

users with zero knowledge of blockchain development. The market anticipates a price breakout and an eventual validation of a bullish run to \$0.1. Conversely, at press time, DOGE displayed a 7% drop in the last 24h.

- Dogecoin's recent surge in value can be attributed to a collaboration with Maximus DAO. - Bitcoin has experienced a negative trend over the last 24 hours, with decreased trading volume. In the cryptocurrency world, Dogecoin (DOGE) has been making headlines once again as its value has begun to soar. With its recent price surge of 9%, many investors are optimistic that this could be the start of a new altcoin season. Currently, the DOGE price is exchanging hands at \$0.08264 with a support and resistance level at \$0.07614 and \$0.08528, respectively. A further bullish optimism can be indicated by the digital tokens trading volume increase, which has increased 121.96% to \$1,031,350,949, indicating that Dogecoin can record further growth. However, the recent surge in the price of the meme coin can also be attributed to the recent collaboration with Maximus DAO. This is after Maximum DAO announced on their official Twitter account that they would launch a Dogecoin staking pool Dogecoin ecosystem. In addition, other alternative cryptocurrencies have also experienced a surge in their daily trading volume. Ethereum (ETH) has climbed above \$1,800, BNB has stabilized at \$315, and others like LTC, MATIC, SOL, and TRX have observed minor gains. Cardano (ADA) has faced a slight decline of just over 1%, whereas Ripple (XRP) has increased by less than 3%. Among the larger-cap alts, Dogecoin and Shiba Inu have performed remarkably well. The initial memecoin has surged by nearly 9%, reaching above \$0.08, while Shiba Inu (SHIB) has risen by just over 3.37% and is trading at \$0.0000112. Bitcoin (BTC) Trading on Negative Trajectory As per CoinMarketCap's data, Bitcoin (BTC), the leading cryptocurrency in terms of market capitalization, has been experiencing a bearish trend over the last 24 hours. It is priced at \$28,391.69 after touching a 90-day high of \$29,159.90. The trading volume has decreased by 38.00%, currently at \$10,163,836,564. On Friday, the BTC market was dominated by bears, causing a drop in its price below \$28,000. However, the bulls regained control as Saturday arrived, and the BTC price climbed back to \$28,000.

- Musk's legal team argued that he did not break any rules by tweeting his support. - The attorneys dismissed the investors' allegation that Dogecoin was security in a footnote. A \$258 billion racketeering lawsuit alleging Elon Musk of creating a pyramid scheme to promote the cryptocurrency Dogecoin was filed against him on March 31. Musk urged a U.S. court to dismiss the case. Lawyers for Musk and his electric vehicle firm Tesla Inc. filed a motion in federal court in Manhattan on Monday night, calling the action brought by investors in Dogecoin a "fanciful work of fiction" because of Mr. Musk's "innocuous and often silly tweets" concerning Dogecoin. No Rules Broken Claim The attorneys said that Mr. Musk's remarks, such as "Dogecoin Rulz" and "no highs, no lows, only Doge," were too nebulous to sustain a fraud allegation, and that the investors never stated how Mr. Musk meant to deceive anybody or what dangers he hid. Musk's legal team argued that he did not break any rules by tweeting his support for a cryptocurrency that has a market valuation of roughly \$10 billion. The attorneys dismissed the investors' allegation that Dogecoin was a security in a footnote. Legal counsel for the investors, Evan Spencer, expressed optimism about the case's outcome in an email. Forbes's number two wealthiest person, Elon Musk, has been accused by investors of intentionally inflating the value of Dogecoin by more than 36,000% in two years before letting it fall. They said Mr. Musk made billions of dollars by taking advantage of those who had invested in Dogecoin despite the fact that he knew the currency was worthless. Investors also cited Musk's portrayal of a bogus financial expert who dubbed Dogecoin "a hustle" on NBC's "Saturday Night Live" "Weekend Update" episode.

- Mishaboar, a dedicated Dogecoin Twitter account, made the announcement. - The announcement of LibDogecoin v.0.1's debut occurred in August 2022. After weeks of anticipation, Dogecoin developer Michi Lumin has released Libdogecoin 0.1.2. Lumin writes extensively on Twitter about how this new release is a consolidation of the previous 0.1.1 update. Mishaboar, a dedicated Dogecoin Twitter account, also made the announcement. Hey #Dogecoin! #Libdogecoin 0.1.2 is out " Libdogecoin's aim is to make developing for Dogecoin easier also for those that do not have big experience with blockchain development. " Mishaboar (@mishaboar) March 24, 2023 Exciting! Thanks to @Kbluezr, @michilumin, @EdTubbs and all contributors to this new version. <https://t.co/SqHlIAMfC5> [pic.twitter.com/3Wlg544wum](https://pic.twitter.com/3Wlg544wum) LibDogecoin is a lightweight, direct C library that allows numerous platforms to support Dogecoin with no requirement for specialized blockchain knowledge. Backbone of Several Dogecoin-related Projects The announcement of LibDogecoin v.0.1's debut occurred in August 2022. Following then, work continued on LibDogecoin with version 0.1.1, which eventually became the 0.1.2 release that is in use today. The LibDogecoin C library is the backbone of several Dogecoin-related projects, including RadioDoge, Gigawallet, and more yet to come. Memory integrity checks and truncation fixes are only two of the new features and improvements in version 0.1.2, according to Michi Lumin. The developer discusses the evolution of Libdogecoin from its inception to the present day. Several other languages may be used to generate seed phrases to and from keys in libdogecoin today. It also generates keys and addresses correctly now. The latest version of Libdogecoin has in-built support for instantaneous QR code generation (in text, jpeg, and png formats). Since Libdogecoin has been upgraded, it is now possible to sign and verify messages and transactions. The dependencies and network awareness of libdogecoin have been updated so that programmers may check a flag to see whether or not the library was compiled with network support. According to CMC, the Dogecoin price today is \$0.075117 USD with a 24-hour trading volume of \$313,113,157 USD. Dogecoin is up 0.63% in the last 24 hours.

- The Twitter CEO Elon Musk responded to a popular Dogecoin community member. - DOGE price increased by over 3.3% to \$0.077137 following Elon Musk's post. In a joke tweet, prominent Dogecoin supporter and tech billionaire Elon Musk mentioned a "fee for visiting Twitter headquarters," which should be paid in DOGE. A user who asked about visiting this social media platform's headquarters received a

response from Elon Musk. Ok, but it will cost 3 Doge â€” Elon Musk (@elonmusk) March 23, 2023 Musk responded ironically that it would cost 3 DOGE. This may have renewed speculation among Dogecoin traders and investors. That is the cryptocurrency will eventually be recognized as a form of payment on Twitter. The popular DOGE price increased by over 3.3% to \$0.077137 following Muskâ€™s post. Due to his recent remarks regarding Federal Reserve (Fed) plans, Musk has recently gained media attention. In a statement, Musk claims that switching from low-interest savings accounts to high-interest money market accounts is a significant factor in why depositors are leaving banks. Musk demanded a 50 basis point rate reduction to save the melting banks before yesterdayâ€™s Fed rate decision. In addition, he supported the idea of mandating the FDIC briefly insure all deposits above the \$250,000 limit to stop bank runs. Recommended For You:

- While Dogecoin increased by 15%, Shiba Inu climbed 56% since the start of 2023. - Shibarium still has not yet set a final date for the launch. The hype over the dog-themed memecoins in the crypto community has increased every day. The prominent meme cryptocurrencies Dogecoin (DOGE) and Shiba Inu (SHIB) were created as a joke. During the 2021 bull run, both cryptos made millions of dollars for investors. And they both have enthusiastic and separate fanbases. Still, each project missed fulfilling its price goals. However, Shiba Inu overtakes the first and largest meme coin Dogecoin in terms of developments. As the â€”Shiba communityâ€” awaits for the upcoming layer-2 blockchain â€”Shibariumâ€” launch, which has no specific release date. SHIBâ€™s pseudonymous co-founder Shytoshi Kusama always has a habit of letting â€”SHIB ARMYâ€” with mysterious hints or puzzles to solve. He started posting medium blog posts about the Shibarium release since Feb 14th, which was rumored to be the rollout of the layer-2 scaling solution. But still, the launch date is mentioned as â€”As Soon As Possibleâ€”. Price Track of the Meme Coins At the time of writing, Dogecoin traded at \$0.081089 with a 24-hour trading volume of \$333 million and has a market cap of \$11 billion. DOGE increased by around 15% since the start of 2023. The revival Shiba Inu traded at \$0.00001272 with a 24-hour trading volume of \$273 million and holds a market cap of \$7 billion, which is less than Elon Muskâ€™s favorite coin DOGE. But when comparing Shiba Inu with DOGE, SHIBâ€™s price surged significantly by over 56% from Jan 2023, 41% higher than Dogecoin. Shib price changes and its upgrade, which has many use cases indicate that it may beat Dogecoin. Also, while leading cryptocurrencies such as Bitcoin (BTC) and Ethereum (ETH) trading in red, SHIB soared around \$1.8% in the last 24 hours, as per CoinGecko. Further, Muskâ€™s recent tweet, which featured his doge â€”FLOKIâ€” as the â€”New CEO of Twitterâ€”, prompted leading memecoins price changes. Recommended for you

- Dogecoin currently ranks at number 10 in terms of market cap. - The total number of Shiba Inu tokens is restricted to 1 quadrillion. Although both Shiba Inu and Dogecoin are still well behind their respective highs, they have both been trending upwards over the last week. Recent occurrences have kept both the popular meme currencies in the spotlight. Shiba Inu and Dogecoin are pitted against one another as competitors because of their relative fame in the cryptocurrency industry. In 2020, Shiba Inu was established, while Dogecoin was created in 2013, making it older among the duo. Battle of the Top Meme Coins It is common knowledge that Elon Musk had a role in Dogecoinâ€™s meteoric rise to prominence in the cryptocurrency market. As Dogecoin relies on Musk to maintain its status, Shiba Inu must do the same to ensure its continued relevance in the cryptocurrency market. There arenâ€™t many distinguishing features between Dogecoin and Shiba Inu meme currencies. Dogecoin may be thought of as a Bitcoin fork in the fourth generation. It is generated using the same proof-of-work (PoW) mining method as Bitcoin. Conversely, Shiba Inu Coin is an Ethereum-based currency that uses proof-of-stake (PoS) technology as opposed to proof-of-work (PoW). Although Dogecoin is a cryptocurrency with its own blockchain, Shiba Inu is a digital asset issued on the Ethereum blockchain network. Moreover, Dogecoin currently ranks at number 10 in terms of market cap as per CMC while Shiba Inu ranks at 13th position on the same list. Dogecoinâ€™s bigger and more active user base is supported by a vibrant community forum and various online organizations. Dogecoin has an unusual distribution model. You can never run out of Dogecoins. Because of this, unlike Bitcoin, which is capped at 21 million coins, there is no limit to the number of Dogecoins that may be created. Nonetheless, the total number of Shiba Inu tokens is restricted at 1 quadrillion, which is still a lot of tokens when compared to other cryptocurrencies. But still capped at the end of the day. Both Dogecoin and Shiba may be traced back to the same source: hype. Both have fully operating infrastructures, but none have really expanded blockchain technologyâ€™s capabilities.

- It has already overtaken Dogecoin and may be looking to do the same with Cardano. - It is gearing up to release a mainnet version of its new Layer-2 scaling solution, zkEVM. Polygon (MATIC) has been a top performer this past week, and with its recent Dogecoin flip, it may be trying to overtake Cardano and Binance USD next. Although the industry as a whole has felt the effects of Bitcoinâ€™s surge to over \$25,000, no other altcoin has witnessed benefits on the scale of MATICâ€™s 21% jump in seven days. MATICâ€™s rise over the last week has seen its market capitalization surpass that of the most widely used meme currency in the world. On the other hand, we canâ€™t know for sure whether this upward trend can be maintained until further down the road. Many people feared the worst when the SEC began its assault against the digital asset sector. Most digital assets, including Bitcoin, have been moving upwards recently, with Bitcoinâ€™s recent break over the \$25,000 mark being a notable example. At the time of writing Bitcoin is trading at the \$24,800 mark. Highly Anticipated zkEVM Launch Polygon (MATIC) has been one of the best performers alongside the most popular cryptocurrency in the globe. It has already overtaken Dogecoin and may be looking to do the same with Cardano and BUSD. At this time, MATIC is ranked as the ninth biggest cryptocurrency by market valuation. One of the most well-known Ethereum scaling projects, Polygon (MATIC), is gearing up to release a mainnet version of its new Layer-2 scaling solution, zkEVM, on March 27. This is why zkEVM will be a ZK-Rollup, which uses an off-chain to do its computations. Thus, transactions will be less risky, more convenient, and cheaper.

- Prominent memecoin Dogecoin (DOGE) rose by over 6.3% in a day. - FLOKI's price climbed more than 35%. The "New CEO of Twitter" was revealed by Elon Musk. He posted a photo of Shiba Inu dog (Dogecoin icon) wearing a black T-shirt with the CEO tag. Also, Musk teased that the dog is "Amazing and stated he's great with numbers". The new CEO of Twitter is [pic.twitter.com/yBqWFUDIQH](https://twitter.com/yBqWFUDIQH) Elon Musk (@elonmusk) February 15, 2023 Following Elon Musk's series of tweets, his favorite meme token Dogecoin (DOGE) price soared by over 6.3% in the last 24 hours and 5.9% from \$0.081848 to \$0.086956 just between before and after the original Twitter CEO posts. Whenever Musk interacts with this meme cryptocurrency, the price of DOGE goes up. Further, Dogecoin founder Billy Markus sarcastically tweeted under one of the tweets that the dog was "the only one crazy enough to take the job." At the time of writing, DOGE traded at \$0.086081 with a market cap of \$11 billion, surged around 5.53% in a day, and has 24 hours trading volume of \$985 million, increased more than 50%, as per CoinGecko data. Moreover, Dogecoin rivals Shiba Inu (SHIB) and Floki (FLOKI) also reacted to Elon Musk's tweets. SHIB soared around 4.8%, and FLOKI rose about 35%. Shiba Inu's Shibarium lead developer Shytoshi Kusama also retweeted his post. And SHIB Army is awaiting its layer 2 blockchain launch. Recommended for you

- Dogecoin (DOGE) is now trading at \$0.09243, up 7.25%. - The global crypto market has dropped by 1.04T, and 0.93% in 24 hours. Dogecoin (DOGE) is a dog meme coin that has previously inflated after the CEO of Twitter announced that the Twitter payment system will allow cryptocurrency. And the announcement caused the DOGE to skyrocket in value. And the DOGE has continued influence by Musk, with its price rising when he succeeds and plummeting when he fails. And the impact of Musk's operations will cause the DOGE to soar in price, and following the update of the payments of the Twitter lead meme currency, the bulls will be in control. The global crypto market has had a 1.04T decline, which has decreased to 0.93% in 24 hours. Furthermore, the largest cryptocurrency, Bitcoin (BTC), is trading in the red, with a decline of 1.24%. Not only BTC, but the entire crypto market, is on a red candle march. Only Dogecoin has seen a price hike in the last 24 hours. Dogecoin (DOGE) is currently trading at \$0.09243, having risen from \$0.08 to \$0.09 following the news. In the previous 24 hours, it has risen to 7.25%. With a daily trading volume of \$1.31 billion. With a market cap of \$12 billion and a potential yield of 6.93%. DOGE is rated 9th, and there is 132B DOGE in circulation. Recommended For You

- The whale made an on-chain purchase of 1.4 billion DOGE coins on May 23, 2022. - After a dormant period of seven months, the whale resumed trading DOGE tokens. As the cryptocurrency market began to rebound in January, Dogecoin also saw a 30% increase in value. The price of DOGE has dropped somewhat over the last two days due to a general market selloff but gained little momentum today. Also, owing to traders' lack of interest, whales have been unloading their DOGE memecoins, with Shiba Inu being the most in-demand memecoin since the launch of Shibarium Beta. An anonymous "whale" sent \$117.53 million worth of Dogecoin (DOGE) to the largest crypto exchange Binance on January 25, according to Whale Alert. In less than five minutes, the whale moves 985,236 DOGE, valued at around \$82.66 million, from Binance to its wallet. Activity After Dormant Period of 7 Months The whale made an on-chain purchase of 1,400,000,000 Dogecoin (DOGE) coins on May 23 of last year. The wallet has been inactive ever since then. After a dormant period of seven months, the whale resumed trading DOGE tokens on the day Tesla announced its quarterly profits. The market's recent rapid rebound has prompted whales to become more active, but Elon Musk's lack of enthusiasm about incorporating Dogecoin into Twitter has led to selloffs. Traders anticipated a market-wide decline in cryptocurrency prices as Bitcoin and Ethereum prices showed no substantial drop. The value of one Dogecoin (DOGE) has gained by nearly 2% in the previous 24 hours and now trades at \$0.08603. The price fluctuated between \$0.08345 and \$0.08788 throughout the course of the last 24 hours. A 2% surge in volume over the last day is also indicative of investors' interest back in the meme coin.

