

Parallel to this, a pack of memecoins dominates the top crypto gainers with their impressive price rallies and hints at the potential memecoin supercycle. Trending players like PEPE, POPCAT, and HIPPO mark their new all-time high (ATH). The tweets or opinions from the following figures – “@DOGEfather” Elon Musk memecoin analyst “@Murada” Mahmudov and crypto influencer Zion Thomas aka “@Ansem” – have been recognized as key factors driving the meme market uptrend. This recent surge in meme rallies can be attributed to memecoin listings on crypto exchanges like Binance and Coinbase. Memecoin Listings in the Last 24H and Their Impact In the last 24 hours, four memecoin listings have been announced, with Binance becoming the focal point for the meme community. Once a memecoin is listed on this major exchange, it typically experiences a surge in attention and trading activity. Sui-based memecoin Sudeng (HIPPO) saw this boost following its listing announcement on Wednesday. HIPPO price surged 122.4%, reaching an all-time high (ATH) of \$0.02509 from a low of \$0.01128. Meanwhile, crypto exchange Coinbase and trading platform Robinhood both listed the popular frog-themed memecoin PEPE, triggering a 96% rally. PEPE spiked from a low of \$0.00001285 to an ATH of \$0.00002524. Alongside PEPE, Coinbase also listed dogwifhat (WIF), another dog-themed meme token, which jumped 61.9% from \$2.89 to a high of \$4.68. Last week, Binance also listed two other memecoins – ACT (ACT I: The AI Prophecy) and PNUT (Peanut the Squirrel) – and the consequent price rallies captured the community’s attention. While Bybit listed GOAT (Goatseus Maximus), the popular pump.fun memecoin, which hit a \$1 billion market cap. Will the Memecoin Supercycle Last? Amid the memecoin frenzy, one of the oldest cryptocurrencies, Litecoin (LTC), playfully tweeted on X, calling itself a memecoin. Dogecoin (DOGE) joined the conversation by encouraging the community to come up with a mascot. Memecoins continue to remain the hot talk of the crypto space, reflected in their strong social dominance. Hey fam, @litecoin now identify as a memecoin, so can we help them out making a few LTC memes to get them started? Some kind of chibi mascot I think ðŸ™„” <https://t.co/t80iCPDNY6> – Dogecoin (@dogecoin) November 14, 2024 Generally, during a supercycle, memecoins experience explosive returns, with gains of 10x, 100x, or even more. The 2020–2021 crypto era saw the “biggest memecoin supercycle,” during which multiple meme tokens skyrocketed to all-time highs (ATHs) that have yet to be surpassed. For instance, in 2021, Dogecoin spiked 18,833% to a high of \$0.7376 in May from \$0.03719 at the start of the year. Currently, DOGE is 45.8% below its ATH. In late October this year, Murad forecasted that 7–8 memecoins would lead this supercycle, with their market valuations rising to over \$20 billion. The rest of the tokens, however, will likely not see such extreme bullish hikes. Over the past seven days, the memecoin market cap soared 77% to claim a cap of \$121.23 billion. Notably, the following tokens exhibited the max weekly returns: ACT (3003.7%), PNUT (1526.3%), HIPPO (236.01%), DEGEN (138.36%), PEPE (123.8%) and DOGE (111.35%). The current trajectory appears bullish, exuding the aura of greed. However, the path ahead is seemingly highly volatile. Traders and investors are advised to calculate and practice caution while investing in memecoins. Disclaimer: The article is only for informational purposes only. It does not represent any investment or financial advice. TheNewsCrypto team encourages all readers to do their own research before investing. Highlighted Crypto News Today Is Bitcoin Set for a Pullback After Reaching All-Time High at \$93K?

- Solana (SOL) rose 7.02% to \$222.02, reflecting a broader market rally. - DEX volume set a new record, surpassing \$5 billion. The global crypto market cap has surged to \$3.01 trillion, reflecting a 4.04% daily increase. Total market volume stands at \$302.64 billion, up 2.70%. Bitcoin (BTC) recently achieved a new all-time high of \$93,434, and Ethereum (ETH) rallied past \$3,300. Additionally, Solana’s decentralized exchange (DEX) trading volume has surpassed \$5 billion daily for three consecutive days, a record milestone. Solana (SOL) is trading at \$222.02, up 7.02% in the past 24 hours. Its trading volume has reached \$11.05 billion, marking a 3.85% increase, while its market cap is now \$104.79 billion with a market cap ratio of 10.53%. This rise comes amid broader crypto market gains. Whale activity indicates increased interest in the Solana ecosystem. A prominent whale recently spent a total of 12,400 SOL (\$2.7 million) to acquire two tokens: WIF and BONK. Specifically, the whale purchased 406,000 WIF at \$3.87 per token, spending 7,200 SOL (equivalent to \$1.57 million). The whale also bought 29.32 billion BONK tokens at \$0.0000387, investing an additional 5,200 SOL (\$1.13 million). Such large transactions reflect confidence in the Solana ecosystem and signal potential growth in token demand, especially for projects related to Solana. Is Solana’s Uptrend Set to Persist? Solana shows notable resistance at \$228, with key support around \$215. If SOL can break above the \$228 resistance, it could signal a move toward the \$240 level, inviting more buying interest. However, a drop below the \$215 support could indicate potential downside pressure, with a possible decline toward the \$200 mark. The Relative Strength Index (RSI) for Solana is currently at 56.35, while the average RSI stands at 61.87. This RSI reading suggests a neutral trend, indicating that buying and selling pressures are balanced. Since the RSI is neither in overbought nor oversold territory, it implies that Solana might sustain its current levels unless influenced by significant market changes. This stability in RSI is a sign of potential price consolidation before any decisive breakout or breakdown. Moving averages add further insight into Solana’s price movement. The 50-day moving average is currently positioned above the 200-day moving average, forming a bullish crossover that supports the ongoing upward trend. This crossover suggests long-term bullish momentum, with buyers showing sustained interest in Solana. Highlighted Crypto News Today Will Dogecoin Cool Down After Its 9th Consecutive Bullish Day?

- Memecoin PEPE’s price has rallied by a significant 75% in the last 24 hours. - The cryptocurrency hit a new all-time high in the last few hours ago. The cryptocurrency sector is \$2 billion away from hitting the \$3 trillion market cap milestone. Several factors have contributed to this bullish trend, primarily Bitcoin’s upward rally. The USA’s regulatory reforms are also another important contributing factor to the current bull run. Additionally, the beginning of the Altseason has propelled prices further upward. In light of the AltSeason, the memecoin sector has rallied with price breakouts in the past few days. Leading memecoins such as Dogecoin and Shiba Inu have recorded significant upward movements. Notably, frog-themed memecoin, PEPE has factored in 75.86% in a matter

of a day. The memecoin 24 hours ago, traded at the \$0.00001272 level after which it broke the \$0.00002 resistance. The cryptocurrency rallied to a new ATH at \$0.00002524 roughly 5 hours ago, surpassing its previous high of \$0.00001718. At the time of writing, PEPE was trading at \$0.00002256 as per CMC data. Moreover, PEPE has seen increased whale activity over the past week. According to Lookonchain reports, one particular whale with the address `0x2daa` sold 500 billion PEPE with a profit exceeding \$45 million 4 hours ago. Previously, other whales have shown buying activity which is also indicated by the RSI standing at an overbought 88.77. How was PEPE's Weekly Price Action? Zooming out, from its daily price chart, PEPE shows a 118.20% increase in the last 7 days. The memecoin has rallied from a low of \$0.00001034 to current trading levels. Additionally, PEPE's technical indicators suggest that the cryptocurrency is on an upward trend. Its Chaikin Money Flow (CMF) value stands at 0.37 highlighting the incoming money flow and subsequently indicating the bullish trend. However, PEPE price has also exhibited increased volatility as prices have been fluctuating highly. The token's RVI stands at 92.49 as per TradingView data. Meanwhile, other altcoins such as Ethereum have also broken previous resistance levels influenced by Bitcoin's upward rally. Highlighted Crypto News Today: Is Bitcoin Set for a Pullback After Reaching All-Time High at \$93K?

A new affordable token is generating buzz among investors seeking significant gains in the crypto market. With the potential to outperform established digital assets, this emerging coin is capturing attention for its promise of remarkable growth. Enthusiasts are closely watching as it shows signs of becoming the next big opportunity in the world of cryptocurrencies. Enter XYZVerse (XYZ), a pioneering memecoin that brings together sports fans from football to eSports within a unique ecosystem. The All-Sports Meme Token You Can't Afford to Bench! XYZ is your exclusive VIP pass to a sports-driven, meme-fueled revolution. Think of it as the MVP of the XYZVerse ecosystem, where degens can score big off the growing demand for prediction markets. Picture this: Polymarket hitting \$1 billion in trading volume during the US presidential election – now throw in the hype of meme coins and the thrill of sports betting. With millions of sports fans ready to hit the field and cash in the XYZVerse ecosystem is set to keep expanding – and your rewards will slam dunk through the roof! >>>XYZ presale is your first-quarter chance to get in before the mind-blowing explosion!<<< In 2024, meme coins are the undisputed champions of the crypto world, and XYZ is set to crush the competition. With potential thousand-fold returns that will blow past the finish line, the presale plan draws a hefty 99,900% growth by the TGE. Forget about BOME's 5,000% rise or WIF's 1,000% rally – XYZ is here to outscore them all! With upcoming listings on major CEX and DEX platforms, rock-solid defense in the form of audited smart contracts, and a fully vetted team, XYZ is already ahead of the game. The first-mover advantage is key here – get in before the crowd storms the field, and you'll be sitting on way bigger returns! Shiba Inu (SHIB) Shiba Inu (SHIB) is a cryptocurrency inspired by Dogecoin but with a twist. Unlike Dogecoin, SHIB runs on the Ethereum blockchain, so it can interact with Ethereum's network of decentralized applications. Launched in August 2020 by anonymous creator Ryoshi, SHIB started with a supply of one quadrillion tokens. In a bold move, half of these tokens were sent to Ethereum co-founder Vitalik Buterin. He donated a large portion to the India Covid Crypto Relief Fund and burned 40% of the supply, reducing the number of SHIB tokens and boosting its profile. SHIB's home on Ethereum opens doors to exciting developments. ShibaSwap, a decentralized exchange, lets users trade SHIB and other tokens directly. Plans for an NFT platform and a governance system give holders a say in decisions. In the current market, where utility and technology are key, SHIB stands out from other meme coins. Its integration with Ethereum could make it more attractive to those looking beyond hype. As the crypto market evolves, SHIB's potential to grow and adapt may give it an edge over other meme-based tokens. Conclusion SHIB and others are promising, but XYZVerse (XYZ), the first sports memecoin aiming for 20,000% growth, could surpass them all in the 2024 bull run. You can find more information about XYZVersus (XYZ) here: Disclaimer: TheNewsCrypto does not endorse any content on this page. Major crypto investors are focusing on a new token priced at just \$0.0005. This low-cost asset is generating buzz for its potential to surpass recent market favorites. Without using the same words as the title, it's clear that significant interest is building around this coin. Observers are watching closely as it shows signs of notable growth. XYZVerse (XYZ), the first all-sport memecoin, is uniting fans across various sports and aiming to make a substantial impact, drawing comparisons to successful tokens like PEPE. Score Big with XYZ: The New Meme Coin Heavyweight The fans are losing it! The XYZ token is in the crypto ring, landing blows on the competition – bullshit coins, worthless farming schemes, and scam projects. Like a true champ, this first-ever all-sports meme token has fought its way through the bear market with fearless momentum and shows no signs of slowing down. With eyes set on a roaring thousand-fold growth, XYZ is destined to leave the 2024 meme coin triumphants like BOME and WIF trailing in its wake. ðŸ’° Own the field, earn while the crowd plays ðŸ’° XYZ is more than just a benchwarmer in the meme coin game; it's creating the ultimate playing field with XYZVerse, where the thrill of sports meets the energy of meme culture. With a roadmap equipped with entertainment dApps, prediction markets, and sports betting options, XYZ is poised to draw in millions of gamblers ready to join the action. Remember Polymarket's massive \$1 billion trading volume during the US election betting fever? XYZ is gearing up for an even bigger win in the GameFi arena, letting its stakeholders cash in on the perfect combo of meme coin vibes, sports hype, and crypto mass adoption. ðŸ’¥ Missed meme coin supercycle? ðŸ’¥ By capitalizing on the ever-expanding gambling niche, XYZ is set to become the G.O.A.T of meme coins. BOME's 5,000% takeoff and WIF's 1,000% year-to-date rally are now relics of the past because XYZ is set to explode by over 9,900% after the TGE and outshine its sensational predecessors. Get in the game early to secure your spot – currently undervalued, XYZ is going the distance to break new records! ðŸ’† Rallying the community, securing the

win ðŸ¥‡ XYZVerse will be the MVP in this bull run, giving the community the control to call the plays and steer the ecosystem's direction. Active contributors will receive airdropped XYZ tokens as a reward for their dedication. With rock-solid tokenomics and plans for both CEX/DEX listings, XYZ is positioned for a championship run, ensuring a steady revenue flow and consistent token burns to keep the scoreboard in favor of a strong price and a thriving community. >>The XYZ presale is live â€” don't miss out on this knockout 99,900% opportunity!<< Pepe (PEPE) PEPE is a deflationary memecoin launched on Ethereum as a tribute to Pepe the Frog, a meme created by Matt Furie that gained fame in the early 2000s. Aiming to ride the popularity of coins like Dogecoin and Shiba Inu, PEPE stands out with its no-tax policy and embraces its role as a simple, utility-free memecoin. This straightforward approach, tied to a beloved internet icon, has attracted a strong following in the crypto community. In April and May 2023, PEPE experienced an explosive surge, with its market cap soaring to \$1.6 billion and turning early investors into millionaires. This boom sparked what's being called a "memecoin season," where new meme-based tokens see dramatic price swings. PEPE's roadmap is ambitious, featuring listings on major exchanges and a planned "meme takeover." While the crypto market is unpredictable, PEPE's rapid rise and dedicated community make it an intriguing option in today's market. As the next Bitcoin halving approaches, many hope for a bull run, and PEPE could be poised to benefit alongside other popular memecoins. Conclusion While tokens like PEPE have soared, XYZVerse (\$XYZ) aims to surpass them by uniting sports fans in a community-driven memecoin targeting massive growth and cultural impact. You can find more information about XYZVersus (XYZ) here: Disclaimer: TheNewsCrypto does not endorse any content on this page. Pepe Coin (PEPE) is the token that has swept over the Bitcoin scene. PEPE has exceeded expectations by more than 969% and confirmed its ranking among the top meme currencies during the past year. But given such fast increases, investors wonder, can this fantasy last? And in the following bull run, how high might PEPE possibly rise? Let's examine expert forecasts and investigate whether this frog-themed coin has staying power and how another developing project, Rexas Finance, can present even more significant returns. Pepe Coin's Journey: From Meme to Market Powerhouse Often mentioned alongside Dogecoin and Shiba Inu, PEPE has become one of the most successful meme coins ever invented. Unlike most popular meme currencies, which are dog-themed, PEPE's frog mascot has managed to break through, especially remarkable since it accomplished this among the demanding conditions of a crypto winter. PEPE traded sideways for much of 2023 but kept a market worth above \$1 billion. Meme coins are causing waves as the crypto market gets ready for a fresh bull run; PEPE is leading the charge. Designed on Ethereum, PEPE distinguishes itself from other meme coins already popular on Solana by displaying resilience and promise as investor excitement returns to the market. PEPE Long-Term Price Forecast: 2025 Although meme currencies are erratic, PEPE should keep on its increasing slope until 2025 and beyond. Should the crypto bull market start, PEPE could gain more trading volume and a favorable attitude among meme coin aficionados. Though it is a big participant in the meme coin market, there is still plenty of opportunity for expansion. Leading meme coin dogecoin has a market capitalization of almost \$25 billion. Should PEPE match this, its price would have to rise by almost 6.25x. Keeping that aim in mind, by the end of 2025 we project PEPE will have a price of about \$0.000050. Under a somewhat optimistic scenario, PEPE might hit \$0.00010, therefore bringing its market capitalization to a startling \$42 billion. Rexas Finance (RXS): Maybe a More Profitable Prospect For those enthralled with PEPE's spectacular expansion, smart investors have also come across another developing project called Rexas Finance (RXS) which is also built on the Ethereum blockchain. Leading real-world asset (RWA) tokenizer, Rexas Finance provides a distinct kind of value, promising stability, creativity, and significant growth potential that might outperform even meme coins like PEPE. The continuous presale of Rexas Finance has attracted enormous support and shows no slowing down tendency. Recently ending, Stage 4 of the presale raised over \$5.4 million and gave early investors returns of more than 130%. In just two months. Rexas Finance, now in Stage 5, has already raised \$6,077,025 with a token price of \$0.07 and over 76% completion at this level. In expectation of the project's forthcoming IPO at \$0.20 on major exchanges, investors are feverishly acquiring RXS tokensâ€”a possible gain of 186% for present buyers and 330% for those who joined earlier stages. Through its Millionaire Giveaway, a \$1 million prize pool in RXS tokens, Rexas Finance has also attracted notice. Twenty fortunate victors in this event stand to get RXS tokens valued at \$50,000 apiece. Investors who want to take part should finish community tasks and provide their ERC20 wallet addresses, therefore fostering a vibrant community surrounding the project. This project has drawn a lot of attention, therefore strengthening the market's visibility and reputation of credibility for it. Rexas Finance is getting ready for a first significant listing on three top-tier exchanges in Q1 2025. Originally priced at \$0.20, RXS is projected to see demand surge and higher trading activity, thereby offering liquidity and perhaps significant profits. Recent listings on CoinMarketCap and CoinGecko have made it simpler for investors to manage their holdings and track the progress of the presale, therefore strengthening faith in the future of the project. Rexas Finance is positioned to lead in the unexplored industry of real-world asset tokenization given the rising price of Bitcoin and generally optimistic crypto markets. With some analysts projecting a surge of up to 20x by the end of 2025, the project's development potential is amazing and RXS is a tempting choice for investors searching for significant gains. Conclusion Pepe Coin has enthralled the meme coin market and is still a great choice for short-term gains; Rexas Finance offers an interesting substitute for investors looking for long-term development possibilities and a strong use case. Rexas Finance distinguishes itself as a potential competitor for investors wishing to profit from the forthcoming bull run with its creative approach to asset tokenization, continuous presale success, and active community projects. Both coins show interesting prospects whether your interests are drawn to the meme magic of PEPE or the real potential of RXS; but, Rexas Finance may provide a more solid route to millionaire status in the next crypto cycle.

