by geopolitical events, but because conventional markets are closed on Saturday, it's hard to say how traders in other asset classes will react. Highlighted Crypto News Today: KuCoin's Turkey X Account Hacked for Phishing Scam Promotion

Trading experts who previously predicted the success of Dogwifhat and Bonk are now looking at the same potential at the \$HUMP. With a possible market boom on the horizon, some say \$HUMP could be the next big thing in the market. Speculation Rises on a Huge Bull Run Following the Halving As the Bitcoin halving approaches, speculation about a major bull run is swirling among leading crypto traders. This excitement stems from a shift in market sentiment that began in early 2024. While the Federal Open Market Committee (FOMC) meeting triggered a market correction, many experts remain optimistic. They believe the upcoming bull run has the potential to outpace rallies that happened during the previous halving. This bullish outlook underscores the enduring potential of the cryptocurrency market. Despite the Bull Run Hype, \$WIF and \$BONK Are Under Intense Selling Pressure The Solana meme coin market, which has been super hot since the beginning of 2024, has started to slow down in the past week. \$BONK it's not doing well lately. After a crazy jump in price of over 3,000%, it dropped more than 18% in the last week. Right now, the price is bouncing between \$0.000031 and \$0.00002. Lots of people are selling, which could make it tough for \$BONK to go back up again. Another popular meme coin, \$WIF, is also having some hard times. They promised investors huge returns since early 2024, but the price has gone down 25% in the last week. It used to be around \$4.50, but now it's only \$3.40. It's trying to get past \$3.50, but it just can't seem to break through. Even though there's a lot of excitement about the bull run on the upcoming Bitcoin halving, some of these meme coins are having a rough time lately. \$HUMP Remain Strong Amid Ongoing Market Correction The recent slump in top SOL meme coins, like \$WIF and \$BONK has spooked some investors, sparking concerns that the hype surrounding these established tokens may be fading. This shift in sentiment has many searching for the next big thing in the meme coin market. \$HUMP, a rising star that has defied the recent downturn was launched on Raydium and Jupiter on March 29th, Hump witnessed a staggering 5,000% price increase, and unlike its struggling counterparts, has maintained its strength even during the broader market correction of the past week. This top contender offers more than just a flashy launch. \$HUMP boasts a unique concept that eliminates buying and selling taxes, fostering a frictionless trading experience and promoting a stronger community atmosphere. Furthermore, within a week of its debut, \$HUMP secured listings on both Coinmarketcap and Coingecko. With its impressive launch, resilience during the correction, and unique features, \$HUMP is quickly capturing the attention of investors, leaving many to wonder if it could be the next breakout star in the scene. Whales Also Showing They're Not \$HUMP's So Missed Out on This Opportunity Adding Another Layer of FOMO \$HUMP's success has attracted the attention of high-profile investors, including investments by "whales," as these major players are known in the crypto world, indicate a growing interest in this token. Not to be outdone, smaller, yet significant, investors, often referred to as "dolphins," are also joining the wave. Transactions ranging from \$5,000 to \$9,000 are becoming increasingly common, signifying the growing appeal of \$HUMP among mid-tier investors. This confluence of activity from both whales and dolphins suggests a rising confidence in \$HUMP's potential. Analyzing the Future of \$HUMP: Trading Experts Predict Huge Potential Trading experts with a proven track record of predicted meme coin successes like \$BONK and \$WIF are now turning their attention to \$HUMP, the hottest new contender on the Solana scene. \$HUMP's impressive performance since its launch, coupled with the promise of an imminent major exchange listing, has fueled excitement among these well-known traders. Their optimism aligns with the predictions on the upcoming bull run, potentially pushing \$HUMP's price up by a staggering 5000%.

BEFE Coin is the hottest meme coin, taking the crypto world by storm this week! It saw an increase in price grabbing the attention of investors worldwide. But what exactly happened that is making investors crazy? So let's rewind the tape and look back in time to see how BEFE Coin is making news. Day 1: BEFE's website saw a surge in traffic in early April, with visits skyrocketing to 21.9K and engagement spiking 626.5% compared to March. The enthusiasm of investors could be seen. Day 2: Many enthusiastic BEFE coin buyers started to tweet about its potential. This got serious when Crypto guru @Sijuuu€ tweeted his excitement about BEFE's upcoming exchange listings, and its strong sustainability on its market cap of more than \$40. This action may have motivated new investors to enter. Day 3: At this time when all other cryptos were struggling with a price correction, BEFE experienced a rally of 31%. This led to a rise in its market cap straight to \$55M. Leaving many market observers speechless, people went crazy on Twitter. The chart below shows this rise. Day 4: BEFE officially announced the completion of the presale event, and the participants would be receiving tokens via airdrop soon. This strategic partnership with Solana, a leading blockchain development firm, further overhyped its current position. Day 5: Amongst all these developments going on CiteX officially announced the launch of BEFE on its exchange. This triggered #BEFE trending on Twitter, with users knowing that this partnership will allow new investors to enter. People throughout the world started sharing their enthusiasm and predictions for continued growth. Day 6: On the following day of listing on the CITEX exchange, BEFE disclosed that it would launch on an unspecified date, and the unsold presale tokens would be used for over-the-counter (OTC) deals. This would result in improving its liquidity and growing community. What to Expect Next? We can already conclude that the previous week was a wild journey for BEFE. Now only time will tell how high can it go. But one thing is certain for sure BEFE has entered into the meme coin market to disrupt it with its long-term vision. It can be a prime candidate for a meme coin portfolio. The crypto market is highly volatile and unpredictable. Hence, it's always recommended that you invest only in what you can afford to lose before making any investment decision. To know more about BEFE, visit <https://befetoken.com> Buy BEFE coin from the below exchanges now! Buy on Gate.io at "BEFE/USDT" Buy on MEXC at "BEFE/USDT" Buy on Pancakeswap Disclaimer: TheNewsCrypto does not endorse any content on this page. New York, United States, April 12th, 2024, Chainwire 99BTCcoins, established in 2013, has recently begun its token presale in an effort to harness the current upward trend in Bitcoin's value. The 99BTC team, seizing this opportunity, offers its learn-to-earn platform, a longstanding resource in cryptocurrency education. What is 99BTCcoins? 99BTCcoins has been breaking down technical concepts and onboarding newcomers to the crypto world for over ten years as the team can show by the numbers on its social media accounts: over 700,000 YouTube followers, 16,000 Twitter followers and 2 million registered users have confirmed its +80 hours of resources are a great entry point for those looking to learn more about crypto. The \$99BTC token is its latest venture. The team promotes its commitment to education by introducing the "gamification of learning" into the platform, providing \$99BTC rewards for those who complete its courses, such as exclusive access to premium content, discounts on partner products and services, VIP communities, trading signals, and token holder events. The 99BTCcoins team aims to attract all the potential new users who are expected to enter the crypto space and explore Bitcoin in light of the upcoming halving; the event, which will occur this month, is expected to increase the number of first-time crypto enthusiasts as confirmed by multiple researches and major sources like CoinTelegraph and CoinDesk. Pioneering BRC-20: Pushing Learn-to-Earn In New Directions 99BTCcoins is also trying to set itself as a pioneer of the BRC-20 movement: a new token standard that allows developers to deploy smart contracts on the Bitcoin blockchain. Security and transparency are also key to this project, a solid proof of audit confirms that 99BTCcoins contract does have no potential issues or warnings. It's worth noting, 99BTC is originally deployed as an BRC-20 token and that it will be bridged to BRC-20 only in Q4 2024, transferring the security of the project to the Bitcoin network. When it comes to the tokenomics (renamed to Token Metrics by its team), 99BTCcoins is distributing its 99 billion \$99BTC total supply with the goal of helping it remain competitive and provide lasting sustainability: - 15% is allocated to the presale, which is currently selling \$99BTC for \$0.001 - 14% for staking rewards, providing \$99BTC stakers with rewards for two years - 23% is allocated to project funds - 17% for community rewards - 8% to provide liquidity to exchanges - 23% for marketing This tokenomics structure is then paired with an ambitious roadmap which would target the beta release of the platform to last quarter this year, followed by the full release next year. About 99BTCcoins 99BTCcoins is a vital educational resource for Bitcoin. It focuses on providing information about cryptocurrency to onboard new users to the industry. The website was established in 2013 and has since expanded its knowledge base to popular blockchains and cryptocurrencies such as Litecoin, Ethereum, Cardano, and Solana. The platform now brings a gamification element to its product, allowing students to receive \$99BTC rewards in a L2E economy. The \$99BTC token is also pioneering the BRC-20 movement, a new token standard that enables smart contracts to be deployed on the Bitcoin network. Contact 99BTCcoins contact@99bitcoins.com

In the ever-expanding universe of cryptocurrency, meme coins have taken center stage, captivating investors with their playful branding and potential for astronomical gains. Among these canine-themed tokens, Dogwifhat (WIF) has surged over 90% in just a week, demonstrating the explosive growth potential inherent in meme coins. As we delve into the unique qualities of Dogwifhat (WIF) and its competitor Shiba Budz (BUDZ), it's evident that these canine coins offer investors distinct opportunities in the crypto market. Dogwifhat (WIF): Unveiling the Phenomenon Dogwifhat (WIF) has emerged as a formidable player in the meme coin space, propelled by its catchy name and engaging community. With its playful branding and vibrant online presence, Dogwifhat (WIF) has captured the imagination of investors seeking a lighthearted yet lucrative investment opportunity. The token's recent surge of over 90% underscores its potential to deliver significant returns in a short period, further solidifying its status as a standout performer in the crypto market. Shiba Budz (BUDZ): A Fresh Perspective While Dogwifhat (WIF) has made waves with its rapid ascent, Shiba Budz (BUDZ) offers investors a fresh perspective on meme coin investing. Unlike its canine counterpart, Shiba Budz (BUDZ) prioritizes innovation and utility, aiming to carve out its own niche in the competitive crypto landscape. With its focus on community engagement and technological advancement, Shiba Budz (BUDZ) presents investors with a compelling alternative to traditional meme coins, positioning itself as a frontrunner in the market. Comparing Unique Potential: Dogwifhat (WIF) vs. Shiba Budz (BUDZ) When comparing the unique potential of Dogwifhat (WIF) and Shiba Budz (BUDZ), it's essential to consider their respective strengths and value propositions. While Dogwifhat (WIF) has demonstrated its ability to generate significant short-term gains and foster community engagement, Shiba Budz (BUDZ) offers investors a more robust and sustainable investment opportunity. With its emphasis on technological innovation and utility-driven solutions, Shiba Budz (BUDZ) has the potential to deliver long-term value and stability to investors, setting it apart from traditional meme coins like Dogwifhat (WIF). Navigating the Canine Coins: Opportunities and Challenges As investors navigate the canine coin landscape, it's crucial to recognize the opportunities and challenges inherent in meme coin investing. While tokens like Dogwifhat (WIF) offer the potential for rapid gains and community-driven growth, they also face regulatory uncertainty and market volatility. In contrast, projects like Shiba Budz (BUDZ) prioritize innovation and long-term sustainability, mitigating risks associated with meme coin investing and offering investors a more stable and predictable investment opportunity. In conclusion, the surge of Dogwifhat (WIF) highlights the explosive growth potential of meme coins in the crypto market. However, as investors seek out new opportunities, it's essential to consider the unique qualities and value propositions of tokens like Shiba Budz (BUDZ). With its focus on innovation and utility, Shiba Budz (BUDZ) offers investors a compelling alternative to traditional meme coins, positioning itself as a frontrunner in the evolving crypto landscape. As the canine coin phenomenon continues to unfold, investors can look to projects like Shiba Budz (BUDZ) for stability, growth, and long-term value creation in the crypto market. For more information on the Shiba Budz (BUDZ) Presale: Presale Website: [SHIBA BUDZ \(BUDZ\)](https://shibabudz.com) Use Promo Code budzmoon30 to get 30% bonus Join and become a BUDZ member: - Telegram: <https://t.me/ShibaBudzP2E> - Twitter: [@SHIBA_BUDZ](https://twitter.com/SHIBA_BUDZ) / X Disclaimer: TheNewsCrypto does not endorse any content on this page. Investors are continuously navigating waves of turbulence and opportunity in the cryptocurrency market. Formerly a major player in the meme currency market, Shiba Inu (SHIB) has witnessed a slump in price, trading well below its peak. Currently selling almost 60% below its \$0.000008616 high value, investors are unsure about SHIB's prospects for a comeback in 2024. But in the midst of all of this uncertainty, a fresh competitor