- 150 million DOGE tokens, worth over \$13 million, were traded by top 20 whale. - The majority of DOGE coins are stored at Robinhood-affiliated wallet addresses. This weekend, the biggest Dogecoin whale traded almost 165 million DOGE coins. As market sentiment improved after zero-fee trading platform Robinhood announced support for Dogecoin in its newly launched wallet, many "whales" bought up massive quantities of DOGE coins. Whale Alert claims that over 500 million Dogecoin have been snatched by whales during the last two days. Dogecoin's (DOGE) biggest holder took part in the whale buildup, amassing approximately 165 million tokens. Massive Accumulation Moreover, 150 million DOGE tokens, worth over \$13 million, were traded by another top 20 whale in the last 24 hours. This change follows Robinhood's announcement that its new self-custody "Robinhood Wallet" app would handle Dogecoin. After the September release to the first 10,000 customers, Robinhood will provide the wallet service to over a million people who have been placed on a waiting list. The majority of DOGE coins are stored at Robinhood-affiliated wallet addresses. Nearly 25.21 percent of all Dogecoins have held in the "DPDLBA" Robinhood wallet. 34.76 billion DOGE, valued at \$3.1 billion, are stored at the given wallet address. Dogecoin's second-largest holder has 7.08 billion DOGE, or 5.14 percent of the currency's supply. As a result, the gap between the two biggest holders is vast. Dogecoin was one of the top 10 tokens that were purchased by the top 100 BSC "whales" on WhaleStats in the last 24 hours. The top 100 BSC "whales" spent the most money on the meme token. In addition, a significant sum of Dogecoin was listed in the top 500 biggest BSC whales holdings.

- More than a million people have signed up for Robinhood's Wallet waitlist. - The news was well received by the meme community. With the announcement of the Robinhood Wallet's release yesterday, Robinhood has officially entered the cryptocurrency wallet market. This is mobile software that allows users to trade and transfer digital assets such as cryptocurrencies and NFTs. The wallet's other capabilities include the ability to make cryptocurrency exchanges without incurring any network fees. More than a million people have signed up for Robinhood's waitlist, and the company says it is

slowly rolling out the service to those people. Yet many were disappointed to find that Dogecoin (DOGE) wasn't initially supported by the wallet. DOGE Community Excited When the DOGE community voiced worry about the wallet's lack of support for the asset, the U.S. retail trading platform said it is "hard at work" on a solution. The news was well received by the meme community, especially because it was revealed that Robinhood will soon begin listing new meme cryptocurrencies. The official answer is in line with what Johann Kerbrat, Robinhood's General Manager of Cryptocurrency, has said before. In response to questions about Dogecoin, Kerbrat said that they want to add other chains and assets, however, they would not say which ones. Nonetheless, Dogecoin may be traded on Robinhood's trading app right now. Further, the corporation said in August 2021 that Dogecoin (DOGE) accounted for around 62% of sales in the second quarter of 2021. This number topped that of both Bitcoin and Ethereum combined. A new media agency called Sherwood was also recently formed by Robinhood to provide news and information on the financial markets, economics, business, and technology. Recommended For You:

- Shiba Inu (\$SHIB) surged by over 15% in the last 24 hours. - Dogecoin (\$DOGE) climbed by around 11% in just 7 days. Since the start of 2023, the global crypto market encountering bullish momentum. Also, social media was buzzing with dog-themed cryptocurrencies. The Shiba Inu (\$SHIB) community, known as the "SHIB Army," has been waiting for the beta version of the Layer-2 scaling solution, "Shibarium," which is designed for the SHIB ecosystem. On January 16, the Shiba Inu community alerted crypto enthusiasts through the memecoin's official Twitter account that the SHIB community will get access to the "Shibarium" as soon as possible. As a result, \$SHIB and \$BONE token values have dramatically soared. In addition, Shiba Inu's rival Dogecoin (\$DOGE) also witnessed massive price surges. Meme Tokens Surging Massively The market's adoration of all things Shiba Inu is still getting strong and evidenced significant rises. According to CoinGecko, Shiba Inu (\$SHIB) surged by over 15% in the last 24 hours with a trading volume of \$1 billion. At the time of writing, Shiba Inu traded at \$0.085970, up 31% in 7 days and 48.5% in just 14 days. \$SHIB has a market cap of \$7 billion. Also, the Shibaswap ecosystem's governance token Bone ShibaSwap (\$BONE) price has risen approximately more than 25% over the last week and by over 64% in the last 14 days. However, prior to release, the Doge killer Shiba Inu ranked as the "second most safe crypto project" in the blockchain industry with a Skynet Trust Score of 95, as per CertiK. Further, the first and largest meme cryptocurrency, Dogecoin (\$DOGE) climbed by around 11% in just 7 days and 22% in the past two weeks with a market cap of over \$11 billion. \$DOGE traded at \$0.0001207 with 24 hours trading volume of \$680 million, which increased by over 67%. Moreover, prominent cryptocurrencies such as Bitcoin (\$BTC) and Ethereum (\$ETH) also beholds greens in their price chart. \$BTC increased by around 21% and \$ETH surged by 18% in the last week. Recommended for you

- On January 13th, buyers attempted to push the price over the 50-day SMA at \$0.08. - Dogecoin is up 8.53% in the last 24 hours. Dogecoin is still performing well despite a drop in value in 2022 owing to catastrophic occurrences and weak market circumstances. The coin's first break of the \$0.1 barrier occurred in January 2021, years after its first release, and its all-time high occurred in May of the same year, at \$0.73. On January 11 and 12, this year bears attempted to push Dogecoin below its 20-day EMA of \$0.07, but the bulls stood firm. On January 13th, buyers attempted to push the price over the 50-day simple moving average (SMA) of \$0.08. Further Bullish Momentum Anticipated And as they have succeeded, the DOGE/USDT pair may accelerate toward \$0.11 and begin a surge. At this price, bears might launch a major selling campaign. If the price suddenly drops from here, the pair might be stuck between \$0.07 and \$0.11 for quite some time. According to CMC, the Dogecoin price today is \$0.087107 USD with a 24-hour trading volume of \$1,196,005,599 USD. Dogecoin is up 8.53% in the last 24 hours. With the ongoing crypto market rally, it is highly likely that the Dogecoin price will continue its momentum. Twitter introduced a price index last month, enabling users to look up the current value of Bitcoin and Ethereum. The Dogecoin community was disappointed not to find Twitter CEO Elon Musk's fav meme coin on the list. However, a "cashtag" for Dogecoin (DOGE) in U.S. dollars (USD) has been introduced on Twitter, facilitating inquiries for the token's current market value.

- The foundation has established a new community Dogecoin Core development fund. - The price of Dogecoin has decreased by 13% over the last week prior to the news. On Saturday, the Dogecoin Foundation made an exciting announcement for the Dogecoin community. For the greater good of the Dogecoin ecosystem as a whole, the foundation has established a new community Dogecoin Core development fund. In response, the Dogecoin community rallied, sending DOGE's price up by more than 2% in just an hour. Prior to this announcement, according to statistics provided by CMC, the price of Dogecoin has decreased by 13% over the last week, and by 6% to just under \$0.07 during the course of the previous 24 hours. Speculation over future modifications to the energy-intensive proof-of-work mining process that now supports the cryptocurrency has caused the notoriously volatile meme coin to drop this week. Rumors Put to Rest One of Dogecoin's primary developers recently denied rumors that the cryptocurrency will soon undergo a transition to a more energy-efficient proof-of-stake architecture, similar to Ethereum's long-awaited merging in September. A lead developer at the Dogecoin Foundation, Michi Lumin, tweeted on Wednesday that those who have posted about the coin and expected changes coming "do not actually have the inside scoop on what's going on with #dogecoin." It would be difficult, Lumin said, for the Dogecoin Foundation to impose such a change without the support of the vast majority of node validators. As said, the most well-known cryptocurrency to switch to a proof-of-stake consensus method is Ethereum, which completed its long-awaited merging event in September of this year. Some people think that proof-of-stake is less safe than a proof-of-work approach, despite the fact that it is a more energy-efficient method to run a decentralized blockchain network. Although there was much excitement about Ethereum's integration and the resulting energy savings, the price of ETH plummeted after the transfer was complete.

- The billionaire purchased Twitter in October, driving up the value of DOGE. - Tesla owns \$218 million in Bitcoin but hasn't invested in Dogecoin. The newest Twitter Poll by Elon Musk asked whether he should resign as Twitter's CEO, and the result sent Dogecoin's price down more than 10% today and almost 16% in the last 7 days, to its current trading level of \$0.07. Recent events have been devastating for the cryptocurrency market and the technology sector at large, including the demise of FTX. As of today, major indices including Bitcoin, Ethereum, the S&P 500, the NASDAQ, and the Dow Jones Industrial Average were all down 1-2 percent. Four days in a row, all three main indices have dropped, reaching new six-week lows. Musk Effect on DOGE Moreover, the billionaire purchased Twitter in October, driving up the value of the original meme currency. Dogecoin was priced at \$0.07 on October 27th, the day Musk completed his acquisition of Twitter. According to CoinGecko, on November 1 Dogecoin was trading at \$0.14, and its value has been fluctuating downward and upward ever since. Dogecoin's yearly high is still much behind its all-time high of \$0.73 in the days before Musk appeared on Saturday Night Live in May 2021. By June 2022, however, the coin's value had dropped by more than 90%. Many people assumed that Dogecoin, Musk's preferred cryptocurrency, would be used in the payment system that was rumored to be built into Twitter in June 2022 after correspondence suggesting that Musk had such plans was released. Some say that after buying Twitter, Musk shelved such ideas. Tesla owns \$218 million in Bitcoin but hasn't invested in Dogecoin despite Musk's enthusiasm.

- Dogecoin continues to crash with a drastic notable fall in its price. - FTX Collapse and BTC downfall are the major reasons for the decline. - Loss of over \$850M in DOGE's market cap in the last 24 hours. Dogecoin (DOGE) is a popular memecoin with a large user base holding a wide investors community. The main pillar for the coin to emerge and grow in the market is Elon Musk who is known as "Father of DOGE". In the past few months, Dogecoin continues to plummet marking a drastic fall in its prices. In addition, the memecoin is currently witnessing short-term selling pressure, which could lead to a tremendous crash for the DOGE ecosystem. At the moment, Dogecoin is trading at \$0.100745 with a decline rate of 5.04% in the last 24 hours. Moreover, there is a great inflation in the market cap of Dogecoin. However, the persistent downfall resulted in a loss of over \$850 million in the last day. Remarkable Fall of Dogecoin The crypto space is facing notable challenges over recent months. More so, the rise of significant issues are creating a great impact on the price fall of all cryptocurrencies. In that case, the meme cryptocurrency hit hard with all the collapse booming in the crypto market. Right from then, DOGE is still shedding down with severe price fall. Notably, the most significant crisis affecting memecoin are, the liquidity crunch of FTX and the unexpected price drop of BTC. The effect of these issues was the major reason for DOGE to experience a downtrend in the marketplace. Suddenly, the recent buying pressure for Dogecoin arose because of the inflow of about \$5 billion in its market cap in just 1 month. More so, the reason behind this inflow is due to two popular announcements in the market. One is the acquisition of Twitter by Elon Musk. The other is the implementation of Dogecoin as the payment gateway for the social giant. As a conclusion, the crypto market provides high fluctuations affecting the community in both ways. Similarly, Dogecoin can suddenly rise up for high adoptions and at the same time can fall down with a crash. However, if this decline state progress, then there is a bearish future awaiting for the meme cryptocurrency near soon.

- At press time, Dogecoin recorded a 117% surge in its 24h trading volume. - Dogecoin holds a fandom of 3.6 million on Twitter. - December 6 marks the 9th year in the crypto market. Dogecoin, the largest memecoin and Tesla CEO Elon Musk's favorite crypto, exhibited a 24% price surge since last week. The episodic spikes in DOGE's price never fail to conquer the crypto community's attention. Rationale Behind Dogecoin Price Surge? No single event or action can be regarded as the prime reason behind the Dogecoin price surge. Predominantly, Elon Musk's curious involvement continues to trigger the DOGE hype and contributes to short price spikes. Two years ago, in April, the new Twitter CEO Elon Musk's reply to Dogecoin's poll revealed his love for Dogecoin. Since then, Musk's DOGE-friendly tweets aided the crypto asset's price rallies. The extensive DOGE community clung to their famous slogan "to the Moon", storming Twitter. Moreover, Musk announced a crypto-funded satellite mission called "DOGE-1: Mission to the Moon" last November, provoking the creators of Dogecoin. After the Twitter takeover, Elon Musk announced various trial-and-error-led plans to enhance the microblogging site. Twitter Blue's \$8 monthly price tag raised enough speculations. Now, the rumored Twitter crypto upgrade is anticipated to cause the Dogecoin price to increase in the future. #Dogecoin may become the official currency of Twitter soon. CEO (@Investments\_CEO) November 27, 2022 The Musk-Dogecoin affinity initiated the launch of numerous memecoin such as Dogelon Mars (ELON), Dogs of Elon (DOE), elonDogeTwit, and so on. Memecoin projects attempted to grab the attention of Elon Musk to skyrocket their worth and fame. Interestingly one among them is the "Elon Goat token". The EGT creators took a 30-ft Musk-based statue to Tesla's Austin HQ. It combined Elon's head with a goat's body and notably, there was a collar with a Dogecoin mark. Recommended For You Dogecoin (DOGE) Price Prediction 2022 Will DOGE Hit \$0.2 Soon?

- There was a dramatic uptick in the price of Dogecoin, showing strength of purchasers. - The meme coin is now trading at \$0.09, an increase of 10.5% in 24 hours. While Bitcoin, Ethereum, and the rest of the cryptocurrency market have scarcely moved, Dogecoin has skyrocketed. There was a dramatic uptick in the price of Dogecoin, showing the strength of purchasers. DOGE has shown a clear breakthrough over a nearby resistance level, which may indicate a continuation of the current trend. According to CMC, the meme coin has a market worth of \$12.3 billion and is now trading at \$0.09, an increase of 10.5% in 24 hours. This is in stark contrast to May 2021, when Dogecoin advocate Elon Musk headlined Saturday Night Live and DOGE reached an all-time high of 73 cents. Industry Still in Shock In fact, the best-performing major cryptocurrency during the last day was Dogecoin, which was founded as a joke but is now Elon Musk's favorite digital asset. Bitcoin, the most valuable cryptocurrency, is down 0.5% over the previous 24 hours, while Ethereum is down almost 1%. The cryptocurrency industry

is still in shock since one of the largest and most popular cryptocurrency exchanges, FTX, declared bankruptcy. As a consequence, this month has seen a significant drop in the value of almost every major cryptocurrency and token. In 2013, a group of developers created Dogecoin as a joke in homage to the “doge” meme depicting a Shiba Inu dog with a stuttering accent. In 2020, however, the coin’s value skyrocketed when Tesla CEO Elon Musk began promoting it on Twitter. Since then, prominent investors like Mark Cuban and Musk have defended the coin’s potential as a payment method. However, despite this, it is still 91% behind its all-time high.