- Revolut X expands crypto trading to 30 European markets for advanced users. - The platform offers over 200 cryptocurrencies, real-time analytics, and TradingView. London-based fintech firm Revolut announced Wednesday that it is expanding its cryptocurrency platform, Revolut X, to serve users across 30 new markets in Europe. Targeted at experienced traders, the platform is set to provide access to a wide selection of digital assets, along with tools for real-time analysis and market tracking. Revolut X, a standalone exchange launched in the UK earlier this year, allows users in the European Economic Area (EEA) and the UK to trade over 200 cryptocurrencies. According to Revolut, the platform's capabilities are aimed at advanced users, integrating data. And charting tools from TradingView to support detailed market analysis. Leonid Bashlykov, Head of Product at Revolut's crypto exchange, commented that the platform aims to provide "a strong alternative to some of the more established platforms." Moreover, Revolut has taken steps to prioritize security measures on Revolut X. It is noted that a majority of the funds will be stored in cold wallets. They are considered to be more secure against online threats. Additionally, risk monitoring tools are in place to alert the platform to potential breaches. **Revolut To Attract More Users?** Revolut first entered the crypto market in 2017, initially offering crypto trading through its app as part of its broader fintech services. Since then, the firm has expanded its offerings, reaching a reported 45 million users globally. In recent months, Revolut has signaled further interest in the digital asset sector. Also, reports in September indicated that it is developing its stablecoin. It is a digital asset pegged to a stable reserve. This move may reflect the company's intent to expand its crypto infrastructure. It is amid a growing interest in digital assets across Europe. With Revolut X's new expansion, it is positioning itself to attract a more advanced user base, but it also faces competition from larger, established platforms like Coinbase and Binance. As the regulatory landscape for cryptocurrencies continues to evolve, its ongoing efforts to expand its digital asset services. It will likely attract scrutiny from both regulators and users. **Highlighted News Of The Day**

- Peanut the Squirrel (PNUT) soared 1505.29% since its debut in early November. - The memecoin's market cap surpassed the \$900 million mark. Solana-based memecoin Peanut the Squirrel (PNUT) surged over 97.3% over the past 24 hours to mark its new all-time high (ATH). Notably, Elon Musk's recent tweet on X, mentioning a "squirrel and meme coin" as the saviors of America, emerged as the stimulus behind the price rally. America was saved by a squirrel and a meme coin! "Elon Musk (@elonmusk) November 13, 2024 Certain activities of Tesla's CEO on social media have fueled the rallies of several memecoins. Dogecoin (DOGE) is the biggest beneficiary, as Musk has both directly and indirectly endorsed the coin. Recently, PNUT has emerged as another memecoin in this category alongside DOGE. This memecoin gained attention during the pre-election phase, recording impressive price rallies. Recently, crypto exchange Binance announced the listing of PNUT alongside another AI-related memecoin, ACT (Act I: The AI Prophecy), sparking a rally in both coins and turning heads in the crypto community. So, how did PNUT rise to fame, and what is its connection to Elon Musk? Here's a brief story. In early November, PNUT originated in the crypto meme space to honor "Peanut," the squirrel euthanized by New York's Department of Environmental Conservation (DEC). Musk supported the animal's justice on X, thereby spurring the story's visibility on the internet. Since its debut, PNUT price surged over 1627%, claiming a market share of \$931 million. At press time, the memecoin traded at \$0.9337. Peanut the Squirrel (PNUT) Price Trend Analysis 30 months ago, the crash of Terraform Labs' altcoin Terra Classic (LUNC), previously LUNA, from a high of \$119 to \$0, triggered the 2022 crypto bear market. Amid the ongoing crypto bull run, Solana memecoin PNUT jumped 147% from \$0.3854 to \$0.9890 in the last 30 hours. The hourly price chart shows the bullish trend of PNUT's current price action. Meanwhile, investor sentiment around the memecoin appears bullish, as two metrics "On-Balance Volume (OBV) and Chaikin Money Flow (CMF) " indicate this. The rise in OBV highlights increasing buying pressure, while the increase in CMF points to more capital flowing into PNUT. According to CoinMarketCap data, the daily trading volume of Peanut the Squirrel (PNUT) spiked 39.5% to reach \$1.78 billion. Disclaimer: The opinion expressed in this article is solely the author's. - Trump appoints Musk and Ramaswamy to lead the Department of Government Efficiency (DOGE). - DOGE will focus on reducing government waste, cutting regulations, and restructuring agencies. President-elect Donald Trump announced Tuesday that Elon Musk and Vivek Ramaswamy will co-lead the new Department of Government Efficiency (DOGE). Trump selected Musk, the CEO of Tesla and SpaceX. Along with Ramaswamy, a former Republican presidential candidate, to head an effort focused on dismantling bureaucracy, slashing regulations, and reducing waste across federal agencies. Their work is set to conclude by July 4, 2026, to commemorate the 250th anniversary of the Declaration of Independence. **BREAKING:** Trump announces Elon Musk and Vivek Ramaswamy will head the Department of Government Efficiency. "Eric Daugherty (@EricLDaugh) November 13, 2024 It will "slash excess regulations" and "cut wasteful expenditures." pic.twitter.com/sBxGW9okcr Trump's plan gives Musk and Ramaswamy a unique, external advisory role, bypassing Senate approval and formal government positions. Instead, the two will collaborate closely with the White House and the Office of Management and Budget (OMB) to drive large-scale reforms. Trump's New Efficiency Team Trump emphasized that the pair's influence from outside government will create an "entrepreneurial approach never seen before." Musk noted that DOGE aims to "send shockwaves through the system" and target individuals tied to government waste. Musk and Ramaswamy's appointments reward two high-profile Trump supporters who contributed significantly to his election campaign. Musk's advocacy for efficiency aligns with his cost-cutting

measures at Twitter, now X, where he famously reduced staff and streamlined operations. Department of Government Efficiency â€” Elon Musk (@elonmusk) November 13, 2024 The merch will be ðŸ™ƒðŸ™ƒðŸ™ƒ Trump has long discussed this government efficiency initiative, promising in September that it could save trillions by eliminating fraud and improper payments. Experts, however, doubt that such ambitious cuts are achievable, with critics warning that deeper reductions would require targeting core programs like Medicare and defense. As Trump seeks to reshape government, both Musk and Ramaswamy are committed to posting DOGEâ€™s actions online for transparency. Ramaswamy added on X, â€œSHUT IT DOWN,â€ underscoring his goal to eliminate what he calls wasteful federal agencies. This unprecedented partnership could signal a new era of government reform. Highlighted Crypto News Today Will BONK Break Key Resistances to Fuel Further Gains?

- BONK surged over 10%, trading at \$0.00003212. - The trading volume of the meme coin has soared over 175%. The global cryptocurrency market exhibits mixed signals, with assets fluctuating between gains and losses. The recent recovery of major assets has extended support to meme coins. However, at press time, prominent meme coins like DOGE and SHIB are recording double-digit declines. Despite this, the Solana-based meme coin BONK leads the pack of gainers in the early hours. The asset currently manages to settle within the top five gainers and chooses a bull run for the day. Breaking past a crucial resistance level at \$0.00002841, BONK currently trades at \$0.00003212, with a 10.38% gain. The meme coinâ€™s price climbed from a low of \$0.00002663 to a high of \$0.00003965. In addition, BONKâ€™s daily trading volume has reached \$2.31 billion. The market has recorded \$7.18 million worth of BONK liquidated in the past 24 hours. The upside trajectory of BONK over the past seven days recorded over 47% gain. The meme coin began the week trading at a low of \$0.00002197, and eventually, the asset ascended to the current trading marks. Are New Highs Within Reach for BONK? BONKâ€™s ongoing market sentiment is neutral, as the daily relative strength index (RSI) settles at 62.78. The four-hour frame of the asset unveils the short-term 9-day moving average above the long-term 21-day moving average. The daily price chart of BONK suggests the recent upside correction. If the bulls could maintain the current momentum, the price of the meme coin might likely hit a high of \$0.00003828. Further gains might push the price of BONK to hit high targets. On the support side, if BONK loses its grip on the upside, the meme coin could retreat to its support zone at \$0.00002583. A steady decline could unfold if the meme coin continues to retreat. Besides, the technical analysis highlights the Moving Average Convergence Divergence (MACD) line over the signal line, exposing the meme coinâ€™s upward momentum and the incoming bull run. The Chaikin Money Flow (CMF) indicator is positioned at 0.17, which denotes the positive money flow and buying interest. Meanwhile, BONKâ€™s trading volume has increased by over 175%. Disclaimer: The opinion expressed in this chart is solely the authorâ€™s. It does not represent any investment advice. TheNewsCrypto team encourages all to do their own research before investing. Highlighted Crypto News Bitcoin Price Steadies at \$86K Post Bull Run Hitting \$89K Milestone

As the year draws to a close, the cryptocurrency market is buzzing with promising tokens that could deliver significant gains. Leading analysts are spotlighting digital assets poised for remarkable growth. One standout is XYZVerse (XYZ), the first memecoin uniting sports fans from football to esports, aiming for substantial growth and blending meme culture with athletic passion. Score Big with XYZ: The New Meme Coin Heavyweight The fans are losing it! The XYZ token is in the crypto ring, landing blows on the competition â€” bullshit coins, worthless farming schemes, and scam projects. Like a true champ, this first-ever all-sports meme token has fought its way through the bear market with fearless momentum and shows no signs of slowing down. With eyes set on a roaring thousand-fold growth, XYZ is destined to leave the 2024 meme coin triumphant like BOME and WIF trailing in its wake. ðŸ’° Own the field, earn while the crowd plays ðŸ’° XYZ is more than just a benchwarmer in the meme coin game; itâ€™s creating the ultimate playing field with XYZVerse, where the thrill of sports meets the energy of meme culture. With a roadmap equipped with entertainment dApps, prediction markets, and sports betting options, XYZ is poised to draw in millions of gamblers ready to join the action. Remember Polymarketâ€™s massive \$1 billion trading volume during the US election betting fever? XYZ is gearing up for an even bigger win in the GameFi arena, letting its stakeholders cash in on the perfect combo of meme coin vibes, sports hype, and crypto mass adoption. ðŸ’¥ Missed meme coin supercycle? ðŸ’¥ By capitalizing on the ever-expanding gambling niche, XYZ is set to become the G.O.A.T of meme coins. BOMEâ€™s 5,000% takeoff and WIFâ€™s 1,000% year-to-date rally are now relics of the past because XYZ is set to explode by over 9,900% after the TGE and outshine its sensational predecessors. Get in the game early to secure your spot â€” currently undervalued, XYZ is going the distance to break new records! ðŸ’† Rallying the community, securing the win ðŸ’† XYZVerse will be the MVP in this bull run, giving the community the control to call the plays and steer the ecosystemâ€™s direction. Active contributors will receive airdropped XYZ tokens as a reward for their dedication. With rock-solid tokenomics and plans for both CEX/DEX listings, XYZ is positioned for a championship run, ensuring a steady revenue flow and consistent token burns to keep the scoreboard in favor of a strong price and a thriving community. >>The XYZ presale is live â€” donâ€™t miss out on this knockout 99,900% opportunity!<< Solana (SOL) Solana is a blockchain platform built for speed and scalability. Unlike some of its competitors like Ethereum and Cardano, Solana focuses on handling many transactions quickly. This makes it a strong foundation for decentralized applications, or dapps. Its unique architecture allows for fast transactions and lets developers use different programming languages. At the heart of Solana is SOL, its native cryptocurrency. SOL is used to make transactions, run programs, and reward those who support the network. The SOL coin holds real value in the Solana ecosystem. It rewards network participants and gives users access to many projects on Solana. Unlike some others, Solana doesnâ€™t use sharding or second-layer solutions to scale up. This makes it attractive to developers and investors who want a high-capacity network. In the current market, SOL looks promising. Its ability to handle high activity could make it a top choice for hosting products and services. Compared to other coins, SOL offers speed and flexibility, which could set it apart in the growing crypto market. Pepe (PEPE) PEPE is a deflationary memecoin launched on Ethereum, paying homage to the

iconic Pepe the Frog meme created by Matt Furie in the early 2000s. Aiming to ride the wave of popular meme coins like Shiba Inu and Dogecoin, PEPE seeks to establish itself as a leading meme-based cryptocurrency. It attracts the crypto community with a no-tax policy and embraces its lack of utility, keeping things pure, simple, and fun. In late April to May 2023, PEPE experienced an explosive surge, pushing its market cap to a peak of \$1.6 billion. Early holders saw significant gains, and a strong community of like-minded followers emerged. This phenomena sparked what some call a "memecoin season," with other meme tokens experiencing dramatic rises and falls within hours. As the crypto market anticipates the next Bitcoin halving cycle, many enthusiasts wonder if PEPE will reach new highs. While its future is uncertain, PEPE's strong community support and meme-driven appeal keep it in the spotlight, making it an intriguing player in the current market landscape.

Shiba Inu (SHIB) Shiba Inu (SHIB) is a cryptocurrency that started as a meme, inspired by Dogecoin (DOGE). But unlike Dogecoin, SHIB runs on the Ethereum blockchain. This means it can interact with Ethereum's network of decentralized apps. Launched in August 2020 by an anonymous developer named Ryoshi, SHIB began with a supply of one quadrillion tokens. Half of these tokens were sent to Vitalik Buterin, co-founder of Ethereum. Buterin donated a large portion to the India Covid Crypto Relief Fund and burned 40% of the supply, boosting SHIB's profile. SHIB's integration with Ethereum allows for more than just memes. It powers ShibaSwap, a decentralized exchange where users can trade tokens without a middleman. There are also plans for an NFT platform and a governance system where holders can vote on changes. This gives SHIB real utility and sets it apart from other meme coins. In the current market, with growing interest in decentralized finance (DeFi) and NFTs, SHIB might attract investors looking for coins with potential beyond hype. While the crypto market is volatile, SHIB's connection to Ethereum and its ambitious plans could make it a coin to watch.

Sui (SUI) Sui is a new blockchain platform built to meet the needs of a global audience. It focuses on being secure, powerful, and able to grow with demand. Sui uses a unique way of handling data that centers on objects, making it different from other blockchains. It also uses the Move programming language, known for its safety. This combination helps Sui overcome common issues found in other blockchain systems. Importantly, Sui puts user experience first. With features like zkLogin, sponsored transactions, and programmable transaction blocks, it removes many of the hurdles people often face when using blockchain technology. Looking at its potential, Sui could make a significant impact in the blockchain world. Its emphasis on making applications accessible and easy to use sets it apart from many other platforms. In a market where user experience and scalability are increasingly important, Sui stands out. Compared to other coins, its focus on removing barriers could attract more users and developers. With current trends favoring technologies that are both powerful and user-friendly, Sui appears to be a promising option for those interested in the future of Web3.

Conclusion While SOL, PEPE, SHIB, and SUI are promising, XYZVerse (XYZ) uniquely combines sports and memes, targeting massive growth and community benefits in the ongoing bull run. Whispers are circulating in the crypto community about undervalued altcoins primed for extraordinary growth. Seasoned investors hint at affordable tokens that could multiply in value, offering rare opportunities for significant returns. The market seems poised for those who can spot the next big breakout. One such contender is XYZVerse (XYZ), the pioneering memecoin uniting sports fans across football, basketball, MMA, and more, aiming to surpass previous record-breaking tokens with its unique community-driven approach. Dominate the Field with XYZ: The Next Meme Coin Champion! The game is on, and XYZ is leading the charge in the meme coin arena! This sensational all-sports meme token has hit the market with unstoppable momentum, knocking out weak competitors and scammy cryptos. As it charges ahead, XYZ is set to deliver jaw-dropping gains, leaving the likes of BOME and WIF far behind. With eyes on a staggering 99,900% growth, XYZ is ready to claim the meme coin crown in the next crypto bull marathon! ðŸ’ Rule the game, cash in as the bets roll in ðŸ’ XYZ is the star player in XYZVerse â€” the ultimate fusion of sports thrill and meme culture. This community-centered ecosystem is the perfect playground for crypto degens and sports fans alike, offering everything from entertainment apps to prediction markets. Think back to Polymarket's \$1 billion trading volume during the US elections betting frenzy, and now, picture that on steroids with XYZVerse. With millions of sport bettors getting ready to jump in the action, opportunities for early investors in XYZ are really huge! XYZ is currently undervalued, and with major listings on the way, presale participants stand to secure life-changing gains. >>>Don't miss your shot at being part of the XYZ winning team!<<< Ethereum (ETH) Ethereum is a leading blockchain platform that introduced smart contracts to the world. Created by Vitalik Buterin and launched in 2015, it has become the foundation for many decentralized apps, known as dApps. These apps range from finance to games, all running on Ethereum's network. In 2022, Ethereum shifted to a Proof-of-Stake system, making it more efficient and eco-friendly. Soon, it plans to introduce sharding, a technology that will make transactions faster and cheaper. Price predictions suggest that Ethereum could reach as high as \$6,580.53 next year, with estimates of continued growth up to 2030. This optimism is based on its past performance and patterns in the crypto market. Compared to other coins, Ethereum stands out because of its large ecosystem and ongoing improvements. With plans to enhance speed and reduce costs, Ethereum shows strong potential. In the current market cycle, ETH appears to be an attractive option for those interested in cryptocurrency's future. Solana (SOL) Solana is a blockchain platform built for speed and scalability. Unlike some of its competitors like Ethereum and Cardano, Solana focuses on handling many transactions quickly. This makes it a strong foundation for decentralized applications, or dapps. Its unique architecture allows for fast transactions and lets developers use different programming languages. At the heart of Solana is SOL, its native cryptocurrency. SOL is used to make transactions, run programs, and reward those who support the network. The SOL coin holds real value in the Solana ecosystem. It rewards network

participants and gives users access to many projects on Solana. Unlike some others, Solana doesn't use sharding or second-layer solutions to scale up. This makes it attractive to developers and investors who want a high-capacity network. In the current market, SOL looks promising. Its ability to handle high activity could make it a top choice for hosting products and services. Compared to other coins, SOL offers speed and flexibility, which could set it apart in the growing crypto market. XRP (XRP) XRP is a cryptocurrency designed to make sending money across borders faster and cheaper. It doesn't rely on banks or central authorities. This means transactions are direct, secure, and can't be reversed. Created by Jed McCaleb, Arthur Britto, and David Schwartz, XRP started with 100 billion coins. The founders gave 80 billion to a company called Ripple. Ripple uses XRP to improve how money moves around the world. They even set aside 55 billion XRP to release slowly, keeping the supply in check. Many see XRP as a game-changer in the world of digital money. Its technology allows easy swapping between different currencies. This makes it useful for international payments. In the current market, XRP looks promising. While some cryptocurrencies are slow or have high fees, XRP offers quick and low-cost transactions. As global trade grows, the need for efficient cross-border payments increases. XRP could be a strong contender in meeting that demand compared to other coins. Dogecoin (DOGE) Dogecoin started as a joke in 2013. It used a Shiba Inu meme for its logo. Unlike Bitcoin, there's no limit to how many Dogecoins can exist. Every minute, 10,000 new coins are made. In 2021, its value shot up. Social media buzz and tweets from Elon Musk helped it become one of the top cryptocurrencies. Its total value went over \$50 billion. This showed how a strong community and online support can boost a coin's success. Today, Dogecoin is more than a meme. Its technology allows quick and easy transactions. Compared to other coins, it's abundant and affordable. Some people like it because it's friendly and fun. In the current market, many are watching Dogecoin closely. While its unlimited supply raises questions, its popularity keeps it in the spotlight. As the crypto world changes, Dogecoin might continue to surprise everyone. Conclusion While ETH, SOL, XRP, and DOGE have potential, XYZVerse (XYZ) aims for 20,000% growth by uniting sports fans in a unique, community-driven memecoin movement. With the crypto market set for a possible breakout, keep an eye on these five altcoins with high growth potential. Each of these tokens is built on innovative tech, unique real-world applications, and robust communities. From established leaders pushing the envelope to emerging projects on the verge of disrupting industries, this list is packed with exciting projects. Whether users are a seasoned investor or new to the crypto space, these coins are worth watching as they aim for exponential growth in the near future. Near Protocol (NEAR) Near Protocol is a crypto platform dedicated to providing lightning-fast transactions at remarkably low costs. Sharding Technology: This innovative feature segregates the network into smaller segments, hugely enabling transaction speeds. Chainlink (LINK) Chainlink (LINK) performance has been increasing in recent days, this is followed by key developments within the platform. The introduction of staking, data oracle network expansion and the launch of Secure Mint have all led to LINK's bullish uptrend. Polkadot (DOT) Polkadot is a crypto project that plans to make tremendous growth in the blockchain world. Moreover, Polkadot's unique multi-chain architecture enables blockchains to function independently. It connects the gap between many blockchains, enabling cross-chain partnerships. Dogecoin (DOGE) Dogecoin is a crypto meme-based project in 2013, providing the popular Shiba Inu "Doge" as its logo. Besides its history as a joke crypto project, Dogecoin has created a strong community and gained real uses over time. Besides, all these crypto projects have the potential to provide 2000% gains for crypto investors in the next five months. Rexas Finance (RXS) Rexas Finance is the user's gateway to the future of asset management. Rexas Finance enables users to own or tokenize digitally any real-world asset, from real estate to commodities, on a worldwide scale. With Rexas Finance, users can gain a market with endless asset investment opportunities. Rexas Token Builder: It is normally used to tokenize their real-world assets and commodities. To make it easy for individuals to get digital ownership and offer access to the global market. Rexas Launchpad: This feature helps the asset owners raise funds for their tokenized assets, offering liquidity and new investment options for the crypto users. Rexas Estate: The project's one of the most exciting features is Rexas Estate which enables crypto users to co-own the real-world assets and earn passive income in stablecoins. Furthermore, the total supply of RXS tokens is 1 billion. Rexas project has raised over \$5.85M until now, with 75% of the fifth stage of presale over. This presale program is important for the platform as it allows early investors to engage in what might turn into a revolutionary solution for RWA tokenization. Moreover, Rexas Finance has been listed on CoinMarketCap and CoinGecko, moreover, it will be listed on top 3 tier 1 exchanges. About Rexas Finance (RXS) Rexas Finance is the user's gateway to the future of asset management. Rexas allows users to own or tokenize virtually any real-world asset, from real estate and art to commodities and intellectual property worldwide. With Rexas, users gain access to a world where asset liquidity and investment choices are boundless. - Fake Zoom link phishing attack led to \$6.09 million in stolen GIGA tokens. - Malware installed on victim's laptop drained crypto wallets, including 95.3M GIGA. A Gigachad (GIGA) token investor lost \$6.09 million after falling victim to a phishing attack through a fake Zoom meeting link. The large-scale sell-off caused an unusual price drop in the GIGA token on November 12, sparking community

speculation before prominent investor “Still in the Game” confirmed the incident. In a statement on social media, Still in the Game disclosed the phishing attack, explaining, “Just want to be transparent” the massive sell on GIGA today was due to one of my wallets being drained by a fake Zoom link. This hurts bad, but I will be back. I will always stay in the game.” This proactive warning highlighted the dangers of increasingly sophisticated phishing methods targeting cryptocurrency investors. Meanwhile, Crypto investigation firm Scam Sniffer detailed that the investor had clicked on a deceptive Zoom call link, which redirected them to a malicious website designed to extract sensitive wallet details. The phishing site then installed malware on the investor’s device, which the attacker used to empty three crypto wallets. Blockchain analytics platform Onchain Lens reported that the hacker drained 95.3 million GIGA tokens, worth \$6.09 million. These stolen assets were quickly exchanged for 11,759 Solana (SOL), valued at around \$2.1 million. And subsequently converted to stablecoins Tether (USDT) and USD Coin (USDC). The attacker then moved the stablecoins to an undisclosed wallet. It is with an additional 700 SOL transferred indirectly to the crypto exchange KuCoin. FBI To Step In In response to the theft, Still in the Game has engaged both the U.S. Federal Bureau of Investigation (FBI) and a forensic team to aid in tracking and recovering the stolen assets. Although recovery remains uncertain, the investor expressed optimism about recouping losses in the current bullish market cycle, stating, “I’m going to make it all back and more. Just watch me.” Phishing attacks are on the rise in the cryptocurrency space, impacting investors from meme coins to established assets. With digital assets’ popularity soaring, experts urge investors to remain vigilant against phishing and malware attacks. Highlighted News Of The Day Dogecoin Surges 50% and Hits 3.5 Year High as Bull Run Fuels Gains