has surfaced: Hump Token. Top analysts believe this meme coin from Solana could be a profitable option for investors looking for bull run returns, which is why it is gaining popularity. In this article, we look at the factors behind Shiba Inu's price slump and why leading analysts are recommending a switch to Hump Token (HUMP) in search of possible benefits. Understanding Shiba Inu (SHIB) Price Decline Shiba Inu piqued the interest of the entire crypto community with its meme-inspired logo and lofty vision. However, since reaching a record high over two years ago, SHIB has failed to retain its momentum, citing factors like market instability, regulatory scrutiny, and pressure from newer meme coins like Hump. Furthermore, investor opinion has shifted due to questions regarding the token's value and long-term viability, resulting in a price drop. The ongoing uncertainty surrounding SHIB encourages speculation about its unlikely future, but nothing should be ruled out in the crypto market. Factors Impacting SHIB's Possible Recovery in 2024 While SHIB's price decrease may appear disappointing, some elements could help it recover in 2024. First, improvements in the overall cryptocurrency market mood may boost investor confidence and rekindle interest in SHIB. Furthermore, the addition of new features, collaborations, and use cases for SHIB may increase its utility and attract additional investors. However, the path toward redemption for SHIB remains unpredictable, and investors need to carefully weigh the risks before deciding on an investment choice. The Case for A Switch to Hump Token (\$HUMP) Despite SHIB's problems, Hump Token has become known as an appealing alternative for investors looking for bull run returns. Hump, built on the Solana blockchain, boasts quick transaction speeds, cheap fees, and a thriving network of supporters. HUMP is more than just a meme coin marvel; it's a movement. By embracing HUMP, you're not only investing in a digital asset, you're joining a community of forward thinkers and innovators who are passionate about shaping the future of finance. Top analysts believe Hump's novel features, solid fundamentals, and expanding momentum make it an attractive investment prospect in 2024. Furthermore, HUMP has been on the rise on the market chart in recent times, increasing by more than 5300% in the last one week. Top Analysts' in Support of Hump Token (HUMP) Leading cryptocurrency analysts have expressed approval for Hump Token (HUMP) as a viable alternative to Shiba Inu (SHIB) in the 2024 market. These analysts point to Hump's strong head start in the market, bullish momentum, and community engagement as major elements in its potential for bull run growth. Furthermore, investors have expressed excitement and optimism about Hump's significant exchange listings and forthcoming developments. Conclusion As investors assess the chances for Shiba Inu recovery and analyze the possible benefits of switching to Hump Token (HUMP), they must exercise prudence and diligence in their investing decisions. While SHIB may yet have a chance to recover, the uncertainties surrounding its future direction require cautious evaluation. Hump Token, on the other hand, provides a tempting alternative due to its great head start, solid fundamentals, and steadily increasing community support. Finally, investors must undertake extensive research, evaluate risk variables, and make informed selections based on their investing objectives and risk tolerance.

Finding profitable prospects in the realm of cryptocurrency investing necessitates having a forward-thinking mindset and a deep comprehension of market dynamics. The forecasts and analyses of seasoned experts carry a lot of weight for investors looking for direction and insight, frequently influencing investment strategies and choices. One such analyst, well known for his precise predictions, became well-known in 2022 when he correctly predicted that Bitcoin would go below \$20,000. This analyst enters the spotlight once more as the cryptocurrency market gets ready for the post-2024 halving period, revealing their most recent forecasts and pointing out three altcoins that could see significant increases. With the expectation that Bitcoin will reach \$100,000 and the attention being drawn to altcoins like Cardano (ADA), Solana (SOL), and Hump (HUMP), investors are anxious to learn more about the possible opportunities to come. Six Figures for Bitcoin in the Future The experienced analyst, who is renowned for providing perceptive market analysis, has restated his long-held conviction in Bitcoin's superiority. He has listed some things that support his optimism for BTC post-halving: - Halving Horizon: The upcoming Bitcoin halving, which is expected to take place in May 2024, is much awaited. Halvings, which cut the quantity of new Bitcoin coming into circulation in half every four years, have historically been followed by large price gains. The analyst speculates that this halving might serve as the impetus for Bitcoin to surpass the coveted \$100,000 threshold. - Institutional Adoption: Increased public acceptance of Bitcoin is indicated by the increased participation of institutional investors in the cryptocurrency space, including hedge funds and investment banks. This cash inflow could raise the cost even more. Top Altcoins to Rally With BTC Post-Halving Although the rise of Bitcoin is expected to take center stage in headlines, astute investors are also keeping an eye on altcoins for possible gains. Three altcoins—Hump (HUMP), Solana (SOL), and Cardano (ADA)—are identified by the knowledgeable analyst as being excellent choices for maximizing gains in the post-halving period. Let's examine the special qualities and possibilities of each altcoin: - Hump (HUMP) While the entire cryptocurrency market is waiting for Bitcoin to hit \$100,000 after the 2024 halving, Hump (HUMP) is one altcoin that has been performing exceptionally well. With its unique strategy and expanding community support, Hump has garnered the interest of analysts and investors alike, positioning it as a promising competitor in the Solana meme coin field. With the prediction of the knowledgeable analyst who forecasted a \$100,000 spike in Bitcoin following the 2024 halving, Hump is well-positioned to capitalize on the overall market trend. Hump presents an alluring option for investors looking for chances to maximize their profits outside of Bitcoin. The possibility that Hump could equal or surpass the performance of well-known players like Ethereum and Bitcoin has attracted the interest of institutional and ordinary investors alike, following the 5300% rally it had already experienced in recent days. - Solana (SOL) Because of Solana's decentralized finance (DeFi) methodology, speed, and scalability, it has attracted a lot of interest. In contrast to Ethereum, Solana is a strong contender for developers and users looking for reliable and affordable blockchain solutions. Solana is in a good position to benefit from the rising demand for decentralized applications (dApps) platforms because of its expanding network of partnerships and projects. SOL is a must-watch and a should-buy ahead of the post-halving rally given its historic rally in tandem with BTC. - Cardano (ADA) Cardano is renowned for its scientific approach to development and focuses on sustainability, scalability, and interoperability. Cardano has ushered in the era of smart contracts with the release of its Alonzo upgrade, creating new opportunities for decentralized finance (DeFi) and decentralized applications (dApps). Holders of ADA stand to gain from the long-term potential of the Cardano ecosystem as adoption increases and it matures, particularly as we anticipate the Bitcoin Halving rally. Brief Recap The analysis from a seasoned analyst clarified Bitcoin's future course as well as the potential advantages offered by well-known altcoins including Cardano (ADA), Hump (HUMP), and Solana (SOL). Investors can profit from the overall market momentum and diversify their portfolios with these promising altcoins, as Bitcoin is expected to soar above \$100,000 after the 2024 halving.

There have been several predictions around Bitgert coin's price surge in the past few weeks. Some experts expect BRISE's value to increase by a massive 400%. But what are the possible reasons behind the expected surge? Let's find out. Bitgert and BRISE: An Overview Launched in 2021, Bitgert is a popular crypto engineering project specializing in centralized exchange and blockchain products. Bitgert aims to create a scalable and affordable environment for multiple projects such as DeFi, metaverse, web3, and more. BRISE is Bitgert's native token (BRC-20), which acts as a utility token and supports the in-house economy. The coin stands at 0.0000002009 on 11th April 2024 with a market cap of \$79.48 million and a 24-hour trading volume of \$1.93 million. Potential Factors Driving the Bitgert Coin's Surge One of the top reasons behind BRISE's expected surge is its relationship with Bitgert. - Massive Speed and Zero Gas Fee: Bitgert was launched as a layer-1 blockchain solution with zero gas fees and a massive speed of up to 100,000 transactions per second. This allows investors to run multiple transitions without any hiccups and fear of losing out on transaction costs. What's special about this is that giants like Injective and Solana can't offer such high speeds and low fees. Where Bitgert processes smooth transactions, Solana is facing bot attacks and congestion, probably because of the recent launch of multiple meme coins on its network. - Reliable Consensus Mechanism: Bitgert leverages PoA or Proof of Authority mechanisms for validating transactions. This mechanism is faster and more user-friendly than the Proof of Stake or any consensus mechanism. - Native Products: Bitgert comes with many native products, including a P2P exchange, a crypto exchange with zero-trading fees, payment gateways, and multiple tools to help developers build apps on the network. For every transaction on the chain, BRISE acts as the primary token. - Limited Token Supply: BRISE has a deflationary mechanism and a limited one quadrillion token supply. This means that whenever a transaction is executed on Bitgert's chain, 12% of the transaction value is removed from the supply. This helps reduce the number of BRISE in circulation and creates scarcity, which pumps up the value. Final Words While the Bitgert coin registered a fall of 5.48% in the last 7 days, its situation is expected to improve, especially considering the USPs it brings. Even predictions from CoinCodex expect BRISE's price to jump by 227.55% within 30 days. However, you should conduct your research before investing. - GBTC outflows may have stabilized following months of selling as per Grayscale CEO. - The ETF has had massive withdrawals of over \$15 billion in the last three months. According to the most recent edition of Reuter's Inside ETFs, the remarks made by Grayscale CEO Michael Sonnenshein about Bitcoin ETFs seem to have sent shockwaves across the cryptocurrency market throughout the world. On April 10, investor interest was piqued by Michael Sonnenshein's statement that Grayscale Bitcoin Trust (GBTC) outflows may have stabilized following months of selling. In the ever-evolving Bitcoin exchange-traded fund (ETF) industry, Grayscale has encountered formidable rivals since the launch of BTC ETFs after clearance by the U.S. SEC. Investors and traders are feeling positive after the CEO said that the outflows could be hitting a balance. This might mean that selling pressure is equalizing out purchasing interest in the market. Little Bit of Equilibrium Curiously, BitMEX Research reports that Grayscale Bitcoin Trust (GBTC) has had massive withdrawals of over \$15 billion in the last three months. Sonnenshein stated: "We do believe that the fund has started to reach a little bit of an equilibrium where some of those anticipated outflows, whether it was some of the bankruptcy selling or some investors perhaps undertaking switch trades, are largely behind us." The CEO of Grayscale made a comment that gave GBTC a little boost to the market, suggesting that the price may level out soon and that supply and demand are in balance as outflows come to a halt. Additionally, he said that certain withdrawals were linked to the bankruptcy settlements of FTX and other failed cryptocurrency startups. On the other hand, there were investors who sold GBTC in order to instantly purchase another Grayscale ETF. Highlighted Crypto News Today: Ripple (XRP) Poised for Bullish Wave, Analyst Predicts Surge Above \$4

- There has been a marked decline in social interactions and general retail interest. - There were two months in the last six months when Bitcoin-related postings were quite active. Retail investors are not yet "believing the hype," according to Joe Vezzani, CEO of LunarCrush, a social media analytic platform, even if the values of Bitcoin and other digital assets are soaring. According to Vezzani, there has been a marked decline in social interactions and general retail interest, as compared to the previous outstanding bull run. There were two months in the last six months when Bitcoin-related postings were quite active, January and March. One possible explanation for the January mentions is the excitement around the spot Bitcoin ETFs. Financial institutions were able to get their applications for spot Bitcoin exchange-traded funds (ETFs) authorized by the SEC on January 10th. A dramatic change in behavior in March, when Bitcoin hit a new all-time high, there was an influx of postings as well: the number of postings, however, stayed the same even after Bitcoin rallied to \$73,737 on March 14. The last six months have seen rather consistent social mentions of the Ethereum or ETH keywords. But the numbers reveal that these keywords have been declining since March 1st. The memecoin craze on the network is likely to blame for the several surges seen in Solana's token during the last six months. Regardless, mentions of Solana or SOL on social media decreased in early April. According to Vezzani, the crypto sector may be seeing a drop in social media engagement if we exclude spam and bots from the discussions. The CEO remains pessimistic about the prospect of a dramatic change in consumer behavior in response to impending big events, such as the Bitcoin halving. The halving is usually viewed as more of an insider event, according to Vezzani. Highlighted Crypto News Today: Ripple (XRP) Poised for Bullish Wave, Analyst Predicts Surge Above \$4