- Musk made the remarks in a Twitter space created by Mario Nawfal. - The Tesla CEO has expressed his approval of the meme coin on many occasions. Dogecoin (DOGE) had a little price increase when Tesla CEO Elon Musk mentioned it. In an interesting twist, the new Twitter boss declared “Dogecoin (DOGE) To The Moon” at his Twitter space on Saturday. Musk made the remarks in a Twitter space created by Mario Nawfal, the Founder of the International Blockchain Consulting Group. In the meanwhile, the price of DOGE increased after Musk’s remarks. In addition to DOGE, Musk discussed the security of cryptocurrencies and Sam Bankman-Fried’s reported interest in purchasing a stake in Twitter. Elon Musk Effect Musk said that the founder of FTX “wanted to invest in Twitter but gave away very bad vibes.” A well-known saying was stated by him: “If it’s not your key, it’s not your wallet.” As for the DOGE element, Musk said he was working hard on that. The value of the cryptocurrency shot up by almost 10% after Elon Musk discussed the meme coin. According to the token value tracker CoinMarketCap, the price of DOGE as of this writing is \$0.0905, up 9.52 percent in the previous 24 hours. All cryptocurrencies have been significantly impacted by the crypto slaughter observed earlier in the week. Over the last week, DOGE has lost approximately 28.51% of its value. Dogecoin (DOGE) had enormous positive momentum after Elon Musk’s formal acquisition of Twitter. Musk has expressed his approval of the meme coin on many occasions. In a recent tweet for Halloween, Musk included his Shiba Inu donning a Twitter t-shirt. Musk’s purchase was met with enthusiasm from the community, and some saw it as a possible preview of Dogecoin (DOGE) on Twitter. Recommended For You:

- The Elon Musk Twitter acquisition, worth \$44 billion, helped propel the price. - During its recent upswing, Dogecoin jumped into the top 10 cryptocurrency rankings. The price of Dogecoin (DOGE), the biggest meme cryptocurrency, surged by over 110%, surpassing the \$0.135 barrier that had previously served as a formidable barrier. The Elon Musk Twitter acquisition, worth \$44 billion, helped propel the price in an unprecedented direction. Market data, however, indicates that a substantial sum of Dogecoin has been liquefied by dealers during the previous day. Coinglass reports that in the last 24 hours, almost \$261 million has been sold off from the worldwide crypto market by 110.99k investors. Dogecoin, meanwhile, has seen the most amount of liquidation. Wild Ride For the Meme Coin According to the data, Dogecoin has had a 24-hour trading volume of almost \$61 million. While this may seem like a lot, consider that short calls account for almost 54% (\$33.11M) of total liquidation. Because of this, most investors were bracing for a decline in the price of DOGE. However, Okex and Binance have both acknowledged liquidating Dogecoin short calls totaling \$7 million. From numerous whale wallets, almost \$18 million worth of Dogecoin were moved to various crypto exchanges in the previous 24 hours, according to Whale Alert. The greatest transaction recorded by the tracker was over 100 million DOGE being sent to Binance. The price of Dogecoin has retracted 16% in the last day. Presently, the average price of a DOGE is \$0.1137. Twitter’s recent announcement of yet another development in the NFT market also contributed to the quick increase in price. Yet, DOGE’s recent trading volume increased by a staggering 207% to \$14.5 billion. During its recent upswing, Dogecoin jumped into the top 10 cryptocurrency rankings. - DOGE has replaced Cardano’s native Token ADA as the sixth-largest cryptocurrency in the world. - Hoskinson extended an invitation to Dogecoin to join Cardano as a sidechain. With the surge to six-month highs, DOGE has replaced Cardano’s native Token ADA as the sixth-largest cryptocurrency in the world. Elon Musk, the CEO of Tesla, who has long been a supporter of DOGE, appears to be bolstering DOGE after completing his acquisition of Twitter. Musk has previously advocated for DOGE as a way to tax users for their tweets and stop spam and bots on Twitter. Effects Of Musk’s Remarks on Dogecoin Price Elon Musk’s initiatives have boosted Dogecoin’s price momentum previously. Musk was sued for \$258 billion in damages in June 2022 for allegedly running a pyramid scheme to fund Dogecoin, according to the lawsuit. Charles Hoskinson, the founder of Cardano, claims that Musk’s acquisition of Twitter has raised the likelihood that DOGE will converge with the social media network. Hoskinson extended an invitation to Dogecoin to join Cardano as a sidechain. Hoskinson asserts that he is prepared to perform the migration at no cost and that he will be able to incorporate smart contracts. Elon Musk said that Dogecoin could be used to purchase Tesla and Starlink goods last year. It caused Dogecoin’s price to increase by 17%. However, not all of Musk’s remarks led to a rise in Dogecoin’s value. In May 2021, Musk said that Dogecoin was his “hustle” during a US comedy gig. The remarks caused the price of Dogecoin to fall by 35%. Exactly what Musk intends to do with Dogecoin remains unknown. That lets speculation and price volatility continue unabated. At the time of writing, Dogecoin’s current price is \$0.1322 with a 24-hour trading volume of \$13,440,926,716. Dogecoin has increased by 53.06% in the last 24 hours as per CoinMarketCap. - Elon Musk Twitter deal is supposed to be finalized on Friday. - Dogecoin (DOGE) price increased by more than 36% in the previous week. While Tesla CEO Elon Musk’s Twitter deal is near to finish line, the most prominent memecoin, which is act as his favorite cryptocurrency, DOGE price surged by more than 21% in the last 24 hours. The billionaire’s actions have repeatedly influenced the token’s price. Dogecoin (DOGE) has grown to act as a stand-in for an opinion on Musk and has received significant support from him. The token’s value rose once more as a result of Musk’s most recent action. At the time of writing, DOGE traded at \$0.08011 and soared up to over 36% in the last 7 days.

Elon Musk Influence on Dogecoin (DOGE) Dogecoin started to trend after rallying in response to the \$44 million Twitter acquisition, which involves the Tesla founder and is expected to finalize on Friday. As it Today Dogecoin recorded 3rd green candle in a week, with a price surge of 33% in 14 days and over 30% in the previous month, as per CoinMarketCap. Further, DOGE's market cap increased by 21% and had a market cap of approximately \$10 billion. Also, the memecoin's trading volume has risen by around 200%, currently, Dogecoin has a 24 hours trading volume of around \$1 billion. However, still, the token decreased by 69% from its all-time high of \$0.7376 recorded on May 8, 2021. After more than a month, the global cryptocurrency market cap reached \$1 trillion, an increase of over 3%. And the prominent cryptocurrencies Bitcoin (BTC) and Ethereum (ETH) also witnessing price surges. Respectively BTC increased by 8% and ETH rose by over 20% in the previous week. Recommended for you

- Dogecoin (DOGE) price surged by more than 3.51% in the last 24 hours. - Google cloud service accepts Dogecoin as payment. Following Elon Musk's release of his brand new perfume, "Burnt Hair," Musk's favorite Dogecoin (DOGE) started to trend after bouncing back today. At the time of writing, DOGE traded at \$0.0604 with a price increase of over 3.51% in the last 24 hours. Users can use Dogecoin (DOGE) along with fiat currency to buy the latest Burnt Hair perfume on Elon Musk's Boring Company website. Thousands of perfume bottles were sold for millions of dollars in a few hours and the perfume cost \$100. Dogecoin (DOGE) Will Back on Track? Once again, the token's value increased due to Musk's most recent interaction with it. Dogecoin price has risen by approximately 2% in the previous month, and DOGE holds a total market cap of more than 8 billion. Whenever Elon Musk interacts with Dogecoin, its value increases. As it, Musk's Twitter acquisition announcement triggered DOGE to rise by 33%, reaching \$0.15. Also, Elon Musk had confirmed that he would invest some of his wealth in it over the years. Furthermore, Dogecoin traded around \$0.06099 with a price surge of around 4% in the early morning. Also, during the market volatility, DOGE traded better, with the highest price of \$0.08772, in August, as per CoinMarketCap. More recently, Google confirmed its support for cryptocurrency. And it has started accepting Bitcoin, Ethereum, Dogecoin, Shiba Inu, Ape Coin, and other cryptocurrencies as payment methods for its cloud service. Google cloud service support may enhance the value and cryptocurrency adoption. Moreover, the global cryptocurrency market is witnessing some gains in the price chart. According to CoinMarketCap, the total crypto market cap is \$941.55B, which surged by 3.28% the previous day. Recommended For You

- Elon Musk's Boring Company now accepts Dogecoin as payment. - Tesla already accepts DOGE for some merchandise. Elon Musk's underground tunneling system company, The Boring Company, has expanded its operations by launching a new perfume. Musk recently revealed in a tweet that the Company has launched an unusual product, a fragrance that smells like a candle at the dinner table. Customers could pay for the product using Musk's favorite cryptocurrency, Dogecoin. Higher Transaction Capacity Than Bitcoin Elon Musk is a strong supporter of the first meme-coin, Dogecoin. He had admitted to investing some of his wealth in it over the years and had praised the token's merits on numerous occasions. Musk stated in August that Dogecoin has a higher transaction capacity than Bitcoin. To demonstrate his point, he stated that DOGE transactions take 60 seconds to complete, whereas BTC transactions take about 10 minutes. Musk purchased more than 70,000,000 Twitter shares earlier this year, indicating his intention to buy the social media platform for \$44 billion. DOGE increased by 33% within hours, surpassing \$0.15 per coin. Tesla, his electric vehicle company, already accepts DOGE for some merchandise. Furthermore, Musk announced in May that SpaceX will follow suit, and future Starlink subscriptions may accept the meme coin. He also hinted that if his takeover bid for the social media platform is successful, Twitter will accept cryptocurrency payments. Musk's Tesla, and SpaceX were sued for \$258 billion in June, alleging that they are engaged in a crypto pyramid scheme via dogecoin cryptocurrency. Nonetheless, Tesla CEO Elon Musk reiterated his intention to continue buying and supporting DOGE. Recommended For You :

- According to the report, the billionaire sent Twitter a letter proposing the revival. - The result was a 12.67% increase in the value of Twitter shares that day. Following the revival of Elon Musk's takeover discussions, rumors have circulated that Dogecoin (DOGE) might replace the dollar as Twitter's official currency. Recent reports indicate that Musk is offering to acquire Twitter at the first bid price of \$54.20 per share. In this light, further conjecture has arisen as a consequence of Elon Musk's apparent involvement with the DOGE project. The DOGE Army on Twitter is divided over whether or not Dogecoin should become Twitter's official currency. Elon Musk Effect With a current market worth of \$8.58 billion, Dogecoin is the most valuable meme coin in the cryptocurrency market. Previously, Elon Musk has tweeted multiple times about DOGE. The price of Dogecoin (DOGE) generally increased when Tesla's founder mentioned it. The value of the meme coin skyrocketed as news spread that Elon Musk had made a new offer to acquire Twitter. CoinMarketCap reports that the current price of DOGE is \$0.06558, up 8.51 percent in the past 24 hours. The fact that meme coin is trading so near to its monthly high of \$0.067 is indicative of the influence Elon Musk has had on the market. Bloomberg claims that Musk is seriously considering purchasing Twitter at the initial offer price of \$54.20 per share. According to the report, the billionaire sent Twitter a letter proposing the idea. The result was a 12.67% increase in the value of Twitter shares that day. The DOGE community was similarly ecstatic to hear the news. Many twitter users expressed interest in having DOGE adopted as the platform's official native currency. - Tesla is offering the whistle for a cool 1,000 Dogecoin right now. - The whistle resembles a miniature Cybertruck and is sold out right now. Elon Musk has started selling his own brand of whistle via Tesla yet again. This future whistle, known as the Cyberwhistle, may now be bought for the digital currency Dogecoin. Those who have been hoping to get their hands on another of Musk's peculiar inventions will have to wait a little bit longer since the item is presently sold out. But u have to

pay in Doge â€” Elon Musk (@elonmusk) September 13, 2022 On September 13, 2022, the guy behind Tesla, SpaceX, and other tech businesses tweeted, â€œBlow the whistle!â€ Of course, Musk was talking to the brand-new Cyberwhistle that Tesla is offering for a cool 1,000 Dogecoin right now. The whistle, however, has sold out entirely as of this writing. Taking a Shot at Twitter? The obvious parallel between Elon Muskâ€™s recent subpoena of a whistleblower and the use of a real, live whistle is plain to see. Late in August 2022, it became public that Muskâ€™s attorneys had sought to subpoena Peiter â€œMudgeâ€ Zatkos, Twitterâ€™s former head of security, in connection with his claims that the business had deceived Musk, its investors, and the board of directors. Teslaâ€™s decision to start selling a whistle is almost too obvious. The whistle resembles a miniature Cybertruck. The item is composed of â€œmedical-grade stainless steelâ€ and features an â€œintegrated attachment feature for added versatility,â€ according to the product description. For those who placed orders for a Cyberwhistle, deliveries should start in around four to six weeks. And Musk says theyâ€™re planning to boost the whistleâ€™s volume. The Dogecoin community is super excited. Although the price pumped up briefly, it then followed the overall market sentiment and plummeted. According to CMC, the Dogecoin price today is \$0.060630 USD with a 24-hour trading volume of \$485,132,504 USD. Dogecoin is down 4.60% in the last 24 hours. Recommended For You:

- While Dogecoin generates 5 billion, Bitcoin has produced 21 million BTC in a year. - Despite whether Bitcoin is bullish or bearish, Tesla has stopped accepting its payment. As the ultimate cryptocurrency meme coin, Dogecoin was developed. But the founder of SpaceX and Tesla, who is also the worldâ€™s richest individual, has taken it seriously. Elon Musk, a passionate supporter of Dogecoin, claimed in an interview with Full Send Podcast that the Dogecoin blockchain can handle more transactions per second than the bitcoin blockchain. He added that several major transportation services, including Tesla and SpaceX, now accept Dogecoin as a form of payment. The Boring Company in Las Vegas is now accepting payments with Dogecoin. Why Musk Supports Dogecoin Musk noted that although bitcoin transactions take around 10 minutes to complete, Dogecoin transactions are completed in just 60 seconds. According to Musk, this justifies the meme coin as a superior form of payment. It also appears to help that the locals are friendly: â€œTo be honest, the main reason Iâ€™m for Doge is that I believe he has the dogs and memes, and he also seems to have a sense of humor and not take himself too seriously. Although Doge was only intended to be stupid joke money, I find it odd that it has a considerably larger total transaction throughput capacity than bitcoin.â€ Additionally, it was noted that only 21 million bitcoins can be produced each year, compared to 5 billion Dogecoins, which may make it easier to establish its use as a transaction currency in the long run. And Tesla already stopped bitcoin as a means of payment and He further stressed that he is associated with other meme coins like â€œElonâ€ and other digital currencies with Elon-related names like Dogelon Mars. Musk has no interest in any other cryptocurrencies, whether they were created in his honor or those of other attractive dog breeds, even though he supports two meme cryptocurrencies (Dogecoin and Shiba Inu). - Dogecoin can now be easily and directly integrated into a wide range of different platforms. - RadioDoge and Gigawallet will be developed on the foundation of this product. Michi Lumin, the key developer of the Dogecoin Foundation, said on August 5 that libdogecoin, a new upgrade, has been made available. With the libdogecoin upgrade, Dogecoin can now be easily and directly integrated into a wide range of different platforms. Although this feature isnâ€™t new, itâ€™s unusual that it doesnâ€™t need people to have a deep understanding of blockchain technology in order to utilize it. Dogecoin-compliant products may be simply created by people who lack the technical and specialized understanding of crypto protocols. The product may be used in a wide range of languages. Libdogecoin v 0.1, which was just released, is only a library without the capacity to run a node, according to the projectâ€™s developers. Key Update For Future Products The completion of libdogecoin is vital to the Dogecoin group as it is essential to the development of future products. For example, RadioDoge and Gigawallet will be developed on the foundation of this product. They are all a part of a long-term strategy that wants to make meme coin a generally recognized medium, as well as a means of transferring goods and services worldwide. Dogecoin is the biggest meme currency in the business, having a market capitalization of over \$9 billion and constant backing from Tesla CEO Elon Musk. With a price peak of \$0.7 in May 2021, the meme token became well-known around the globe. Shiba Inu and other imitators were born as a result of the tokenâ€™s success. Due to this, Dogecoin remains a popular asset option for investors. According to CMC, the Dogecoin price today is \$0.068521 USD with a 24-hour trading volume of \$331,435,906 USD. Dogecoin is up 3.28% in the last 24 hours. Recommended For You:

- The UI now includes pruning configuration. - New RPC function, rescan has been added to enable node operators to rescan the chain. On earlier Today, Dogecoin announced that the underlying blockchain has been improved in terms of efficiency and security with the latest Dogecoin Core 1.14.6 upgrade. The update includes a range of features, and modifications to the current fee structure, the update will help to fix many security-related problems. A wallet backup directoryâ€™s setup and a limitation on the maximum number of addnode records are two breaking modifications in the upgrade. There is a maximum of 800 addnode records per addnode. #Dogecoin Core 1.14.6 is now released, live and current! With a good number of improvements under the hood and some nice new features in the UI. Get it here â€” <https://t.co/7pn8tl4dwj> this is definitely a recommended update for everyone! â€” Dogecoin (@dogecoin) July 20, 2022 The Upgraded version The recommended dust limit for all network users has been changed from 1 DOGE to 0.01 DOGE, which is a fundamental enhancement to DOGEâ€™s fee mechanism. A new RPC method called liststucktransactions has been created to assist wallet operators in identifying any stuck transactions and enabling resolution. The UI now includes pruning configuration, making it simpler for graphical users to save disc space. And the upgrade helps to control the number of connections without restarting. Also, a new RPC function called rescan has been added to enable node

operators to rescan the chain for wallet transactions from a specific height. CEO of Tesla and Dogecoin lover Elon Musk announced that the company had not sold any DOGE despite liquidating 75% of its Bitcoin holdings to add \$936 million to its balance sheet in Q2. At the time of writing Dogecoin (DOGE) traded at \$0.068660 with a trading volume of \$769,361,347. DOGE is down 6.53% in the last 24 hours and it has a market cap of \$9,109,122,387 according to CMC.