- Worldcoin has surged 23.55% in the last 24 hours reaching new trading levels. - The altcoin’s daily trading volume surged by 79.14% as per CMC data. After nearly six months of speculations, the crypto market has finally witnessed the bull run that it was waiting for. With Bitcoin’s rally, altcoins have followed suit in the upward movement over the past week. In the last 24 hours, the community rejoiced at the market cap reaching closer to the \$3 trillion mark. One specific altcoin, Worldcoin, also initiated its upward movement with a significant price surge. The altcoin has been maintaining upward movements in the past few days, however, particularly, in the last 24 hours, WLD has witnessed a price breakout. The altcoin’s daily chart shows a price surge of 23.55% surge causing Worldcoin to reach a 28-day high of \$2.85. In the Asian afternoon hours of November 11, WLD was trading at a low of \$2.15 before moving upwards to the current levels. At the time of writing, the cryptocurrency was trading at \$2.63 as per CMC data. Zooming out, over the past week WLD has rallied by 53.63% rising from a low of \$1.6. The token also surpassed the \$2 milestone in the last 7 days. Additionally, the cryptocurrency also recently rebranded World and has launched its own blockchain. World Chain went live on October 17 as per reports. Will Worldcoin Rally to Further Highs? Inferring to technical indicators, WLD’s Moving Average Convergence Divergence (MACD) shows an existing positive trend as per TradingView data. The altcoin’s signal line recently crossed over the MACD line suggesting the above inference. Furthermore, the token’s bull power indicator value stands at 1.21 while its bear power indicator value is at a low of 0.78. These indicators and the prevailing external conditions in the market highlight expectations for Worldcoin to continue its upward rally. In such a case, the altcoin can be expected to face resistance at \$2.65 and \$2.96. Meanwhile, other altcoins such as DOGE and Solana have also factored in bullish movements in the last 24 hours. Highlighted Crypto News Today:

Turning a small stake into millions isn’t just a dream; it’s possible with the right cryptocurrencies. As the market evolves, five promising coins priced under a dollar are catching attention for their potential to deliver extraordinary returns by 2026. Savvy investors are eyeing these affordable tokens, eager to capitalize on their growth before prices soar. One standout is XYZVerse (XYZ), a memecoin blending sports passion with crypto, aiming for remarkable growth through community-driven success. The All-Sports Meme Token You Can’t Afford to Bench! XYZ is your exclusive VIP pass to a sports-driven, meme-fueled revolution. Think of it as the MVP of the XYZVerse ecosystem, where degens can score big off the growing demand for prediction markets Picture this: Polymarket hitting \$1 billion in trading volume during the US presidential election “now throw in the hype of meme coins and the thrill of sports betting. With millions of sports fans ready to hit the field and cash in the XYZVerse ecosystem is set to keep expanding” and your rewards will slam dunk through the roof! >>>XYZ presale is your first-quarter chance to get in before the mind-blowing explosion!<<< In 2024, meme coins are the undisputed champions of the crypto world, and XYZ is set to crush the competition. With potential thousand-fold returns that will blow past the finish line, the presale plan draws a hefty 99,900% growth by the TGE. Forget about BOME’s 5,000% rise or WIF’s 1,000% rally “XYZ is here to outscore them all! With upcoming listings on major CEX and DEX platforms, rock-solid defense in the form of audited smart contracts, and a fully vetted team, XYZ is already ahead of the game. The first-mover advantage is key here” get in before the crowd storms the field, and you’ll be sitting on way bigger returns! JasmyCoin (JASMY) In a world where our devices are constantly connected, JasmyCoin (JASMY) is taking a stand for personal data ownership. Developed by Tokyo-based Jasmy Corporation, this cryptocurrency project combines the Internet of Things (IoT) with blockchain technology. The goal? To give users full control over their personal information. By creating a secure platform, Jasmy allows individuals to safely store, share, and even monetize their data. Service providers and data users can connect directly, fostering a trustworthy environment where personal assets are respected. As concerns about data privacy grow, JasmyCoin’s approach is gaining attention. By decentralizing data storage using edge computing and the InterPlanetary File System (IPFS), it ensures that individuals, not corporations, own their data. This sets it apart from many other cryptocurrencies that focus solely on financial transactions. In the current market, where the value of data is skyrocketing, JASMY offers a unique proposition. It taps into the rising demand for privacy and control, positioning itself well among emerging digital assets. With the IoT market

expanding and more devices coming online, JasmyCoin™s vision aligns with global trends, making it a noteworthy player in the crypto space. XRP (XRP) Imagine sending money across the world as easily as sending an email. That's the promise of XRP, a cryptocurrency on the XRP Ledger. Created by Jed McCaleb, Arthur Britto, and David Schwartz, XRP is fast, low-cost, and open to everyone. With no central authority, transactions are quick, secure, and irreversible. You don't need a bank account to use it, making it accessible everywhere. XRP's goal is seamless money movement, no matter your location or currency. XRP could change how we think about payments. Its technology allows near-instant transfers with minimal fees, a big advantage over traditional systems and other cryptocurrencies. While some coins are stores of value, XRP aims to bridge currencies globally. In the current market, XRP stands out due to its real-world use cases and support from Ripple. Though crypto markets are volatile, XRP's focus on practical utility could make it attractive for those eyeing the future of digital payments.

Pepe (PEPE) PEPE is a new memecoin launched on Ethereum as a tribute to the famous Pepe the Frog internet meme created by Matt Furie. Embracing its roots, PEPE keeps things simple and fun, appealing to the crypto community with a no-tax policy and by being upfront about its lack of utility. In late April to May 2023, PEPE experienced an explosive surge, with its market cap reaching a peak of \$1.6 billion. Early holders saw astonishing gains, and the coin attracted a strong community of like-minded enthusiasts. The rise of PEPE has sparked what some call a "memecoin season," with other meme-based cryptocurrencies experiencing wild price swings. PEPE's roadmap includes listings on major exchanges and a planned "meme takeover." With the upcoming Bitcoin halving and hopes for a new bull run, many are keeping a close eye on PEPE. While it's uncertain how the coin will perform in the long term, its rapid ascent and dedicated following suggest it could continue to make waves in the current market cycle, much like Dogecoin and Shiba Inu did before it.

Shiba Inu (SHIB) Shiba Inu (SHIB) is a cryptocurrency that started as a joke but is now turning heads. Inspired by Dogecoin, it sets itself apart by running on the Ethereum blockchain. This means it can work with many other apps and tools in the Ethereum world. Launched in August 2020 by someone named Ryoshi, SHIB began with a whopping one quadrillion tokens. Half of these tokens were given to Vitalik Buterin, one of the creators of Ethereum. He donated a big chunk to help with COVID relief in India and destroyed (or "burned") 40% of the total tokens, making the remaining SHIB more valuable. Unlike Dogecoin, SHIB's connection to Ethereum allows it to do more than just be a meme. It has its own decentralized exchange called ShibaSwap, where people can trade tokens without a middleman. SHIB also plans to introduce its own platform for digital art (NFTs) and a system where holders can vote on decisions (a DAO). These developments show that SHIB wants to be more useful. In the current market, where people are looking for coins with real-world uses, SHIB's plans could make it more attractive to investors compared to other meme coins.

Conclusion Amid the 2024 bull run, JASMY, XRP, PEPE, and SHIB hold promise, but XYZVerse (XYZ) could outshine them with its unique sports memecoin targeting 20,000% growth. You can find more information about XYZVerse (XYZ) here: Disclaimer: TheNewsCrypto does not endorse any content on this page. The content depicted in this press release does not represent any investment advice. TheNewsCrypto recommend our readers to make decisions based on their own research. TheNewsCrypto is not accountable for any damage or loss related to content, products, or services stated in this press release.

Shiba Inu, once a sensation in the cryptocurrency arena, has seen a significant drop from its peak value, causing many to question its ongoing allure. As its momentum wanes, investors are on the lookout for fresh opportunities that could offer substantial returns. Emerging tokens are catching attention, showing promise to potentially outshine established players in the market. One such token is XYZVerse (XYZ), the first all-sport memecoin uniting fans across football, basketball, MMA, and eSports, aiming to become a cultural icon in both sports and crypto. Dominate the Field with XYZ: The Next Meme CoinChampion! The game is on, and XYZ is leading the charge in the meme coin arena! This sensational all-sports meme token has hit the market with unstoppable momentum, knocking out weak competitors and scammy cryptos. As it charges ahead, XYZ is set to deliver jaw-dropping gains, leaving the likes of BOME and WIF far behind. With eyes on a staggering 99,900% growth, XYZ is ready to claim the meme coin crown in the next crypto bull marathon! ðŸŽ', Rule the game, cash in as the bets roll in ðŸŽ', XYZ is the star player in XYZVerse â€” the ultimate fusion of sports thrill and meme culture. This community-centered ecosystem is the perfect playground for crypto degens and sports fans alike, offering everything from entertainment apps to prediction markets. Think back to Polymarket's \$1 billion trading volume during the US elections betting frenzy, and now, picture that on steroids with XYZVerse. With millions of sport bettors getting ready to jump in the action, opportunities for early investors in XYZ are really huge! XYZ is currently undervalued, and with major listings on the way, presale participants stand to secure life-changing gains. >>>Don't miss your shot at being part of the XYZ winning team!<<< Dogwifhat (WIF) Dogwifhat (WIF) is the latest dog-themed meme coin catching attention on the Solana blockchain. Inspired by the viral Dogwifhat meme, this coin embraces the fun and quirky side of internet culture. Meme coins like WIF are known for building strong communities around shared jokes and viral trends. They stand out by turning internet memes into digital assets, creating a sense of camaraderie among holders who enjoy being part of something humorous and light-hearted. What makes WIF interesting is its potential to grow within the vibrant Solana ecosystem. Solana's fast and low-cost transactions could give WIF an edge over meme coins on other platforms. In a market where meme coins like Dogecoin and Shiba Inu have shown that community and hype can drive significant attention, WIF might attract those looking for the next big thing. While the crypto market is always unpredictable, and meme coins are especially volatile, the unique charm of Dogwifhat could make it an appealing choice for enthusiasts who appreciate both memes and the potential for high-risk, high-reward investments.

Pepe (PEPE) PEPE is a new memecoin launched on Ethereum as a tribute to the famous Pepe the Frog internet meme created by Matt Furie. Embracing its roots, PEPE keeps things simple and fun, appealing to the crypto community with a no-tax policy and by being upfront about its lack of utility. In late April to May 2023, PEPE experienced an explosive surge, with its market cap reaching a peak of \$1.6 billion. Early holders saw astonishing gains, and the coin attracted a strong

community of like-minded enthusiasts. The rise of PEPE has sparked what some call a “memecoin season,” with other meme-based cryptocurrencies experiencing wild price swings. PEPE’s roadmap includes listings on major exchanges and a planned “meme takeover.” With the upcoming Bitcoin halving and hopes for a new bull run, many are keeping a close eye on PEPE. While it’s uncertain how the coin will perform in the long term, its rapid ascent and dedicated following suggest it could continue to make waves in the current market cycle, much like Dogecoin and Shiba Inu did before it.

Conclusion With SHIB’s decline, alternatives like WIF and PEPE offer new prospects. Yet, XYZVerse (XYZ) stands out by merging memes and sports in a community-driven platform aiming for significant growth. You can find more information about XYZVerse (XYZ) here: Disclaimer: TheNewsCrypto does not endorse any content on this page. The content depicted in this press release does not represent any investment advice. TheNewsCrypto recommends our readers to make decisions based on their own research. They stand out by turning internet memes into digital assets, creating a sense of camaraderie among holders who enjoy being part of something humorous and light-hearted. What makes WIF interesting is its potential to grow within the vibrant Solana ecosystem. Solana’s fast and low-cost transactions could give WIF an edge over meme coins on other platforms. In a market where meme coins like Dogecoin and Shiba Inu have shown that community and hype can drive significant attention, WIF might attract those looking for the next big thing. While the crypto market is always unpredictable, and meme coins are especially volatile, the unique charm of Dogwifhat could make it an appealing choice for enthusiasts who appreciate both memes and the potential for high-risk, high-reward investments. Dogecoin (DOGE) Back in 2013, Dogecoin started as a joke. Billy Marcus and Jackson Palmer created it as a fun alternative to serious cryptocurrencies like Bitcoin. With a Shiba Inu dog as its logo, it quickly caught the internet’s attention. Unlike Bitcoin, which is scarce, Dogecoin was made to be abundant. New coins are mined every minute, and there’s no cap on how many can exist. In 2021, something surprising happened. Dogecoin’s value soared, reaching over \$50 billion in market cap. Social media buzz, especially from Elon Musk, turned this meme coin into a top ten cryptocurrency. Now, people are asking if Dogecoin has real potential. Its technology isn’t as advanced as some newer coins, but its strong community keeps it going. The limitless supply might seem like a problem, but it also means Dogecoin can stay affordable. In the current market, where many look for the next big thing, Dogecoin stands out for its simplicity and charm. While it may not have the cutting-edge features of other cryptocurrencies, its popularity and the backing of influential figures make it interesting to watch. Whether it’s a good investment now depends on where you think the market is headed, but Dogecoin’s journey shows that even a joke can turn into something serious. Pepe (PEPE) PEPE is a new memecoin launched on Ethereum as a tribute to the famous Pepe the Frog internet meme created by Matt Furie. Embracing its roots, PEPE keeps things simple and fun, appealing to the crypto community with a no-tax policy and by being upfront about its lack of utility. In late April to May 2023, PEPE experienced an explosive surge, with its market cap reaching a peak of \$1.6 billion. Early holders saw astonishing gains, and the coin attracted a strong community of like-minded enthusiasts. The rise of PEPE has sparked what some call a “memecoin season,” with other meme-based cryptocurrencies experiencing wild price swings. PEPE’s roadmap includes listings on major exchanges

and a planned “meme takeover.” With the upcoming Bitcoin halving and hopes for a new bull run, many are keeping a close eye on PEPE. While it’s uncertain how the coin will perform in the long term, its rapid ascent and dedicated following suggest it could continue to make waves in the current market cycle, much like Dogecoin and Shiba Inu did before it. Conclusion SHIB, WIF, DOGE, and PEPE have strong potential, but XYZVerse combines sports and meme culture, aiming for massive growth and community-driven success. As SHIB hints at a potential upswing fueled by expanding investor interest, the crypto market is abuzz with speculation about which tokens might be next to soar. Traders and enthusiasts are watching closely for digital currencies that combine popular themes with vibrant communities, anticipating significant growth opportunities in emerging assets. Enter XYZVerse (XYZ), an innovative memecoin uniting fans across football, basketball, MMA, and esports. By blending meme culture with sports passion, XYZ aims to surpass recent success stories with its unique community-driven ecosystem. Score Big with XYZ: The New Meme Coin Heavyweight The fans are losing it! The XYZ token is in the crypto ring, landing blows on the competition “ bullshit coins, worthless farming schemes, and scam projects. Like a true champ, this first-ever all-sports meme token has fought its way through the bear market with fearless momentum and shows no signs of slowing down. With eyes set on a roaring thousand-fold growth, XYZ is destined to leave the 2024 meme coin triumphants like BOME and WIF trailing in its wake. “ Own the field, earn while the crowd plays “ XYZ is more than just a benchwarmer in the meme coin game; it’s creating the ultimate playing field with XYZVerse, where the thrill of sports meets the energy of meme culture. With a roadmap equipped with entertainment dApps, prediction markets, and sports betting options, XYZ is poised to draw in millions of gamblers ready to join the action. Remember Polymarket’s massive \$1 billion trading volume during the US election betting fever? XYZ is gearing up for an even bigger win in the GameFi arena, letting its stakeholders cash in on the perfect combo of meme coin vibes, sports hype, and crypto mass adoption. “ Missed meme coin supercycle? “ By capitalizing on the ever-expanding gambling niche, XYZ is set to become the G.O.A.T of meme coins. BOME’s 5,000% takeoff and WIF’s 1,000% year-to-date rally are now relics of the past because XYZ is set to explode by over 9,900% after the TGE and outshine its sensational predecessors. Get in the game early to secure your spot “ currently undervalued, XYZ is going the distance to break new records! “ Rallying the community, securing the win “ XYZVerse will be the MVP in this bull run, giving the community the control to call the plays and steer the ecosystem’s direction. Active contributors will receive airdropped XYZ tokens as a reward for their dedication. With rock-solid tokenomics and plans for both CEX/DEX listings, XYZ is positioned for a championship run, ensuring a steady revenue flow and consistent token burns to keep the scoreboard in favor of a strong price and a thriving community. >>The XYZ presale is live “ don’t miss out on this knockout 99,900% opportunity!<< Shiba Inu (SHIB) Shiba Inu (SHIB) is a cryptocurrency that started as a joke but is now turning heads. Inspired by Dogecoin, it sets itself apart by running on the Ethereum blockchain. This means it can work with many other apps and tools in the Ethereum world. Launched in August 2020 by someone named Ryoshi, SHIB began with a whopping one quadrillion tokens. Half of these tokens were given to Vitalik Buterin, one of the creators of Ethereum. He donated a big chunk to help with COVID relief in India and destroyed (or “burned”) 40% of the total tokens, making the remaining SHIB more valuable. Unlike Dogecoin, SHIB’s connection to Ethereum allows it to do more than just be a meme. It has its own decentralized exchange called ShibaSwap, where people can trade tokens without a middleman. SHIB also plans to introduce its own platform for digital art (NFTs) and a system where holders can vote on decisions (a DAO). These developments show that SHIB wants to be more useful. In the current market, where people are looking for coins with real-world uses, SHIB’s plans could make it more attractive to investors compared to other meme coins. Conclusion SHIB and others are strong, but XYZVerse (XYZ) combines meme culture and sports, aiming for 20,000% growth and offering early adopters a unique, community-driven ecosystem. You can find more information about XYZVersus (XYZ) here: Disclaimer: TheNewsCrypto does not endorse any content on this page. The recent victory of Donald Trump in the 2024 U.S. presidential election has led to a surge in the memecoin market. Known for his pro-crypto stance, Trump’s campaign included promises that appealed to the crypto community, and his win has sparked optimism among investors. This positive sentiment has driven a wave of risk-on behavior, with memecoins seeing a notable uptick. As of November 6, the total market capitalization of memecoins hit a seven-month high of \$66.72 billion, showing a 21% increase within just 24 hours. Dogecoin (DOGE) led the market surge with a 14.5% rise over the past 24 hours and a 72% gain over the last month. Other popular memecoins also saw substantial growth: Shiba Inu (SHIB) rose by 5%, and Pepe (PEPE) saw a 12.6% increase. Additionally, tokens linked to political figures, especially those associated with President-elect Trump, experienced significant growth. The total market cap of political memecoins climbed by 17%, reaching over \$640 million, with a striking 87% increase in trading volume. Where Fun Meets Profits: \$XYZ “ A New Entrant with Major Potential In the midst of this energized market, \$XYZ’s part of the XYZverse, a sports-themed memecoin platform “also shows impressive potential. XYZverse is unique in that it unites fans of football, basketball, MMA, Dota 2, and more, creating a community that’s driven not only by a love for sports but by the thrill of high-stakes investment. Currently in its presale phase, \$XYZ has just reached Stage 6, pushing its price up to \$0.0005. With a listing target of \$0.1, early buyers could see a significant increase of 19,900% from this low entry point. Given the favorable crypto sentiment