Web3 entrepreneurs are encouraged to apply for Permissionless Opportunities Event by Permissionless Capital, a web3 platform for startups. Through the initiative, qualified web3 companies will have access to the resources they need to develop their ideas and effectively launch their products. Outstanding web3 businesses may get the resources, capital, and connections they need from Permissionless Opportunities to successfully traverse the blockchain space and introduce their product. It takes just ninety seconds to apply for the Permissionless event, and there are no costs or pitches needed. It is anticipated that several entrepreneurs will submit applications for the first-ever Permissionless Opportunities Event, with the most deserving candidates being selected to participate in the initiative. Permissionless Opportunities, the biggest event of its type for web3, blockchain, and web3 entrepreneurs, gamifies the funding process and enables exceptional firms to reach their full potential. Partnerships with companies like Solana, Polygon, ImmutableX, Chainlink, Arweave, and many more have been arranged for the event. In addition to many more, the

event features collaborations with companies including Solana, Polygon, ImmutableX, Chainlink, and Arweave. Permissionless Opportunities was conceptualized as a game show, replete with audience interaction. Expert judges and popular vote will both be used to select the contest winners. The Permissionless Opportunities Event winners will have the chance to pitch to over 50 top venture capitalists and form partnerships with ecosystems that will help them develop their idea and provide technical assistance and coaching. Additional benefits include credits, discounts, one-on-one access to professional advisers, and widespread media attention to increase their credibility. The initiative covers both B2B and B2C applications and is aimed toward web3 entrepreneurs in the Defi, infrastructure, security, gaming, and RWAs sectors. From April 10 to May 1, applications may be registered with Permissionless Opportunities. In addition to providing the top candidates with all they need to maximize their chances of success, the program aims to shed light on the next generation of web3 firms.

Looking for the best cryptocurrency in the market has become quite tough today. There are more than 2.4M cryptocurrencies in the market owing to the \$2.6T market cap of the market. But one token has outshined every other cryptocurrency in the last few months. Bitgert™s BRISE coin has managed to give exponential returns to its investors in these past months. Bitgert™s BRISE coin™s rise in the market has made experts study the token and give an opinion on whether it is just the hype or the token is actually useful. Let™s understand what Bitgert™s BRISE coin is all about and whether it can still give you explosive returns in little time. Exploring the Growth of Bitgert The growth of Bitgert™s BRISE coin is mainly because of the expansion of the Bitgert network in the blockchain community. Bitgert was launched in late 2021 and was played as the major competition to Solana and Cardano. Bitgert works to offer solutions to the users that have accumulated over the years and held back the blockchain community from modernizing. Bitgert aims at giving modern solutions to all blockchain-related problems and therefore functions as a layer 1 open-source blockchain network. It provides a firm architecture to the users for managing and operating their blockchain projects. Bitgert makes use of a combination of POS and PoA consensus mechanisms to reduce the need for validation and computation while improving efficiency and speed. Bitgert offers a speed of 100K TPS to the users while other blockchains are still at less than half this speed. All these features are available for use at Bitgert with near-zero gas fee transactions. Owing to this, multiple projects have already switched to Bitgert, thus increasing the utility of the BRISE coin. With the rapid spread of this network, Bitgert™s BRISE coin is only bound to grow further. Market Analysis of Bitgert™s BRISE Coin Coming to the talk of the moment, what are the expectations from Bitgert™s BRISE coin? Well, experts suggest that the token still has to skyrocket further through the market. It is anticipated that the token will reach \$0.0001 by the end of the year while currently trading at \$0.0000002026. Bitgert™s BRISE coin was introduced to the market in 2024 only and since then, it has already risen by close to 40,000% in monetary terms. Even during the market correction of last month, the token added 70% to its price rise. The token follows a deflationary mechanism which burns some of the supply with each transaction. As the market trusts more on Bitgert™s network, the transaction fees are increasing and the supply is decreasing, this combination has helped position the price of the token. The KPIs like RSI and MACD value of the token have been sending strong buy signals to the market. The increasing trading volume and moving average of the token also point out a positive trading sentiment about Bitgert™s BRISE coin. Conclusion The token has upside potential in the market. Bitgert™s BRISE coin is looking at an explosive price rise shortly as well. The analysts state that it will achieve the price goal before the end of this year. This means that investing even \$100 into the token can turn to thousands of dollars. Currently, Bitgert™s BRISE coin is the golden basket, giving priceless returns to investors. To know more about Bitgert, Visit <https://bitgert.com> Buy Bitgert coin from the below exchanges now! - Buy on Kucoin æ” BRISE/USDT - Buy on Gate.io æ” BRISE/USDT - Buy on Pancakeswap - Buy on Uniswap Disclaimer: TheNewsCrypto does not endorse any content on this page. Crypto investors are diligently assessing their portfolios and seeking out assets with the potential for significant growth. While Polygon (MATIC) has enjoyed considerable success as a layer-2 scaling solution for Ethereum, there are concerns about its ability to keep up with the pace of innovation and competition in the upcoming bull run. Let us explore the factors that may hinder Polygon's performance in 2024 and identify two alternative cryptocurrencies that investors may consider over MATIC. By examining key metrics such as technology, adoption, community support, and market potential, we aim to provide insights into why these alternatives could offer compelling investment opportunities. Challenges Facing Polygon

(MATIC) in the 2024 Bull Run Scalability Issues: Despite Polygonâ€™s reputation as a layer-2 scaling solution for Ethereum, there are lingering concerns about its ability to address scalability challenges effectively. As the demand for decentralized applications (dApps) and decentralized finance (DeFi) continues to surge, Polygon may struggle to keep up with the growing transaction volumes and maintain optimal performance, potentially hindering its ability to attract new users and projects. Competition from Rival Solutions: The cryptocurrency market is increasingly crowded with competing layer-2 scaling solutions and blockchain platforms, posing a significant challenge for Polygon to differentiate itself and maintain its market share. Rival projects such as Optimism, Arbitrum, and Binance Smart Chain (BSC) offer alternative solutions to scalability and interoperability, potentially diverting attention and resources away from Polygon and limiting its growth potential in the 2024 bull run. Regulatory Uncertainty: Regulatory uncertainty surrounding cryptocurrencies and blockchain technology remains a persistent challenge for Polygon and the wider crypto market. As governments around the world continue to grapple with regulatory frameworks and compliance requirements, there is a risk that regulatory crackdowns or unfavorable regulations could impact Polygonâ€™s operations and adoption, dampening investor confidence and hindering its performance in the upcoming bull run. Alternative Cryptocurrencies to Consider Over MATIC Solana (SOL): Solana has emerged as a formidable competitor to Ethereum and Polygon, offering a high-performance blockchain protocol capable of processing thousands of transactions per second with low fees. With its innovative technology stack and growing ecosystem of projects and partnerships, Solana presents a compelling alternative to Polygon for investors seeking exposure to scalable decentralized applications and decentralized finance. Retik Finance (RETIK) Retik Finance, a pioneering decentralized finance (DeFi) ecosystem, redefines global transactions with innovative solutions. Offering Futuristic DeFi Debit Cards, Smart Crypto Payment Gateway, and AI-Powered Peer-to-Peer (P2P) Lending, it opens doors for newcomers in the expanding DeFi landscape. Backed by emphasis on security, reliability, and community engagement, Retik Finance attracts investors. With \$32 million secured and a Certik audit, its credibility is solidified. Strategic initiatives like a \$333,000 giveaway foster community participation and investor confidence. Looking ahead, key announcements will be communicated via official social media channels. Celebrating success, Retik Finance launches a \$5000 giveaway, inviting users to share content capturing their enthusiasm. Twenty-five winners will each receive \$200, showcasing appreciation for community support. Beta Launch of Retikâ€™s DeFi Crypto Cards Retik Finance is thrilled to announce the beta release of its cutting-edge Retik DeFi Crypto Cards, marking a monumental achievement for both the platform and its dedicated community of supporters. With deep appreciation for the unwavering commitment of Retikâ€™s backers, we are excited to share that our innovative crypto cards have exceeded expectations by being delivered a remarkable year ahead of schedule. This remarkable milestone underscores Retikâ€™s steadfast dedication to innovation and its overarching mission to reshape the future of finance in collaboration with our esteemed community members. As pioneers in the decentralized finance (DeFi) arena, the Retik team is enthusiastic to introduce Visa and Mastercard-compatible cards that seamlessly integrate with leading payment methods such as Binance Pay, Gate Pay, and Token Payment. The launch of Retik DeFi Crypto Cards signifies a significant advancement in providing users with unparalleled convenience and flexibility in crypto payments. Featuring a user-friendly interface meticulously designed for ease of use, these cards are poised to empower both individuals and businesses in effortlessly navigating the digital economy. While Polygon (MATIC) has established itself as a leading layer-2 scaling solution for Ethereum, there are challenges and uncertainties that may impact its performance in the 2024 bull run. Investors should carefully evaluate alternative cryptocurrencies such as Solana (SOL) and Retik Finance (RETIK), which offer innovative technology, strong adoption, and growth potential in the evolving cryptocurrency market. By diversifying their portfolios and considering alternative investment options, investors can position themselves to capitalize on opportunities and navigate the dynamic landscape of the 2024 bull run with confidence and conviction. About Retik Finance Retik Finance (RETIK) is a cutting-edge decentralized finance (DeFi) project revolutionizing global transactions with its innovative suite of financial solutions. Introducing futuristic DeFi Debit Cards, a Smart Crypto Payment Gateway, AI-powered Peer-to-Peer (P2P) lending, and a Multi-Chain Non-Custodial Highly Secured DeFi Wallet. - The integration is anticipated to benefit several apps and DeFi protocols. - This extension brings the total number of supported blockchains for USDC to sixteen. A leading name in stablecoin issuer, Circle, has announced that USD Coin (USDC) will now be compatible with zkSync, a zero-knowledge layer-2 solution built on Ethereum. Developers will be able to use USDC on a scalable and efficient platform thanks to this announcement, which took place on April 9, 2024. Moreover, by providing a solid basis for financial services like payments and trading, the integration is anticipated to benefit several apps and DeFi protocols. Strategic Expansion Furthermore, this extension brings the total number of supported blockchains for USDC to sixteen, including Ethereum, Arbitrum, Base, Solana, and many more. Also, businesses and developers alike will have access to a powerful tool for application development and expansion with Circle. This effort highlights Circleâ€™s dedication to increasing USDCâ€™s reach and usefulness on several blockchain platforms. By moving transaction processing away from the Ethereum core layer, zkSyncâ€™s solution uses zero-knowledge proofs and rollups to improve transaction speed and decrease costs. The integration with USDC is expected to bring about substantial user efficiency. Over 180 decentralized apps and 5.7 million unique active wallet addresses in the prior 30 days were part of the zkSync ecosystem, which provided developers and users with a robust and expanding platform, as of the announcement. Users can still buy USDC on zkSync using Circle for \$1 USD and trade it for other USDCs on other chains using cross-chain bridges. Moreover, users across the blockchain spectrum may be certain that this feature will facilitate smooth interoperability and liquidity. The fact that Circle Mint is available to institutional investors further expands the stablecoinâ€™s reach and demonstrates the platformâ€™s versatility. Highlighted Crypto News Today: Cardano Price Prediction: Analysts Forecast Two Bullish Scenarios for ADA