- Tesla retains \$936 million in its balance sheet after selling BTC holdings. - In the previous year, Tesla invested \$1.5 billion in BTC. On Wednesday, Tesla Inc revealed in a letter to its shareholders, that the company has sold about 75% of its Bitcoin holdings, adding the amount of \$936 million to its balance sheet in the second quarter (Q2). In February 2021, Tesla had invested \$1.5 billion in Bitcoin, and a few days later, the firm sold 10% of its holdings. As per Tesla's latest full Q2 2022 financial report, the value of its digital assets had dropped to \$218 million, and a Bitcoin impairment had reduced second-quarter revenue. Tesla sold Bitcoin at a time when the cryptocurrency was at its low for the month. Musk's Ceaseless Love for Dogecoin On an earnings conference call, Tesla CEO Elon Musk expressed that, due to the uncertainty surrounding the Covid shutdowns, the company sold Bitcoin to maximize its financial position. He also added that the sale shouldn't be seen as some verdict on Bitcoin. At the same time, in the same conference call, Musk claimed that Tesla has not sold any of its Dogecoin. However, he didn't mention anything about the company's Dogecoin holdings. The billionaire has a great influence on major cryptocurrencies and the global crypto market. Some of his supportive statements on particular cryptocurrencies created tremendous growth in the crypto market. He previously tweeted that he owns cryptocurrencies Bitcoin, ether, and Dogecoin. However, Musk advises people to invest in cryptocurrencies with caution. In the previous year, he announced through Twitter that Tesla is open to accepting Bitcoin and customers can purchase Tesla with Bitcoin. But nearly after two months, he suspended that service due to the environmental issues created by Bitcoin mining. Moreover, he continuously uses his Twitter account to support Dogecoin. Last year, Musk branded himself as the "dogefather". Recommended For You Did Bitcoin Slump Push Elon Musk's Tesla Into Major Losses? - Billy Markus made a tweet describing his opinions on crypto and its users. - Elon Musk replied to the tweet showing the support and mentioned it to be currency-like. The Dogecoin co-founder Billy Markus has made a tweet describing his wish for the dogecoin and the community which follows it. And as always, the mascot for the memecoin, Elon Musk came into full agreement with the suggestion. Additionally, he included his firms Tesla and SpaceX would be marching along. Tesla and SpaceX merch, maybe more down the road " Elon Musk (@elonmusk) June 18, 2022 Despite the recent legal action on Tesla & SpaceX CEO, being demanded \$258 billion for supporting the DOGE. He still has massive trust and confidence in memecoin. Seems like Elon Musk is set to take the DOGE to the moon in literal and financial market form. Musk replied to Markus's tweet conveying that it is more stable than any fiat currency. The one-word reply from Musk has created more attention to Dogecoin's father's tweet. DOGE Founder Desire In the DOGE co-founder's view, it is more about just buying and selling. The pump and dump is not the only concern of the crypto as many others in the market. He is proud of the fact that Dogecoin followers know the market volatility and its existence is all based on current popularity. The community knows the pros & cons, and it enjoys the fun attached to it. If people react differently, that means they are unaware of the crypto concept. Also, he requested people to put effort into making crypto as utility and security. Recommended For You

- The senatorial candidate is a chiropractor and sports medicine professional. - Ursich's main goals, if elected, are healthcare and mental health, in addition to cryptos. Democrat candidate for the U.S. Senate, Timothy Ursich, wants to legalize Dogecoin in California. Candidate Ursich is a Democrat running for office and will be on the primary ballot on June 7. The senatorial candidate is a chiropractor and sports medicine professional who has a deep understanding of blockchain technology's complexities. Dogecoin investors and Tesla CEO Elon Musk's response to Ursich's Senate campaign is awaited. Billy Markus, the co-founder of Dogecoin, was also contacted for help in capturing the Dogecoin community. Push For Mass Adoption Dogecoin will become legal tender in California if one of the candidates on the primary ballot wins. As part of this, he said that he would promote cryptocurrencies and advocate for their widespread use in the financial sector. The medical practitioner is a first-time primary candidate who has no prior experience in politics. For his U.S. Senate candidacy in California, he tweeted: "I call on Billy Markus and Elon Musk for support of my U.S. Senate campaign here in California." Ursich further stated: "As mentioned weeks ago, if voted in/elected on June 7, I will draft a bill proposing Dogecoin as Legal Tender. I will push for mass adoption via the universal utility of #cryptocurrency." Ursich's main goals, if elected, are healthcare and mental health, in addition to cryptos. We'll have to wait and see whether Elon Musk and Billy Markus support the Democratic candidate. Last month, California Governor Gavin Newsom issued an executive order establishing the basis for regulating the crypto business. One of the co-founders of the meme cryptocurrency Dogecoin (DOGE), Billy Markus, has expanded his criticism of several digital currency projects, with Binance Smart Chain (BSC) being his newest target. On June 2, Markus referred to all BSC tokens as "garbage" while pointing out that the BSC Gem is a hoax.

- The market cap of DOGE is more than \$11 billion. - Research and background study will help to keep a steady foot in the crypto market. The meme coin has made up in the market capitalization pushing itself up in the list of largest cryptocurrencies in the market.. Dogecoin (DOGE) has a current market cap of \$11 billion and Polkadot (DOT) has \$10 billion, according to CMC at the time of writing. The price of DOGE is \$0.0845 and DOT is \$10.26, though the memecoin values only 0.823% of DOT, the popularity and community support it has is vast. The talk among both crypto and non-crypto circles is that the digital assets don't need any strong back working or developmental logic, just great timing and crowd capturing content is enough. The statement above is supported by the proof that Elon Musk's tweet on May 27th, about DOGE being accepted by Tesla and very soon SpaceX also going to join it made the coin hit main pages again. Musk tweeted: "Tesla merch can be bought with Doge, soon SpaceX merch too" One more hyped coin in recent times is the new Luna, the dramatic crash of the old Luna and the launch of the new Terra blockchain kept constantly reminding people about it. But the launch doesn't seem to touch the mark created. Staying Vigilant Investment in crypto needs knowledge and great risk-taking capacity, but getting into something without doing proper research is not advisable at all. Also, getting full knowledge and predicting the future trend is next to impossible. The hype and market trending can seem good but that is not stagnant, the volatile market surprises in hourly basics. Binance has also warned impulsive crypto enthusiasts to get a hold before taking any further actions. Binance tweet: " Binance (@binance) May 29, 2022

- The rally, eventually, lasted just a few hours. - The price of Dogecoin has increased by 4.27 percent during the past day. Tesla CEO Elon Musk said on Twitter on Friday that his space exploration business SpaceX would soon accept Dogecoin as payment. As a result, Dogecoin's value increased. DOGE rocketed up to over 9 cents within minutes of the tweet, partly reversing Thursday's 6.14 percent drop, as DOGE completed the day at \$0.0814. According to Musk's forecast, Dogecoin might "one day" be used to pay for SpaceX's Starlink subscriptions. If you're in a rural or distant place, Starlink claims to be able to deliver "high-speed, low latency broadband internet" through

satellite. Musk Dominates DOGE Price The rally, on the other hand, lasted just a few hours. DOGE is now trading at about \$0.081. While the rest of the crypto market continues to decline, DOGE has gained a little over 4% on the day. Although this isn't the first time Musk has affected DOGE's price. Tesla CEO Elon Musk's intentions to purchase Twitter sparked a surge in the market value of the meme-inspired cryptocurrency last month. DOGE prices rose by 32 percent in December after he said that Tesla products could be bought using DOGE. His enthusiastic tweets about Bitcoin after his company's \$1.5 billion purchase coincided with the cryptocurrency's brief but quick rise. Dogecoin (DOGE) has surpassed Polkadot (DOT) to become the tenth-largest cryptocurrency in the world by market valuation, according to statistics accessible on CMC. It's now trading at \$0.081494 with a 24-hour volume of \$1.292,139,186 USD. The price of Dogecoin has increased by 4.27 percent during the past day.

- Tesla CEO Elon Musk has had considerable influence on the Price of Dogecoin. - The CEO's fondness for DOGE may be more than just a passing fad. Elon Musk's SpaceX and Tesla will both accept Dogecoin as payment for items soon; he tweeted Friday, "Tesla merch can be bought with Doge, soon SpaceX merch too". "Maybe one day," he said when asked whether DOGE might be used to pay for Starlink subscriptions, a broadband satellite internet service. "Tesla merch can be bought with Doge, soon SpaceX merch too" Elon Musk (@elonmusk) May 27, 2022 After the news, Dogecoin's value soared quickly. A few minutes before the tweet was sent at 11:24 a.m. ET, the meme currency, was trading at \$0.078 on CoinGecko. Approximately eight percent higher by the time it reached \$0.084 at about 11:50 a.m. On the other hand, the pump only lasted for a short time. Currently, the Price of Dogecoin is about \$0.080. While the rest of the crypto market is down significantly, this still represents a gain of just over 1% for DOGE on the day. Musk Can Still Inspire Since early last year, Tesla CEO Elon Musk has had considerable influence on the Price of Dogecoin. His corporation purchased \$1.5 billion worth of Bitcoin in February 2021, which coincided with the ascension of Dogecoin to a top three cryptocurrency by market valuation. He followed up with a series of positive tweets about Dogecoin. There is no doubt that the tweets of Tesla CEO Elon Musk still can inspire. In December, when Musk indicated that Tesla would soon take DOGE for goods, the token surged another 20%, which he repeated today. Before that, when Musk stated that he did not hold any of the phoney Shiba Inu Dogecoin killer tokens, its value plummeted by more than 50%. The CEO's fondness for DOGE may be more than just a passing fad. On TIME in January, Musk said that Dogecoin was a better means of trade than Bitcoin because of its greater transaction throughput capacity.

- Dogecoin trading pair DOGE/USDC has been added to crypto exchange OKX. - DOGE has been up 1.58% in the last 24 hours. As the price of Dogecoin continues to solidify, it has re-emerged as one of the most regularly acquired assets by BSC whales, according to WhaleStats' official Twitter account. Data from IntoTheBlock also indicates that Dogecoin whales have been active in the last 24 hours, with a 24% rise in huge transactions. The increasing activity of institutional participants, or whales, who purchase or sell large amounts, is typically linked to surges in transaction volume. According to IntoTheBlock, the total amount of these trades is well over \$100,000. Banking on Elon Musk's Twitter Acquisition Even after falling below 50% earlier this month, the biggest meme cryptocurrency's profitability remains 53%. Dogecoin trading pair DOGE/USDC has been added to the spot trading markets of cryptocurrency exchange OKX. According to the statement, the spot trading of DOGE/USDC is planned to begin on May 23, 2022. May 21 saw the price of Dogecoin fall to a low of \$0.082 before rebounding to \$0.088 today, making it the third consecutive day in the green. In the first half of May, Dogecoin saw its value plummet to as low as \$0.065. DOGE surged 29 percent in the first 24 hours after the announcement. Many feel that Twitter's future may include Web 3.0 and Dogecoin because of Musk's magnetism. Considering Twitter has over 200 million active users monthly, the possibilities are almost unlimited. It is expected that Dogecoin will be employed in some capacity if Elon Musk gains total control of the platform. According to CMC, the Dogecoin price today is \$0.086663 USD, with a 24-hour trading volume of \$426,205,862 USD. Dogecoin has been up 1.58% in the last 24 hours.

- Since its all-time peak in May of 2021, Dogecoin has been in the fall. - Dogecoin has been down 2.08% in the last 24 hours. The crypto market has suffered its most devastating hit in a long time. According to available statistics, the recent market decline has resulted in meme coins losing more than 80% of their ATH value. The most popular meme currency, Dogecoin, has lost more than 88% of its all-time high. There is no improvement for Shiba Inu, which has likewise lost almost 85% of its ATH. Strong Backing by Investors Since its all-time peak in May of 2021, Dogecoin has been in the fall. On a high note, Elon Musk was hawking the meme currency at its pinnacle around this time. However, the digital asset has not performed as well since then. Almost the majority chunk of its all-time high has been lost in one of the worst drops ever observed. Contrary to popular belief, investors are not suffering as much as one would expect, given the meme coins' recent collapse. Investing in a meme currency like Dogecoin is like gambling to some people. Because of this, many investors have been urged to accept their gains. Despite this, the meme coin retains sway with a sizable portion of the population. Almost a year after the all-time high, many investors are still profiting from their investments. According to statistics from IntoTheBlock, 53% of all investors are still in profit. Even though Dogecoin has lost 88.23 percent of its value since its all-time high, it is still one of the best investments for early investors. According to CMC, the Dogecoin price today is \$0.084326 USD, with a 24-hour trading volume of \$442,915,374 USD. Dogecoin has been down 2.08% in the last 24 hours.

- Dogecoin's inventor isn't holding back in his criticism of rogue cryptocurrency projects. - Billy strongly urged investors to do their research and not rely on hyped YouTube videos. Cryptocurrencies remain divisive, even after years of development; some hail them as blessed while others call them evil. Their most appropriate term is the latest fintech trend; at their most complicated, they are revolutionary technologies that challenge civilization's political and social foundations. Dogecoin's inventor isn't holding back in his criticism of rogue cryptocurrency

projects. A stunning 95% of cryptocurrencies, according to Dogecoin (DOGE) developer Billy Marcus, are frauds and a waste of time. the reason why people think crypto is 95% scams and garbage and most crypto people are assholes is because crypto is 95% scams and garbage and most crypto people are assholes â€” Shibetoshi Nakamoto (@BillyM2k) May 16, 2022 letâ€™s change that. it starts with you â€” what you support, and how you behave. Recent Scams and Junk Cryptocurrencies have had a terrible label since their birth, says Dogecoinâ€™s founder, with established financial players, in particular, adopting derogatory phrases to characterize the asset class. Slanderous labels like â€œscamsâ€ and â€œjunkâ€ have been attributed to digital currencies due to the many horror tales plaguing the crypto industry. The inventor of DOGE has weighed in on the price crash of Terra Luna and its stablecoin, UST. Billy called Lunaâ€™s Do Kwon a â€œtech broâ€ and slammed him in the episode. In the wake of the Luna and UST disaster, investors have lost billions of dollars. Following an alleged home invasion by a LUNA investor, Terra founder Do Kwon now seeks police protection. He said that scammers and assholes are the only ones who should be bothered by the tweet. Elon Musk reacted to the tweet sent by Marcus. Muskâ€™s response to the Dogecoin creatorâ€™s tweet was a laughing and sobbing emoji. In response to Billyâ€™s constant mocking, he was blocked by Do Kwon. The Dogecoin co-founder, though, seems unfazed by the block. According to Billyâ€™s comments, Do Kwonâ€™s move was not surprising to him. He believes that banning individuals in the crypto realm is an excellent idea, particularly if they deserve it. Billy strongly urged investors to do their research and not rely on hyped YouTube videos, and not to take decisions emotionally. Indeed, the recent Terra crash has left the entire community something to think about seriously.

- Dogecoin slid down to its ATL at the \$0.07 zone. - Elon Musk calls Dogecoin a â€œpotential currencyâ€. Dogecoin and Shiba Inu are entering into dreadful red zones following the LUNA disaster. Joining the line of dogecoin supporters like Elon Musk and Shark Tank investor Mark Cuban, Vitalik Buterin, the creator of Ethereum, has donated over \$ 1 million worth of ETH to the Dogecoin Foundation. Famous Crypto Youtuber Matt Wallace updated this news in the following tweet. Vitalik Buterin Just Donated Over 1 Million Dollars in \$ETH To The #Dogecoin Foundation!!! â€” Matt Wallace (@MattWallace888) May 16, 2022 Dogecoin developers have pinned their hopes on the Ethereum creator for the projectâ€™s transition from PoW to PoS consensus. In February, through a famous crypto podcast interview, Buterin confirmed that he will help in the migration of Dogecoin onto PoS. Additionally, he accepted the developersâ€™ request of conferring community staking to the network through ETH 2.0 aka â€œthe Mergeâ€. DOGE Bears Awakened Dogecoin, the top trending memecoin, is preparing to fall into its bloodbath. The disastrous LUNA crash has not yet calmed down. The reign of top memecoins such as DOGE and Shiba Inu is experiencing free-fall dominated by bears. As per the data from CMC, DOGE hit its all-time low of \$0.07004 USD on Thursday. SHIB is trading at \$0.00001206 USD at the time of writing. The trading volume declined by 22.36% to \$648,257,772 USD in the last 24 hours. Tesla campaigned for DOGE by deploying it as an effective payment option. It allowed customers to purchase certain products such as S3XY Mug and Cybertruck Beanie. In January 2022, Tesla enabled DOGE payouts at Santa Monica Superchargers, a boost station. In early May, Mark Cuban, owner of NBA team Dallas Mavericks, tweeted a suggestion of deploying dogecoin to eliminate the crypto bots on Twitter. Even Elon Musk welcomed this suggestion, but no official plan was developed on this. He aids to boost up the use cases for the plummeting memecoin. Muskâ€™s upcoming mission DOGE-1 astonished the crypto world by being the first mission paid with Dogecoin. The â€œDogefatherâ€ continues to support his favorite memecoin despite its ongoing free-fall.