following the election, \$XYZ is well-positioned to take advantage of the current market momentum. Ready to Profit? Get Into \$XYZ Now and Watch It Soar! A Promising Roadmap for Long-Term Growth Beyond its immediate gains, XYZVerse has a detailed roadmap focused on building a robust and engaging ecosystem. Its play-to-earn gamification strategy and partnerships with leading sports platforms will allow users to earn rewards and enhance community engagement. As \$XYZ powers this platform, itâ€™s setting itself up as a utility token with solid real-world applications, ensuring its relevance and growth potential in the long term. Step In Now! \$XYZ Is Rising Fast, and Itâ€™s Your Time to Join! Built for Endurance and Driven by Community On the Polygon network, XYZVerse leverages proven revenue streams, benefiting from a dedicated community that plays a key role in shaping the platform. Active users receive rewards and incentives, differentiating XYZ from other memecoins that lack substantial user engagement. As XYZVerse continues to grow, itâ€™s looking to flip the script in the memecoin world by being a project that not only entertains but offers real value and profitability. Backed by a loyal community and a sustainable model, \$XYZ is setting itself apart as a unique investment opportunity, poised to make waves in the memecoin space. With \$XYZ, investors have the chance to be part of a platform thatâ€™s changing the game! Donâ€™t miss out on the opportunity to be part of this fast-growing sports-driven memecoin universe. Certain tokens are emerging with the potential to deliver remarkable returns in 2024. These digital assets are drawing attention for their unique features and the possibilities they hold for investors. Observers are keen to see which of these tokens might lead the way in the next wave of crypto growth. Among them, XYZVerse shines as a pioneering memecoin that unites sports fans, aiming for exponential growth by blending meme culture with a passion for athletics. Dominate the Field with XYZ: The Next Meme Coin Champion! The game is on, and XYZ is leading the charge in the meme coin arena! This sensational all-sports meme token has hit the market with unstoppable momentum, knocking out weak competitors and scammy cryptos. As it charges ahead, XYZ is set to deliver jaw-dropping gains, leaving the likes of BOME and WIF far behind. With eyes on a staggering 99,900% growth, XYZ is ready to claim the meme coin crown in the next crypto bull marathon! ðŸ’ Rule the game, cash in as the bets roll in ðŸ’ XYZ is the star player in XYZVerse â€“ the ultimate fusion of sports thrill and meme culture. This community-centered ecosystem is the perfect playground for crypto degens and sports fans alike, offering everything from entertainment apps to prediction markets. Think back to Polymarketâ€™s \$1 billion trading volume during the US elections betting frenzy, and now, picture that on steroids with XYZVerse. With millions of sport bettors getting ready to jump in the action, opportunities for early investors in XYZ are really huge! XYZ is currently undervalued, and with major listings on the way, presale participants stand to secure life-changing gains. >>>Donâ€™t miss your shot at being part of the XYZ winning team!<<< XRP (XRP) Imagine sending money across the world as easily as sending an email. Thatâ€™s the promise of XRP, a cryptocurrency on the XRP Ledger. Created by Jed McCaleb, Arthur Britto, and David Schwartz, XRP is fast, low-cost, and open to everyone. With no central authority, transactions are quick, secure, and irreversible. You donâ€™t need a bank account to use it, making it accessible everywhere. XRPâ€™s goal is seamless money movement, no matter your location or currency. XRP could change how we think about payments. Its technology allows near-instant transfers with minimal fees, a big advantage over traditional systems and other cryptocurrencies. While some coins are stores of value, XRP aims to bridge currencies globally. In the current market, XRP stands out due to its real-world use cases and support from Ripple. Though crypto markets are volatile, XRPâ€™s focus on practical utility could make it attractive for those eyeing the future of digital payments. Shiba Inu (SHIB) Shiba Inu (SHIB) is a cryptocurrency that started as a joke but is now turning heads. Inspired by Dogecoin, it sets itself apart by running on the Ethereum blockchain. This means it can work with many other apps and tools in the Ethereum world. Launched in August 2020 by someone named Ryoshi, SHIB began with a whopping one quadrillion tokens. Half of these tokens were given to Vitalik Buterin, one of the creators of Ethereum. He donated a big chunk to help with COVID relief in India and destroyed (or â€œburnedâ€) 40% of the total tokens, making the remaining SHIB more valuable. Unlike Dogecoin, SHIBâ€™s connection to Ethereum allows it to do more than just be a meme. It has its own decentralized exchange called ShibaSwap, where people can trade tokens without a middleman. SHIB also plans to introduce its own platform for digital art (NFTs) and a system where holders can vote on decisions (a DAO). These developments show that SHIB wants to be more useful. In the current market, where people are looking for coins with real-world uses, SHIBâ€™s plans could make it more attractive to investors compared to other meme coins. Conclusion In the 2024 bull run, XRP, Shiba Inu, and especially XYZVerse offer significant potential, with XYZVerse aiming for 20,000% growth by uniting sports fans in a unique meme coin ecosystem. Tokens are drawing significant attention for their potential to deliver substantial returns. Priced below two dollars, these digital assets are captivating investors eager to uncover the next standout performer. With market momentum shifting, a blend of well-known and emerging coins could be on the verge of notable breakthroughs. One such promising contender is XYZVerse, a unique memecoin that fuses sports passion with crypto innovation, aiming to become a cultural phenomenon and achieve impressive growth. The All-Sports Meme Token You Canâ€™t Afford to Bench! XYZ is your exclusive VIP pass to a sports-driven, meme-fueled revolution. Think of it as the MVP of the XYZVerse ecosystem, where degens can score big off the growing demand for prediction markets Picture this: Polymarket hitting \$1

billion in trading volume during the US presidential election – now throw in the hype of meme coins and the thrill of sports betting. With millions of sports fans ready to hit the field and cash in the XYZVerse ecosystem is set to keep expanding – and your rewards will slam dunk through the roof! >>>XYZ presale is your first-quarter chance to get in before the mind-blowing explosion!<<< In 2024, meme coins are the undisputed champions of the crypto world, and XYZ is set to crush the competition. With potential thousand-fold returns that will blow past the finish line, the presale plan draws a hefty 99,900% growth by the TGE. Forget about BOME’s 5,000% rise or WIF’s 1,000% rally – XYZ is here to outscore them all! With upcoming listings on major CEX and DEX platforms, rock-solid defense in the form of audited smart contracts, and a fully vetted team, XYZ is already ahead of the game. The first-mover advantage is key here – get in before the crowd storms the field, and you’ll be sitting on way bigger returns! Cardano (ADA) Cardano is making waves in the cryptocurrency world with its native token, ADA. Unlike many traditional blockchains, Cardano is built with sustainability and scalability at its core. It uses the Ouroboros proof-of-stake mechanism, which is far more energy-efficient than the energy-hungry proof-of-work models like Bitcoin’s. This means Cardano can process transactions without the hefty environmental cost. Its innovative two-layer system separates transaction processing and smart contract computations. The Cardano Settlement Layer handles the transactions, while the Cardano Computing Layer manages smart contracts. This design allows Cardano to potentially process up to a million transactions per second, making it one of the fastest in the industry. In the current market, ADA stands out as a promising option. With growing concerns about the environmental impact of cryptocurrencies, Cardano’s green approach is attracting attention. While Ethereum’s ETH has been a leader in smart contracts, Cardano offers a compelling alternative with lower fees and higher efficiency. The introduction of Cardano native tokens in March 2021 has expanded its capabilities, allowing for secure and cost-effective interactions with smart contracts. As decentralized finance apps, crypto tokens, and blockchain games continue to grow, Cardano’s sustainable platform positions ADA as a strong contender in the evolving crypto landscape. Shiba Inu (SHIB) Shiba Inu (SHIB) is a cryptocurrency that started as a joke but is now turning heads. Inspired by Dogecoin, it sets itself apart by running on the Ethereum blockchain. This means it can work with many other apps and tools in the Ethereum world. Launched in August 2020 by someone named Ryoshi, SHIB began with a whopping one quadrillion tokens. Half of these tokens were given to Vitalik Buterin, one of the creators of Ethereum. He donated a big chunk to help with COVID relief in India and destroyed (or –burned–) 40% of the total tokens, making the remaining SHIB more valuable. Unlike Dogecoin, SHIB’s connection to Ethereum allows it to do more than just be a meme. It has its own decentralized exchange called ShibaSwap, where people can trade tokens without a middleman. SHIB also plans to introduce its own platform for digital art (NFTs) and a system where holders can vote on decisions (a DAO). These developments show that SHIB wants to be more useful. In the current market, where people are looking for coins with real-world uses, SHIB’s plans could make it more attractive to investors compared to other meme coins. Conclusion ADA and SHIB are promising, but XYZVerse (XYZ) stands out by uniting sports fans in a community-driven ecosystem, aiming for remarkable growth in the 2024 bull run. You can find more information about XYZVersus (XYZ) here: Disclaimer: TheNewsCrypto does not endorse any content on this page. Top tokens like Cardano (ADA) and new companies like Rexas Finance (RXS) are attracting investor interest as the market for cryptocurrencies shows fresh indicators of a possible bull run. One of the most well-liked blockchain initiatives because of its scalability and energy efficiency, Cardano is ready for a big climb. Rising sensation Rexas Finance, meantime, has been creating waves with its outstanding presale success. While Rexas Finance has the potential to soar from below \$0.20 to an astounding \$20 by mid-2025, analysts estimate Cardano may see a 1,000% rise. Here is the reason both tokens are destined for remarkable expansion. Cardano (ADA): A 1,000% Surge to Cross \$3 Thanks to its effective Proof-of-Stake (PoS) consensus mechanism and continuous developments in distributed apps (dApps), Cardano, presently at \$0.3, has positioned itself as one of the most exciting projects in the crypto market. Developers choose the blockchain team because of their considerable progress in enhancing transaction speeds, scalability, and interoperability. Experts predict a big price rise; Cardano is predicted to reach \$3, a 1,000% rise from its existing values. Several important elements will cause Cardano’s price to increase expectedly. As applications expand, demand for ADA is being driven by more dApp development and DeFi acceptance inside the Cardano ecosystem. Furthermore appealing is the forthcoming Hydra protocol, a layer-2 scaling solution, which promises lower prices and speedier transactions. Growing institutional interest in ADA as an energy-efficient Ethereum substitute helps to boost its price projection and brings it closer to the \$3 level. Rexas Finance (RXS): Expected to Reach \$20 by Mid-2025 As a new player in the decentralized finance (DeFi) market, Rexas Finance (RXS) has been getting a lot of attention. It started as a cheap token, but its ongoing presale, which is now in stage five and the token price is \$0.07, has shown amazing growth. Experts think that RXS could hit an amazing \$20 by the middle of 2025 because of its strong performance in the presale, strong community support, and unique approach to tokenization in the real world. Rexas Finance’s quick ascent, now in stage five at \$0.07 – much above its previous levels – has been mostly driven by its presale success. With about \$5.7 million raised and more than 114.6 million Rexas tokens sold, this outstanding presale success demonstrates great investor interest. Especially among early investors, this momentum shows rising project confidence and emphasizes the expanding need for RXS. The price should rise as every step advances, therefore providing a strong basis for the performance of the token once it goes public. Rexas Finance’s path has also included important turning points in its listings on CoinMarketCap and CoinGecko, two main crypto data sites. These listings provide the token with more credibility and visibility, allowing a larger audience to monitor its price, market cap, and performance criteria. Being on these reputable sites helps notify possible

investors of the validity and expansion possibilities of the project, therefore stimulating demand as it approaches public release. Rexas Finance started a \$1 million giving campaign to increase company visibility and draw even more capital. For individuals wishing to attend the presale, this campaign will pay 20 participants \$50,000 worth of RXS tokens apiece, therefore providing a significant incentive. This approach has generated a lot of awareness around Rexas Finance, enabling the project to strengthen the community and boost token flow before it opens. Conclusion Both rising players like Rexas Finance (RXS) and established tokens like Cardano (ADA) showing interesting expansion possibilities. Cardano's continuous growth and calculated improvements help it to be positioned for a 1,000% increase to top \$3, maybe by 2025. Driven by a strong presale performance, significant listings, a \$1 million giveaway, and a vision of practical application, Rexas Finance is arguing for its price to leap from below \$0.20 to \$20. Investors should, as usual, carefully evaluate their risk tolerance and keep informed about developments on these initiatives. For individuals looking for perhaps large returns, ADA and RXS offer special chances in the current crypto scene since they have significant catalysts in place to drive remarkable increases over the next few years. For more information about Rexas Finance (RXS) visit the links below: - Website: <https://rexas.com> - Win \$1 Million Giveaway: <https://bit.ly/Rexas1M> - Whitepaper: <https://rexas.com/rexas-whitepaper.pdf> - Twitter/X: <https://x.com/rexasfinance> - Telegram: <https://t.me/rexasfinance> Disclaimer: TheNewsCrypto does not endorse any content on this page. - Bitcoin crosses \$80,000 for the first time, with a market cap exceeding \$1.5 trillion. - BlackRock and Fidelity ETFs add over \$1.6 billion to Bitcoin, signaling institutional demand. Bitcoin's price has soared past the \$81,000 mark, setting a new record in market history, with the cryptocurrency reaching a market cap of over \$1.5 trillion just days after Donald Trump's election as President of the United States. Tokens including Ethereum, Dogecoin, and Cardano, have also seen notable gains, reflecting broader bullish sentiment in the crypto market. During his campaign, Trump promised to make the U.S. a global crypto leader, proposing a strategic Bitcoin reserve and pledging to appoint pro-crypto regulators. Since his victory on November 6, Bitcoin has surged by 15.65%, marking its best weekly performance since February. The current Bitcoin rally builds on a roughly 81% increase in 2024, spurred by strong demand for U.S.-based Bitcoin ETFs and interest rate cuts. This growth rate has positioned BTC as an outperformer relative to traditional investments like stocks and gold. ETF activity, particularly from BlackRock, has played a substantial role in this upward trend. BlackRock recorded its largest-ever Bitcoin inflow, adding \$1.12 billion in Bitcoin holdings last week. This influx signals institutional confidence in Bitcoin, further amplifying anticipation for a prolonged bull run, with analysts projecting that Bitcoin could approach the \$100,000 mark in the coming weeks. Bitcoin Withdrawals Surge as RSI Signals Bullish Momentum In a recent research note, Alex Thorn, head of research at Galaxy Digital, highlighted the potential for a "golden era" for crypto under Trump's administration. Trump's pro-crypto stance, combined with a team of crypto advocates, could lead to significant policy shifts benefiting the industry. Meanwhile, recent data on Binance reveals intensified withdrawals, suggesting that major holders are moving their assets off exchanges to secure them. In the past hour alone, five new wallets withdrew 745.5 BTC, worth \$59 million. Since November 6, a total of 32 fresh wallets have withdrawn 5,364 BTC, equating to \$425 million, reflecting a trend of heightened outflows from Binance. Technical analysis supports the bullish sentiment, with Bitcoin's Relative Strength Index (RSI) currently overbought at 78.67, indicating strong buying momentum. The 9-day and 21-day moving averages continue to trend upward, with recent crossovers reinforcing upward momentum. If Bitcoin breaks its nearest resistance level of \$82,000, it could continue its ascent toward the highly anticipated \$100,000 mark. On the downside, support levels stand at \$77,500 and \$74,700, where prices may find stability if a correction occurs.

- Dogecoin rallies 25% with whale accumulation, reaching multi-year high levels. - Key resistance breached; traders anticipate potential 50% upward rally. Dogecoin (DOGE), the leading cryptocurrency in the memecoin sector, has made impressive gains over the past 24 hours, surging by 25% amidst strong market momentum. With Bitcoin climbing above \$81,000, investors and analysts are dubbing November "Moonvember" as the market greed index reaches a high of 79. Dogecoin's trading volume has also seen an exceptional 188% rise, indicating renewed interest from retail investors and major holders, or "whales," who have been accumulating DOGE rapidly. According to data from Santiment, whale wallets holding between 100 million and 1 billion DOGE have collectively boosted their holdings, rising from 2.68 million to over 30.56 million DOGE within a short span. This accumulation pattern has often signaled market bottoms in the past, suggesting that Dogecoin could be poised for further gains. Moreover, Dogecoin recently crossed a significant resistance level of \$0.223, a threshold it last reached in March 2024, and touched a three-year high of \$0.30294. Over the past week, DOGE has climbed an impressive 85%, marking one of its most significant rallies since 2021. Additionally, Coinglass reports a 19% surge in DOGE's Open Interest over the same period, reflecting high market confidence and signaling potential for further upside. Can DOGE Pull Historic Rally? Technically, Dogecoin is trading above its 200-day Exponential Moving Average (EMA) on the daily chart, a bullish indicator that highlights sustained upward momentum. Analysts suggest that if DOGE successfully closes above the resistance level at \$0.289, it could rally an additional 50%, reaching \$0.38 in the near term. This, coupled with the current bullish sentiment, positions Dogecoin for a continued rally, provided it holds above this key support level. As of the latest update, Dogecoin is trading around \$0.2782, with 86% of community sentiment in the past day and the daily RSI is at 86, suggesting that it is in an overbought situation. Highlighted News Of The Day Crypto Founder Behind Bars For \$400M Bitcoin Laundering on Darknet