On the Solana blockchain, HUMP, a brand-new meme coin, saw a remarkable rise today. due to the fact that HUMP increased by 5300% in just 5 days. The meme coin became one of the things to look forward to after this startled the cryptocurrency community. Crypto investors are reminded of Shiba Inu (SHIB) by HUMPâ€™s brilliant action. Strong adoption activities and a vibrant community make SHIB a highly sought-after meme coin. Numerous individuals are curious as to whether HUMP will become the next Shiba Inu due to the stark and similar developments between HUMP and SHIB. Who knows? How Do Shiba Inus Grow? According to Shiba Inu, â€œthe power of communityâ€ powers it. By â€œworking together in harmony,â€ the Shiba Inu Ecosystem hopes to create a route to freedom and creativity. There are many tokens in the vast Shiba Inu ecosystem, including SHIB, BONE, and LEASH. In addition to creating a number of tokens that benefit the community and ecosystem, Shiba Inu has created its own metaverse, dubbed â€œSHIB The Metaverse,â€ and its own collection of NFTs, known as Shiboshis. As previously stated, SHIB is a primary token inside the ecosystem and serves as a catalyst for decentralisation. Furthermore, the ERC-20 tokensâ€™ value may rise due to SHIBâ€™s burn function, which is triggered by Metaverse transactions, games, and applications. The meme token known as Shiba Inu (SHIB) is sweeping the cryptocurrency world. Its community and other cryptocurrency users refer to it as the â€œDOGE COIN KILLER.â€ It was introduced as an ERC-20 token on the Ethereum network. The Shiba Inu ecosystem has expanded over time with the creation of coins, NFT collections, and even a metaverse. The burn feature of SHIB is another characteristic that draws traders and memecoin enthusiasts in. Shiba Inuâ€™s market capitalization is currently \$15.87 billion, with a live price of \$0.000027 per share (SHIB/USD). The amount traded in a day is \$688.67 million. Shiba Inu has a circulating supply of 589,289,41B and has increased by +1.67% during the past 24 hours. HUMP: The Next Shiba Inu? Due to the meme coinâ€™s lower transaction costs and greater adoption potential, HUMP, which is available on the Solana network, is able to draw interest from a wide range of stakeholders. This is HUMPâ€™s primary draw, enabling it to grow into a community of its own that aspires to govern this coin going forward. Hump represents the spirit of advancement in the field of decentralised finance (DeFi), drawing inspiration from the picture of a fuzzy companion. Hump, which was introduced with the goal of developing a meme coin with practical applications, has attracted a lot of interest from experts and investors. Its distinctive branding and open development plan have drawn a committed following of backers who see its long-term potential. Humpâ€™s tokenomics are the result of a methodically thought-out plan to optimise value for its owners. Hump creates a strong ecosystem of liquidity and demand by balancing accessibility and scarcity with a total quantity of 6,900,000,000 tokens. According to expert projections, HUMP might cause the price of the meme coin to climb by up to 1000 times, which helped it surge. Beyond the forecasts, thereâ€™s the reality that the coinâ€™s price shot up by 5,300% in the five days that began last week. This is consistent with the forecasts of other analysts who think this meme coin has the potential to exceed a number of other coins in terms of profitability. Aside from that, HUMP has a great chance to expand and compete with other significant meme currencies because it does not yet have a market capitalization. Many investors think that HUMP can carry on the success of Shiba Inu, which also saw a dramatic price increase and is currently ranked among the top 100 meme coins in the world because of its remarkable price movement. Todayâ€™s live Hump price is \$0.011116, with \$1,258,783 in trading activity over the course of a day. The market cap of this meme coin is \$84.1 million. HUMP gained +2.57% during the past 24 hours. Click here to Buy Hump Token (HUMP): - Website: <https://hump.io/> - Twitter: <https://x.com/Humptoken> - Telegram: <https://t.me/humptoken>

Victoria, Seychelles, April 9th, 2024, Chainwire Bitget, the worldâ€™s leading cryptocurrency exchange and Web3 company, is excited to unveil PoolX, a pioneering stake-to-mine platform, that according to the team allows users to stake specific coins to potentially earn popular tokens in a seamless manner. Starting off with the ChatAI project, PoolX features an AI-driven social and gaming platform on the Solana blockchain. The team states that each PoolX project will feature one or more mining pools, with potential token rewards distributed hourly based on participantsâ€™ staking volume. Hourly snapshots of staked amounts will be taken to ensure accurate calculations of usersâ€™ proportionate shares and rewards. Each mining pool on PoolX calculates its Annual Percentage Rate (APR) separately, providing users with diverse opportunities to maximize their potential token earnings. Furthermore, the team states that users enjoy the flexibility to redeem the staked tokens at any time, with staked assets automatically returning to their spot accounts after the mining period ends. The inaugural project on PoolX is ChatAI, a dynamic social and gaming platform powered by AI and based on the Solana blockchain. With a rapidly growing community spanning Japan, Taiwan, Hong Kong, Nigeria, Vietnam, and beyond, ChatAI has amassed over 5 million registered users. Among them, there are over 1 million active users per month and 500,000+ concurrent users daily across more than 170 countries. Gracy Chen, Managing Director of Bitget, states: â€œPoolX marks a significant advancement in our commitment to empowering users with innovative crypto solutions. With its user-centric design and robust features, PoolX will redefine the token farming experience, offering greater flexibility and profitability to our users.â€ For more information about Bitget PoolX and the ChatAI project, users can visit here. About Bitget Established in 2018, Bitget is the worldâ€™s leading cryptocurrency exchange and Web3 company. Serving over 25 million users in 100+ countries and regions, the Bitget exchange is committed to helping users trade smarter with its pioneering copy trading feature and other trading solutions. Formerly known as BitKeep, Bitget Wallet is a world-class multi-chain crypto wallet that offers an array of comprehensive Web3 solutions and features including wallet functionality, swap, NFT Marketplace, DApp browser, and more. Bitget inspires individuals to embrace crypto through collaborations with credible partners, including legendary Argentinian footballer Lionel Messi and official eSports events organizer PGL. The crypto world is unpredictable and recently a rumor has been spread that BEFE coin can turn pennies into pounds. So before you jump over letâ€™s dive deep and explore what Befe Coin is, leaving no stone unturned. Befe Coin is a utility token built on the Ethereum blockchain. BEFEâ€™s hype was already trending on X after its recent initiation of launching phase 5 on Solana Chain. On top of that team BEFE has officially announced that they are looking forward to getting listed on 2 more exchanges very soon. BEFE coin is already listed on 4 more exchanges. This has fueled the hype and is attracting more and more investors every day, making investors confident in its future ecosystem. With all these developments, BEFE has been able to perfectly maintain a strong market cap of \$45M. The \$1 Million Dream Given the current developments, people are expecting a lot from BEFE. Currently, BEFE is trading at \$0.00036, and if someone invests \$100 at this price, they will receive 0.03529 BEFE. Furthermore to grow this \$100 to \$1 million requires BEFEâ€™s price to grow to \$3.529. Since the total coin supply remains constant, we can set up a proportion to find the new market cap: (Current Market Cap) / (Current Price per Coin) = (New Market Cap) / (Target Price per Coin) (\$45M) / (\$0.00036) = (New Market Cap) / (\$3.529) New Market Cap â‰ˆ \$1277 If we consider the current market volatility into account along with BEFEâ€™s current hype, we can estimate several possible outcomes: Case 1 (Aggressive Growth): Months to reach target price = (Target Price â€“ Current Price) / Monthly Growth Rate Months to reach target price = (\$3.529 â€“ \$0.00036) / 0.01 (as per 352.57% highest daily growth recorded) Months to reach target price â‰ˆ 17 Months Case 2 (Moderate Growth): Months to reach target price = (\$3.529 â€“ \$0.00036) / 15 (1500% monthly growth expected) Months to reach target price â‰ˆ 23

Months Case 3. (Conservative Growth): Months to reach target price of (\$3,529.66, \$0.00036) - 12 (1200% monthly growth expected) Months to reach target price at 29 months conclusion Apart from the world of fiction and predictions, it's important to understand the real world scenario. It is important to remember that crypto is a highly volatile market, DYOR before jumping to any conclusions. To know more about BEFE, Visit <https://befetoken.com> Buy BEFE coin from the below exchanges now! - Buy on Gate.io [BEFE/USDT](#) - Buy on MEXC [BEFE/USDT](#) - Buy on Pancakeswap

Bitgert, a recently emerged Layer-1 blockchain, aims to outperform industry leaders like Solana, Cardano, and Tron with its remarkable speed and low transaction costs. Layer-1 blockchains are considered the future of the industry, and Bitgert's focus on interoperability and scalability puts it in a strong position within this evolving landscape. Its key features include zero gas fees and lightning-fast transaction speeds of 100K TPS, while some experts predict that it will make you a millionaire in the near future. expectation? So Let us dive deeper into the Bitgert coin's potential and see if the hype is justified. What Makes Bitgert Special? So, the question arises, what sets Bitgert apart from its competitors and the other players present in the market? Here are some unique sets of features offered by Bitgert that have contributed to its rising popularity. Proof of Authority (PoA): A fast consensus mechanism that sets it apart. Product Suite: Includes innovative offerings like a zero-trading fee exchange, P2P exchange, payment gateway, and developer tools. Startup Studio: Supports new project funding, enriching the ecosystem. Partnerships: Collaborations with Chainlist, Forward, Omniachain, and Dextools boost credibility. Community: A large, active community of over 800K members contributes to its success in more ways than one. Bitgert Tokenomics Bitgert's BRISE token is engineered for growth. Its limited supply of 1 quadrillion tokens safeguards value and prevents dilution. A solid 12% transaction burn mechanism actively reduces token supply which is essentially designed to drive price appreciation. This is not it as BRISE holders further benefit from staking rewards, earning passive income. In addition to it, the highly anticipated Binance listing could also dramatically increase exposure and adoption, further boosting price growth. Bitgert's performance speaks for itself. Even during recent market corrections, BRISE achieved a remarkable 76% monthly gain. Since launch, the staggering 40,000% ROI demonstrates the coin's immense potential. Experts predict another 10,000% surge in 2024, highlighting Bitgert's position as a compelling investment opportunity that can possibly make you a millionaire. Conclusion While a 10,000% increase in Bitgert's value might seem ambitious, the project's fundamentals and market conditions create a compelling argument for its potential. With this in mind, many experts consider Bitgert one of the best altcoin investments right now. While the number might have sounded too good to be true at first, we covered some of its recent feats in the past to come to the conclusion that Bitgert providing massive returns to its investors is very much possible. To know more about Bitgert, Visit <https://bitgert.com> Buy Bitgert coin from the below exchanges now! Buy on Kucoin [BRISE/USDT](#) Buy on Gate.io [BRISE/USDT](#) Buy on Pancakeswap Buy on Uniswap