- Sentimentâ€™s â€œstrong and oversoldâ€ list also included Dogecoin. - The meme coinâ€™s value has fallen to levels last seen on April 25. In recent days, Dogecoin (DOGE) has been rocked by uncertainty surrounding billionaire Elon Muskâ€™s purchase of Twitter. In the last week, the value of the dog-based meme currency dropped by 7.95 percent. Sentimentâ€™s â€œstrong and oversoldâ€ list also included Dogecoin. This merits more investigation. DOGEâ€™s volume dropped significantly when Muskâ€™s Twitter takeover news faded from the headlines. As a matter of fact, the meme coinâ€™s value has fallen to levels last seen on April 25. This notion seems to be supported by the velocity measure, which shows a drop in DOGE-related activity to levels last seen in late March and early April. Itâ€™s as if the Musk Twitter episode never happened when looking at these numbers. No Remarkable Surge Despite New Development Meme cryptocurrency Dogecoin has been added to Bitso, Mexicoâ€™s most popular cryptocurrency exchange, announced in a recent Twitter statement. However, CMC data shows that the DOGE price hasnâ€™t changed much but a 2% surge, now trading at \$0.1315, despite the announcement. Dogecoin-based tokens are the only ones supported by the exchange. In January, Bitso extended support for Shiba Inu, a competing meme currency. The exchange currently supports 33 cryptocurrencies in total, including Dogecoin (DOGE), The Sandbox (SAND), Gala (GALA), Enjin (ENJ), and SushiSwap (SUSHI). A DOGE rally doesnâ€™t seem to be in the cards. However, nothing about DOGE and Elon Musk can be taken for granted, as seen in the past. According to CMC, the Dogecoin price today is \$0.131176 USD, with a 24-hour trading volume of \$707,191,833 USD. Dogecoin has been up 2.06% in the last 24 hours.

- Musk wondered aloud whether there should be a Dogecoin payment option. - Musk has said that Twitter Blue would not display any advertisements to the user. Elon Musk, the tech tycoon now a member of Twitter Incâ€™s board of directors, revealed three new features on Sunday that would only be available to Twitter Blue subscribers. To use the microblogging siteâ€™s premium features, users must subscribe to Twitter Blue (\$3/month), a premium service version. Proposed Multiple Features The billionaire Musk claims that people who join up for Twitter Blue will get an authentication mark. Additionally, tweets may be edited in as little as 20 seconds. Musk has said that Twitter Blue would not display any advertisements to the user. Blue already has a modifiable 20 second time to edit tweet feature â€” Elon Musk (@elonmusk) April 10, 2022 When Tesla CEO Elon Musk became the social media platformâ€™s largest stakeholder with a 9.2 percent stake on April 5, Twitter announced that it would be adding him to its board of directors. Musk tweeted that he was â€œlooking forward to workingâ€ with the board

to make significant improvements to Twitter in the coming months. The team is working on ways for users to amend their 280-character tweets; Twitter said the following day, April 6. According to the social media site, Twitter Blue, the company's paid premium service, will be the first to test the new feature. A statement said that the test would help it "learn what works, what doesn't, and what's possible." However, there's a good chance that most Twitter users won't have access to the service for quite some time, if ever. In addition, Musk wondered aloud whether there should be a Dogecoin payment option. "Maybe even an option to pay in Doge?" he suggested, referring to the cryptocurrency. According to CoinMarketCap, the Dogecoin price today is \$0.148544 USD, with a 24-hour trading volume of \$921,565,415 USD. Dogecoin has been up 3.57% in the last 24 hours.

- According to the deputy prime minister, DOGE has "exceeded" the price of the ruble. - On Friday, Ukraine's official Doge wallet received more than 300 contributions. Dogecoin (DOGE) contributions from pro-Russian activists will now be accepted by Ukraine, which tagged billionaire and DOGE booster Elon Musk in a Twitter announcement. Vice Prime Minister and Minister of Digital Transformation Mykhailo Fedorov tweeted the announcement and Ukraine's official DOGE wallet address on Wednesday morning in a bid to encourage contributions. Addition of Solana and Polkadot In recent days, Ukraine has added SOL, and DOT contribution addresses to its list of cryptocurrency donation addresses, in addition to DOGE. When Ukraine first announced that it would take cryptocurrency contributions, only bitcoin (BTC), ether (ETH), and tether (USDT) were included. More than \$40 million has been raised so far via the crypto donation initiative, including extra donations that flooded in when Ukraine stated that it could execute an airdrop to contributors. According to the deputy prime minister, DOGE has "exceeded" the price of a Russian ruble, who seemed to be referencing Russia. He also included Tesla CEO Elon Musk, who has talked positively about DOGE in the past and referred to himself as "The Dogefather" in a tweet before his hosting role on "Saturday Night Live" last year. Billy Markus, the man behind Dogecoin and the alias Shibetoshi Nakamoto, was also mentioned by Federov. Markus, the inventor of Dogecoin, tweeted back to Federov stating that he had personally "given some" DOGE to him as a "donation." On Friday, Ukraine's official Doge wallet received more than 300 contributions totaling roughly 272,000 Doge or nearly \$35,000 in cryptocurrency. According to CoinMarketCap, the Dogecoin price today is \$0.125918 USD with a 24-hour trading volume of \$552,150,016 USD. Dogecoin has been down 4.12% in the last 24 hours.

- Binance Smart Chain tokens came up as Markus resumed his outburst. - Tuanskiii1, a Twitter user, calls the spam adverts "sickening." It seems that Billy Markus, the creator of Dogecoin (DOGE), was fed up with spammers posing as "meme coin" and overwhelming his Twitter timeline with their messages. Markus said how DOGE began as a parody of "idiotic coins" more than eight years ago. The author, however, points out that today's meme coins are no longer memes. Markus stated: "They're made by people trying to get rich off of other people trying to get rich." Followers Echoed Displeasure Binance Smart Chain tokens came up as Markus resumed his outburst. According to him, they have "made the internet worse in every way." On the subject of gambling: He reiterated that it doesn't matter whether or not others do it, but he asked that the spam adverts be removed from his threads. Ads like these are making the internet less enjoyable, he said. Many of Markus's Twitter followers noticed the messages and echoed his displeasure. Tuanskiii1, a Twitter user, calls the spam adverts "sickening." It didn't stop meme coin spammers from filling the forum with other meme coin adverts, even though the developer of DOGE made his arguments quite obvious. According to CoinMarketCap, the Dogecoin price today is \$0.112758 USD with a 24-hour trading volume of \$1,566,323,960 USD. Dogecoin has been down 15.88% in the last 24 hours. In January 2021, Dogecoin entered the top ten cryptocurrencies in market valuation. A 17 percent drop on the day hasn't deterred DOGE from being one of the top 15 by market capitalization, according to CoinMarketCap.

- The price of Dogecoin, on the other hand, has been declining. - Tesla started taking Dogecoin in January for select products. Elon Musk, CEO of Tesla and SpaceX, responded to a tweet from developer Ryan Zohoury, who reported that a new Tesla supercharger station in Santa Monica, California, is virtually full 10 minutes after it opened tweeting about potential Dogecoin payment acceptance. At the time of this writing, the Tesla CEO has not explicitly said what the meme cryptocurrency might be used to pay for. Dogecoin supporters believe that Tesla's supercharger stations will take the cryptocurrency, while Tesla detractors believe Musk's post merely refers to the forthcoming Hollywood area and drive-in cinema. Dogecoin Godfather However, Dogecoin's fans are pleased with Musk's goal to increase the currency's popularity. The price of Dogecoin, on the other hand, has been declining. According to statistics from CoinMarketCap, the DOGE was trading at \$0.1417 at the time of Musk's post. Since then, it's fallen marginally and now stands for \$0.1363. Tesla started taking Dogecoin in January for select products. Musk then offered to consume a Happy Meal on national television to persuade McDonald's to embrace DOGE. However, McDonald's responded, "only if Tesla accepts grimacecoin." Musk, a longstanding backer of Dogecoin, is frequently referred to as the Dogefather in the crypto world. He has already admitted that many individuals he spoke to at Tesla and SpaceX owned DOGE. According to him, while Bitcoin is better for long-term holdings, Dogecoin is better for transactions. One of Dogecoin's primary developers, Ross Nicoll, has resigned from the project. The reason mentioned was that there's no way that he wants to be involved with any possible conflicts of interest in the coin making process.

- The whales have accumulated an estimated \$46,994,460 worth of Dogecoin. - Dogecoin has been down 0.02% in the last 24 hours. Investors and enthusiasts of Dogecoin have been very dissatisfied with the currency's price movement. Although bulls are hoping for some relief from the 281-day standstill and downturn, bulls are looking for some respite, considering the recent underperformance versus its rivals, such as Shiba Inu. On February 4, the price of Dogecoin was able to withstand another capitulation move. Up to February 7, DOGE has had a 27% rebound from its February 4 swing low. DOGE is

no stranger to huge swings and whipsaws. Since January 2022, the stock has undergone four prior whipsaws that resulted in movements of 25% to higher than 50% ups and downs. There has been an inverted head-and-shoulders pattern in the works due to these multiple whipsaws. If this pattern is activated, Dogecoin's price might reach an Ideal Bullish Ichimoku Breakout on its daily chart while recovering to the critical \$0.25 price level, generating the required momentum. Read More: Dogecoin Price Prediction Top-held Asset by Largest Whales According to WhaleStats, the biggest 1,000 Binance Smart Chain (BSC) whales have again included the iconic meme coin DOGE on their list of top-held assets. Yet despite its importance to the DOGE army, the currency is ranked relatively low. The whales have accumulated an estimated \$46,994,460 worth of Dogecoin. 1.97 percent of the top BSC whales' cryptocurrency holdings may be found here. According to CoinMarketCap, the Dogecoin price today is \$0.144727 USD with a 24-hour trading volume of \$563,255,929 USD. Dogecoin has been down 0.02% in the last 24 hours, with a live market cap of \$19,201,088,760 USD.

- A fall below the \$0.129 support level would raise concerns. - The DOGE price might fall to \$0.080 if there is an increase in selling pressure. Since last week, Dogecoin's price has surged to new highs, enabling it to amass liquidity. The predicted correction will offer bulls time to recharge for the next rise in DOGE's price. The price of Dogecoin increased by 36% in the space of two weeks, reaching a high of \$0.173. As investors continue to make gains, DOGE is likely to retrace. A 10% decline to the 70.5 percent Fibonacci retracement level of \$0.139 becomes conceivable. For the time being, purchasers may get together and provide a platform for DOGE to take flight. If the current upward trend continues, it is expected that it will break past the \$0.163 weekly resistance level and proceed to the next obstacle at \$0.194. Read More: Dogecoin Price Prediction Potential Buyers Await Entry It is expected for market makers to prolong this run-up above \$0.215 and collect the buy-stop liquidity that is now lying above the triple top formation. The next local high will most likely be formed if this move goes through at a 55 percent gain. A fall below the \$0.129 support level would raise concerns among potential purchasers who have been waiting to buy Dogecoin. The Dogecoin price might fall to as low as \$0.080 if there is an increase in selling pressure in this region. Coin prices would fall back to the \$0.43 level if sellers exerted sufficient supply pressure at the \$0.16 level. As long as the bears continue to sell on rallies, this might signal the beginning of a catastrophic slump. According to CoinMarketCap, the Dogecoin price today is \$0.157509 USD with a 24-hour trading volume of \$870,472,694 USD. Dogecoin is up 0.38% in the last 24 hours.

- There are now 529,309 Dogecoin wallets in existence, according to the latest statistics. - Dogecoin (DOGE) price is already climbing and breaking its current downturn. Dogecoin (DOGE) seems to be accumulating 8,000 new owners on a daily basis as demand for the meme coin increases. The popular canine-themed joke currency is reaching its pinnacle, according to current BscScan statistics, which shows that around 8,000 new addresses join the DOGE-accumulation every day. There are now 529,309 Dogecoin wallets in existence, according to the latest statistics from BscScan (DOGE). On February 2, this number stood at 486,439 people. This implies that 42,870 new holders have joined the ranks in the last five days. After doing basic math, the figure turns out to be 8,574. Dogecoin (DOGE) price is already climbing and breaking its current downturn, and the figure supports the increment. On the other side, the top 1000 BNB wallets possess 324,223,677 DOGE, worth \$4 7,796,325 according to WhaleStats statistics. Read More: Dogecoin Price Prediction Only Second to Bitcoin Now Despite this, the price of Dogecoin hasn't yet risen as much as expected and now sits at \$0.163, up 12% for the day. On average, the 24-hour trading volume grew by 235.07 percent over the previous day's trade to \$1,509,512,726. The meme coin achieved another milestone. Dogecoin's official Twitter account now has more than 3 million followers. Second only to Bitcoin in terms of popularity on the popular social networking site. Shiba Inu, a competing meme currency, has 2.7 million followers on Twitter. It's been an incredible year for the Dogecoin account, with a 681 percent gain in followers. According to CoinMarketCap, the Dogecoin price today is \$0.162144 USD with a 24-hour trading volume of \$1,432,909,087 USD. Dogecoin has been up 12.07% in the last 24 hours.

- There are 323,502,178 DOGE worth \$46,481,982 in the top 1000 BNB wallets. - Elon Musk recently asked McDonald's to accept DOGE as a form of payment. After a nine-month absence, Dogecoin (DOGE) seems to be attracting investors' attention once again. There was a surge in the number of Dogecoin holders, according to Etherscan's most current statistics. As a result, the largest meme currency in market valuation has gained 11,410 new owners in the last 48 hours. There are 323,502,178 DOGE worth \$46,481,982 in the top 1000 BNB wallets according to WhaleStats. The CEO of Tesla, Elon Musk, revealed that Tesla would accept Dogecoin as a legitimate payment mechanism for certain items, which sparked investor interest in the meme currency. Some crypto community members welcomed the news, while others scoffed at his ongoing support for the waggish Dogecoin project. Elon Musk recently asked McDonald's to accept Dogecoin as a form of payment after Tesla adopted the cryptocurrency. Adoption of Proof-of-Stake Method Several major players in the industry are supporting Dogecoin's push toward adopting a proof-of-stake method. At its all-time high price of \$0.8, the digital asset had amassed a four million-strong holding base. When it first came out, the token had a steady slide, with developers constantly increasing its usefulness to keep it running. When Vitalik Buterin spoke on the UpOnly podcast, he explained how he plans to push the meme coin on this new path. Even while Buterin has previously expressed his support for the meme currency project, this is the first time he has specifically mentioned his interest in becoming involved with it. According to CoinMarketCap, the Dogecoin price today is \$0.142574 USD with a 24-hour trading volume of \$388,686,650 USD.

Shiba Inu's overall market cap has fallen to \$11.35 billion, from around \$29 billion at its peak. However, because of its low cost, its trading volumes remain healthy. The crypto crisis is causing several coins to lose their luster, including Shiba Inu, which was once in the top ten digital tokens but is now struggling to remain in the top 15. At 13.30 IST on Thursday, the dog-based meme token,

also known as the joke token, was trading at 0.00002008. The token reached an all-time high of \$0.00008 in late October 2021. After Bitcoin's price dropped to a six-month low, all cryptocurrency prices dropped, including the Shiba Inu, known as the "Dogecoin Killer." Shiba Inu's total market value has dropped to \$11.35 billion. During its early days, it was worth up to thrice what it is now. However, due to its low price, the token's trading volumes have steadily improved. Shiba Inu is based on the Ethereum blockchain and does not have its own blockchain. Shiba's circulating quantity is extremely limited, which makes the meme token a high-risk investment. Raj Kapoor, Founder & CEO of the India Blockchain Alliance said: "Holding by only a handful of wallets; limited adoption among merchants; and a fuzzy development future could put this dog coin in hibernation." About two-thirds of SHIB tokens' total available supply is held by 10 wallets. Even Shiba's audit report posted on its website shows that more than half of its available supply is held in four wallets. According to Coinmarketcap, there is a total supply of 589,735,030,408,323 SHIB tokens, with 549,063.28 billion available for circulation on the market. Shiba has a limited number of usable applications right now, and it's struggling for scraps even as a payment option. It's impossible to say whether SHIB developers will continue to contribute value. As per market experts, Shiba Inu is a high risk investment that does not meet any of the requirements for solid foundations. They also say that investors should stay away from it. Meme tokens like Shiba Inu will swing drastically with market sentiments due to their lack of real value and utility use-cases, according to Praveen Kumar, founder and CEO of Belfrics Group, a crypto exchange. According to Sharat Chandra, VP-Research & Strategy, EarthID, a self-sovereign Identity Management Platform, Shiba Inu has remained weak recently, and its price has fallen in lockstep with other coins, including Dogecoin. He also stated that "The Shibarium blockchain layer-2 solution proposed by the SHIB creator Ryoshi is expected to launch soon and it can give a price boost in the coming days." Due to the recent drop in the last month, the Shiba Inu investment community has maintained a solid trading volume. Nitish Sharma, the Global CEO of TP Global FX, Shiba Inu is falling because the entire cryptocurrency industry is in a bear market. "Cryptocurrency is like any other trading market in that there will be a bear and a bull market."