As the crypto industry attracts fresh interest, Ripple (XRP) is showing encouraging indicators of expansion. XRP is expected to skyrocket to \$0.75 in Q4 2024 as positive events materialize; it is now trading at \$0.5122. The coin is becoming more popular with the possible acceptance of XRP as a payment method among BRICS countries and positive changes in its legal scene. Still, despite these positive forecasts, more and more investors are focussing on a rising competitor: Rexas Finance (RXS). Rexas Finance has rapidly become a top alternative for forward-looking investors with practical uses and an amazing presale performance. Rexas Finance trades at \$0.070 and shows potential to reach \$12.60 by 2025. Why XRP's Momentum Isn't Enough Given XRP gains from increasing use cases and institutional adoption, its possible increase to \$0.75 is very fascinating. XRP still mostly pays cross-border transactions, nevertheless. Although this utility is great, many investors are increasingly looking for tokens that use blockchain technology to link actual assets with financial activities going beyond simple transfers. Tokenizing physical objects has piqued interest in Rexas Finance (RXS), a project providing original ideas that make conventional assets traded on the blockchain easily available. Although XRP might witness increases in the next months, Rexas Finance provides a larger scope that attracts a wide spectrum of investors. Worth trillions, the real-world asset (RWA) tokenization industry has a huge potential for development and innovation—a sector in which RXS is actively positioned to seize. Rexas Finance (RXS) Gains Investor Confidence with a Real-World Asset Tokenization Platform Investors ready to profit on an RWA token meant to change asset ownership are attracted to the Rexas Finance presale, which is creating a lot of noise. In just five stages, the RXS presale has been rather successful having raised over \$5.65 million and sold more than 112 million tokens. Beginning at \$0.030 in Stage 1, RXS has jumped to \$0.070 in Stage 5, therefore demonstrating an astounding 163% price rise thus far. Those who join now stand to win from ongoing increases as the

presale moves forward; the price is set to be \$0.20 at debut in early 2025. Rexas Finance funds from a community-oriented standpoint, avoiding conventional venture capital and instead creating a committed investor base. This approach fits the goal of the project— that of building an all-accessible dispersed platform. Especially, RXS is projected to open on three of the top 10 tier-1 exchanges, so offering great exposure and liquidity. But presently, it boosts presence on CoinMarketCap and CoinGecko. One very notable quality of Rexas Finance is its dedication to accessibility and simplicity. Regardless of technical experience, the user-friendly interface of the platform is meant to suit both people and companies equally. Users may tokenize a variety of assets, from real estate to commodities, therefore enabling ownership and exchange in an open and safe manner. Rexas Finance distinguishes itself from conventional financial models with this simplicity of use and democratization of asset tokenizing. To add to the buzz, Rexas Finance is running a \$1 million RXS giveaway with around 176,000 entries thus far. Twenty lucky winners will each get \$50,000 in RXS, which will pique more presale demand. By finishing little chores on the Rexas Finance website, participants can raise their chances and help to create a fast-expanding community around the token. Future Growth Projections: Rexas Finance Set to Outpace XRP Although XRP's expected rise to \$0.75 could provide interesting returns, Rexas Finance presents much more growth potential. Based on current forecasts, RXS might soar to an amazing \$12.60 by 2025, meaning a stunning 18,000% increase from its presale price of \$0.070. Rexas Finance's position in the RWA tokenizing market fuels this expected expansion since blockchain technology is expected to drastically change asset management. Investors seeking this change from speculative assets to blockchain solutions with useful uses are swarming to Rexas Finance. RXS is rapidly establishing itself as the preferred token for individuals wishing to profit on the next wave of blockchain expansion with its community-driven approach, creative platform, and significant market demand. The Bottom Line XRP's upward path to \$0.75 indicates it still has promise, but Rexas Finance presents a forward-looking substitute with more expansion possibilities to investors. Despite XRP's expected rally, investors are betting big on Rexas Finance instead as it is poised to rally 18,000% in 2025. Rexas Finance might be the chance you have been waiting for if you are searching for a crypto investment with real-world uses and a strong growth projection. Don't miss the RXS presale, where early on a project scheduled to reinvent asset ownership and lead the next generation of crypto innovation can be accessed. As the crypto bull run gains momentum, investors are on the lookout for affordable altcoins with high potential for explosive growth. Here are five low-cost options you should consider right now: Dogecoin (DOGE) Dogecoin is a meme-based project that has huge potential in the crypto world. Dogecoin is a digital asset that utilizes a custom proof-of-work consensus protocol to enhance instant payments on its ledger. Shiba Inu (SHIB) Shiba Inu aims to develop a huge ecosystem in the crypto industry. Shibarium is a layer-2 blockchain solution that focuses on DeFi applications. In addition, the project has enabled NFTs and staking options, looking to add real-world uses and attract many users. Cardano (ADA) Cardano is a blockchain-crypto project that has huge potential to reach 25X. Moreover, the Cardano team is working continuously on the project's upgrade. Many developers and DApps, are migrating now to Cardano. This indicates the price of ADA will rise. Tron (TRX) TRON is a decentralized, blockchain-based operating system with smart contract functionality, proof-of-stake principles as its consensus algorithm, and a cryptocurrency native to the system, known as Tronix. Rexas Finance (RXS) Rexas Finance is the user's gateway to the future of asset management. Rexas Finance enables users to own or tokenize digitally any real-world asset, from real estate to commodities, on a worldwide scale. With Rexas Finance, users can gain a market where asset investment chances are endless. Rexas Token Builder: It is normally used to tokenize their real-world assets and commodities. To make it easy for individuals to get digital ownership and offer access to the global market. Rexas Launchpad: This feature helps the asset owners raise funds for their tokenized assets, offering liquidity and new investment options for the crypto users. Rexas Estate: The project's one of the most exciting features is Rexas Estate which enables crypto users to co-own the real-world assets and earn passive income in stablecoins. Rexas GenAI & DeFi: It is mainly utilized by artists who can use Rexas GenAI to develop and tokenize digital artworks, while Rexas DeFi allows users to swap digital assets across multiple networks with ease. Rexas Treasury: A multi-chain yield optimizer that enables users to earn compound interest on their crypto deposits, which adds one more layer of financial utility to the project. Despite all these features and benefits, Rexas Finance (RXS) has not reached any Venture Capital for investment, instead, the project began its presale on September 8, 2024. Furthermore, the total supply of RXS tokens is 1 billion. Rexas project has raised over \$5.45M until now, with the fourth stage of presale over. This presale program is important for the platform as it allows early investors to engage in what might turn into a revolutionary solution for RWA tokenization. Moreover, Rexas Finance has been listed on CoinMarketCap and CoinGecko, moreover, it will be listed on top 3 tier 1 exchanges. About Rexas Finance (RXS) Rexas Finance is the user's gateway to the future of asset management. Rexas allows users to own or tokenize virtually any real-world asset, from real estate and art to commodities and intellectual property worldwide. With Rexas, users gain access to a world where asset liquidity and investment choices are boundless. For more information about Rexas Finance (RXS) visit the links below: - Website: <https://rexas.com> - Win \$1 Million Giveaway: <https://bit.ly/Rexas1M> - Whitepaper: <https://rexas.com/rexas-whitepaper.pdf> - Twitter/X: <https://x.com/rexasfinance> - Telegram: <https://t.me/rexasfinance> Disclaimer: TheNewsCrypto does not endorse any content on this page. The new L1 blockchain of the DTX Exchange has generated significant attention in the crypto space, which has propelled Chainlink (LINK) and Arbitrum (ARB) upwards. This announcement has investors expecting a reversal on numerous cryptocurrencies with analysts expecting DTX to reach \$2. The interest in DTX has risen as the trading platform plans to combine its high-frequency trading offering with a broad lineup of assets, including both conventional and innovative ones. Chainlink (LINK) Sees Gains Amid CCIP Mainnet Launch Chainlink (LINK) has been on an upward trend in the past few days, with the mainnet release of the Cross-Chain Interoperability Protocol (CCIP). Self-serve, decentralized deployment, zero-slippage transfer, and other usability improvements are also provided, and industry insiders are convinced that they will help Chainlink become more competitive in the cross-chain market. This week, Sergey Nazarov, the co-founder of Chainlink discussed the future of finance in the blockchain environment and the expanding cooperation between Chainlink and SWIFT at SmartCon. **Link to Chainlink Goat Herd** to continue reading, Chainlink has been collaborating with SWIFT to enable blockchain-based transactions on financial messaging on the SWIFT network. Pilot tests should start next year to enable banks to originate digital asset transactions over SWIFT. This initiative puts Chainlink at the forefront of the new blockchain finance stack, thus logically increasing the utilization of LINK as one of the foundational layers in the emerging ecosystem. **Arbitrum (ARB) Faces Volatility Despite Positive Market Trends** The ARB token, used in Arbitrum, an Ethereum Layer 2 scaling solution, has also declined in price and is currently trading at \$0.5, down from \$0.54 per token last week. However, there has been a recent slump in the trading activity in ARB but volumes of trading has been registered to have risen by 8% According to the analysis, it is evident that the enlargement of the Bollinger bands around ARB is due to high volatility and it will be attractive to short-term traders. Analysts believe in the possibility to witness further ARB's value increase knowing the increasing significance of Layer 2 solutions as Ethereum evolves. The market cap ranking for the current analysis is ranked putting the company in a strategic position in the market despite of the recent oscillations. **DTX Exchange Presale Gains Momentum with Layer 1 Blockchain Launch** DTX Exchange, which is in the fourth presale round at the moment, is benefiting from the novel Layer 1 blockchain called VulcanX. Some investors, in their funding early-stage funding, offered \$6.3 million to the platform, which is a good indication. The native token of the DTX ecosystem which will cost \$0.08 in the presale is set to rise to \$1 by the end of this year, furthermore, experts believe that DTX could skyrocket 1000%. DTX intends to combine the features of centralized and decentralized trading components for its users, wherein users get non-custodial storage, an on-chain order book, and wallet-based trading facilities. It will have both centralized and decentralized components to facilitate trading and provide access to over 100,000 financial instruments, including stocks, forex, commodities, and cryptocurrencies along with issuing and managing various financial products derived from them, such as contracts for difference and others. Additionally, the platform has a high-speed VulcanX blockchain that can process over 100000 transactions per second thus catering to the needs of high-frequency traders. **Experts Anticipate DTX Rally as Broader Crypto Market Shows Bullish Trends** Analysts have highlighted the fact that the cryptocurrency could probably reach a high of \$2 in the

coming months in line with trading activities on the DTX. This prediction is in line with other predictions observed in the cryptocurrency market, for instance, the bull’s presentation for coins like Chainlink (LINK) and Ethereum (ETH). For instance, Ethereum is lately trading at over \$2,500 or thereabout and is predicted to head even higher with potential resistances expected to be around \$6,000. The DTX presale grants voting rights to token holders through staking, which will be meaningful to investors who like to engage. This governance model coupled with diversity in assets, and high-speed handling inherent in the adoption of exchange puts DTX in the right position in the decentralized financial (DeFi) industry. At the rate set by DTX, if they reach the projected uptick, then they are as valuable as tokens such as Dogecoin (DOGE) or even TRON (TRX). Therefore, as DTX Exchange is constantly adding new amenities to its VulcanX blockchain, fast growth may attract both institutional and retail investors, which means the emergence of a new market. Julia Ramirez, a 22-year-old finance major at New York University, has recently hit the jackpot in an unexpected way. An early investor in BONK, the Solana meme coin that skyrocketed in popularity earlier this year, Julia watched her modest initial investment explode in value as BONK’s price surged. Now, with BONK price volatility settling, she’s shifting her focus to BlockDAG, a new player in the cryptocurrency scene. Believing that BlockDAG has similar growth potential, Julia is all in, inspired by BlockDAG’s technological promise and its recent BULLRUN100 bonus offer, which gives a 100% bonus on all coin purchases and early access to an airdrop. Let’s dive into Julia’s journey, her decision to pivot to BlockDAG, and what makes BlockDAG an attractive choice for crypto enthusiasts.

From BONK to BlockDAG: Julia’s Crypto Journey Julia first heard about BONK from friends in her college finance club, who were abuzz with stories of a meme coin’s success. Inspired by Dogecoin’s rise, BONK captured the internet’s attention as a Solana meme coin with a distinctive appeal. Taking a leap of faith, Julia invested \$500, hoping to see modest returns. However, as BONK price soared, Julia found herself sitting on \$45,000, a life-changing sum for a college student. But BONK’s journey was volatile. With BONK price dipping as quickly as it surged, Julia knew it was time to look for a more stable yet promising opportunity. That’s when she discovered BlockDAG, a Layer 1 blockchain merging blockchain and Directed Acyclic Graph (DAG) technology for high-speed, decentralized transactions. She believes BlockDAG could replicate the success of BONK but with more sustainable growth, especially given BlockDAG’s innovative technology and recent advancements.

Why BlockDAG? Key Features and Benefits BlockDAG has quickly gained attention in the crypto community, distinguishing itself with a combination of blockchain and DAG technology, setting it apart from traditional blockchains. This unique setup allows BlockDAG to process transactions faster, positioning it as a competitor to networks like Solana, but with greater scalability. In addition to its technological appeal, BlockDAG has attracted a wave of users through its community-focused initiatives. For example, its TG Tap Miner game has drawn over 70,000 players, promoting social engagement and rewards through gaming. The company’s X1 Miner app also reached a milestone with over 200,000 downloads, showing a strong user base eager for decentralized applications. Julia sees BlockDAG’s community-centric approach as a sign of long-term potential, which makes her confident in moving her investments there. Adding to this momentum is BlockDAG’s latest BULLRUN100 bonus offer, which provides buyers a 100% bonus on their coin purchases, plus early access to its anticipated airdrop. Julia plans to take advantage of the BULLRUN100 bonus, believing this incentive could fuel BlockDAG’s growth by attracting more users and expanding its community, much like BONK attracted meme coin enthusiasts. The Roadmap and Community Engagement BlockDAG’s roadmap is another factor that caught Julia’s attention. Following the completion of its presale, which raised over \$105.5 million and yielded a remarkable 2100% return for early participants, BlockDAG is preparing for its mainnet test phase launch on November 14, 2024. The mainnet will undergo testing before going live, an important step in ensuring reliability and scalability. The BULLRUN100 bonus, a limited-time offer, has drawn a lot of interest from crypto enthusiasts, particularly those looking for the next big thing after the BONK price rally. Julia is excited about the opportunity to get early access to BlockDAG’s airdrop, seeing it as a chance to increase her holdings while being part of a promising project from the start. As a student familiar with the potential for explosive growth in the crypto world, she’s confident that BlockDAG’s roadmap and strategic incentives position it well to replicate, if not surpass, BONK’s success.

Looking Ahead: Can BlockDAG Match BONK’s Success? For Julia and others eyeing the crypto market, BlockDAG offers a compelling alternative to traditional meme coins. While BONK’s Solana meme coin rise was driven largely by internet hype and market speculation, BlockDAG is grounded in practical technology and has shown a clear commitment to building a lasting ecosystem. The combination of scalability, high-speed transactions, and community-driven applications makes BlockDAG stand out. Plus, the BULLRUN100 bonus offers an attractive entry point for buyers looking to maximize their initial investments, a sentiment that has resonated strongly with early adopters. Julia sees BlockDAG as a coin that not only has the potential to match the initial gains she saw with BONK but also sustain those gains over time.

Key Insights Julia Ramirez’s journey from a modest BONK investment to a serious commitment to BlockDAG is a reflection of the evolving interests in the crypto space. While BONK price fluctuations highlighted the risks of meme coins, BlockDAG’s innovative approach and community-oriented incentives, such as the BULLRUN100 bonus, offer a fresh avenue for growth. With BlockDAG’s mainnet launch just around the corner and its presale success showcasing strong demand, Julia is optimistic about what’s to come. For those inspired by Julia’s story, BlockDAG represents a potential “next big thing” in the crypto world. Whether it reaches the heights of BONK or blazes its own trail, one thing is clear: BlockDAG is positioning itself as a serious player in a market that’s always looking for the next breakthrough. And as Julia gears up for another exciting journey in crypto, she’s hopeful that BlockDAG could be the investment that,

once again, makes her future a little brighter Website: <https://blockdag.network> Presale: <https://purchase.blockdag.network> Telegram: <https://t.me/blockDAGnetworkOfficial> Discord: <https://discord.gg/Q7BxghMVyu>

Salt Lake City, Utah, November 8th, 2024, Chainwire CoinZoom, a leading global fintech and payments company, announced the launch of its Crypto Debit Card, empowering 617 million crypto owners worldwide to spend their digital assets instantly at over 130 million merchants in 150 countries. As Bitcoin reaches new highs, CoinZoom's innovative approach further accelerates the mainstream adoption of cryptocurrency, marking a significant step forward for the global crypto landscape. "More than 56% of consumers globally prefer debit cards for payments, and we've seen over 20% growth year-over-year in our U.S. debit card program," said Todd Crosland, CEO and Co-Founder of CoinZoom. "With that momentum, expanding internationally was a natural next step." The free CoinZoom Crypto Debit Card, available as a virtual card with a physical card coming soon, connects directly to a CoinZoom account, holding both local currencies and cryptocurrencies. Functioning like any standard debit card, it allows users to earn up to 5% back in crypto on eligible purchases through its "crypto-back" rewards program. The card is now available to users in 150 countries. "One of the biggest barriers to crypto adoption has been, 'Where can I actually spend it?'" said Ben Crosland, Head of Business Development and Co-Founder of CoinZoom. "With our card, users can pay in local currency or choose from cryptocurrencies like Bitcoin, Dogecoin, or Ethereum. Crypto is now available for everyday purchases, from groceries to dining." Previously, merchants had to choose individually to accept cryptocurrencies like Bitcoin, with major brands such as Starbucks, Gucci, Tesla, and Xbox leading the way. However, until now, there hasn't been a seamless way to spend top cryptocurrencies universally. CoinZoom's launch can signify a breakthrough moment for the crypto industry, which has gained increased support within the U.S. "With smartphone access and debit cards at the core of modern spending, this is a no-brainer," added Paxton Powers, CTO at CoinZoom. "Our card offers an easy way to earn crypto rewards on everyday purchases. Imagine earning \$300 in crypto per year just from paying your bills and buying essentials with our card." In addition to the debit card, CoinZoom's free remittance service, ZoomMe, benefits users by making funds instantly available for spending. "Combining ZoomMe with the CoinZoom debit card is a game-changer for anyone who sends money abroad," said Crosland. "Send funds to family in Mexico, and they can instantly use the funds for purchases or ATM withdrawals without the hassle of cash pickups or paperwork." About CoinZoom CoinZoom is a U.S.-based financial platform enabling users worldwide to send, spend, save, and invest seamlessly. As a U.S.-registered Money Services Business and Money Transmitter, CoinZoom is available in 45 states and operates with a SOC2 Type II Certification, recognized for stringent security standards. With diverse funding options like Apple Pay, Google Pay, debit and credit cards, wire transfers, ACH, and instant cash deposits at multiple U.S. retail locations, CoinZoom bridges traditional and digital finance. Its global peer-to-peer payment system, ZoomMe®, allows users in 169 countries to send cash or crypto instantly and fee-free, offering significant savings on remittance fees. The CoinZoom Crypto Debit Card provides unparalleled spending flexibility, allowing users to transact in USD or crypto at over 130 million merchants globally while earning up to 5% in crypto rewards. CoinZoom also has subsidiaries in Australia and Ireland and is pending registration as a Virtual Asset Service Provider (VASP) in Lithuania. Contact Director of Marketing Adrienne Blackett CoinZoom cz.marketing@coinzoom.com 1 385-355-6540

The shifting political climate is stirring excitement in the cryptocurrency market. Memecoins are drawing attention as investors speculate on assets that could experience remarkable growth. With recent developments, certain digital tokens are poised to capture significant interest from traders looking for potential high-return opportunities. Among these promising contenders is XYZVerse (XYZ), a memecoin uniting sports fans across various disciplines in a unique ecosystem that blends meme culture with athletic passion. The All-Sports Meme Token You Can't Afford to Bench! XYZ is your exclusive VIP pass to a sports-driven, meme-fueled revolution. Think of it as the MVP of the XYZVerse ecosystem, where degens can score big off the growing demand for prediction markets. Picture this: Polymarket hitting \$1 billion in trading volume during the US presidential election – now throw in the hype of meme coins and the thrill of sports betting. With millions of sports fans ready to hit the field and cash in the XYZVerse ecosystem is set to keep expanding – and your rewards will slam dunk through the roof! >>>XYZ presale is your first-quarter chance to get in before the mind-blowing explosion!<<< In 2024, meme coins are the undisputed champions of the crypto world, and XYZ is set to crush the competition. With potential thousand-fold returns that will blow past the finish line, the presale plan draws a hefty 99,900% growth by the TGE. Forget about BOME's 5,000% rise or WIF's 1,000% rally – XYZ is here to outscore them all! With upcoming listings on major CEX and DEX platforms, rock-solid defense in the form of audited smart contracts, and a fully vetted team, XYZ is already ahead of the game. The first-mover advantage is key here – get in before the crowd storms the field, and you'll be sitting on way bigger returns! Popcat (POPCAT) Remember the adorable cat that took the internet by storm in October 2020? POPCAT is back, but this time, it's making waves in the cryptocurrency scene. Inspired by the viral meme of Oatmeal, the cat with the hilarious open and closed mouth images, POPCAT has become a meme coin capturing the hearts of crypto enthusiasts. This token doesn't carry any financial promises or inherent value. It's all about fun and bringing a touch of joy to the often serious world of digital currencies. In a market filled with complex projects and high-stakes investments, POPCAT stands out by embracing simplicity and entertainment. While it doesn't boast groundbreaking technology or utility, its charm lies in its community and the smiles it brings. Similar to other meme coins like Dogecoin and Shiba Inu, POPCAT thrives on internet culture and community engagement. With the current market embracing meme tokens and the power of social media, POPCAT could be a delightful addition to the crypto conversation. It's not about financial gain but about being part of a lighthearted movement that's spreading positivity in the crypto space. Bonk Coin (BONK) BONK is a new memecoin on the Solana blockchain that's catching

everyone's attention. With a cute Shiba Inu as its mascot, BONK aims to shake up the crypto world by giving power back to the community. Unlike other coins controlled by big investors, BONK is all about its users. It surged over 100% after getting listed on Coinbase, one of the largest crypto exchanges. In a bold move, the team behind BONK airdropped half of its total supply to participants in Solana's NFT and DeFi projects. By mid-December 2023, BONK had become the third-largest memecoin by market cap, soaring more than 10,000% since the start of the year. Despite the challenges that memecoins often face, like wild price swings and massive supplies, BONK shows promise. It's becoming a key part of the growing Solana ecosystem, with plans that include launching a decentralized exchange called BonkSwap. This integration sets it apart from other memecoins that lack real utility. In the current market cycle, where investors look for coins with strong communities and real-world use, BONK stands out. Compared to other memecoins, BONK's focus on empowering its users and building useful applications makes it an attractive option. As the crypto market evolves, BONK could be a coin to watch. Conclusion POPCAT and BONK are poised for significant gains, but XYZVerse (XYZ) uniquely unites sports fans in a community-driven memecoin aiming for massive growth and cultural impact. You can find more information about XYZVerse (XYZ) here: Disclaimer: TheNewsCrypto does not endorse any content on this page. The content depicted in this press release does not represent any investment advice. TheNewsCrypto recommend our readers to make decisions based on their own research. TheNewsCrypto is not accountable for any damage or loss related to content, products, or services stated in this press release.