The cryptocurrency market has witnessed extraordinary growth, with meme coins like Dogecoin leading the charge in creating millionaires seemingly overnight. However, investors are now on the lookout for the next crypto gems with the potential to replicate or even surpass such astonishing gains. Among the myriad of tokens vying for attention, three stand out as potential contenders set to recreate the monumental 100x surge witnessed by Dogecoin. Pepe Coin (PEPE), Bonk (BONK), and Retik Finance (RETIK) are making waves in the crypto sphere, each with its unique value proposition and promising trajectory. Pepe Coin (PEPE): A Tribute to Meme Culture Pepe Coin, an Ethereum-based deflationary meme coin, pays homage to the ubiquitous Pepe the Frog internet meme. Leveraging the popularity of meme coins like DOGE and SHIB, Pepe Coin has rapidly ascended the ranks to establish itself as a formidable player in the meme coin arena. Since its inception, Pepe Coin has garnered substantial ownership, catapulting its popularity and reputation within the crypto community. The token's performance speaks volumes about its potential for exponential growth. Within the past month alone, Pepe Coin has surged by a staggering 757%, underscoring the fervent investor interest and market demand for this meme-inspired cryptocurrency. Moreover, in a year-to-date metric, Pepe Coin has witnessed an astonishing appreciation of 15,033%, firmly solidifying its position as one of the hottest assets in the market. With a daily trading volume averaging around \$1.5 billion and a new all-time high firmly established, Pepe Coin is poised for a breakout year in 2024. Investors eyeing the next 100x opportunity have Pepe Coin on their radar, anticipating a trajectory akin to the monumental pump that propelled Dogecoin to stratospheric heights in 2021. Bonk (BONK): Ascending the Solana Memecoin Ranks Bonk (BONK) emerges as a prominent player in the realm of Solana memecoins, boasting a robust market capitalization and formidable bullish potential. With its astronomical growth and consistent market inflows, Bonk has captured the attention of investors seeking the next big opportunity in the crypto space. The token's performance metrics are nothing short of impressive. Over the past year, Bonk has witnessed a remarkable surge of 3,160.51%, accompanied by an 89.05% increase in the last 30 days alone. Despite minor fluctuations, with a total market capitalization of \$1.43 billion, Bonk remains a force to be reckoned with in the meme coin landscape. As investors speculate on BONK potential to replicate the monumental gains of Dogecoin, the token is poised to recreate the 100x pump that catalyzed millionaires in 2021. With its strong fundamentals and burgeoning market presence, Bonk represents a compelling investment opportunity for those seeking exponential returns in the crypto market. Retik Finance (RETIK): A Newcomer with Promising Prospects Despite its recent entry into the cryptocurrency sphere, Retik Finance has swiftly garnered attention for its exceptional performance and promising outlook. As a newcomer on the scene, RETIK has delivered staggering returns to investors, indicative of robust confidence and growing interest in the project's potential. In 2024 alone, Retik Finance (RETIK) has offered investors a remarkable gain of over 4x, highlighting its rapid ascent and bullish trajectory. The anticipation surrounding the token's exchange debut further fuels investor enthusiasm, with RETIK poised for a parabolic trajectory in the coming months. The heightened anticipation surrounding Retik Finance (RETIK) underscores its position as a compelling contender in the ever-evolving crypto landscape. With both seasoned investors and newcomers alike eyeing its potential, RETIK stands poised to replicate the monumental gains witnessed by Dogecoin in 2021. As the next bull run era looms on the horizon, Retik Finance offers investors the opportunity for substantial returns amidst the evolving dynamics of the digital asset market. Conclusion: Navigating the Crypto Landscape in the Fast-Paced World of Cryptocurrency Investing, identifying the next 100x opportunity requires diligence, foresight, and a willingness to embrace innovation. Pepe Coin, Bonk, and Retik Finance emerge as frontrunners in this quest, each presenting a unique value proposition and promising trajectory. With their exponential growth potential and strong market fundamentals, these three tokens are poised to recreate the monumental pump that catapulted Dogecoin to fame in 2021. As investors navigate the crypto landscape in search of the next big opportunity, Pepe Coin, Bonk, and Retik Finance stand out as compelling candidates, offering the potential for substantial returns in the ever-evolving world of digital assets. Visit the links below for more information about Retik Finance (RETIK): - Website: <https://retik.com> - Whitepaper: <https://retik.com/retik-whitepaper.pdf> - Twitter: [www.twitter.com/retikfinance](https://twitter.com/retikfinance) - Telegram: [www.t.me/retikfinance](https://t.me/retikfinance)

In the volatile world of cryptocurrency, market movements are often shrouded in mystery, leaving investors speculating on the motives behind significant transactions. Recently, analysts have observed a peculiar trend involving the dumping of two prominent cryptocurrencies, Ripple (XRP) and Cardano (ADA), by large holders known as "whales." What's intriguing is that these whales seem to be redirecting their capital towards a lesser-known, small-cap token named HUMP. In this article, we delve into the motivations behind these whale movements and explore the potential implications for the cryptocurrency market. Understanding Whale Activity in Cryptocurrency Before delving into the specifics of the recent whale movements, it's crucial to understand the concept of whales in the cryptocurrency space. Whales are individuals or entities that hold substantial amounts of a particular cryptocurrency. Due to their significant holdings, their trading activities can influence market prices, leading to sizable fluctuations in value. Whales often execute strategic moves to capitalize on market trends, leveraging their large holdings to buy or sell assets in a manner that maximizes their returns. Their actions are closely monitored by analysts and investors, as they can provide valuable insights into market sentiment and potential price movements. The Ripple (XRP) Dumping Phenomenon One of the cryptocurrencies that have recently attracted attention due to whale activity is Ripple (XRP). Despite being one of the top cryptocurrencies by market capitalization, XRP has experienced a prolonged period of underperformance, exacerbated by ongoing legal battles with the U.S. Securities and Exchange Commission (SEC). Whales holding significant amounts of XRP have been observed dumping their holdings, leading to downward pressure on the token's price. This selling pressure has been fueled by uncertainty surrounding the outcome of the SEC lawsuit and concerns about the long-term viability of the project. The Cardano (ADA) Sell-off Similar to XRP, Cardano (ADA) has also faced challenges in maintaining its price momentum. Despite being touted as a promising blockchain platform with a focus on scalability and sustainability, ADA has struggled to regain its footing following a period of market-wide volatility. Whales holding large quantities of ADA have been observed selling off their holdings, contributing to a decline in the token's price. The sell-off has been exacerbated by concerns about the project's ability to deliver on its ambitious roadmap and compete with other blockchain platforms. The Rise of \$HUMP: A Small-Cap Token with Big Potential Amidst the turbulence surrounding XRP and ADA, a small-cap token named \$HUMP has captured the attention of investors and analysts alike seeking innovative alternatives to traditional cryptocurrencies. Launched on the Solana network, \$HUMP distinguishes itself from traditional meme coins with its innovative approach and emphasis on community involvement and governance. Unlike many meme coins burdened by transaction taxes, \$HUMP eliminates these fees, providing users with a hassle-free experience. Moreover, its development team prioritizes community engagement, fostering a decentralized ecosystem with real-world utility. With a market capitalization of around \$81 million and a daily trading volume exceeding \$2.7 million, \$HUMP boasts strong fundamentals and robust engagement. Its meteoric rise in value, coupled with endorsements from prominent crypto publications such as Coinpedia, Bitcoinist, and Yahoo Finance, positions \$HUMP as a formidable contender in the crypto space. The \$HUMP Phenomenon: Why Whales Are Flocking to It The allure of \$HUMP lies in its disruptive potential and community-driven ethos. Whales, disillusioned with the stagnation of XRP and ADA, view \$HUMP as a viable investment opportunity with significant upside potential. The absence of transaction taxes and the emphasis on community governance make \$HUMP an attractive proposition for whales seeking to diversify their portfolios. Moreover, the recent 5000% surge in value, driven by institutional interest and strong market fundamentals, underscores its growing prominence within the crypto landscape. As whales continue to pivot towards promising small-cap tokens like \$HUMP, the stage is set for further growth and adoption in the months to come. Conclusion The recent whale activity involving the dumping of Ripple (XRP) and Cardano (ADA) in favor of \$HUMP has captured the attention of analysts and investors alike. While the motivations behind these strategic moves may vary, they underscore the fluid nature of the cryptocurrency market and the opportunities it presents for astute investors. As \$HUMP continues to gain traction and attract capital from whales and retail investors alike, its rise serves as a testament to the transformative potential of blockchain technology. Whether \$HUMP will maintain its momentum and emerge as a dominant player in the meme coin market remains to be seen, but one thing is certain: the era of whale-driven market movements is far from over. - A excitement in the ecosystem coincides with Cronje's discussion regarding memecoin. - The aim is to allow the Fantom community to easily create, promote, and nurture memecoins. Andre Cronje, founder and primary developer of the Fantom protocol, said in an X post that a highly scalable blockchain network would soon include memecoins. Cronje acknowledged that the cryptocurrency project has been diligently looking into memecoins. The goal of this step is to lay down the groundwork for a framework that the Fantom community can use to easily create, promote, and nurture memecoins. Expectedly, one X user sought to learn more about Fantom memecoin. Banking on Memecoins Frenzy In answer to a user's question, Cronje made it clear that none of the cryptocurrency initiatives mentioned by the user are memecoins. A continuous excitement in the ecosystem coincides with the Fantom developer's discussion regarding memecoin. Memecoins on other blockchains have been quite successful recently, and that's mostly due to the meteoric rise in value seen by a small number of these cryptocurrencies. If Fantom decides to embrace memecoins in the near future, it may potentially join these successful platforms. On the other hand, in light of the recent transaction failures, Cronje has voiced his support for the Solana network. As far as decentralized finance (DeFi) is concerned, Cronje is right up there with the biggest names in the industry. Cronje writes in an X post that while some see the persistent congestion as a defect in Solana, it is really the result of the ecosystem's fast expansion, which has raised the need for block space. Problems with performance, according to Cronje, are technological difficulties, not defects in the consensus method. The Solana network, according to Cronje, became a victim of its own success. Users of Solana have recently gone ballistic on social media, expressing their dissatisfaction with the service and the increased number of unsuccessful transactions. Highlighted Crypto News Today: Investors Await Upcoming U.S Economic Data as High Volatility Expected

The Godlenfish, the latest sensation in the meme token, arrives with an agenda to reshape the industry in ways not seen before. Also referred to as the \$GODLEN, is a meme focused on bringing luck and good vibes. Godlenfish is more than just an aquarium dweller, it's the golden ruler of memes

positioned to lead the digital ocean and make its hodlers lucky. Godlenfish coin is set to be launched on the Solana blockchain, with speed, scalability, and security, even as it bears all the amazing features of a meme coin. Godlenfish will, among other things, enable its hodlers to realize their unfulfilled dreams, navigate the chaos of meme coins, and create immeasurable wealth. The Success Stories: WIF, BOME, and BONK In the wake of the Dogecoin success, numerous meme coins emerged, each with its own unique branding and value proposition. Among these, WIF, BOME, and BONK have emerged as standout performers, capturing the imagination of investors and enthusiasts alike. WIF: With its whimsical branding and vibrant community, WIF quickly gained traction in the meme coin space. Leveraging the power of social media and celebrity endorsements, WIF experienced exponential growth, rewarding early investors with substantial returns. BOME: Building upon the success of WIF, BOME introduced innovative features and use cases, distinguishing itself in a crowded market. Its Solana-inspired design and emphasis on community engagement propelled BOME to new heights, with its price surging as investors flocked to capitalize on its potential. BONK: As a Solana-based meme coin, BONK capitalized on the growing popularity of the Solana ecosystem. With its unique features and vibrant community, BONK demonstrated steady growth and stability, cementing its position as a top contender in the meme coin landscape. Memes with Meaning Beyond the laughter, Godlen Fish memes carry a deeper narrative, weaving together humor and mythology to drive the community towards a shared goal æ“ skyrocketing gains. With a perfect blend of wit and wisdom, these memes are more than just entertainment; they are a rallying cry for believers in the Godlen vision. The Buildup For 1000x Potential Having completed its successful airdrop within 24 hours, Godlen Fish has a massive following amassed across the board, as it is riding the wave of community enthusiasm straight to the top. As a community-driven project, Godlen Fish allocates a significant portion (40%) of tokens to its presale participants, ensuring that everyone has a chance to ride the tide of success. The rest tokens are used for marketing and liquidity purposes which boosts project transparency. With all this consideration, and the amount of time, energy, and work put in by the giant heads at Godlenfish, the projection shows crazy numbers at 1000x, within a few days of its arrival. \$GODLEN much like its name, is looking at crossing never-seen benchmarks, and this as an investor is like water to fish. Godlenfish Token Presale: An Opportunity To Upgrade Your Financial Status The Godlenfish presale commences on April 9, 2024, offering investors a chance to add luck to their investments and improve their financial fortunes. Identifying assets with substantial potential is crucial for investors seeking to diversify their portfolios and capitalize on emerging trends in the crypto sector. While the crypto market is filled with a plethora of options, three coins stand out for their innovative features, strong fundamentals, and promising outlook for the future. Let's look into each of these top contenders: Retik Finance (RETIK), Binance (BNB), and Solana (Sol). Retik Finance (RETIK): Rising Star in DeFi Landscape Retik Finance (RETIK) emerges as a pioneer in the decentralized finance (DeFi) space, offering a comprehensive suite of innovative solutions aimed at redefining global transactions. With its futuristic DeFi debit cards, smart crypto payment gateway, AI-powered peer-to-peer lending, and multi-chain non-custodial DeFi wallet, Retik Finance addresses key pain points in traditional finance while prioritizing user privacy, security, and convenience. One of Retik Finance (RETIK) standout features is its early utility launch of DeFi debit cards, providing users with anonymous transactions without the need for KYC procedures. This further drives adoption and demand for RETIK. With a presale that raised \$32,050,000 and a listing price of \$0.15, Retik Finance boasts a rapidly growing market capitalization, positioning it as a significant player in the DeFi landscape. Moreover, the successful conclusion of the presale, months ahead of schedule, and the subsequent 400% increase in RETIK price spotlights the project's strong community support and investor confidence. As Retik Finance continues to expand its ecosystem and enhance its offerings, you will have a compelling opportunity to gain exposure to the booming DeFi sector. Binance Coin (BNB): Largest Crypto Exchange Coin Binance Coin often hailed as the largest æ“ crypto exchange coin, æ“ has established itself as a dominant force in the cryptocurrency market. With high market capitalization, trading volume, and liquidity, BNB stands out for its versatility and utility within the Binance ecosystem. From powering transactions on the Binance Smart Chain to offering bonuses for Binance CEX users, BNB continues to adapt and introduce new use cases, driving adoption and demand for the token. Despite concerns surrounding centralization and security risks associated with the Binance ecosystem, BNB's performance remains robust, with recent price surges signalling bullish momentum. BNB's consistently high trading volumes exceeded \$41.7 billion on Binance earlier in March. This solidifies its position as a preferred choice for traders and investors. Despite regulatory challenges, Binance Exchange continues to expand its market share, with BNB's trading volume increasing for the fifth consecutive month, reaching over 40% of the total market volume. Also, BNB's recent price rally saw it surge from \$500 to an intra-day high of \$539 within a short period, showcasing its resilience and bullish momentum in the face of market fluctuations. As Binance Exchange maintains its market share and BNB Smart Chain sees increased activity, owning a BNB coin will allow you to benefit from the platform's growing ecosystem and utility. Solana (SOL): High Scalability and Efficiency Solana distinguishes itself as a high-speed and high-volume blockchain network designed for scalability and efficiency. With its superior transaction throughput and low latency, Solana offers a compelling solution for applications requiring fast and frequent transactions. Despite recent challenges related to centralization and technical issues, Solana has experienced rapid adoption and growth, increasing by 54% in 2024, indicating growing user interaction and adoption of the platform. SOL's technical analysis reveals strong support levels and bullish patterns, with key resistance levels at \$550 and \$600, paving the way for a potential rally towards its all-time high of \$690. The recent price surges and bullish predictions for Solana reflect growing investor confidence in the project's potential. This project presents a promising opportunity if you seek exposure to innovative and profitable blockchain solutions. Strengthen Your Crypto Portfolio Retik Finance, Binance Coin, and Solana emerge as top contenders in the crypto market, each offering unique features and opportunities for investors. Among these three, Retik Finance, being a DeFi solution, offers the needed security instead of other centralized projects in our list. The early introduction of debit cards makes Retik Finance more appealing and user-centric. Also, RETIK price poses a big bargain, an easy way to multiply your bucks with a high ROI in 2024. Finally, as you evaluate your portfolio, consider these three coins for potential inclusion, which can provide exposure to diverse sectors of the crypto market and capitalize on emerging trends. However, you should conduct thorough research and assess your risk tolerance before making investment decisions in the volatile crypto space. Visit the links below for more information about Retik Finance (RETIK): - Website: <https://retik.com> - Whitepaper: <https://retik.com/retik-whitepaper.pdf> - Twitter: [www.twitter.com/retikfinance](https://twitter.com/retikfinance) - Telegram: [www.t.me/retikfinance](https://t.me/retikfinance)