- Crypto.com suffered a hack on January 17, 2022. - Officially declares no funds were lost. - DOGE founder Billy Markus thrashes Crypto.com being irresponsible for the hacks occurred. Seems there never goes a day without a hack or a scam upon the crypto industry! And so true to the fact, the global crypto exchange, Crypto.com became a victim of several continuous hacks on morning hours of January 17, 2022. In spite of this, the Dogecoin (DOGE) co-founder, Billy Markus took to twitter completely thrashing Crypto.com to the fullest extent. Accordingly, Billy Markus terms that Crypto.com has been quite lethargic. The Hack Upon Crypto.com On the early morning hours of January 17, 2022, the crypto exchange platform witnessed several continuous malicious activities prevailing on various wallet accounts. With more profuse investigations, it's been confirmed that several wallets have been hacked anonymously. In spite of this, Crypto.com took on to Twitter, posting a tweet to reveal the hack attack officially. According to the tweet, Crypto.com declares that it has received complaints regarding several suspicious activities upon the platform's few wallets. Moreover, Crypto.com termed that in spite of this, they will be stopping all transactions temporarily, for furthermore investigations. In addition, Crypto.com assured that all the funds were safe and not to worry. However, a crypto investor and Crypto.com wallet holder going by the name Ben Baller, commented upon the tweet that his wallet has lost 4.28 Ethereum (ETH). Also, he questioned Crypto.com why they didn't answer his query mails previously. Ben Baller also questioned how the hackers have gone past the two-factor authentication security protocols! We have a small number of users reporting suspicious activity on their accounts. We will be pausing withdrawals shortly, as our team is investigating. All funds are safe. "Crypto.com (@cryptocom) January 17, 2022 DOGE Billy Markus's Thrashings As the news took on fire, the co-founder of DOGE, Billy Markus tweets that he witnesses certain suspicious activities on a hot wallet. Furthermore, he exclaims upon the tweet that multiple transactions have taken place, with an overall withdrawal of 3 to 4 ETH approximately. In addition, Billy Markus tweets that such a hack past the security protocols is completely the lack and lethargicness of Crypto.com.

- It's still up about 1,900 percent over the previous year. - Dogecoin might rise in value if more businesses accept the token. This morning, the price of the world's most popular and most significant digital currency, Bitcoin, fell below \$43,000. Since the beginning of the year, Bitcoin has lost roughly 7% of its value. Meanwhile, according to CoinMarketCap, the worldwide cryptocurrency market cap remains unchanged at \$2.19 trillion today. Elon Musk recently announced that Tesla is accepting Dogecoin for its products, including the "Giga Texas" belt buckle and miniature electric car models. Dogecoin prices rose 25% due to Musk's announcement that Tesla will use digital currency as a payment option. Dogecoin: Still Positive However, the coin's value fell by more than 5% yesterday. Although Dogecoin has had a recent dip, it is still up over 19 percent over the past week. There has been a 75% drop in the value of Dogecoin from its all-time high in May last year. It's still up about 1,900 percent over the previous year, despite recent turbulence in larger crypto markets and significant drops in its token price. Read More: Dogecoin Price Prediction Since Dogecoin does not have an underlying blockchain service network like Ethereum, Solana, or Cardano. The driving force may only influence its price via currency acceptance and speculation. Dogecoin might rise in value if more businesses accept the token as a means of payment or if more trading platforms provide the ability to purchase and sell the cryptocurrency. According to CoinMarketCap, the Dogecoin price today is \$0.170846 USD with a 24-hour trading volume of \$1,088,010,111 USD. Dogecoin has been down 5.55% in the last 24 hours.

- Dogecoin (DOGE) is now accepted for merchandise purchases at Tesla. - Customers will not be able to purchase electric cars using Dogecoin. 🤯 An ETH whale just bought 8,000,000 \$DOGE (\$1,411,777 USD). "WhaleStats" the top 1000 Ethereum richlist (@WhaleStats) January 14, 2022 Transaction: [#https://t.co/1AL0u9kMMo#Doge](https://t.co/1AL0u9kMMo#Doge) #Tesla #Dogecoin #DogecoinToTheMoon pic.twitter.com/v0eqGpG032 WhaleStats

reports that an anonymous Ethereum whale purchased eight million DOGE worth \$1,411,777 at 10:54:37 UTC on Thursday, January 13 2022. Elon Musk's electric vehicle manufacturing company Tesla is now selling items for the meme crypto. Read More: Ethereum Price Prediction Dogecoin (DOGE) is now accepted for merchandise purchases at Tesla, CEO Elon Musk announced today. Before, on December 14, he tweeted that they would begin taking DOGE crypto tokens as a form of payment for retail transactions. Tesla merch buyable with Dogecoin " Elon Musk (@elonmusk) January 14, 2022 However, customers will not be able to purchase electric cars using Dogecoin at this time. Twitter users couldn't contain their joy when they learned of the tweet's viral content. On the other hand, Huobi's official Twitter account posted an image of a Doge riding in a Tesla automobile. Multiple Businesses Adopt Dogecoin Musk has been outspoken on the DOGE blockchain's potential applications, and he's even tweeted about it a few times. And he's promised to support the DOGE team by collaborating with them. GameStop has teamed with digital payment processing provider Flexa to accept DOGE payments, which was revealed early last month. Adam Aron, CEO of AMC Theaters, made the announcement a few weeks ago that his firm would begin accepting DOGE somewhere in the first quarter of 2022 as well. People are beginning to accept Dogecoin and other cryptocurrencies as payment for goods and services. Read More: Dogecoin Price Prediction According to CoinMarketCap, the Dogecoin price today is \$0.191640 USD with a 24-hour trading volume of \$5,859,208,259 USD. Dogecoin has been up 12.02% in the last 24 hours.

- A QR code is provided after clicking the "Pay Now" button. - The poll had gathered more than 500,000 votes. The Tesla shop began accepting Dogecoin (DOGE) payments in Asian hours today, and prices rose by 18% soon afterwards. Dogecoin is now being accepted and denominated on Tesla's online store. Items like the Giga Texas Belt Buckle, Cyberquad for Kids, and the Cyberwhistle were listed in DOGE under the shop's "lifestyle" section. According to our research, Cyberquad for Kids costs 12020 DOGE, the belt buckle costs 835 DOGE, and Cyberwhistle costs 300 DOGE. Billy Markus, a co-founder of Dogecoin, tweeted this morning about Tesla's action. yo " Shibetoshi Nakamoto (@BillyM2k) January 14, 2022 it's happening!#dogecoin #doge4teslahttps://t.co/aYKGdYjJ5h pic.twitter.com/271DIW8oFJ A QR code is provided after clicking the "Pay Now" button, and the consumer needs to fill out a form that enables DOGE payments on the website. After 30 minutes, the DOGE sum expires unless payment is completed. The payment page has a countdown clock. Elon Musk, CEO of electric-car manufacturer Tesla, indicated in December 2021 that the company would accept Dogecoin as payment for its products. This comes over a month later. Elon Musk tweeted that Tesla merchandise may now be purchased with Dogecoin only a few hours before. Read the tweet below; Tesla merch buyable with Dogecoin " Elon Musk (@elonmusk) January 14, 2022 Executed as per the Poll Result Earlier last year, Tesla began taking bitcoin as payment for its EVs. The pilot program was quickly cancelled because of growing worries about Bitcoin's energy consumption. Even before being chosen "Person of the Year" for 2021 by Time magazine, Musk, a cryptocurrency lover, has backed Dogecoin and stated it is superior for transactions. Last year, Musk asked Twitter followers whether or not they wanted Tesla to take Dogecoin. Within 20 minutes of its broadcast, the poll had gathered more than 500,000 votes, with 75% of respondents answering "Yes." Read More: Bitcoin Price Prediction Read More: Dogecoin Price Prediction According to CoinMarketCap, the Dogecoin price today is \$0.200809 USD with a 24-hour trading volume of \$4,423,655,169 USD. Dogecoin has been up 17.94% in the last 24 hours.

- Mozilla started raising a crypto donation a few weeks back. - Mozilla stops the crypto donation program amidst crypto being ponzi. - Dogecoin founder, Billy Markus thrashes Mozilla for its decisions. Mozilla, one of the oldest and largest web browser applications created a hustle upon the crypto industry with its announcement of starting to accept crypto donations. In spite of this, the program went about for a few days. However, Mozilla suddenly stopped the crypto donation program, stating crypto to be ponzi. This indeed created a huge speculation in the industry. Mozilla's Decisions By the end of 2021, by December 31, Mozilla took to twitter, posting a tweet mentioning its acceptance of various cryptocurrencies as donations towards the Mozilla foundation. This move by Mozilla was appreciated by everyone. The prominent cryptos which were accepted by Mozilla were Bitcoin (BTC), Ethereum (ETH), and Dogecoin (DOGE) and much more. However, crypto acceptance was not present for a longtime. It ran only for a week or less though. This was due to the fact that Mozilla has paused all its crypto donations, as many termed crypto to be a complete ponzi. In spite of this, the co-founder of Mozilla, Jamie Zawinski states that all those involved in coming with such a decision to accept crypto should be ashamed. In addition, Zawinski terms that no one should go ahead and support a completely world-killing ponzi scheme. Also, Zawinski utters that the crypto industry only produces pollution and converts this pollution into sick money. Dogecoin Founder's Comments In spite of such deceitful statements uttered officially by Mozilla, the co-founder of Dogecoin (DOGE), Billy Markus takes to twitter, posting a tweet completely thrashing Mozilla for its views and decisions on crypto. Accordingly, Markus states that Mozilla should first be appreciated for taking random statements from the internet and believing them. In addition, Markus points out that Mozilla is being completely ignorant for various true facts. Moreover, he criticizes Mozilla vividly and hysterically that they would first take into account the environmental effects of papers and banking sectors accounts for. Besides, he points out that Mozilla would never come up with such comments in regards with environmental factors and impacts caused by the crypto industry.

- "The future currency of Earth" was a tweet by Elon Musk in February. - A "trailmap" has been released that looks at eight different projects. LibDogecoin and GigaWallet are among the eight new initiatives detailed in the foundation's first official roadmap in its eight-year existence. As part of its ongoing efforts to promote the meme currency, the Dogecoin Foundation has unveiled its first-ever roadmap, which outlines several exciting new initiatives. According to the Dogecoin Foundation, a "trailmap" has been released that looks at eight different projects, including LibDogecoin and GigaWallet. For the first time in the foundation's eight-year existence, a plan like this has been made public. As of August, the foundation signed the Dogecoin Manifesto, outlining DOGE's mission

and inviting cryptocurrency supporters to contribute their ideas by signing the manifesto. Notable Figures and Important Allies In addition to Ethereum co-founder Vitalik Buterin serving on the Dogecoin Foundation's board, the organization has several other notable figures on its staff. According to the foundation's roadmap, this "community staking" form of Proof of Stake (PoS) will enable everyone, not just the large players, to engage in a manner that compensates them for their commitment to operating the network. A rising number of individuals are preparing to devote development time to these open-source projects, according to the foundation's claim that it has some important allies. "The future currency of Earth" was a tweet by Elon Musk in February. Because of Musk's engagement with the DOGE token tribe, the value of this cryptocurrency has risen sharply. According to CoinMarketCap, DOGE is the 12th most valuable cryptocurrency by market value.

- Dogecoin Foundation gets back into action. - Joins hands with Vitalik Buterin for bringing Proof-of-Stake for DOGE. - Dogecoin Foundation lays out officially its ambitious roadmap. The Dogecoin Foundation was established by the Dogecoin (DOGE) founders themselves, Billy Markus and Jackson Palmer. The foundation functions as a non-profit organization which focuses completely towards the development of the DOGE. In spite of being founded a few years after the DOGE, the Dogecoin Foundation has so far remained dormant for the past six years. And so, in August 2021, the Dogecoin Foundation sprung back to action, portraying for the betterment of the DOGE. However, no special features were introduced in recent times for the DOGE stables, until the news spread officially now. There were rumours regarding the Ethereum (ETH) co-founder Vitalik Buterin as part of the Dogecoin Foundation, joining for the improvisation of DOGE. And so, the news is official that the Dogecoin Foundation is now currently working together with Vitalik Buterin to implement ideas and to create a completely new Proof-of-Staking (PoS) for the DOGE. The Alliance & the Roadmap The Dogecoin Foundation put forth officially on 23rd December regarding their complete plans and roadmap for the future on which they were working on. Named as the "Dogecoin Trailmap" - literally referring to the "dog-walk" path, the Dogecoin Foundation is completely focused and optimistic upon their future for the DOGE. In addition, upon the roadmap, the Dogecoin Foundation reveals their works in bringing a unique PoS solution in the aspects of "community staking" for the DOGE together with ETH co-founder Vitalik Buterin. This PoS will enable DOGE owners to stake their DOGE and in return increase their DOGE as rewards, by receiving new DOGE as rewards. Comments of the Dogecoin Foundation Accordingly, the Dogecoin Foundation states that their new PoS will enable not only big DOGE holders, but all together to proceed with the community staking. Also, they term that everyone involved in the community will be rewarded irrespective of their stakings. Moreover, the foundation also states that proceeds of the stakings will be going towards the charity as a well-fare means. Besides, they also reveal that they have a list of new enticing projects lined up all based on DOGE.

- Dogecoin greatly improves the efficiency of NFT minting. - The developer employed Sha-256 hash algorithms. A DOGE developer created the first non-fungible token (NFT) on the Dogecoin blockchain. On December 13, Twitter handle inevitable360, the developer behind the minted NFT tweeted about the transaction. According to the transaction records, the mint only cost 0.1 DOGE (or \$0.0018). Furthermore, for the minting of non-fungible tokens, the developer employed Sha-256 hash algorithms. First NFT Ever "Minted" on #Dogecoin Blockchain! "inevitable360 (@inevitable360) December 13, 2021 How can it be done? Proof on screens! Dogecoin NFT "Minted" Transaction: 19aeaa88859c04a333257f1119a77438ac08feec424c6ad3645a0679c8be9882@dogecoin\_devs @JRossNicoll @KBluezr @michilumin @BillyM2k @mishaboar Opinions please ðŸ™, pic.twitter.com/XXrjdCXjB6 The NFT was then saved on Checksum, which is a little chunk of data from a larger chunk of digital data. As a result of the NFT's success, inevitable360 gained the backing of additional developers. These include Dogecoin's inventor Billy Markus. Moreover, some of the commenters used SoDogeTip, a bot that gives money to people who like their work. Significant Savings on Transaction Fees Dogecoin greatly improves the efficiency of NFT minting. NFTs have caught the blockchain industry by surprise in the last few months. However, the expense of minting on top-tier blockchains like Ethereum is a huge concern. To put this into perspective, the cost of minting NFT on Dogecoin was approximately \$0.0018. Moreover, this is a significant saving over Ethereum, where it may go into the hundreds of dollars for NFT. On the situation, Michi Lumin, a Dogecoin Core developer, said: "NFTs without the gas fees and less energy usage. V. nice. Also Doge. Wow .â€" This is a new achievement for Dogecoin, conceived as a "joke" cryptocurrency featuring a dog. Recent developments reveal that this cryptocurrency is more than simply a meme currency. Elon Musk, the company's CEO, said on December 14 that DOGE would be accepted as a form of payment for certain of its products. The currency gained within minutes following the news of this momentous milestone. Furthermore, a new use case for the network has been opened up by creating an NFT on the blockchain, which might lead to a rise in DOGE's value on the crypto market.

- Elon Musk has often referred to Dogecoin as his favorite digital money. - The price of the cryptocurrency rocketed to record heights early this year. On Tuesday, Elon Musk's revelation that Tesla will accept Dogecoin as payment for certain products caused a 20% increase in the meme-inspired cryptocurrency. "Tesla will make some merch buyable with Doge & see how it goes," the electric auto maker's CEO said in a tweet. Elon Musk has often referred to Dogecoin as his favorite digital money. Even addressed it on NBC's "Saturday Night Live," among other places. Moreover, Dogecoin was founded as a joke by Billy Markus and Jackson Palmer in 2013. The brand's mascot is a Japanese Shiba Inu dog, which was the basis for the original "doge" meme. The Rise of Dogecoin Over the Year The price of the cryptocurrency rocketed to record heights early this year due to tweets by Tesla CEO Elon Musk and increased interest from a wave of amateur investors. Dogecoin was worth less than a cent at the start of the year. It had grown to a record high of about \$74 by May. The cryptocurrency is worth less than 20 cents a coin, down more than 70% from its all-time high. Tesla will make some merch buyable with Doge & see how it goes " Elon Musk (@elonmusk) December 14, 2021 Dogecoin has been

compared to “meme stocks” like GameStop and AMC, and some crypto investors believe it should not be taken seriously. Furthermore, Shiba Inu, a so-called meme token that claims to challenge Dogecoin’s domination, has emerged as a Dogecoin killer. Shiba Inu briefly surpassed Dogecoin as the 13th most valuable cryptocurrency by market valuation.