As political currents shift, meme-based cryptocurrencies are gaining newfound attention, with forecasts predicting substantial gains amid recent developments. A trio of these tokens stands out, poised for remarkable growth. Enthusiasts and investors are closely watching these assets, anticipating notable returns as they align with prevailing trends. Leading the way is XYZVerse (XYZ), a pioneering memecoin uniting fans of various sports and eSports, aiming to surpass previous market successes through a unique blend of meme culture and athletic enthusiasm. The All-Sports Meme Token You Can't Afford to Bench! XYZ is your exclusive VIP pass to a sports-driven, meme-fueled revolution. Think of it as the MVP of the XYZVerse ecosystem, where degens can score big off the growing demand for prediction markets Picture this: Polymarket hitting \$1 billion in trading volume during the US presidential election – now throw in the hype of meme coins and the thrill of sports betting. With millions of sports fans ready to hit the field and cash in the XYZVerse ecosystem is set to keep expanding – and your rewards will slam dunk through the roof! >>>XYZ presale is your first-quarter chance to get in before the mind-blowing explosion!<<< In 2024, meme coins are the undisputed champions of the crypto world, and XYZ is set to crush the competition. With potential thousand-fold returns that will blow past the finish line, the presale plan draws a hefty 99,900% growth by the TGE. The first-mover advantage is key here – get in before the crowd storms the field, and you'll be sitting on way bigger returns! Popcat (POPCAT) Remember the adorable cat that took the internet by storm in October 2020? POPCAT is back, but this time, it's making waves in the cryptocurrency scene. Inspired by the viral meme of Oatmeal, the cat with the hilarious open and closed mouth images, POPCAT has become a meme coin capturing the hearts of crypto enthusiasts. This token doesn't carry any financial promises or inherent value. It's all about fun and bringing a touch of joy to the often serious world of digital currencies. In a market filled with complex projects and high-stakes investments, POPCAT stands out by embracing simplicity and entertainment. While it doesn't boast groundbreaking technology or utility, its charm lies in its community and the smiles it brings. Similar to other meme coins like Dogecoin and Shiba Inu, POPCAT thrives on internet culture and community engagement. With the current market embracing meme tokens and the power of social media, POPCAT could be a delightful addition to the crypto conversation. It's not about financial gain but about being part of a lighthearted movement that's spreading positivity in the crypto space. Dogwifhat (WIF) Dogwifhat (WIF) is capturing hearts as the newest dog-themed meme coin on the Solana blockchain. Inspired by the viral Dogwifhat meme, WIF combines internet culture with cryptocurrency. Meme coins thrive on community and viral trends, often drawing from popular memes or pop culture moments. Dog-themed tokens, in particular, have a special place among crypto enthusiasts, adding a playful twist to the market. What sets WIF apart is its foundation on the Solana blockchain, known for fast transactions and low fees. This technology could give WIF an edge over other meme coins on slower networks. In the current market, where community-driven projects are gaining attention, WIF's growing popularity might make it stand out. While meme coins are unpredictable, the fun and engagement they offer can be appealing. Comparing WIF to other tokens, its unique meme origin and technological base could make it an attractive option for those looking to explore new trends. Conclusion POPCAT and WIF are promising, but XYZVerse is better: the first all-sport memecoin, aiming for 20,000% growth and uniting sports fans in a unique community. You can find more information about XYZVerse (XYZ) here: Disclaimer: TheNewsCrypto does not endorse any content on this page. - First Neiro On Ethereum (NEIRO) reached a new all-time high of \$0.002496. - The memecoin has been showing a consistent upward trend, with a 24-hour gain of over 22.5%. Today, Bitcoin (BTC) held steady at around \$76K during Asian trading hours on Friday after hitting an all-time high of \$76,943. Other leading altcoins such as Ethereum (ETH), Solana (SOL), Cardano (ADA), and Chainlink (LINK) also landed in the green chart, with the overall Market Fear & Greed Index reaching 72 (greed) out of 100, as per CMC data. Amid this surge, First Neiro On Ethereum (NEIRO), a relatively new memecoin, stole the spotlight, marking a 24-hour gain of over 22.5% and setting a new all-time high of \$0.002496. This

record-breaking performance surpassed its previous high, reached just a day earlier on November 7. At the time of writing, NEIRO was trading at \$0.002365 with a market cap of \$994 million after dipping to an intraday low of \$0.002046. The memecoin operates on the Ethereum blockchain and has gained attention for its community-driven nature and a total supply of 1 billion tokens. With no buy or sell tax and no team tokens, NEIRO aims to maintain a decentralized and user-focused approach, drawing comparisons to popular tokens like Dogecoin (DOGE). While NEIRO made impressive strides, meme coins such as Dogecoin (DOGE), Shiba Inu (SHIB), and others only saw modest gains between 1% and 3%. NEIRO's 24-Hour Technical Outlook A closer look at NEIRO's technical chart shows a steady upward trend, with the 9-day moving average crossing above the 21-day moving average—a bullish signal in technical analysis. The Chaikin Money Flow (CMF) at 0.27 suggests positive buying pressure, indicating more money flowing into the asset. However, with an RSI of 80, NEIRO is showing signs of being overbought, which could lead to a price pullback. If this occurs, the memecoin could face initial support at \$0.001636, potentially pushing the price down to \$0.001239. Despite this, if the bullish momentum continues, the memecoin may push even higher, aiming for a new all-time high above \$0.0025. Highlighted Crypto News Today:

The Shiba Inu token has seen a meteoric rise since 2020 when it launched at roughly current levels, soaring up over 1,319,863% as it has emerged as a favorite tether to Dogecoin. However, considering that there are 589 trillion tokens in total supply, the milestone of \$0.01 is quite unlikely to come any time soon. Nevertheless, the interest in meme coins and the change in the digital assets domain keep investors hopeful. With a whopping current market capitalization of over \$1.5 trillion, the broader cryptocurrency industry has now found itself as a store of value. Blockchain technology's potential to change the global economy underpins this immense market growth. By creating new channels of integrated finance and asset trading, blockchain technology is actively being explored by investors as an active way to take advantage of new opportunities. Ambitious Cross Asset Trading Platform: DTX Exchange DTX Exchange seeks to change the market by combining stocks, forex, and crypto trading on a single blockchain-integrated platform. Though the global forex market's daily trading volume is now \$6.6 trillion, the market infrastructure is still outdated. DTX Exchange provides over 100,000 trading instruments on one platform and wants to simplify access for retail investors with blockchain integration. DTX Exchange aims to simplify trading globally by allowing users to trade across asset classes (stocks, cryptos, ETFs). Its goal is to boost liquidity, increase openness, and simplify the retail trader's journey to trade in multiple markets. This approach has sparked interest, as many think DTX Exchange could completely shift trading and move cross-asset trading innovation forward. Expected to be the next phase for the DTX Exchange, its live trading features are set for a November launch. Sitting on passive yield opportunities for holders and revenue through trading fees, the rollout will occur. This has already made DTX Exchange a likely game changer in the blockchain-powered trading space. Phoenix Wallet and VulcanX Blockchain Secure the Ecosystem Recently, DTX Exchange has introduced the Phoenix Wallet, a non custodial digital wallet for security of asset management. Crypto assets "encompassing the first version of the wallet" will be supported by the wallet; plans to add stocks and forex assets in the future. Compared to traditional custodial protocols, this noncustodial solution increases ownership and less dependency on centralized parties, which is consistent with blockchain's distributed culture. The way that DTX Exchange works is that it runs on VulcanX blockchain, which is a Dedicated Proof of Stake (DPoS) system for both traditional and digital assets. Looking further, the mainnet was scheduled to launch in early 2025 after the testnet was launched, further anchoring DTX's establishment of asset custody and trading. The combination of Phoenix Wallet and VulcanX makes a secure place for the management of numerous assets appealing to many traders. DTX Exchange has funded its growth by choosing to skip over traditional venture capital and go with a community-driven presale, raising \$6.3 million from 120,000 investors. The widespread funding through this approach has also helped build community trust and speed up its growth. Regulatory Push and Market Momentum for DTX Exchange DTX Exchange has filed for regulatory licenses in 50 different regions to operate as a compliant global trading platform. These regulatory efforts send the signal that DTX Exchange is trustworthy and transparent in the financial markets. TX's visibility has been greatly increased by its listing on CoinMarketCap, which gives traders access to data and updates on DTX activities. In line with the exchange's vision to establish a robust and trustworthy platform for cross-asset trading, the exchange is working on regulatory assurance efforts. As the presale comes to a successful conclusion and the exchange gets ready for full launch, DTX Exchange has nearly \$6.3 million in funds that show it is ready for some serious momentum throughout its platform. The platform's community governance model, which positions holders as voters and holders, adds to the powers invested in the platform by investors. Conclusion Shiba Inu's journey toward the \$0.01 milestone remains uncertain, but platforms like DTX Exchange illustrate the transformative power of blockchain in modern finance. By combining crypto, stocks, and forex on one platform, DTX is redefining accessibility in asset trading. As DTX Exchange approaches its official launch, investors are watching closely, viewing it as a critical step in blockchain-driven financial innovation. Investors are looking for cryptocurrencies that might provide decent profits while getting ready for the next bull run in the Bitcoin market. Six interesting altcoins here have special qualities together with considerable growth potential that might make them really valuable. RXS Finance (RXS) Rexas Finance has positioned itself at the forefront of the tokenization of RWAs (real-world assets) employing a multitude of new technologies including artificial intelligence and DeFi applied on Ethereum. Rexas Finance creates fractionalised liquid digital tokens from conventional assets such as real estate, commodities, collectibles, and others, therefore reducing the cost of access to high-

value assets for the masses. With its fourth stage bringing \$5.45 million and now at the fifth stage with the tokens valued at \$0.07, the presale of the RXS token has shown promise. Based on the present listing, it is predicted to be launched for \$0.20 which implies it should rise at least 500% after being listed on tier 1 exchanges. Considering this, RXS is in the best position to observe a significant expansion in the upcoming bull run-dominating market. Along with Rexas GenAI, which lets one develop NFTs driven by artificial intelligence, we have the Rexas QuickMint Bots that can be readily combined with Telegram and Discord for basic token creation which makes RXS a reasonable investment for someone looking for a utility and upside. The \$1 million giveaway in RXS tokens, where 20 lucky participants win \$50,000 each by performing tasks also helps in increasing user interaction and boosting Rexas Finance's momentum. Notcoin (NOT) Notcoin (NOT), has shown promise with a 28% rise over the previous month. Actually, user adoption and interaction are clear-cut and seem to be supporting the worth of the coin. Given NOT transactions between the \$0.0175 and \$0.2 level, there is a lot of hype and enthusiasm and the coin might be headed toward a bullish phase. Should NOT overcome its \$0.019 resistance, the price may leap to \$0.05 or perhaps \$0.1 at best. In such cases, prices might revert to the \$0.018 level. With an RSI score of 42.68, the market in issue is also pretty erratic, and opinions of it are rather dubious. Notcoin is therefore an excellent investment for those ready to go through large swings in the coin for notable possible gains. Mallconomy (WOOT) Combining the finest aspects of game, economy, and Metaverse together makes Mallconomy (WOOT) unique. It creates a spatial GameFi economy in a metaverse designed like a mall allowing brands, companies, and consumers to live in the metaverse, within a mall. Some of the metaverse's elements, such as a Launchpad and a Rewards App that would be combined in the appearance of a metaverse, progressively reveal themselves. WOOT seems to be a great prospect for significant expansion as the metaverse keeps getting acceptance based on its principles and user orientation. Dogecoin (DOGE) Although of late the price performance has been flat with both bulls and bears pulling with similar vigor, Dogecoin (DOGE) seems to have not lost most investors who support it as the top meme coin. Right now one DOGE coin's worth falls between fourteen and sixteen cents. Though it has seen small price changes, breaking the fifteen-cent level opens a whole new spectrum of possibilities including the coin landing on one dollar during a bull market. Dogecoin has community-driven backing, and the meme culture makes it relevant and indeed among the most valuable cryptocurrencies sought by retail investors seeking to make quick gains when the market has momentum. Ripple (XRP) Given that its price has been sitting around \$0.5 and looked good on the market as well, XRP may also have a chance, especially with the legal challenges against the SEC. If we view Ripple's price movement as an RSI model, XRP is expected to be positive near the end of the year. Ripple's token currently costs roughly \$0.6. Should Ripple's legal fight go in favor of XRP, we may find XRP near \$1 under increasing buying pressure from market players. The prospect of a spot XRP ETF, which will only grow as more control enters the market, has also excited investors. Litecoin (LTC). Being "the silver to Bitcoin's gold," Litecoin has drawn a lot of comments; that concept has not altered since its launch. Along with its present marketing activities, it is also seeing another surge in popularity; the currency has recently undergone a halving event. Particularly as the market grows, the inexpensive prices and adaptability of the currency make it ideal for daily use as it expands. One of the coins most likely to reach all-time new highs in terms of price during a bull run is LTC since it is so widely used and a wonderful fit for any investor seeking dependability in cryptocurrencies. Conclusion With a promise of great gains during the next bull run, all these altcoins have a target audience and reason for use. Among the various initiatives, Rexas Finance distinguishes itself with its emphasis on the tokenization of real-world assets, therefore offering a broad use. The others either have already created blockchain solutions, or hold special niches in meme coins, or gaming. Investors could consider these altcoins as part of a larger basket aiming at profits with the next crypto cycle. For more information about Rexas Finance (RXS) visit the links below: - Website: <https://rexas.com> - Win \$1 Million Giveaway: <https://bit.ly/Rexas1M> - Whitepaper: <https://rexas.com/rexas-whitepaper.pdf> - Twitter/X: <https://x.com/rexasfinance> - Telegram: <https://t.me/rexasfinance> Disclaimer: TheNewsCrypto does not endorse any content on this page. - Huge BTC and ETH transfers by crypto whales follow the 2024 U.S. election results. - Multi-million-dollar transfers of this large-cap frog-themed memecoin were detected hours ago. The 2024 US elections, which elected Donald Trump, drove the global crypto market to \$2.47 trillion, confirming a foray into the "greed" zone. Dominant player, Bitcoin (BTC), marked the day for hitting its new all-time high (ATH) "the ATH Day as celebrated by the community. On this ATH Day, crypto whales have shown up on the radar with massive transfers. Eleven new whale wallets recorded one of the day's largest Bitcoin withdrawals on the crypto exchange Binance. According to Spotonchain, those wallets accumulated over 1,807 BTC, worth \$133.5 million at current prices, in the last 7 hours. Based on data from Arkham Intelligence, two massive ETH transfers were spotted in the last two hours. Reportedly, an Ethereum ICO participant deposited over 14,999 ETH, worth \$39.38 million, on the crypto exchange Kraken two hours ago. Another whale deposited 10,000 ETH, worth \$26.25 million, on the same exchange within the last 45 minutes. The second largest cryptocurrency noted a 7.8% spike in the last 24H to surpass \$2.6K. Its trading volume soared 105.8% to reach \$37.16 billion. Huge Crypto Whale Moves in the MemeFi Arena On-chain analytics firm Lookonchain reported large accumulations of the frog-themed token PEPE over the past six hours. Three whales accumulated over 835.6 billion PEPE tokens from two exchanges, Binance and Gate.io. Additionally, Binance noted two whales withdrawing nearly 699.18 billion PEPE tokens. Whales are accumulating \$PEPE! " Lookonchain (@lookonchain) November 6, 2024 In the past hour, 3 whales withdrew 835.6B \$PEPE (\$7.94M) from #Binance and #Gateio! 0x51Cc withdrew 535.81B \$PEPE (\$5.09M) from #Binance. <https://t.co/2Bjy1s07j5> 0xa586 withdrew 163.37B \$PEPE (\$1.44M) from #Binance. <https://t.co/QYR3aPhb00> 0xd3B0! pic.twitter.com/UJh1YjqG0B In the last 24 hours, PEPE surged by 15.37%, currently trading at \$0.000009488. The meme coin's market cap increased by 143.81% to reach \$1.37 billion. Meanwhile, following its remarkable surge, Elon Musk's

favorite Dogecoin (DOGE) saw increased whale activity. Whale detector Whale Alert tracked two significant DOGE transfers from the trading platform Robinhood. Eight hours ago, over 75 million DOGE were moved to an unknown wallet, and over 50 million DOGE were transferred to Coinbase. Furthermore, two recently viral memecoins, FRED and PNUT, have also captured the attention of crypto whales. A new, anonymous whale accumulated over 17.35 million PNUT tokens and 68.97 million FRED tokens. The popularity of these coins is somehow linked to the story of two orphaned animals, Peanut the Squirrel and Fred the Raccoon, seeking justice in the US. Elon Musk's support for the cause on X has been a key factor in their rise. Indeed, every aspect of the 2024 U.S. elections spurred the rise of memecoins. However, PolitiFi memecoins – altcoins inspired by the political scene – experienced bearish dips. Highlighted Crypto News Today

- The top 3 memecoin gainers are GOAT, NEIRO, and POPCAT (SOL). - Bitcoin reached an all-time high of \$75,361, driving optimism across the crypto market. The cryptocurrency market is displaying a vibrant surge, fueled by Bitcoin's recent climb to a new all-time high of \$75,361 following optimism sparked by Donald Trump's victory against Kamala Harris in the presidential race. At the time of writing, the global crypto market cap stands at \$2.47 trillion, marking a 7.88% increase in just 24 hours. Bitcoin's dominance has paved the way for a ripple effect, driving positive sentiment among altcoins, particularly in the memecoin sector. Among the top gainers in the memecoin space are Goatseus Maximus (GOAT), First Neiro on Ethereum (NEIRO), and Popcat (SOL), all of which are soaring with impressive gains. Goatseus Maximus (GOAT) In the past 24 hours, GOAT price rose over 47.04% and topped the gainers list, recording a high of \$0.7503. Also, the daily trading volume has seen a significant jump of over 108%, reaching \$282. The token now boasts a market cap of \$735 million, placing it at the 92nd spot in the crypto rankings. GOAT is one of the memecoins that was launched on the Solana blockchain in October and gained popularity with a strong following. The memecoin is still 19% below its all-time high of \$0.8837. But GOAT has surged by an eye-watering 653% in the last month. Further, the memecoin's key resistance was found at \$0.8095 and the nearby support at \$0.4204. First Neiro On Ethereum (NEIRO) Another memecoin catching the market's attention is First Neiro on Ethereum (NEIRO). That has jumped by 32.70% in the past 24 hours. The price surged from a low of \$0.001309 to a high of \$0.001764, driven by a massive 248% increase in its trading volume, which reached \$740 million. First Neiro on Ethereum is a meme coin inspired by Shiba Inu, continuing the legacy of Kabosu, the dog behind the original Dogecoin meme. The coin gained attention as it was linked to Neiro, another dog adopted by Kabosu's owner after her passing. On Oct 15, NEIRO recorded an all-time high of \$0.0023, which now seems like a distant memory, as the token is currently 24.53% off that peak. However, the ongoing rally has pushed the price to new highs. Currently, it's eyeing further resistance levels at \$0.001932 and \$0.0021, with support found near \$0.001278. Popcat (SOL) Last but not least, Popcat (SOL) has joined the surge, rising by 20% to trade at \$1.59. The token's price climbed from a low of \$1.28 to a high of \$1.60, with its trading volume spiking by 269% to \$269 million. The meme coin was launched in December 2023 on the Solana blockchain, inspired by the viral –Popcat– meme. POPCAT has gained 14% over the past month. Meanwhile, it has seen a 5% decline over the past week, as it hit an all-time high on Oct 29 at \$1.81. The token now faces initial resistance at \$1.75, with significant support around \$1.12. Highlighted Crypto News

- Donald Trump has secured victory in the 2024 U.S. presidential election. - Bitcoin surged over 10%, hitting a new all-time high. The Republican candidate, Donald Trump won the 2024 US presidential election race with 248 electoral votes, beating the Democratic candidate, Kamala Harris. – BREAKING: – Donald Trump officially elected President of the #UnitedStates! – TheNewsCrypto (@The_NewsCrypto) November 6, 2024 The global #Crypto market is green today with #Bitcoin hitting an all-time high above \$75K –i. With Trump's pro-crypto stance, industry insiders are optimistic about regulatory support and U.S. –i. pic.twitter.com/2CrwQnxDvh The Trump victory has justified the Polymarket prediction. Over the past 24 hours, the prediction platform revealed the probability of Trump's victory with 95%, and Kamala Harris trailing at 3.3%. This shift highlights strong market sentiment in favor of Trump. Looking back, both candidates have been racing on the prediction market platform. Someone Profits While Others Take a Loss Notably, the three prominent bettors made significant profits as Trump won the presidency. Players like Theo4 earning \$20.4M, Fredi9999 gaining \$15.6M, and zxngnl securing \$11M. These profits highlight the rewards of strategic investments during key market movements. Meanwhile, the individual who placed a \$5 million USDC bet on Kamala Harris facing heavy losses, with a current loss of approximately \$4.9 million, a 97.7% drop in value. Moreover, the preliminary counts indicate that Trump has garnered 95 electoral votes, while Harris has 35. The US election's Electoral College system mandates that a candidate must secure more than 270 electoral votes to win the presidential race. The anticipation hovered around the Trump victory has generated confidence in financial markets as his economic policies will bolster the U.S. dollar. Meanwhile, the U.S. Dollar Index rose by 0.8% to 104.27. Furthermore, as the market speculated, Bitcoin's price soared by over 10% and the largest crypto asset hit its all-time high (ATH), reaching the \$75,000 mark for the first time, amid the elation of Trump's victory in the US election. The daily trading volume of BTC has risen by over 114% to \$89.37 billion. Highlighted Crypto News Bitcoin and Dogecoin Flex Big Moves to the 2024 US Election Results

In the dynamic world of cryptocurrency, meme coins have emerged as a unique phenomenon, experiencing a rapid ascent. From the inception of Dogecoin to the recent wave of innovative projects, meme coins have not only disrupted traditional investment logic but are also shaping a new cultural trend. What underlying principles are fueling the rise of meme coins? And how will new projects stand out in this market? This article delves into the current state, trends, and potential of the meme coin market, focusing on how emerging projects like \$FISH are poised to lead the way forward. 1. Current State and Development Trends of the Meme Coin Market 1.1 The Rise of Meme Coins and Market Performance According to historical data from CoinGecko, as of October 2024, the market capitalization of meme coins has

exceeded \$70 billion, with 10 meme coins ranked among the top 100 cryptocurrencies. This phenomenon is not coincidental but rather the result of several contributing factors:

- **Investor Appetite for High Returns:** Meme coins, with their high volatility and potential for substantial returns, have attracted a significant number of speculators.
- **Growing Community Power:** Strong community consensus and engagement have endowed meme coins with lasting vitality.
- **Viral Spread on Social Media:** Platforms like Twitter and Reddit have amplified meme coins through viral sharing, contributing to their popularity.