- Ethereum L2s record new highs in terms of transactions per second. - Gas fees on Ethereum L2s are slashed by 99% after the Dencun Upgrade. - Anticipation mounts over the ETH's classification and the pending SEC's verdict on spot Ethereum ETFs. The sentiment surrounding Ethereum and Ether (ETH) is now a mix of optimism and criticism. Metrics displayed by the largest smart contract-led ecosystem's layer-2s (L2s) reflect a bullish outlook, while certain circumstances provoke fear, uncertainty, and doubt (FUD). Especially the question: Will ETH lose its value accrual amid the L2 fragmentation? Let's take a closer look at the L2 ecosystem and gradually figure out what's the real concern about Ethereum. Gas Fees on L2s Slashed by 99% with the Dencun Upgrade on March 13, Ethereum onboarded blobs (Binary Large Objects) via the implementation of EIP-4844. Blobs optimized the data availability and reduced the transaction costs across the L2s. Soon after the implementation, chains such as OP Mainnet (Optimism), Base, Arbitrum, Zora, and zkSync displayed notable reductions in the gas fees for different transactions æ“ swap, transfers, and the like. The above data from GasFees.io reveals that transferring ETH on Base averages \$0.0011, with token swaps costing \$0.0049. On Arbitrum, fees stand at \$0.0085 and \$0.0021 respectively, while Zora's fees are \$0.0058 and \$0.0026 and OP Mainnet's fees are \$0.0046 and \$0.0508. L2s Rise to All-Time High This paired with the viral Memecoin trading season fueled the activity of these ETH L2s to highs. The transaction count of multiple solutions marked respective all-time highs (ATH). Remarkably, Consensys's ETH L2 zkEVM rollout Linea spiked by 678% and Coinbase's Base by 605% over the past month, as per perthebie.xyz data. To highlight, asset manager VanEck predicts Ethereum L2s will attain a trillion-dollar valuation by the end of 2030. FUDs and Criticisms Aimed At Ethereum Ethereum finds itself in the crosshairs of criticism and mockery. OG Trader Peter Brandt cited flaws in its functionality and labeled ETH a æ“ junk coin. æ“ On the other hand, the famous Solana community super team DAO aired a promotional video on Wednesday, criticizing Ethereum. This video mocked ETH maximalists and devs, labeling them as sufferers of Ethmaximymysis (aka æ“ ETHMAXIÆ“). It advised ETH developers to migrate and build on Solana via Wormhole, despite its flaws. Next up is the concern of ETH losing its value accrual over the rising æ“ L2 fragmentation. æ“ Emphasizing this concern, pseudonymous crypto whale æ“@0xSisyphusæ“ compared it with the scenario of ATOM, the native token of interoperable Cosmos chains and DOT, the token of parachain-focused Polkadot. Per contra, popular ETH educator advocates for the rise of a modular Ethereum era built with ETH powering it up. Amid this scenario, Ether (ETH) resumes hovering within the \$3.2K range. At the time of writing, it traded at \$3,269 after recording a 2.4% drop in the last 24 hours. Notably, according to Into The Block, in Q1 2023, nearly \$4 billion worth of ETH was withdrawn from various crypto exchanges. Holder accumulation in this data hints at a bullish outlook. Meanwhile, expectations soar as discussions continue on ETH's classification and the awaited SEC decision on spot Ethereum ETFs.

In the ever-evolving landscape of cryptocurrency, meme coins have carved out their niche, capturing the attention of investors and traders with their whimsical names and viral appeal. Among the plethora of meme coins flooding the market, three stand out this week, poised to break their all-time highs this week: Cat in a Dogs World (MEW), Dogwifhat (WIF), and Hump (HUMP). These coins, each with their unique narratives and community backing, are primed for significant price movements, catching the eyes of both seasoned investors and newcomers alike. Hump (\$HUMP): Ride the Wave of Innovation with Hump Hump (HUMP) has swiftly emerged as a standout in the vibrant world of Solana meme coins, captivating the attention of crypto enthusiasts worldwide with its remarkable ascent since its inception. In a mere 24 hours post-launch, HUMP experienced an unprecedented surge of 2595.57%, catapulting from its initial lows to a staggering high of \$0.007260. This meteoric rise not only reflects the explosive potential of HUMP but also underscores the fervent interest it has garnered within the crypto community. With its current market capitalization soaring to \$42.20 million and a notable surge in trading volume, HUMP has solidified its position as a formidable player in the meme coin arena. However, what sets HUMP apart from its peers is its ability to transcend the superficial realm of meme coins, embodying a deeper ethos of innovation and community empowerment. With a total token supply of 6,900,000,000, HUMP represents more than just a digital asset; it symbolizes a movement towards a decentralized financial ecosystem driven by collective participation and shared ideals. As influential stakeholders such as Solana and Shiba Inu whales redirect their investment towards HUMP, the meme coin stands on the precipice of breaking its all-time high this week, marking a pivotal moment in its journey. With its compelling narrative and unwavering community support, HUMP is poised to redefine the Solana meme coin landscape, ushering in a new era of progress and expansion. Cat in a Dogs World (\$MEW): Pounce into Profits with Cat in a Dogs World \$MEW, the quirky meme coin with its feline-inspired moniker, has been making waves in the crypto market recently. The surge in its price has not gone unnoticed, signalling a growing interest among investors and traders. This spike in interest comes at a time when Solana whales are shifting their focus towards MEW, indicating a changing preference within the meme coin sector. MEW's price surge reflects not only growing confidence in the meme coin market but also a shift in investment strategies among Solana whales. As of the latest update, MEW has witnessed an impressive 213.42% increase in price over the past 7 days, hinting at its trajectory to break its all-time high of \$0.01034 this week. Currently trading at \$0.005543, MEW presents an enticing opportunity for investors looking to capitalize on its upward momentum. Dogwifhat (\$WIF): Join the Knitted Revolution with Dogwifhat Another meme coin commanding attention is Dogwifhat (\$WIF), which has emerged as one of the top altcoins in the market. With its explosive growth this year, WIF has become a frontrunner in the Solana meme coin arena, overtaking rivals like Bonk (BONK). Despite lacking real-world applications, WIF compensates with its strong memetic appeal, featuring a Shiba Inu adorned with a knitted hat. Trading in sync with the broader crypto market, WIF solidifies its position as a leading meme coin, distinguished by its sustained bullish run and long-term potential. Currently trading at \$4.45, WIF sits 8.07% below its all-time high. However, with increasing liquidity and a bullish outlook, WIF is poised to set a new all-time high this week, presenting an attractive opportunity for investors seeking significant gains. In conclusion, \$MEW, \$WIF, and \$HUMP represent three hot meme coins ready to break their all-time highs this week. With their distinctive narratives, strong community backing, and promising price trajectories, these meme coins present compelling investment opportunities for those looking to capitalize on the volatility and excitement of the crypto market. As always, investors should conduct thorough research and exercise caution when trading meme coins, but for those willing to take the plunge, the potential rewards may be well worth it.

The launch of \$HUMP sent shockwaves through the memecoin market, with its price skyrocketing over 20x from its initial price. This explosive growth is a serious contender to dethrone \$WIF and \$SLERF as the top SOL meme coin. The Rise of Solana Solana once again has reignited its potential by becoming the breeding ground for a wave of popular memes coins, including \$HUMP, \$SLERF, and \$WIF. This surge in memecoin activity highlights Solana's efficient transaction mechanism, a key advantage over its competitors. As a result, Solana is solidifying its position as a leader within the crypto market.

Memecoin Frenzy This year, we're seeing a wave of new memecoins emerge, many experiencing explosive price increases. However, unlike the fleeting trends of the past, these offer a new distinct advantage: a real use case. This shift suggests memecoins are maturing beyond mere internet jokes. \$HUMP: Revolutionizing Memecoins \$HUMP, the newest meme coin on the Solana ecosystem, stands out with its innovative approach. Unlike traditional meme coins, they prioritize user experience by eliminating transaction taxes entirely. This fee-free trading environment offers a significant advantage for both buyers and sellers. \$HUMP also embraces decentralization through robust community governance features. This empowers the whole community to actively participate in shaping the project's future, fostering a truly collaborative and user-driven ecosystem. By prioritizing utility and community involvement, Hump seeks to redefine the standards for memecoins within the market. Their development team is committed to moving beyond the realm of mere internet jokes. By integrating real use cases and fostering a strong community, Hump aspires to become a valuable player in the industry. This innovative approach has the potential to reshape public perception of memecoins, demonstrating their potential to offer utility and contribute meaningfully. Surpassing \$SLERF and \$WIF Since its launch, \$HUMP has taken the crypto market by storm, experiencing a phenomenal 20x price increase. This surge has propelled it to become the next top SOL meme coin, surpassing rivals like \$SLERF and \$WIF.