- A significant short setup might invalidate the above speculative long entry. - The price level needs to reach \$0.218 to confirm the breakout. The price of Dogecoin has been a major letdown for the Doge army, to say the least. In November, Dogecoin lost over 34% of its value, which is expected to change shortly. Dogecoin’s price offers a fantastic buying opportunity. With a stop loss of \$0.214 and a profit objective of \$0.351, the long-term theoretical strategy is to buy at \$0.218 with a buy stop order. The price level has crossed \$0.218 to confirm the breakout that formed at \$0.217. Known as a “Bear Trap,” the entrance at \$0.218 verifies the existence of a bullish Point and Figure pattern. Bullish Momentum A significant short setup might invalidate the above speculative long entry for Dogecoin, which is despite the bullish posture. The chart of Dogecoin shows a split-triple bottom pattern. Sell stop order at \$0.212 and a profit target of 0.153 is the potential short entry point for the short position. In Point and Figure Analysis, the profit goal is calculated using the Horizontal Profit Target Method. In contrast, the possibility of profiting from the short trade concept is modest. Dogecoin bears have had several chances over the last 60 days to cause large sell-offs, but they have either been unable or unable to take advantage of them. There is also a good chance that the price will not go below \$0.185. According to CoinMarketCap, the Dogecoin price today is \$0.222523 USD with a 24-hour trading volume of \$1,425,465,143 USD. Dogecoin is up 3.95% in the last 24 hours.

- Dogecoin is still very volatile and follows social media trends. - He advised investors not to buy in these recently hot currencies. Jordan Belfort, the Wolf of Wall Street, thinks meme currencies like Dogecoin and Shiba Inu are hoaxes. He advised investors not to buy in these recently hot currencies and that their founders be imprisoned. Earlier this year, Tesla CEO Elon Musk began tweeting about Dogecoin. Since then, Shiba Inu and Baby Doge have spawned. Belfort told The Sun in an interview: “I’m a fan of blockchain but there’s a lot of nonsense out there, a lot of s\*\*t coins which serve no purpose and are only there to separate people from their money. You hear crazy stories of people making millions and billions but for every person like that, there are 10,000 or 100,000 people getting their a\*\* handed to them in Shiba Inu.” Taking Advantage of Uncontrolled Market He stated that individuals are taking advantage of an uncontrolled market to generate coins with no value or function. It was built as a joke, and its developers gave up after a few years. However, it has become one of the year’s most valuable cryptocurrencies. Dogecoin is still very volatile and follows social media trends. After leaving prison, Belfort became a popular motivational speaker. He believes governments worldwide should regulate cryptocurrencies, benefiting “blue chip” coins like Bitcoin and Ethereum. On this front, the Indian government may intervene. A crypto law has been drafted and submitted in Parliament’s winter session. However, despite the finance minister’s denial that Bitcoin would become legal money, it may end up regulating it.

- Elon Musk warns Dogecoin holders regarding leveraged trading. - The newbies in the crypto industry should be aware of risks in trading. - The current price of DOGE is 72% lower than its ATH. The whole crypto industry is fond of Elon Musk’s tweet on cryptocurrencies. Twitter users have a great talent for connecting tweets of Musk with the crypto space. Thus, if Musk tweets every trader will admit that he has posted regarding cryptocurrencies or meme-currencies. His support for meme-currencies was the trend for the past few days which significantly resulted in a huge gain for meme-tokens. As a matter of fact, the crypto market faces many dangers and issues on leveraged trading. Likewise, Elon Musk, CEO of Tesla has warned the dogecoin holders by replying to a tweet posted by Mishaboar. The tweet mentions the hazards and disadvantages of leveraged Dogecoin trading, this has collected the attention of users. After their margin accounts were liquidated, several meme cryptocurrency holders began seeking aid, according to Mishaboar. As a result, he emphasized the importance of educating individuals about high-risk leveraged trading, equating it to throwing gasoline on a fire. Several of these shibes were new to crypto when they were introduced by their “buddies” to margin and futures trading. To the point that many of them think these tools are an integral part of crypto and #dogecoin. They are NOT! What do we say to those pushing these tools? [pic.twitter.com/oTW9lrFqy3](https://pic.twitter.com/oTW9lrFqy3) “Mishaboar (@mishaboar) November 26, 2021 Moreover, he also mentioned that early investors shouldn’t be fooled by their buddies to make them think that “gambling” is an integral part of crypto. Besides, only professional traders could take their turn at margin trading, according to the prolific member of the Dogecoin network. But the fact is, they are still left out to outperform major institutional players. Dogecoin Is Dipping At the time of writing, the trading price of DOGE is \$0.20057 which is 72% lower than its highest price value at \$0.7315 in mid-May. Since then, Dogecoin has been experiencing a sell-off which has resulted in a gradual price fall. As per Coingecko, Dogecoin has dropped to 3.8% within the last 24-hours and 14.5% down in a week. Furthermore, according to the data from Coinglass, in the past 24-hours, \$1.88 million worth of Dogecoin yearns have been liquidated. The market experiences more regulatory scrutiny where Binance and FTX were compelled to drastically cut maximum leverage earlier this year. However, there is still a slew of trading platforms that allow clients to place incredibly dangerous trades. As a result, Musk urges his followers to be aware of risks in leveraged trading.

- Dogecoin ranks under the top 10 most actively used smart contracts. - Dogecoin remains in the top position among other meme coins. - DOGE is the only meme coin other than SHIB to be listed on Korbit Meme coins are meme-inspired cryptocurrencies that are generally created as a joke. In beginning they are not taken seriously despite falling in the same category as other mainstream cryptocurrencies like bitcoin, their prices have spiked this year. Dogecoin has developed by two engineers based on a popular meme about Shiba Inu, a Japanese breed of hunting dogs. The popularity of Dogecoin (DOGE) has

driven the creation of many other meme coins. Furthermore, Dogecoin, given a great comeback, as enthusiasts on public platforms talk about digital assets. Currently, Dogecoin ranks under the top 10 most actively used smart contracts on the Ethereum chain. Eventually, DOGE faced an increase in the whale's grabbing the dips. Even more, Dogecoin remains in the top position among other meme coins by market cap. In fact, Dogecoin rivals Shiba Inu's continuous attempts to overtake DOGE. But, the space has witnessed Dogecoin increasing from the shadows to compete against SHIB's legendary rally. The popularity of Dogecoin (DOGE) remains the same, despite its major crash back in mid-year. Accordingly, as per the smart contracts, activity Dogecoin (DOGE) has made its way to the top 10 most actively used smart contracts on the Ethereum blockchain. DOGE has secured the 7th position among the most interacted smart contracts by the top 1000 BSC wallets. Moreover, DOGE, the only meme coin other than SHIB to be listed on Korbit, South Korea's exchange platform. Recently Korbit listed SHIB on its platform. In South Korea, DOGE is the fifth most traded cryptocurrency by trade volume. Current Market Status Henceforth, as per CoinMarketCap, Dogecoin (DOGE) was trading at \$0.2079 with 24-hour trading volume of \$1,607,959,119. At press time, the circulating supply of DOGE is 132.29B DOGE. In the last 24-hour DOGE price surged over 5%. The above 24-hour price chart displays the continuous bullish trend of DOGE. In a day DOGE gained from \$0.199 to \$0.2079. Therefore, Whatever the up and downs DOGE face it will remain as a king among another meme coin in the industry. Till now, no other meme coin, able to overtake its position.

In Doge Technical Analysis 2021, we use past statistics, price patterns, RSI, and much other information about DOT to analyze the future movement of the cryptocurrency. Dogecoin (DOGE) is based on the famous "doge" Internet meme and features a Shiba Inu on its logo. Moreover, the open-source crypto was created by Billy Markus from Portland, Oregon and Jackson Palmer from Sydney, Australia, and forked from Litecoin in December 2013. Dogecoin Current Market Status According to CoinGecko, the Dogecoin (DOGE) price is trading at \$0.34 with a 24-hour trading volume of \$3,484,078,068, at the time of writing. However, DOGE has decreased by 2.2% in the last 24 hours. Moreover, DOGE has a circulating supply of 129,776,492,184 DOGE. Currently, DOGE trades in Binance, Huobi Global, OKEx, CoinTiger, and ZG.com. Doge Technical Analysis 2021 The recent development and upgrades might push Dogecoin to reach new heights. Now, let's deep dive into the Dogecoin technical analysis 2021. DOGE holds the 7th position on CoinGecko right now. The monthly time frame chart of Dogecoin (DOGE) is shown below. The above chart shows the Descending Triangle pattern of DOGE. This pattern indicates bearish chart pattern, however, this is created by drawing one trend line that connects a series of lower highs and a horizontal second line indicates the series of low. Moreover, a breakdown is possible in this case, and this makes traders enter a short position and aggressively force the price of the asset even lower. As shown in the above chart between the price level \$0.15 and \$0.2, it is considered a demand area. At this point, traders can buy the coin at low levels. According to the chart, the downside breakout area is at \$0.159, if the DOGE price reaches the particular level, there is a lot of chance to go below that level. In contrast, the upside breakout area is at \$0.376. If the coin reaches this level, there is a huge chance that the price will go beyond this level. Moreover, high volume trade happens on April 12-15, and also on May 17-26. DOGECOIN (DOGE) RSI, MACD, and MA The below chart shows the Moving Average Convergence/Divergence (MACD) of DOGE. Notably, the MACD (blue) continues to stay just below the signal indicator (orange line). This means that cryptocurrency traders can still expect more bullish days ahead. In contrast, if the MACD begins to move above the signal indicator and performs a bullish crossover. Then the crypto has a high possibility of reaching new highs. Now let's look at the relative strength index (RSI) of DOGE. As shown in the chart above, the RSI remains at level 48. This shows that DOGE's price is in neither oversold nor overbought state. However, this gives confidence for the traders to trade without any fear. DOGE's Moving Average (MA) and Exponential Moving Average (EMA) is shown in the chart below. Moreover, MA is a part of technical analysis that helps traders to recognize trends. While EMA is a type of moving average. From the beginning of 2021, it is clear that the DOGE price has shown many bullish patterns. Furthermore, taking all these into account, DOGE could have a competitive market in 2021. Conclusion With the ongoing developments and upgrades that are taking place within the DOGE platform. The cryptocurrency DOGE has a fantastic future ahead in this crypto market. However, it is possible to see DOGE reaching new heights. Bullish DOGE price prediction 2021 is \$64. As said above, it may reach great heights, however reaching \$100 if investors have decided that DOGE is a good investment in 2021. FAQ Dogecoin is a cryptocurrency developed by software engineers Billy Markus and Jackson Palmer, who plans to develop a payment system as a joke, making fun of the wild speculation in cryptos at the time. DOGE is listed on many cryptocurrency exchanges that include Binance, Huobi Global, OKEx, CoinTiger, and ZG.com. In which the crypto is available to be traded against fiat currencies, stablecoins, and other cryptos. With the ongoing developments and upgrades within the DOGE platform, it has the high possibility of reaching its ATH soon. Disclaimer: The opinion expressed in this chart solely author's. It does not interpreted as investment advice. TheNewsCrypto team encourages all to do their own research before investing. Recommended for You

- The initial barrier is at \$0.35, the mid-August high. - Expect a positive breakthrough towards \$0.53 as the price squeezes. Dogecoin's proof-of-work mechanism varies from Bitcoin's in various areas, including employing Scrypt. The cryptocurrency has a one-minute block interval and an infinite supply, which means it may be mined indefinitely. The price of Dogecoin (DOGE) has been rising since April, with minor price swings. Bulls have consistently supported the lower end of the DOGE price response around the green ascending trend line. Expect a positive breakthrough towards \$0.53 as the price squeezes. Bulls Eyeing For a Buy Since September, the buy-side volume has increased significantly. Bulls may use these chances to bolster their previous or fresh long holdings. The green rising trend line seems to be holding firm. The topside red falling trend line has only seen one retest in two weeks. Without a third test, the decreasing top line's strength is questioned. The present level of mounting buy volume is simply too great for shorts in Dogecoin to meet. The initial barrier is at

\$0.35, the mid-August high and the monthly R1 resistance. When Dogecoin price gets some tailwinds to support the advance, anticipate a faster breakout to \$0.53 with no bears to oppose it. If the current surge in DOGE price fails, anticipate the level at \$0.20 to remain. This level has been the S1 support level for a few weeks now with no testing. Bulls would take up Dogecoin pricing on a break below the trend line since the alt-currency is still in the media and benefits from this. According to CoinMarketCap, the Dogecoin price today is \$0.261157 USD with a 24-hour trading volume of \$1,232,873,926 USD. Dogecoin has been up 0.96% in the last 24 hours. Recommended for You

- To confirm the upswing, the price must slam the crucial levels at \$0.32. - If the asset receives a larger push, it may break the pattern. Bitcoin and Ethereum prices have hit monthly highs, igniting intense optimistic feelings. After a lengthy period of stagnation, the XRP price moved approached its immediate resistance levels. Contrary to expectations, Dogecoin fails to break over the \$0.3 barrier level. The price of DOGE soared in the final two days of October 2021. After a little fall, the price stayed stable for almost a week. However, the new spike rallied the price by almost 8% in an hour, with a noteworthy decrease from \$0.2979 to \$0.2817. Even if the market seems to be ranging south, a breach of support levels confirms a downturn. Momentary Rejection Despite a momentary rejection, the doge price is still in range. The asset may, however, consolidate inside the triangle without breaking. If the asset receives a larger push, it may break the pattern in the following few hours or trading day. To confirm the upswing, the price must slam the crucial levels at \$0.32. After that, the next major milestone might be over \$0.4 and finally near \$0.7. So, following the second ATH, the dollar mark may be more attainable for DOGE pricing. The trade volume of Dogecoin has increased by over 210 percent, reaching over \$3 billion. So, if the large volume persists, the DOGE price may soon break the trend. The Shiba Inu (SHIB) Price surge may encourage a greater Dogecoin price rally in the coming days. According to CoinMarketCap, the Dogecoin price today is \$0.278851 USD with a 24-hour trading volume of \$3,645,377,421 USD. Recommended for You

- If the price of DOGE supports the bears, it may decrease by 28%. - A reduction in price volatility may result in a rise in the price of DOGE. There is chaos and negativity in the crypto market, as Bitcoin drops below \$60488, and most major altcoins are trading in the red. The price of Ethereum, ADA, XRP, and DOT have all fallen by 2-4 percent, but BNB and SOL have remained stable in the green. The price of Dogecoin, the original meme currency, is now trading at \$0.2549, with a little downward bias. A reduction in price volatility may result in a rise in the price of DOGE. The symmetrical triangle forecasts that Dogecoin will rise by 29 percent, reaching \$0.34 per coin. Bulls and Bears Cancelling Each Other It's an asymmetrical triangle on the four-hour chart, meaning the bulls and bears are cancelling each other out. With market volatility decreasing, a breakout in either direction is possible in the next sessions. The flattening of the moving averages and the RSI indicator's position at 45.2, near the middle line, confirm this view. There is a potential that DOGE may continue to rise to \$0.34, a 28 percent gain. If the price of DOGE supports the bears, it may decrease by 28% to \$0.18. Before reaching this bearish target, Dogecoin may find support at the 200-day SMA at \$0.2524. Between October 5 and 25, the Dogecoin price consolidated between \$0.24 and \$0.28. On October 26, DOGE dipped to below \$0.21 before rising to stabilize over \$0.235. According to CoinMarketCap, the Dogecoin price today is \$0.256961 USD with a 24-hour trading volume of \$1,359,776,912 USD. Recommended for You

- Markus urged Bray to "take responsibility for his actions." - Markus added, "Doge is a Shiba Inu." - Two Indian exchanges made a majority of their trading volume from the meme coins. A recent statement from Doge inventor Billy Markus noted that "hype does not stay" but that ventures must have "lasting worth" to be successful. Recently, SHIB suffered a fast deterioration due to his admission that he possessed zero Shiba Inu tokens (as previously reported). Before Musk's presentation on Saturday Night Live, Dogecoin's price was gathering pace. Even so, the value of the memes currency plummeted by 30 percent shortly after he debuted. "Take responsibility for his conduct," Markus admonished Bray in this context. Other cryptocurrency investors have already received advice from the Dogecoin inventor, who has counseled caution when entering the crypto space. In addition, he advised people to accept responsibility for the dangers that they choose to take on their initiative. "Take everything that everyone says about it with a grain of salt because no one knows anything," states the second point. Finally, if they are unable to implement the preceding recommendations, they should avoid this market entirely. Senate candidate Bray has previously voiced his support for SHIB should be mentioned at this stage in the discussion. Once, he claims to have "distributed his doge holdings in exchange for SHIB tokens. The Dogecoin cryptocurrency has been referred to as "people's money" by both Musk and Markus, with Markus recently stating that "dogecoin is a fundamental cryptocurrency." The following remark was in response to his "hype" comments: "It is not a currency of promise and bombastic overstatements." The SHIB and DOGE meme currencies are still being confused by some, even though the two are entirely different. "The network of dogecoin self-identified as shibes" for YEARS," according to Markus, which explains why this has happened. Accordingly, "Doge is a Shiba Inu," he said. Even yet, both currencies appear to have a rapidly growing investor base, with the latter appearing to be particularly strong in India. Recent research revealed that two Indian marketplaces generated a vast bulk of their trading volume through meme currencies. Recommended for You

- Shiba Inu (SHIB) shoots up to a new ATH of \$0.00008685 . - SHIB's overall market cap has increased astonishingly. - SHIB dethrones Dogecoin (DOGE) and jumps further up the crypto rankings into top 10. The past 24 hours or perhaps a few hours even more than that has quite been a day of drownings for the entire crypto industry. Even Bitcoin (BTC) sank down below \$60k. Amidst all this, one altcoin, which obviously made records like anything over the past one month and still following the same track once again creates a new record! Yes, this is obviously none other than the Shiba Inu (SHIB). SHIB hit a

new all-time-high (ATH) of \$0.00008685 just a few hours back from the time of writing. Another ATH for SHIB To be frank, this is the third or fourth time I myself as a writer is writing yet another article about the new ATH of SHIB over the past 24 hours. Seriously, SHIB is completely on fire shooting upwards like anything, as if it's on triple nitrous boosters continuously. Accordingly, over the past 24 hours, SHIB has surged up about 77% gains. This led to a whopping ATH of \$0.00008685! In spite of this, SHIB shot all the way up drastically from \$0.00004668 to \$0.00008685 within the past 24 hours. On the other hand, the trading volume of SHIB has also gained exponentially about 257.13%. Apart from this, the overall market capitalization for SHIB has also surged about 68.54%. Also, now the overall market cap for SHIB amounts to \$31,335,296,430.86. ~DOGEKILLER~ Kills DOGE Besides all the hype with its surges, SHIB has finally accomplished it's one and only sole goal. Yes, finally SHIB has made its tagline name into reality. Thereby, now SHIB is officially the ~DOGEKILLER~! With surge upon its market cap, made SHIB jump up upon the crypto rankings, dethroning Dogecoin (DOGE) from its position and taking it's throne. Now, SHIB stands at 10th ranking whereas DOGE is at 11th. Seems, now SHIB can even rest peacefully, beating DOGE. Personally, I never thought even in my rarest dream that SHIB will overtake DOGE, rather being a copy of the original meme coin. However, anything is possible with the crypto market though! At the present SHIB stands at a price of \$0.00008321, with 72.61% gains.