1.2 Rapid Emergence of New Projects

Among the many meme coins, recent projects like PEPE, WIF, BONK, POPCAT, and MEW have captured market attention through unique concepts and robust community management. These projects share several common traits:

- **Innovative Storytelling:** Leveraging internet culture and trending events, they create distinctive narratives.
- **Active Community Engagement:** By maintaining close interaction with users on social media and forums, they build a loyal base.
- **Efficient Marketing:** Through influencers and celebrity endorsements, these projects quickly broaden their reach.

Many successful meme coin projects have undergone extended periods of growth and consolidation, underscoring the importance of time in validating their potential. Data shows that, on average, these projects require approximately 162.7 days to reach their peak price, indicating that long-term viability enhances their stability:

- **Time-Proven Stability:** Projects that endure over time build credibility through market validation.
- **Community Consensus Development:** Sustained community operations foster deeper user loyalty and emotional connection.

2. The Multifaceted Logic Behind the Rise of Meme Coins

Community as the Core of Meme Coins

In the decentralized crypto world, community consensus is the lifeblood of any project. For example:

- **BITCOIN (HarryPotterObamaSonic10Inu):** This project combines multiple elements of popular culture, drawing in users from diverse backgrounds.
- **SPX (SPX6900):** By creating a narrative around an anime girl surpassing the S&P 500's market cap, it establishes a unique cultural identity. These projects leverage deeply resonant cultural elements, fostering a strong sense of emotional belonging among users and building formidable community cohesion.

High Returns Satisfy Investor Aspirations

For Wealth Growth Meme coins's high returns cater to investors's desire for significant financial gains:

- **GIGA (GigaChad):** After its launch, it achieved a maximum increase of 245,000 times, creating an impressive wealth effect.
- **MOG (Mog Coin):** As the first coin based on emoji culture, it saw a peak increase of over 16,000 times. This wealth effect not only attracts a large influx of new investors into the market but also boosts overall market activity.

Celebrity and Influencer Involvement as Catalysts for Meme Coin Popularity

The participation of celebrities and key opinion leaders (KOLs) has significantly boosted the reach of meme coins.

- **Elon Musk's Support for Dogecoin:** Musk's endorsement transformed Dogecoin from a joke to a globally recognized cryptocurrency.
- **MOODENG's Success:** The project gained rapid traction by leveraging the popularity and influence of internet-famous animal Moo Deng. Media exposure and public attention driven by celebrity endorsements often elevate a project's visibility and market cap in a short time.

Innovative Concepts and Narratives as Pathways to User Engagement

Original storytelling and a first-mover advantage are crucial to capturing users's attention quickly.

- **GOAT (Goatseus Maximus):** This project, the first AI-promoted meme coin, used the brand recognition of a16z to gain an early foothold in the market.
- **Daram:** By combining the BRC20 standard with meme qualities, Daram opens a new channel for issuing meme assets. First-mover advantage has enabled these projects to stand out, attracting substantial capital and user attention, thereby contributing to the successful establishment of these meme projects.

3. Emerging Trends, Challenges, and Opportunities in the Meme Coin Market

With continuous advancements in blockchain technology, the meme coin market is undergoing profound transformation.

- **AI-Optimized Project Management:** Leveraging AI to enhance operational efficiency and improve user experience.
- **AI-Driven Trading Strategies:** Utilizing AI to optimize investment strategies, reshaping how the market functions.

The widespread adoption of Web3 technology, paired with the boundless potential of the metaverse concept, as well as strengthened community autonomy and consensus mechanisms, provide meme projects with powerful tools to break new ground. The rise of Decentralized Autonomous Organizations (DAO) enables community members to participate in project governance more equitably. Key highlights include:

- **Decentralized Identity (DID):** Offers improved user management and community governance for meme coin projects.
- **Advances in Cross-Chain Technology:** Breaks down barriers between blockchains, promoting interoperability for meme coin projects.
- **Integration of Virtual Reality and Memes:** Opens new application areas for meme coins, blending virtual and real-world experiences.
- **Enhanced Project Transparency:** DAOs facilitate transparency in decision-making.
- **Increased User Engagement:** Each user has the opportunity to contribute to the project's growth and development.

While meme coins offer significant opportunities, they also come with inherent risks that demand careful consideration of market volatility and investment strategies. The high volatility of meme coins brings both risks and rewards.

However:

- **Sharp Price Fluctuations:** Could lead to substantial losses for investors.
- **Potential for Market Manipulation:** With high token concentration, meme coins are vulnerable to market manipulation by large holders. For those considering meme project investments, a rational approach is essential:

- **Diversify Investments:** Reduces the risk associated with a single project and balances the portfolio.
- **Conduct Thorough Research:** Understanding a project's background, team, and community can help avoid speculative decisions.
- **Hold for the Long Term:** For projects with potential, a long-term holding strategy can yield greater returns.

4. The Bold Leap Led by \$FISH: The Rise of Flying Fish Amid the wave of meme coins

The Flying Fish (\$FISH) project stands out as a new entrant leading a bold leap forward. The symbolism and cultural significance of Flying Fish are profound:

- **Courage and Freedom:** The flying fish's ability to leap from the water represents a spirit of self-transcendence and freedom.
- **Speed and Agility:** Known for swift movement, the flying fish embodies efficiency and agility.
- **Mystery and Enchantment:** The mysterious allure of the flying fish sparks curiosity.
- **Ocean and Vitality:** Residing in the ocean, it symbolizes abundant vitality and boundless possibilities.

In the Web3 landscape, \$FISH aims to achieve decentralized financial freedom and democratization, allowing all users to participate and benefit fairly in the meme coin market. By implementing community-resonant incentive mechanisms, it addresses common challenges in the meme coin space, fostering a healthy, sustainable meme ecosystem. The launch of 142Pact accelerates the development of

the meme minting platform, enabling the community to progress steadily and injecting fresh energy into the meme coin market. Community members benefit as shareholders, reaping the rewards of the meme coin surge. The symbolism of “142” represents:

- Focus: Staying true to the project’s original vision and dedicated to its growth.
- Loyalty: Building trust through loyalty to the community and its users.
- Stability and Longevity: A commitment to the project’s long-term, steady development.

Advantages of \$FISH

- Supply of 100 Billion Tokens: Ample market liquidity to meet investor demand.
- Unique Meme Concept: The innovative and distinctive flying fish imagery enhances its viral potential.
- Strong Community Support: Active community engagement reinforces the project’s vitality.
- 142 Protocol Synergy: Combining \$FOMO and \$FISH in a dual-cycle approach to drive price momentum.

Future Outlook for \$FISH

- Technological Innovation: Integration of AI and Web3 technologies to enhance project competitiveness.
- Global Strategy: Expanding into international markets to attract a global user base.
- Ecosystem Development: Building a complete ecosystem, including DApps, NFTs, and a trading marketplace.

5. Impact of \$FISH on Public Chain Ecosystems

As \$FISH gains popularity, it is likely to attract a significant number of Web2 users into the crypto market, driving user growth, transaction volume, and activity within public chain ecosystems. This influx of new participants boosts liquidity and enhances the overall market’s fluidity.

- Promotion of Technological Innovation and Ecosystem Diversity: The rise of FlyFish inspires technological advancements, enriching the public chain ecosystem.
- DApp Development: Increased developer participation fosters a more diverse range of DApps.
- Integration with DeFi and NFTs: The combination of \$FISH with DeFi and NFTs creates new application scenarios.

6. Investor Strategies and Recommendations

- Adopt a Rational Perspective on Meme Coins’ High Returns
- Avoid Blindly Following Trends: Stay cautious of high returns and remain aware of potential risks.
- Conduct Thorough Research: Evaluate project fundamentals, including the team, technology, and community.
- Diversify Investments to Mitigate Risk
- Portfolio Diversification: Avoid placing all funds into a single project.
- Focus on Long-Term Value: Select promising projects for long-term holding.
- Monitor Market Trends and Adjust Strategies Promptly
- Stay Informed: Keep an eye on market news and regulatory changes.
- Adjust Positions as Needed: Adapt investment strategies based on market conditions.

7. Summary

- Future Trends for \$FISH
- Deepening Technological Integration: As \$FISH combines with AI, the metaverse, and other technologies, new application scenarios will emerge.
- Strengthening Community-Driven Growth: The community will continue to play a central role in project development.
- Meme Traffic and Unique IP: The consensus within the \$FISH community aims to establish a distinct global IP and cultural identity.
- Opportunities for \$FISH
- Unique Positioning: The novel concept of \$FISH sets it apart with a differentiated advantage.
- Market Potential: The meme coin market still holds vast opportunities.
- Recommendations for Investors
- Exercise Caution and Invest Wisely: Be mindful of market risks to make sound investment decisions.
- Engage with the Community: Actively participate in community activities to gain deeper project insights.

8. Conclusion

The rise of meme coins is not just a market phenomenon but a fusion of culture and technology. In this era filled with both opportunities and challenges, the success of any project relies on innovative concepts, a robust community, and a sound strategy. As a new entrant in the meme coin landscape, Flying Fish (\$FISH) is spearheading a bold leap forward with its distinctive cultural significance and technological innovation. Looking ahead, as more remarkable projects join the field, the meme coin market is poised for even greater prosperity, contributing to the growth of the entire cryptocurrency ecosystem.

- Dogecoin (DOGE) climbed 11.42% on US Election Day, reaching an intraday high of \$0.1669.
- Elon Musk fueled Dogecoin’s rally by mentioning the Department of Government Efficiency (D.O.G.E.) during a podcast.

On US Election Day, Dogecoin (DOGE) grabbed a spot in the cryptocurrency market, climbing over 11.42% in the last 24 hours and emerging as a top gainer. While major cryptocurrencies like Bitcoin (BTC) trade in red, DOGE’s rise stands out as a beacon of optimism. The rally in the DOGE was triggered by comments from Elon Musk, who mentioned DOGE as an acronym for a potential Department of Government Efficiency (D.O.G.E.) during a podcast with Joe Rogan. At the time of writing, Dogecoin was priced at \$0.1669 (intraday high), up from a low of \$0.1498. Also, the daily trading volume surged over 51%, reaching \$3.14 billion. This rally signals a renewed interest in memecoins and community-driven tokens, often fueled by social media excitement and online communities. What makes this surge particularly intriguing is the potential connection to Donald Trump’s presidential battle, bolstered by Elon Musk’s involvement. Analysts suggest that DOGE could benefit significantly if Trump wins, especially following Musk’s recent proposal for a “Department of Government Efficiency,” cleverly abbreviated to D.O.G.E. This initiative aims to streamline government spending, which could resonate with Dogecoin’s community.

What Do Recent Trends Reveal About Dogecoin’s Price?

Analyzing global market trends over the past week shows that many memecoins, including Shiba Inu (SHIB) and Pepe (PEPE), have displayed declines. Even Dogecoin faced some price fluctuations and closed the week at \$0.1446 after briefly peaking near \$0.17. However, the daily candlestick chart revealed significant price movements and spikes in trading volume, especially between Oct 29 and Nov 2. During this period, a sharp increase in Dogecoin’s price was observed, followed by a pullback as the week progressed. Zooming in, the four-hour chart reveals a bullish trend, with the 9-day moving average crossing above the 21-day average. Currently, Dogecoin is trading above both the upper and basis lines of its

Bollinger Bands, which further suggests upward momentum. However, the RSI is nearing overbought territory, which often signals a potential price correction. The TD Sequential indicator also shows a buy signal, hinting at a possible price rebound. Looking ahead, resistance is expected around \$0.1807, which will lead DOGE to levels not seen since April. However, if the excitement surrounding the elections fades, crucial support at \$0.1432 could come into play, with a further drop to \$0.1235 possible. For now, Dogecoin's ascent offers a glimmer of hope amid a fluctuating market. Highlighted Crypto News

The world is still captivated by Shiba Inu (SHIB), trading around \$0.000007 and looking to hit its all-time high (ATH) of \$0.00008. SHIB is strong with its community-driven appeal, but for investors looking for big returns, the growth potential may not be as extensive. Rexas Finance (RXS), priced at \$0.060, on the other hand, is set to become a game changer and is being offered as an existing alternative to those willing to maximize their investments. According to projections, RXS could go up to \$17 by Q1 2025, which means that a \$1,000 investment today could return very well in six months. A new interest in innovative tokens may be the best time to look into the possibility of RXS.

The Current Landscape of Shiba Inu (SHIB) The Shiba Inu has become one of the leading meme coins in the cryptocurrency space. SHIB was initially launched as an alternative to Dogecoin so it could be fun, but since then it has turned into a community it was built for and has developed a decent trading volume. Even though it is a popular token, SHIB has not been able to keep up with momentum in the market along with the volatility and the competition by the newer projects. Though SHIB's price is currently hovering around \$0.000007, it seems like a tough uphill battle from there to its ATH of \$0.00008. Analysts say there is potential for growth but it's unlikely a modest investment would turn into life-changing wealth unless the market shifts or catalysts. To illustrate, even if SHIB were to reach its ATH once more, an investment of \$1,000 would gain you the max of about \$12,500, far short of the million dollars that some investors dream about.

Rexas Finance: A Revolutionary Opportunity Unlike Shiba Inu, Rexas Finance is not speculative at all, but rather a real-world, real utility, real innovation, and investment opportunity. Currently priced at just \$0.060 on their presale stage 4, RXS has already raised over \$5 million towards its \$5.45 million goal. Given the nature of this groundbreaking project, this presale phase has largely attracted the attention of investors eager to capitalize on the addressable market of this project. Rexas Finance wants to reinvent asset management by making real-world assets such as real estate, art, and commodities available to users for tokenization on a global scale. This is a truly innovative way of increasing liquidity, but a way of democratizing access to investment opportunities that were always reserved for the wealthy or institutional investors. The feature of Rexas Finance is its Token Builder which lets the users build tokens representing their real-world assets without any technical knowledge or even knowing how to code. This tool makes entry into the cryptocurrency space much simpler and extends participation for potential investors. Furthermore, Rexas Finance provides a Launchpad to engage in secure token sales across multiple blockchain ecosystems. It's a way of being transparent and building trust among creators and investors alike. In addition to offering the platform's integration of Rexas GenAI, an AI tool for the creation of high-quality digital artworks, the platform plays into the rapidly growing NFT market.

The Future of Rexas Finance: Aiming for \$17 Rexas Finance's future is very bright, analysts are predicting RXS can hit an incredible \$17 by Q1 2025. This projection is supported by several factors: growing demand for fractional ownership investment models from retail investors, increasing use of blockchain technology for asset management, and the growing trend of digital asset investment. As a presale stage for RXS tokens, we have already seen strong demand as 97.26% of target funds have been raised and nearly 107 million tokens have been sold, out of 110 million that are available. With more investors realizing the special position that Rexas Finance occupies, especially in tokenizing real-world assets, the likelihood of unprecedented price appreciation becomes more apparent. What attracts investors to RXS is not just that it has innovative features, but also that its tokenomics is in favor. The total supply of 1 billion RXS tokens has been allocated across categories including presale, staking pools, liquidity provision, marketing efforts, and team incentives. This mindful tactic about distribution attempts to keep a healthy balance between supply and demand, and to maximize investor returns.

Comparing RXS with SHIB: A Clear Choice Rexas Finance stands out as a more attractive investment by comparison to Shiba Inu, as RXS delivers a better investment opportunity for substantial returns in the cryptocurrency market. SHIB is largely based on community sentiment and speculative trading dynamics, whereas RXS is built over solid and practical fundamentals. However, RXS is an opportunity to invest in an exponential growth curve driven by real use cases for asset management and tokenization. The difference between SHIB being too dependent on meme culture and social media hype that can be unpredictable, Rexas Finance, on the other hand, is in the right place " within the growing DeFi (Decentralized Finance) space that solves core problems with traditional investing. Additionally, as Rexas Finance plans additional development, such as exchange listings where RXS will be listed at a higher price, present investors might be well positioned for significant gains if they act now.