As of this writing, \$HUMP market capitalization has exceeded \$30 million with a daily trading volume reaching \$4 million. \$HUMP: Exploring its Growth Potential Following a highly successful launch on the Solana network, \$HUMP has quickly captured the attention of the crypto market. The coin has experienced a phenomenal surge, with its price skyrocketing by an impressive 20x since its debut. This explosive growth has propelled \$HUMP to become the next top SOL meme coin or even surpassing \$SLERF and \$WIF. Fueled by this momentum, analysts are predicting even greater things for \$HUMP. Some projections suggest the token could experience a staggering 100x price increase in the future. This bullish outlook stems from the unique innovations embedded within the Hump ecosystem, which offer substantial utility beyond mere speculation. \$HUMP also has a thriving community with over 11,500 followers on X and Telegram group exceeding 11,600 members, Hump boasts a dedicated user base that actively participates in the project's growth. This strong community engagement is a positive indicator of the project's long-term success.

Buying \$HUMP: A Step-by-Step Guide \$HUMP leverages the Solana blockchain for its operations. There are a total of 6.9 billion tokens available, and here is its official contract address: [CU5EVHGFir2WwioFD7LrowYy6UbxY2HfApUzTsiB](https://solscan.io/address/CU5EVHGFir2WwioFD7LrowYy6UbxY2HfApUzTsiB). Here's a quick guide on how to buy some \$HUMP tokens: Get a wallet: Download the free Phantom app (or another compatible wallet) from the app store/Google Play Store (mobile) or install the Chrome extension (desktop) from Phantom.app Head to a DEX (Decentralized Exchange): Open Dextools, Raydium.io, or Jupiter in your browser (Chrome is recommended for Phantom users). Connect your wallet: Connect your Phantom wallet to the chosen DEX platform. Then, copy and paste the HUMP token address into the swap interface on Raydium or Jupiter. Swap SOL for HUMP: Choose SOL as your swap currency and enter the amount of HUMP you want to buy. Since there are no buy/sell taxes, you don't need to worry about slippage for most transactions. However, during periods of high volatility, you might need to adjust the slippage settings. Confirm and sign: Confirm the swap details and sign the transaction with your Phantom wallet when prompted. The crypto markets are trending upwards in 2024, with Bitcoin currently trading around \$65,000 with a total market capitalization surpassing \$1.2 trillion. The global market cap hovers just above \$2.6 trillion. Despite this remarkable growth, analysts warn that the "real" bull run is yet to start and that we are still in the early stages of what could be the biggest market surge in history. Three cryptocurrencies, in particular, are garnering immense attention and presenting compelling opportunities for substantial gains: Retik Finance (RETIK), Solana (SOL), and Ethereum (ETH).

Retik Finance: Revolutionary DeFi Platform Redefining Finance At the vanguard of this bullish momentum is Retik Finance (RETIK), a groundbreaking decentralized finance (DeFi) project propelling the future of global transactions. This dynamic platform has captured the attention of investors worldwide by introducing virtual DeFi debit cards, a seamless crypto payment gateway, an AI-powered peer-to-peer lending solution, and an ultra-secure multi-chain non-custodial wallet. Retik Finance's virtual DeFi debit cards, already available in beta a year ahead of schedule, empower users to spend cryptocurrencies effortlessly, blurring the lines between digital and traditional finance. The project's disruptive Retik Pay system facilitates borderless transactions while the Retik wallet offers unparalleled security for asset management across multiple blockchains. Furthermore, Retik Finance's AI-driven lending platform revolutionizes the borrowing landscape, leveraging advanced algorithms to enhance accessibility and affordability. With listings on CoinGecko and CoinMarketCap, successful Certik audits, and a recent presale raising over \$32 million, Retik Finance is primed to disrupt traditional finance forever.

Solana: Scalable Blockchain Gaining Meteoric Traction Solana (SOL), the high-performance blockchain solution, continues its ascent as a leading contender in the crypto arena. Boasting lightning-fast transaction speeds, minimal fees, and unparalleled scalability, Solana has become a hotbed for innovative decentralized applications (dApps) and projects, including the wildly popular meme coin Dogwifhat (WIF). Solana's total value locked (TVL) has skyrocketed by 97% in the past 30 days, now exceeding \$4 billion and solidifying its position as a DeFi powerhouse. With a market capitalization of \$77 billion, Solana occupies the fifth spot among cryptocurrencies, reflecting its growing significance and investor confidence.

Ethereum: Pioneering Smart Contract Platform Evolving As the second-largest cryptocurrency by market capitalization, Ethereum continues to entrench itself as the preeminent platform for building and deploying decentralized applications. Following the successful Dencun upgrade, Ethereum developers are setting their sights on the highly anticipated Electra update. This forthcoming enhancement promises to increase the network's data capacity through innovative "blob" technology, bolstering scalability and performance. Moreover, Ethereum's commitment to improving accessibility is evident through its focus on light client development, enabling more users to interact with the network without relying on third-party services or extensive hardware requirements.

Retik Finance Celebrates Presale Success with a \$5,000 Giveaway In an exciting announcement, Retik Finance is commemorating the overwhelming success of its presale by launching a \$5,000 giveaway. The innovative DeFi platform invites its vibrant community to showcase their creativity by submitting unique photos, videos, or memes celebrating the triumph of the presale. Twenty-five fortunate winners will be selected, each receiving a remarkable \$200 cash prize. Amid this celebration, Retik Finance is gearing up for its exchange debut, targeting at least two top-tier exchanges, with announcements expected soon on their social media channels.

Conclusion: Seizing Opportunities in the Crypto Renaissance The crypto markets are experiencing the early stages of a massive bull run, with Retik Finance, Solana, and Ethereum leading the charge toward a year of gains. As investors seek to capitalize on the burgeoning 2024 bull run, these three cryptocurrencies present compelling opportunities for substantial gains. Retik Finance's groundbreaking DeFi solutions, including its virtual debit cards, payment gateway, and AI-powered lending platform, position it as a game-changer in the financial sector. Solana's unparalleled scalability and thriving ecosystem continue to attract developers and users alike. Ethereum's pivotal role as the backbone of decentralized applications and its upcoming upgrades solidify its status as a pillar of the crypto industry. BEFE coin is one of the most popular meme coins within the cryptocurrency domain. It has recently gained notable traction as it recorded a surge in its price when Bitcoin touched an all-time high of \$73,000. Moreover, the rise in BEFE coin seems to have curated a torrent of speculative buzz across the broader crypto market. As the crypto market is seeing a dip, investors and traders are accumulating at low prices. Meme coin experts predict this meme coin could pump 5000% from its current price. Cryptocurrency investors are buying BEFE Coin, a digital token, speculating a +5000% pump in its price for wealth creation. Many retail investors wonder whether or not BEFE could surge over 5000% in price from here. From an emerging meme coin to a popular altcoin in only a few months. It's hard to imagine a digital currency emerged during the meme coin trend surging through internet culture and creating its impact and place. But, BEFE has surprised everyone with its massive gains of 525% in a year. BEFE Skyrockets Amid Presale So what is helping the BEFE momentum and Gaining investors' interest? Well, it is a presale on solana blockchain. The presale is driving the movement currently for this BEFE coin. Specifics on the multi-phase presale are announced gradually, making each new release a hype. As a result, BEFE coin is getting buying pressure from retail investors and institutional investors. Four presale phases have been completed now by the BEFE coin team. The presale's first phase, sold out within hours of its announcement at \$0.01. Likewise, Phase 2 at \$0.02, Phase 3 at \$0.04, and Phase 4 at \$0.055 per BEFE. The fifth presale is currently going live at the price of \$0.075. Because this presale is on the SOL blockchain, the Solana community and BEFE supporters are making it viral on social media by creating hype and awareness. How Could You Be Part Of 5000% Pump? This meme coin is gaining investors' interest both institutional as well as retail. More than 4,787 investors are tracking BEFE and added to their watchlist on the Coinmarketcap website. It ranks 3095th on Coinmarketcap with a current market cap of over \$45.22 million. Experts analysts are expecting a +5000% surge in its price. The interesting part is the market is currently dipping, it can be a good opportunity to accumulate BEFE coins at low prices. You can use the DCA (Dollar Cost Average) method to buy this innovative meme coin. You can hold it for the bull run to make a significant profit. To know more about BEFE, Visit <https://befetoken.com>

Everyone keeps passing around endless derivative coins with names like PEPE, DOggy, ShIBLoKi, and Doge Inu, but BEFE is over it. The Inu & Frog coins have had their moment in the sun. It's time for the world's most recognizable meme to take over as the ultimate meme king. BEFE coin has the potential to unfold and grow your wealth. Let us Uncover the numbers and understand how a mere \$100 Investment could expand your wealth exponentially. BEFE Gaining Value Through Utility Since meme coins are community-driven, their value is considered to be speculative and incredibly volatile. When influencers and investors promoted meme coins, their value skyrocketed. But once the hype dies, its price will fall just as quickly. Meme coins often have an uncapped supply, making them inflationary. But, Some meme coins offer utility and The exceptional meme coin with utility and popularity is BEFE. BEFE is committed to providing utility while fostering collaborations within its community. Numerous meme coins have tried to break the volatile nature and grow with utility in the blockchain. BEFE is the only meme coin that stands out by actively working on enhancing its utility and making it a viable option for investors. The coin aims to offer a better future for its community by providing a variety of services, including staking Bitgert, providing zero gas-free transactions, and ensuring lightning-fast speed and scalability. These utility-driven features not only enhance the value proposition but also contribute to its long-term sustainability and adoption. Analysis of a \$100 Investment in BEFE Coin According to coinmarketcap, At the time of writing the BEFE price is \$ 0.000452 with a 24-hour trading volume of \$ 400,000 and a market cap of \$ 45.20M. The BEFE price increased by 0.24% in the last 24 hours. BEFE reached its highest price on Jan 2, 2024, when BEFE was trading at its all-time high of \$ 0.001127. If an investor invested \$100 now at the price of \$0.000452 and waited until it reached its previous all-time high of \$0.001127, their total value would be \$249.34. However, Analysts are predicting a growth of 5000% in the coming days due to its 3 listings on the top 50 central exchanges and the presale hype on the Solana chain. If the analysts' prediction of 5000% growth of its all-time high comes true, The returns on a \$100 investment in BEFE would be approximately \$12,616.15. The blockchain industry creates many opportunities for investors to profit continually with the different strata ranging from Gamefi, smart contracts, cryptos, NFTs and much more. Investors that successfully navigated the space have benefited from it depending on the strategy applied. In the cryptocurrency sector, we have seen volatility and how investors try to navigate this volatility to get the best from the space. Some coins have proven exceptional compared to others, and one that has shown massive growth is the Bitgert coin. Bitgert coin value explosion has kept eyes fixated on it and interest on a high as many seek to maximize profit from it due to the impressive surge in price. Bitgert's Price Explosion And Causes The organic offerings of Bitgert to investors are a significant reason for the growth it has experienced. Its uniqueness in transactions at a speedy rate leaves it as a number option for investors seeking the best blockchain experience. In terms of scalability and seamless nature, it edges the likes of Solana and Ethereum while still carrying out similar functions. It is only average for investors to select based on efficiency, which has given Bitgert the expected boost. Partnerships are also an essential aspect that could boost growth, which has helped Bitgert massively. With partnerships, projects can help one another, which triggers more reach to investors, thereby enabling the development of individual projects. Bitgert's partnership with Onus, KuCoin, Cointelegraph and many other DEX and media houses have been instrumental to the growth as many investors are now aware of how they can benefit from Bitgert. The aggressive burning policy of Bitgert has helped mainly in improving value by creating scarcity amid rising demand. The result of this is usually movement to the top. Bitgert Guarantees Profit For Investors The rise of Bitgert is

gradually becoming a consistent phenomenon, with predictions of the coin skyrocketing massively. Investors have seen profit as massive, over 40% in the last 60 days, and it still shows signs of performing even better. In the past three years, it has recorded a rise of over 120%, with investors grabbing more of the coin, increasing the demand and trading volume. The use cases of Bitgert give it a bright future as investors can be sure of more profit. This has made more investors gain interest, with many monitoring it closely. Conclusion Over the years, Bitgert has consistently made investors rich, with most smiling to the bank at every investment made due to the uptrend it keeps recording. Many factors keep pushing the coin to the top, with more investors discovering this opportunity for an investment. To know more about Bitgert, Visit <https://bitgert.com>

- Wormhole's governance token W is down by 14% since its debut on Solana. - The token's market cap drops by 30% from \$3 billion to \$2.15 billion. - 674 million tokens were airdropped to eligible users on Wednesday. Debut of W, the governance token of the cross-chain messaging protocol Wormhole, is at odds with the usual occurrence of a subsequent price surge post-airdrop. The token has remained in a state of decline ever since it started trading on Wednesday. Wormhole airdropped 674 million tokens " 6.75% of the total supply " as SPL tokens on Solana at 11 AM UTC yesterday. It opened trading at the price of \$1.66 on Solana-based OpenBook. Notably, in the last 20-hour window, the token noted a decline of 13.7%. As per TradingView, the trading pair, W/USDT, hit a high of \$1.86 on the crypto exchange Binance. In the last 24-hour window, it peaked at \$1.86, reaching a market cap of \$3 billion. But it slid to a low of \$1.13 on Thursday. At press time, W traded at \$1.18 with a trading volume of \$1.74 billion. According to CoinMarketCap data, 1.8 billion W tokens are valued at over \$2.15 billion. Amid the watch over the token's performance, warnings about golden tick verified accounts impersonating the official Wormhole account with fake airdrop links are flooding X (Twitter). Zoom Out and Glance at W's Long-Term Plan! The soon-to-be multichain token initially is deployed on Solana. According to the strategies of this protocol, W is poised to serve as the cornerstone of the blockchain realm's "first multichain governance system." Subsequently, as outlined in the next phase of the roadmap, it will roll out to EVM chains synchronized with Wormhole. This implementation will be facilitated through Wormhole Native Token Transfers (NTT), a novel framework designed for direct token transfers across multiple blockchains. Following this, token locks and delegation on Solana and EVM chains fall into place, opening doors for W token holders to actively contribute to governance. The endgame is Wormhole DAO which would bolster multichain governance.

In the lucrative landscape of cryptocurrency, certain trends emerge that capture the imagination of investors worldwide. One such trend that has gained significant traction in recent times is the rise of meme coins. These digital assets, often characterized by quirky branding and community-driven narratives, have become a prominent fixture in the crypto market, challenging traditional notions of value and investment. In recent times, meme coins continue to lead the 2024 bull rally with \$HUMP topping the charts. The Emergence of \$HUMP: A Solana Meme Coin Superstar In the past three days, one meme coin, in particular, has captured the spotlight: HUMP. Positioned as the Solana meme coin superstar, HUMP has quickly risen to prominence, shining bright in the expansive crypto galaxy. Its journey began with the conclusion of its presale phase, marking the official launch of this furry-faced token into the digital arena. A Meteoric Debut: HUMP's Spectacular Surge in Value Within a mere 24 hours of its launch, HUMP defied all expectations by surging over 5000%, reaching an all-time high of \$0.006574. This remarkable feat immediately propelled HUMP to the top of the charts, garnering attention from investors and enthusiasts alike. Its debut day witnessed an unprecedented spike in value, solidifying its status as a formidable player in the meme coin space. Analysing the Numbers: Market Cap, Momentum, and Beyond As of the latest data, HUMP boasts a staggering market capitalization of \$45.50 million, a testament to its growing momentum and liquidity. Analysts are bullish on HUMP's prospects, predicting that it is poised to surpass the \$100 million mark in the near future. With each passing day, HUMP continues to assert its dominance, consistently outperforming expectations and solidifying its position as a frontrunner in the 2024 bull rally. The Anatomy of \$HUMP: Beyond the Meme Coin Marvel What sets HUMP apart from its counterparts in the meme coin landscape? At its core, HUMP represents more than just a cute face; it embodies the spirit of innovation and community empowerment. Inspired by the image of a furry friend, HUMP transcends the traditional confines of meme tokens, offering investors a unique opportunity to be part of a movement dedicated to reshaping the future of finance. Supply and Demand Dynamics: Understanding HUMP's Total Supply With a total supply of 6,900,000,000 tokens, HUMP is well-positioned to meet the demands of its growing community. This ample supply ensures liquidity and accessibility, enabling investors to participate in the HUMP ecosystem with ease. Moreover, it underscores HUMP's commitment to inclusivity and democratization, ensuring that everyone has the opportunity to be part of this groundbreaking initiative. A Beacon of Innovation: HUMP's Impact on the Solana Meme Coin Scene HUMP's rapid ascent to the top of the charts has not gone unnoticed within the Solana meme coin community. As the best SOL meme coin to date, HUMP has redefined the parameters of success, setting a new standard for innovation and excellence. Its influence extends far beyond its immediate sphere, inspiring other projects to push the boundaries of what is possible in the world of decentralised finance. As of writing, \$HUMP is up over 25.01% in the last 24 hours alone. The Ripple Effect: Meme Coins Leading the 2024 Bull Rally HUMP's success is emblematic of a broader trend sweeping the crypto market: the rise of meme coins. These digital assets, once dismissed as mere novelties, have emerged as powerful drivers of the 2024 bull rally, captivating the attention of investors and reshaping the financial landscape in the process. With their whimsical branding and community-driven ethos, meme coins continue to defy expectations, challenging traditional narratives and redefining the parameters of success. Looking Ahead: The Future of \$HUMP and Meme Coins As HUMP continues to soar to new heights, it serves as a potent reminder of the transformative power of meme coins. Beyond their surface-level appeal lies a potent force for change, capable of reshaping the financial landscape and empowering individuals worldwide. As we look ahead to the future, one thing is clear: the era of meme coins is here to stay, and HUMP is leading the charge into uncharted territory. Conclusion: HUMP's Legacy in the Crypto Galaxy The rise of HUMP in the 2024 bull rally is a testament to the growing influence of meme coins in the crypto market. With its unprecedented surge in value and unwavering community support, HUMP has emerged as a frontrunner in the meme coin revolution, challenging conventional notions of value and investment. As it continues to lead the charge, HUMP exemplifies the spirit of innovation and empowerment that defines the world of decentralized finance, leaving an indelible mark on the crypto galaxy for years to come. Click here to Buy Hump Token (HUMP): - Website: <https://hump.io/> - Twitter: <https://x.com/Humptoken> - Telegram: <https://t.me/humptoken>

New stars emerge with astonishing speed, captivating investors' attention and fueling the fervour of the digital asset realm in the vast and ever-lucrative world of cryptocurrency. Among these celestial bodies, one particular coin has recently burst onto the scene with unprecedented momentum and excitement: \$HUMP. The Genesis of \$HUMP: From Humble Origins to Galactic Stardom In a mere three days since its introduction, Hump (\$HUMP), the Solana meme coin sensation, has surged to unprecedented heights, astonishing even the most seasoned crypto enthusiasts. With a staggering increase of over 5000%, this furry-faced marvel catapulted from its initial all-time low of \$0.0002689 to reach an astronomical high of \$0.006477, marking a meteoric rise that reverberated throughout the financial world. On its inaugural day of trading, HUMP showcased its extraordinary potential by skyrocketing over 5000%, sparking widespread excitement and frenzied activity among investors. The resounding impact of this surge is evident in HUMP's current market capitalization of \$44.53 million and daily trading volume of \$952.06 thousand, underscoring its remarkable influence within the crypto galaxy. As HUMP continues to captivate the imagination of investors worldwide, its ascent serves as a testament to the boundless possibilities of the digital asset landscape. A New Meme Coin to Buy Right Now Amidst the vast expanse of meme coins, \$HUMP emerges as a shining beacon of opportunity, beckoning investors to embark on a journey of innovation and prosperity. With its current trajectory and rapidly expanding liquidity, HUMP presents itself as the premier choice for those eager to capitalize on the potential for monumental gains within a remarkably short timeframe. Analysts forecast that HUMP, fueled by its prevailing momentum and escalating liquidity, is on the cusp of surpassing its all-time high and reaching unprecedented heights in the coming week. Projections suggest the possibility of gains soaring up to 3000%, underscoring the undeniable allure of this burgeoning meme coin and its unparalleled potential for exponential growth. As investors flock to seize the opportunity presented by HUMP, the stage is set for a transformative journey into the realm of decentralized finance. With its promise of substantial rewards and a community united by a shared vision for the future, HUMP stands poised to redefine the landscape of meme coins and pave the way for a new era of financial innovation. Beyond the Cute Face: Embracing Innovation and Community However, \$HUMP is far more than just another meme token; it represents a paradigm shift in the realm of decentralized finance, embodying the principles of innovation, inclusivity, and community empowerment. Inspired by the endearing image of a furry friend, HUMP transcends its superficial appeal to become a symbol of progress and transformation within the crypto ecosystem. By investing in HUMP, individuals not only align themselves with a digital asset poised for remarkable growth but also become integral members of a community united by a shared vision for the future of finance. This sense of camaraderie and collective purpose distinguishes HUMP from its peers, elevating it to the status of a movement rather than merely a speculative asset. Technical Specifications and Market Dynamics With a total supply of 6,900,000,000 tokens, HUMP embodies a delicate balance of scarcity and accessibility, fostering an environment conducive to sustained growth and stability. In the ever-evolving landscape of cryptocurrencies, meme coins have emerged as a captivating facet, blending humor, community, and speculative investment. Among the plethora of meme coins inundating the market, two notable contenders have recently gained significant traction: Dogwifhat (WIF) and Hump (HUMP). As investors seek the next big opportunity in this volatile yet potentially lucrative space, the question arises: which meme coin holds more promise? Let's delve into the performance and prospects of both Dogwifhat and Hump to ascertain which might be the wiser investment choice. Dogwifhat (WIF): A Top Solana-Based Meme Coin Dogwifhat (WIF) has recently solidified its position as a leading meme coin within the Solana ecosystem. The coin experienced a notable surge, catapulting its value by 20% in a single day, reaching an all-time high of \$4. This surge underscores the growing popularity and demand for WIF among investors. Notably, this surge surpassed the previous all-time high achieved in mid-March, further reinforcing WIF's upward trajectory. The market cap of Dogwifhat surged to \$4.2 billion, reflecting the substantial investor interest in this meme coin. Such exponential growth is particularly impressive when considering WIF's journey from its all-time low of \$0.0677 in January 8, 2024. However, as WIF approaches the \$5 price mark, analysts speculate that it may encounter psychological resistance, potentially stalling its ascent. Despite these potential hurdles, Dogwifhat's performance underscores its resilience and appeal within the meme coin ecosystem. Its strong presence within the Solana blockchain, coupled with a dedicated community of supporters, bodes well for its future trajectory. Hump (\$HUMP): The Rising Star of Solana Meme Coins Hump (HUMP), a relative newcomer to the meme coin scene, has swiftly captured the attention of investors with its meteoric rise. The token's presale concluded recently, marking the beginning of its journey in the crypto galaxy. \$HUMP made an impressive debut, surging by an astonishing 5000%, cementing its status as the premier Solana meme coin. What sets Hump apart from its counterparts is its unique ethos. More than just a meme token, HUMP embodies a vision of progress and community empowerment within decentralized finance. Inspired by the endearing image of a furry friend, HUMP transcends its meme status to become a symbol of innovation and inclusivity. The rapid rise of Hump underscores the growing demand for novel approaches to decentralized finance within the meme coin ecosystem. With a total supply of 6,900,000,000 tokens, HUMP is positioned to disrupt the Solana meme coin landscape significantly. Its recent performance, surging by over 5000%, signifies the immense potential that investors see in this budding meme coin. Experts predict that HUMP's upward trajectory is far from over, projecting potential gains of over 10,000% in the coming weeks. This bullish sentiment reflects the confidence in Hump's unique value proposition and its ability to captivate a diverse community of supporters. As investors seek the next big opportunity in the meme coin market, Hump emerges as a compelling choice, promising both innovation and substantial returns. The Verdict: Which Meme Coin Should You Buy? As investors weigh their options in the meme coin market, the choice between Dogwifhat (WIF) and Hump (HUMP) boils down to several factors. Dogwifhat, with its established presence within the Solana ecosystem and recent surge in value, presents a compelling investment opportunity. However, analysts caution that the coin may face resistance as it nears the \$5 price mark. On the other hand, Hump emerges as a promising contender, riding high on its recent debut and exponential growth. With its unique narrative and enthusiastic community, HUMP represents more than just a meme coin—it embodies a movement toward innovation and community-driven finance. While both meme coins exhibit potential for significant