- Aleksei Andriunin faces charges of wire fraud and market manipulation. - Gotbit allegedly created an artificial trading volume for cryptocurrency clients. The U.S. Department of Justice has indicted Aleksei Andriunin, 26, the founder of cryptocurrency financial services firm Gotbit, in a large-scale market manipulation and fraud scheme. Gotbit, along with two of its directors, Fedor Kedrov and Qawi Jalili, has also been charged in connection with these activities. Andriunin, Kedrov, and Jalili allegedly engaged in market manipulation from 2018 through 2024. According to court documents, Gotbit

provided fraudulent “market-making” services for various cryptocurrency companies, including those in the United States. Andriunin, Gotbit’s CEO, allegedly devised and implemented strategies to artificially inflate trading volume. In 2019, Andriunin detailed his methods for “wash trading” in an interview, explaining how his firm used it to enhance market visibility. Growing Efforts to Combat Cryptocurrency Fraud The DOJ alleges that Gotbit’s services generated millions in wash trades, and the proceeds totaled tens of millions of dollars. Additionally, Andriunin is accused of personally transferring millions into his Binance account. Furthermore, they allegedly informed potential clients about strategies to circumvent blockchain detection, using multiple accounts to hide wash trading activities. Gotbit’s clients included cryptocurrency projects Saitama and Robo Inu, both of which face separate charges in related schemes. The penalties for wire fraud could lead to up to 20 years in prison, a \$250,000 fine, supervised release, restitution, and forfeiture. Charges of conspiracy to commit market manipulation and wire fraud carry a potential sentence of five years, additional fines, supervised release, restitution, and forfeiture. Moreover, sentences in these cases will be determined by federal district court judges following the U.S. Sentencing Guidelines. Federal prosecutors have increased efforts to address cryptocurrency fraud. Last month, DOJ authorities arrested leaders of Gotbit, ZM Quant, and CLS Global, resulting in several plea deals and the seizure of \$25 million in assets. Acting U.S. Attorney Joshua S. However, Levy emphasized that fraud remains punishable, regardless of the technology involved. The DOJ warns that it will continue to pursue legal actions against cryptocurrency fraud and market manipulation. Highlighted Crypto News Today Dogecoin Rally Fades as Price Drops Over 10% Amid Bitcoin Slump

- SHIB has plunged by 6%, over the past 24 hours. - The burn rate of SHIB has soared by 254,078% with 5.63 billion tokens burned over the day. The cryptocurrency market has faced a pullback over the past 24 hours, with its market cap plummeting by over 3.60% to \$2.33 trillion. The largest asset, Bitcoin, which traded above \$72.5K, has slipped to \$69K. The bearish sentiment affected all the major assets in the market. The dog-themed meme coin Shiba Inu (SHIB) is one of the losers. Its price has steadily plunged by 6% on a daily scale. It’s crucial to note the burn rate of Shiba Inu surged around 254,078% over the day. Notably, the spike is observed as 5.63 billion tokens were burned. To date, the Shiba Inu ecosystem has burned a total of 410.73 trillion SHIB, leaving over 583.59 trillion SHIB in circulation. This surge in burn rate has brought in an expectation over SHIB’s price, as it likely indicates a price rally. Notably, SHIB appears to be at a critical threshold. In the morning hours, the meme coin traded at a high of \$0.00001913, and it began to slide to the current price levels. At press time, SHIB traded at \$0.00001742, with the trading volume staying at around \$508 million, according to CMC data. Moreover, the market observed a liquidation of \$1.45 million worth of Shiba Inu during this timeframe. Where is SHIB’s Price Headed Next? Technical analysis of the SHIB/USDT trading pair indicates the bearish sentiment. The chart displays the daily relative strength index (RSI) positioned at 37.95, suggesting the weakness of the asset. Moreover, the asset’s short-term 9-day MA is situated below the long-term 21-day MA. The Moving Average Convergence Divergence (MACD) line sits below the signal line, highlighting the ongoing negative outlook, which might lead to the incoming bear run. Besides, the Chaikin Money Flow (CMF) indicator stays at -0.31, which suggests the decreased money flow with selling pressure. While the daily trading volume has increased by over 59%. If the bullish sentiment revives, SHIB’s price could likely rally to \$0.00001879. It might further rise if the upward momentum persists. However, if the asset’s price attempts a reversal on the support side, the immediate support zone might be at \$0.00001639. Disclaimer: The opinion expressed in this chart is solely the author’s. Highlighted Crypto News Dogecoin Rally Fades as Price Drops Over 10% Amid Bitcoin Slump

As the U.S. election generates heightened interest in alternative investments, SnoozeCat (\$ZZZZCAT) enters the crypto market with a presale destined to redefine meme coins. Following in the footsteps of iconic coins like Dogecoin and Shiba Inu, \$ZZZZCAT combines engaging meme appeal with unique, community-driven technology, setting it apart from every meme coin that has come before. This isn’t just another meme coin—\$ZZZZCAT is poised to be the ultimate meme coin with robust features, exceptional earning opportunities, and a groundbreaking approach that rewards investors and strengthens the community. \$ZZZZCAT: Positioned to Become the Top Meme Coin of 2024 In 2024, meme coins have surged as powerful assets with real earning potential, and \$ZZZZCAT is leading the pack. Far from being a short-lived trend, \$ZZZZCAT’s innovative features and community-centered benefits aim to set a new standard in the meme coin space. Here’s what makes \$ZZZZCAT stand out: Community-First Design with Proven Team Leadership: SnoozeCat’s developers and community managers are experienced crypto professionals committed to transparency, integrity, and creating lasting value. Regular updates, an open roadmap, and a strong social media presence underscore \$ZZZZCAT’s commitment to building trust and rewarding its holders. Proof of Meme (PoM) Consensus: The PoM consensus model is a groundbreaking approach that reflects and rewards meme culture’s social and viral nature. PoM encourages community engagement by creating rewards tied directly to social interactions and activity within the SnoozeCat community. By aligning growth incentives with community contributions, PoM transforms \$ZZZZCAT into a living, evolving digital ecosystem that grows with its users. Exclusive Rewards for Early Participants: Early adopters can maximize their returns with bonus tokens and automatic qualification for SnoozeCat’s game-based airdrop. With up to 10 SUI tokens available to those who reach early benchmarks such as accumulating 10,000 \$ZZZZCAT coins, early participants enjoy substantial perks that enhance the project’s earning potential from the outset. \$ZZZZCAT Presale Details: - Min Buy: 100 SUI - Max Buy: 5000 SUI - Presale Price: 1 SUI = 5000 \$ZZZZCAT - Total Supply: 1,000,000,000 \$ZZZZCAT - Presale Allocation: 400,000,000 \$ZZZZCAT Presale Address: - Send SUI to: 0xcca929604088ae523af11cc007d9a784ab9c6f2ce44f5f3764fd4ccb21f4e750 How to Buy \$ZZZZCAT - Set Up a SUI Wallet: Use Sui Wallet or Suiet Wallet for secure transactions. - Acquire \$SUI on an Exchange: Buy SUI on Binance or Coinbase. - Transfer \$SUI to Your Wallet: Move SUI to a personal

wallet. - Send SUI to Presale Address: Use the address above from your personal wallet. - Receive \$ZZZZCAT Post-Presale: Tokens will be airdropped after the presale ends. Important: - Only send SUI from a non-custodial wallet (no exchanges). - Security: Team members will never DM you first. Avoid impersonators. - Join the \$ZZZZCAT movement on SUI! - \$ZZZZCAT's Unique Features: Building Lasting Value for Investors Key Products and Innovations: SnoozeCat isn't just another meme coin; it's a token engineered with an investor-focused mindset, offering lasting growth potential and continuous engagement. Proof of Meme (PoM) Consensus: As a model built exclusively for meme coins, PoM amplifies community engagement by tying token rewards to social interactions within the SnoozeCat network. This consensus ensures that \$ZZZZCAT's value grows organically, boosted by user activity and active participation. Game-Based Airdrop and Reward System: SnoozeCat's presale participants gain access to the game-based airdrop, allowing them to earn extra tokens through fun, interactive challenges. Early investors reaching certain milestones can also earn up to 10 SUI tokens, adding value and gamified excitement to their investment. Long-Term Vision and Expanding Ecosystem: The SnoozeCat roadmap includes utilities like staking rewards, community-driven events, and continuous platform enhancements, ensuring that \$ZZZZCAT holders experience growth and reward over the long term. Trusted, Transparent, and Community-Driven: SnoozeCat's Commitment to Investors The SnoozeCat team is focused on building a secure, transparent, and thriving community. With regular development updates, accessible project documentation, and active engagement on social media, \$ZZZZCAT ensures every investor is a part of the journey and has direct access to the team and community. Rexas Finance, known for its emphasis on Real World Assets (RWA) tokenization has created a sufficient buzz around it representing a very special player in the blockchain domain. Investor sentiment for the long term is evident as RXS has already raised \$5,000,000 from a presale of \$0.06 per token. Other Shiba Inu supporters have been watching, and are predicting a huge rally for the token, potentially up to 12,644% gains as it aims for a \$0.08 price point in the months ahead. Shiba Inu Millionaire Predicts a 12,644% Increase in RXS Price Rexas Finance has been catching the attention of high-profile investors, unlike Shiba Inu community members. Rexas Finance is not necessarily the worst thing to come out of the Binance Smart Chain; some Shiba Inu holders are getting behind it and are even calling it the "SHIB Killer" already, awaiting a sharp rise in its price. According to analysts, the presale price of \$0.06 would at least see RXS reach \$0.08 but others believe the returns that could be realized with the next bull run could be as high as 12,644%, both ways are very positive. Indeed, the crypto market is waking up to building projects that add practical value and this optimism arrives at a crucial time. Previously, we have seen Rexas Finance enjoy strong presale performance and focus on tokenizing tangible assets, making the token bullish sentiment. With RXS growing as a platform, more investors will be interested in spots that are not just speculative trading. Rexas Finance: Transforming Asset Management through Blockchain Rexas Finance intends to bring real-world assets onto the blockchain. Contrary to other cryptos being widely associated with market speculation, Rexas Finance aims to tokenize physical assets: real estate, artwork, and commodities. This makes asset management more accessible to individual investors and businesses to trade or manage asset-backed tokens easily. However, the platform tries to simplify the process of asset tokenization with the aim that users who are not tech-savvy face no barriers when trying to do so. With Rexas Finance, anyone can make such tokens and trade them without increasing transaction costs or improving transparency. In that position, the platform found itself in an evolving market where players were looking to connect traditional finance to blockchain technology. Tokenizing Real Assets: A Growing Market with High Potential Blockchain is emerging as a trend of tokenization of real-world assets. With Rexas Finance, physical assets can be brought into the blockchain, opening up active participation for more investors by bringing fractional ownership to a wider set of high-value items. Tokenized assets can be better tracked, bought, and sold, which could bring some efficiency to traditional asset management. Rexas Finance is a flexible infrastructure that is eligible for numerous types of assets, which makes it appealing to both individuals and businesses. This versatility meets real market needs and sets it apart from the speculative interest-blinding projects that we see these days. Rexas Finance may be microfinance based on the growing demand in the asset tokenization market. - Website: <https://rexas.com> - Whitepaper: <https://rexas.com/rexas-whitepaper.pdf> - Twitter/X: <https://x.com/rexasfinance> - Telegram: <https://t.me/rexasfinance> Disclaimer: TheNewsCrypto does not endorse any content on this page. Solana (SOL) is catching attention with its steady climb toward the \$200 mark, which is drawing in traders eager for big gains. Meanwhile, Dogwifhat (WIF) is leading the meme coin pack with a 5% rally, showing that meme coins still have a place in this market. With both SOL and WIF on the rise, traders are looking for smarter ways to stay ahead. IntelMarkets is emerging as a top choice. It's more than just an exchange since its AI-powered trading bots have trained on over 100,000 data points, giving users a real advantage. As prices move fast, IntelMarkets helps investors make the most of crypto's latest trends. Solana (SOL) Surges: Pushing Towards the \$200 Milestone Solana Price (SOL) is gaining

serious attention as SOL nears the \$200 mark. Experts note a surge in interest, with Solana's market cap now over \$83 billion and a trading volume jump of almost 32% in the last 24 hours. Analysts say this momentum comes from positive signals, including the 200-day moving averages, which point to strong growth potential for SOL. Many believe Grayscale's recent inclusion of SOL in its Digital Large Cap Fund now part of a mixed crypto ETF has boosted the Solana (SOL) appeal. This step could attract more mainstream investors adding to the optimism around Solana's (SOL) future. Reports also show that the Solana (SOL) total value locked has topped \$6 billion, the highest since 2022 which is reinforcing confidence among investors. If this trend continues, some experts think Solana Price could cross \$190 soon. With 83% of SOL staked and solid backing, the outlook remains strong.

Dogwifhat's (WIF) 5% Rally: Leading the Charge in the Memecoin Market Dogwifhat (WIF) is quickly climbing the ranks of the memecoin world, sitting just behind Dogecoin (DOGE) and Shiba Inu (SHIB) as a top contender. Its unique "dog in a hat" branding has captured a growing fan base, especially as the market hints at a possible bull run. Investors are drawn to its playful image, which has added to its recent surge in popularity. Currently trading around \$2.40, WIF has seen a single-day growth of nearly 5%. Reports show that its trading volume has jumped by almost 49% to over \$300 million, indicating a rise in interest. Many see this increase in volume as a positive sign pointing to strong market demand. Analysts believe WIF's popularity could keep it in the spotlight. As more traders look toward meme coins, Dogwifhat's humor and increasing liquidity might attract even more attention especially if the market trend stays positive.

IntelMarkets (INTL): Helping Traders Make the Most of Crypto's Latest Moves IntelMarkets (INTL) is gaining traction in the crypto world by pairing AI with blockchain, giving traders smart tools to stay ahead. In Stage 4 of its token sale, IntelMarkets (INTL) raised over \$1.6 million, showing strong interest from investors. People are noticing how IntelMarkets (INTL) makes it easier to trade with automated strategies, which can be a big help in rapid markets. With about 10% of Stage 4 tokens already sold, the current token price is around \$0.036, and it's set to rise in the next round. IntelMarkets (INTL) lets traders set up strategies that act instantly, a key advantage during market surges. This use of AI for real-time decisions is catching attention, especially among traders who want data-backed tools. Experts believe that IntelMarkets (INTL) could become a popular choice for both beginners and pros. Its AI insights and blockchain access mean traders can simplify their moves without missing out on strategy. As the token sale continues, IntelMarkets (INTL) seems well-positioned to bring in more users looking to stay sharp in the crypto space.

- DOGE surges 14%, reaching four-month high amid Bitcoin's rise. - Other memecoins like SHIB and PEPE also experience significant gains. In the latest market shift, Dogecoin (DOGE) has surged by 14% over the past 24 hours, reaching a four-month high of \$0.1684, as its trading volume skyrocketed 119%. This rally comes amid Bitcoin's surge past the \$71,000 mark, which has contributed to renewed interest in the memecoin sector, with DOGE emerging as a leading player. Dogecoin's impressive performance isn't isolated, as other notable memecoins are riding the same wave. Shiba Inu (SHIB) saw a 9% increase, and PEPE gained 8%, while other tokens like Wall Street Inu Finance (WIF) and POPCAT climbed by 9% and 11%, respectively. FLOKI, yet another popular dog-themed token, also gained by 9%. The memecoin rally appears to align with broader trends in the crypto market, where investors are gravitating towards risk-on assets as major cryptocurrencies experience substantial growth. Historically, memecoins like DOGE have enjoyed popularity during bull markets, often attracting high-volume trading and retail investor interest.

Resurgence On Stay? The resurgence of interest in Dogecoin has, in particular, been linked to community-driven support. And periodic boosts from prominent figures like Elon Musk, who has openly endorsed the token. However, the current rally raises questions about the sustainability of these gains. While trading volumes indicate strong short-term momentum, the inherently volatile nature of memecoins warrants caution for investors. Analysts suggest that as long as Bitcoin and Ethereum continue their upward trends, DOGE and its counterparts may see further gains. Yet, market corrections are common in the meme sector, making risk management essential for those joining the rally.

Highlighted News Of The Day

As the cryptocurrency market anticipates yet another possible bull run in the year 2025, smart and shrewd investors have begun searching for inexpensive coins that, with very slight investments, can yield huge dividends. Here are five cryptocurrencies that can be bought for under \$0.50 and have the potential to skyrocket with returns of up to 20,000%.

Rexas Finance (RXS) Rexas Finance (RXS) is rapidly gaining traction among crypto investors as one of the best cryptocurrencies concentrating on the tokenization of Real World Assets (RWAs). At a current price of only \$0.060, RXS is quite low, even by a third of its expected worth. With many analysts betting that as the project develops in terms of adoption, its worth will skyrocket. RXS investors can tokenize real-world assets, such as real estate, gold, and commodities on the RXS platform, tapping into huge and, up to now, undeveloped markets. Moreover, RXS has several key functions, including a token builder that makes it easy for app developers to create new tokens and a launchpad for companies to fund their tokenized assets. The growth prospects for RXS are enormous, and the market has hardly begun as it gets ready for its formal launch, with some estimated returns of 6x and more than 20,000% over the long run.

Tron (TRX) Tron, which is valued at \$0.157, is a firm committed to building a decentralized web. It has grown to love the dApp ecosystem with Tron's rapid transaction speeds and cost-efficient transactions, especially for those in the entertainment and content-sharing industries. Given the current trend, Tron is quickly sinking roots deeper into the DeFi and NFT sectors, which seem to be promising opportunities

at the moment. Tron's efforts towards enhancing scalability and developers' accessibility to its products have the potential to increase its worth in the next bull cycle. Furthermore, its association with big brands and its increasing number of applications place TRX nicely under the \$0.50 support level. Cardano (ADA) Another cryptocurrency under \$0.50 that has snagged the attention of many investors is Cardano. Its current price is \$0.35. Cardano's all-time best price never sank too low because it is backed by a good trend of research regarding scalability, security, and sustainability for its blockchain, which is targeted toward real-life applications. There is a Hydra upgrade scheduled sometime, which might considerably increase the transaction speeds on Cardano and make it one of the fastest blockchains by 2025. Despite being unable to shift price momentum recently, Cardano has firmly placed itself in the decentralized finance (DeFi) space alongside smart contract frameworks, giving vast hopes for its developers and investors, making it a worthwhile play for the years to come. Shiba Inu (SHIB) The Shiba Inu had its moment last year but is still continuously called the "Doge coin Killer". This community-kept coin has yet to lose appeal to retail investors. At this moment, Shiba Inu is being offered at a rate of \$0.00001831, which calls for a minimal amount of capital investment with significant returns; we go further to add that SHIB is bound to appreciate in the years to come thanks to technologies like ShibaSwap, DEX, and initiatives for developing a DAO. BONK (BONK) With the latest trend of meme coins, here's another one that has been getting quite popular as well as BONK. BONK's low price of \$0.00002 and community focus have helped the coin gain a lot of traction. It is part of the Solana ecosystem and is being hailed as the next SHIB and DOGE for the tremendous growth it will be able to achieve in a market bull run. BONK has plans to create an NFT marketplace and expand its ecosystem further, which can potentially create demand in 2025. Like most of the other meme coins, the risk is higher but may be short-lived for investors with an appetite for risk because the popularity of meme coins will spike in the years to come, hence promising a healthy return on investment in BONK. Conclusion: Why Rexas Finance Is the Focus of Attention Although all five of these cryptocurrencies can be considered great to watch under the price tag of \$0.50, Rexas Finance (RXS) is the clear winner. Rexas focuses on the tokenization of real-world assets, which is different from the other projects on this list, and provides real usage and application beyond just speculation. With \$4 million raised in its presale and a projected 6x return upon the official launch, Rexas Finance is positioned perfectly to create phenomenal returns in the foreseeable future and should, therefore, be on the radar of every investor seeking long-term growth. - Once seen as a fleeting trend, meme coins have become popular among India's huge population. - Recent analysis indicates that Shiba Inu (SHIB) is becoming popular among Indians. With the Indian community showing a strong interest in these exciting, high-risk, high-reward digital assets, India's fast expanding crypto industry has become a hub of meme coin aficionados. Let's explore why one specific meme coin appeals to Indian crypto buffs and investors. The Rise of Meme Coins in India: A Community Driven Movement Once seen as a fleeting trend, meme coins have become popular among India's huge population of crypto-savvy people. Many people joined the meme coin frenzy after Dogecoin and Shiba Inu were so successful. Meme coins appeal to India's huge millennial and Gen Z populations as millions of young investors are swarming to the market and they reflect both the attitude of investing and amusement. Recent analysis indicates that Shiba Inu (SHIB) is becoming popular among Indians. Its low entry cost, explosive growth potential, and community-driven development methodology match a market that depends on easily available but exciting prospects. Affordability & Accessibility Shiba Inu's modest coin price lets even inexperienced investors join without a large initial outlay. The main draw for the Indian middle class and younger investors who want little but regular contributions instead of a one, high-risk enterprise is this affordability. Increased community involvement: India has one of the biggest crypto communities on social media, where groups solely focused on meme coins find a venue on Twitter and Telegram. Strong online presence of Shiba Inu supported by loud support from Indian investors generates a self-sustaining buzz that drives additional involvement and ongoing investment. Promising Ecosystem & Prospective Use Originally a meme coin, Shiba Inu has been growing its ecosystem to include a decentralized exchange called ShibaSwap and plans for a metaverse platform. These initiatives reflect development beyond hype for Indian investors seeking long-term value in meme coins. Community-Led Influence and FOMO Component One special quality of India's meme currency community is their emphasis on a community-led investments. Information here naturally moves via local influencers, crypto aficionados, and committed online communities. Shiba Inu's appeal has been enhanced by this strategy, which is fueling what can only be called a "fear of missing out" (FOMO) all throughout the crypto scene. Will Shiba Inu's Popularity Last? Shiba Inu's approach to go from a meme status to a utility-based initiative might make it a staple in India's crypto market even if meme coins are volatile. Shiba Inu's affordability and India's developing crypto legislative clarity should help to confirm Shiba Inu as a long-term favorite. Conclusion Shiba Inu rules as the meme coin of choice in the Indian crypto scene, where community support is a powerful tool. Shiba Inu's future may establish a new benchmark for meme coins as it develops, proving that, with the correct mix of community support and innovation, meme coins can be more than simply online jokes—they can become popular investments.

- Polymarket shows Donald Trump leading Harris with a 66.6% chance of winning. - 75% of Americans believe cryptocurrency can enhance the economy. As the 2024 presidential election approaches, former President Donald Trump is emerging as a compelling candidate, particularly against the backdrop of current Vice President Kamala Harris. Trump's policies, especially his strong support for cryptocurrency and innovative economic strategies, resonate with many voters seeking significant