Altcoins are now on recent trends emerging in the market with a strong user base and high trading volumes. Among that, Dogecoin is scoring a high value of recognition with followers all around the world. Besides its low performance in recent months, Dogecoin (DOGE) is now gaining power depicting a bullish trend. DOGE is maintaining a green graph without any highs and lows but staying like a still boat. DOGE is Set to Boom According to CoinMarketCap, the price of DOGE is standing at \$0.266328 which is on a spike with 1.56% in the last 24 hours. In addition, the overall trading volume of Dogecoin records a shoot up over 300% indicating the bullish trend. Interestingly, the meme coin is always a luck favouring coin which always offers long opportunities for crypto traders. Besides, there are DOGE millionaires who purchase the coin even when it is at red lines. If traders show interest in buying dogecoins even when at red lines then the DOGE/USDT will bounce to \$0.32 and succeedingly hit \$0.35. Additionally, the king of all crypto's Bitcoin (BTC) crossed its ATH reaching above \$66,000 in the past week. Thus, the entire crypto market was on high performing a bullish scale with huge market capitalization. However, at that period all the altcoins were also directing an upward trend surging in the prices. Moreover, when dogecoin had a peak time, all investors expected DOGE to reach \$1 with its bull run appearance in the market. Besides, it is not the first time Dogecoin is achieving a more than 30% hike. It placed records scoring many spikes till now over its history. Even in mid of August DOGE reached a significant rise up-to 33% surprising the investors. At present dogecoin is boosting up its price value slowly falling on the green line margin. More so, if DOGE maintains the same consistency level it will surely reach over \$0.34 level soon. Thus, all DOGE holders will enjoy earning huge rewards with their digital investments.

- Shiba Inu has reached a 24-hour trading volume of over \$13 billion. - SHIB attracted crypto analysts to think that SHB can flip DOGE soon. - Today Shiba Inu (SHIB) has reached its new ATH at \$0.0000442. An ERC-20 altcoin developed on Ethereum blockchain Shiba Inu (SHIB) was growing tremendously in the crypto market for the past few days. SHIB has been vigorously raising its market position. As per CoinMarketCap, Shiba Inu (SHIB) secured 11th position. Accordingly, at press time, SHIB has reached a 24-hour trading volume of over \$13 billion. This was a massive growth, and this achievement of SHIB attracted crypto analysts to think that SHB can flip DOGE soon. On October 23rd the crypto enthusiast posted a tweet, Will \$SHIB flip \$DOGE in 2021? ðŸ““ ~Watcher.Guru (@WatcherGuru) October 23, 2021 More so, this tweet has hit over 6k likes and 1k shares on Twitter. However, it has gathered many different opinions about SHIB's possibility of flipping Dogecoin (DOGE). Some of them agreed on the point, some of them disagreed with that point, even more, some remain neutral. SHIB is one of the top 15 cryptocurrencies as forementioned. As per CoinMarketCap, SHIB price was trading at \$0.00004206 with 24-hour trading volume of \$13,337,613,639. In the last 24-hour SHIB price has surged over 48%. Eventually, SHIB was displaying a continuous bullish trend from the past few days. In the last 30 days, SHIB has increased from \$0.0000072 to \$0.00004166. And today Shiba Inu (SHIB) has reached its new all-time high (ATH) at \$0.0000442. If this continues then the flip may happen soon. Furthermore, some countries are started to adopt SHIB as one of the payment options for goods and services. Venezuela, a well-known country in the world where some of their shops accept SHIB as their mode of payment. Recommended for You

- More likely to reach the immediate resistance levels at \$0.33. - The bulls are anticipated to enter quickly to avoid additional losses. While the crypto market seems to be reversing its downward trend, bears tend to be persistent. So the Dogecoin price is only able to swing 4% to breach the boundaries. With an initial goal of \$0.5, the potential of a significant rise remains. Like Shiba Inu, the DOGE price seems to remain static. However, the pricing shows a few potential rally scenarios. Firstly, the price may crash to local support around \$0.1989 and then rally massively following accumulation. Otherwise, the price will continue to consolidate. Many layers above the local support. On the other hand, it is more likely to reach the immediate resistance levels at \$0.33. If neither scenario occurs, the asset may ultimately fall towards the strong support levels around \$0.1589. Many may rush in to get the asset at a reduced price, perhaps for the final time. Eventually, Break the Downtrend The hourly chart is bullish and about to slash through the ascending triangle. The breakout occurs when significant trade volume is influx to increase buying pressure. However, the RSI seems to have fallen into bearish divergence. MACD also shows no clear bullish trend but shows considerable buying pressure. The price of Dogecoin(DOGE) may eventually break the downtrend. However, the bulls are anticipated to enter quickly to avoid additional losses and recover lost positions. It may reach \$0.5 by the end of October 2021, according to Watcher.Guru, a popular analyst. According to CoinMarketCap,

the Dogecoin price today is \$0.252972 USD with a 24-hour trading volume of \$1,607,426,914 USD.

- Shiba Inu (SHIB) surges up drastically this week. - SHIB reached a peak of \$0.000035 just a few hours before. - SHIB will soon destroy Dogecoin and take its place. A new member entering into the top ten crypto rankings is something which is not common. There ought to be competitions, one place up and back upon the top ten. However, entry of a completely new altcoin into the top ten is a rather rare event. Accordingly, on October 7th, witnessed such a similar event. The Shiba Inu (SHIB) which is actually a meme based coin, on other terms an exact copy of the Dogecoin (DOGE) has surged up in the rankings to the 12th place, straight from the 20. All owing to its total market capitalization on October 7, 2021. Stupendous Surges of SHIB The SHIB has been quite promising, to be even more abrupt, actually it was a lot more than any could expect. Ever since May 2021, after witnessing its All-time-high, SHIB remained dormant for the next couple of months. And so, it completely started to sprung up out of nowhere totally unexpectedly since the beginning of October. Accordingly, by the end of the week, SHIB touched \$0.000035, an epic high after a long time. The surge was standard upward axis graphs since October 1, such that even those who invested just a few days back, would have made a fortune by now. In addition to this, the overall market capitalization raised upto \$14 billion on October 7. Also, this made the headlines as SHIB became the 12th upon the crypto rankings in terms of market cap. Moreover, the past week alone SHIB has witnessed a surge of a whopping 300%. Also, the overall surge compared to last year amounts to a mammoth 8000%. Killing of DOGE Despite being launched with the sole tag line of "DOGEKILLER" at the time of launch, it seems it's soon going to be a reality. In spite of all the surges, the major reason is from the drastic coin burns by SHIB. Also, at such a rate throughout the week, many crypto enthusiasts predict that SHIB will destroy DOGE and take its place soon! - The price of Dogecoin has risen by approximately 40% in the last week. - Investors should be wary of an approaching correction. Funding from Shiba Inu is needed to feed Dogecoin, says billionaire Glauber Contessoto. The Dogecoin-Ethereum Bridge is in the works, according to co-founder Billy Markus. Shiba Inu's advancements in the ecosystem increase its rivalry with Dogecoin. Dogecoin's price remains stagnant despite Shiba Inu's 200 percent gain in a week. Moreover, the market's general negative structure suggests DOGE may be ready for a drop. The price of Dogecoin has risen by approximately 40% in the last week. This price increase was met with strong resistance at the 50% Fibonacci retracement level at \$0.272. Due to poor buying pressure, DOGE has retraced approximately 9%, but it seems to be headed lower. The Bullish Thesis, Invalidated However, the support region between \$0.213 and \$0.23 will determine the meme coin's short-term trajectory. A breach of the \$0.213 demand level would signal an increase in selling pressure and a 20% decline to \$0.193. The poor structure of the major crypto and the rising popularity of DOGE rival Shiba Inu, which has risen approximately 200 percent in the last week, contribute to this gloomy view. This rapid rise in SHIB may have prompted consumers to switch to DOGE-killer. Investors should be wary of an approaching correction. If the Dogecoin price fails to breach the \$0.213-\$0.23 support region, it indicates a buyer's strength. The bullish thesis, invalidated by a decisive closing above \$0.272 (50 percent Fibonacci retracement line). In this case, DOGE is likely to revisit the 70.5 percent Fibonacci retracement level around \$0.305. According to CoinMarketCap, Dogecoin price today is \$0.257067 USD with a 24-hour trading volume of \$6,006,110,421 USD. - Several altcoins prove to be a vital part of the crypto industry. - Dogecoin (DOGE), Shiba Inu (SHIB), UniSwap (UNI) and Dash (DASH). - The following are short history of DOGE, SHIB, UNI and DASH. For an average person, when taking the topic of cryptocurrency, the first which comes to their mind and those who are clueless regarding it too, is the Bitcoin (BTC). However, the times have changed with the rise of the altcoins profusely. The developments in regards with the blockchain technology has completely catapulted the altcoin industry. Moreover, not taking in regards to the top most altcoins, let's catch a glimpse of how and reason behind the start of certain prominent altcoins of the industry. Dogecoin (DOGE) The "accidental coin", "the People's coin", "the meme coin" are often few alternatives for this altcoin. Yes, the Dogecoin (DOGE) is one altcoin which rose to epic fame and market capitalization in recent times. Besides, from being adored by all, the overall market cap of DOGE has increased so much that now DOGE ranks 10th place. The altcoin was launched in the year 2013, merely as a joke, by Billy Markus and Jackson Palmer. Surely, till date the developers both of them couldn't believe where their crypto stands. They still proclaim they had absolutely no intentions of any sort, except for making fun of the crypto industry. In addition, no wonder why it's adored by all, as it has the Japanese breed dog, Shiba Inu's face for the coin. Furthermore, the overall market cap of the DOGE stands at more than \$26 billion. Also, DOGE current price is at \$0.199 with a decrease of 0.29% at the time of writing. Shiba Inu (SHIB) This altcoin could be said to be a complete replica of the popular Dogecoin. In addition, the Shiba Inu (SHIB) was solely started only for destroying the DOGE. Moreover, the SHIB was launched only last year, 2020. Despite such a short term the current market cap of SHIB accounts for about more than \$7 billion. On the other hand copying the same Shiba Inu dog image, sort of even cuter than DOGE though. Likewise, the SHIB was also considered as a meme based crypto. Many speculated it would fail adversely. However with the backing up from Elon Musk, who tweets every now and then, SHIB has reached prominent heights. Moreover, SHIB has a loyal fan base who expects it to rise up like DOGE similarly. In spite of all

this, the current market price of SHIB stands at \$0.000007 at the time of writing. UniSwap (UNI) As we spoke about technological advancements, the UniSwap (UNI) is one of the best examples. Apart from being a decentralized platform, UniSwap is solely dedicated to all sorts of finance based services, basically DeFi. In spite of the platform being launched in the year 2018, owing to its profuse decentralized finance services, UniSwap has spiked up profusely. It was only 2 years later that the platform bought out its native token, the UNI. Moreover, the liquidity pools with the finances ought to be the most important and vital factor for UniSwap platform's rise. In addition, it eliminates all sorts of issues with liquidity pooling giving out automated solutions. Also, UniSwap made sure none of the defaults saw that other first generation decentralized exchanges were present with UniSwap. With all this, the current value of UNI stands at \$23.15 at a dressing range of 3.69% at the time of writing. Besides, the overall market cap of UniSwap accounts to about more than \$14 billion.

Dash (DASH) Another one in our list in regards to the technology driven aspects is the Dash (DASH). The open sourced blockchain platform is extremely unique when compared to other altcoins. In addition, the uniqueness is that instead of using the conventional transaction protocols, Dash uses "Masternodes". On the other hand these masternodes work at an amazing speed, with all transactions taking place almost instantaneously. Moreover, looking at its history, the DASH, which is the native token of Dash platform, was actually launched as a hard-fork for Litecoin (LTC) in the year 2014. In spite of all these factors, the Dash platform is now one of the most trusted platforms for amazing transaction speeds and extremely low costs compared to others. Amidst all, the sole goal of the Dash platform is to produce a crypto dedicated for payments at extreme speeds. Besides, now the price of DASH stands at about \$154.55 at the time of writing with an average surge of 2.81%. Also, the overall market cap accounts to about \$2.93 billion.

Elon Musk does not need any introduction as he is a well-known figure worldwide. Moreover, his support for a meme-currency has made that token reach its peak. The CEO of Tesla, Elon Musk, was showing his constant support to Dogecoin through his tweets. Besides, Elon Musk's support for DOGE was the trend for a few days on the Twitter platform. Dogecoin enthusiasts have become larger in number following Elon Musk's support for DOGE and surprisingly, the price of DOGE will rise immediately after his tweet. Similarly, it has been days since Elon Musk's tweet has gone viral regarding Dogecoin. But now, a Twitter user has posted that the Doge community will support Elon Musk. Tweet States "Mutually Beneficial Relationship" A Twitter account with a Dogecoin profile @itsALLrisky which has over 183,000 followers has posted that the support for Elon Musk won't be unnoticed. The tweet also states that Tesla's CEO support for DOGE is a "mutually beneficial relationship". This refers to the support from the dogecoin community to Elon musk would never fade. Elon's support for \$DOGE is a mutually beneficial relationship "ðŸ’ðŸ’ðŸ’ (@itsALLrisky) September 25, 2021 Because the #DOGE community will always support @elonmusk! pic.twitter.com/osU8YRmiQd The photo on the tweet was Boris Vallejo with Atlantis holding the Earth. Elon Musk's face appears on the giant, and a Shiba Inu Doge character stands nearby, offering assistance. However, at the beginning of this week, Musk endorsed the idea of the AMC cinema chain accepting Dogecoin as payment. Moreover, he tweeted to reduce the fees of Dogecoin earlier this week. If Musk again starts to show his support to Dogecoin through posts then the price may hit its new ATH soon. Gradually, Dogecoin might also lead the crypto market with its step towards heights.

- Tesla CEO Elon Musk Tweeted Dogecoin to Reduce its Fees. - Billy Markus planned to release a Software upgrade. - According to Musk, the Dogecoin upgrade Core 1.14.4 is critical. The co-founder and CEO of electric car maker Tesla and rocket manufacturer SpaceX is Elon Musk has supported the meme token Dogecoin by revealing what will help the growth of cryptocurrency. On Wednesday, Elon Musk commented to Billy Markus aka Shibetoshi Nakamoto's Tweet, by suggesting to lower the fees to make the crypto a more viable payment option for everyone. Super important for Doge fees to drop to make things like buying movie tix viable "Elon Musk (@elonmusk) September 22, 2021 Moreover, the price of the Dogecoin continues to drop, he commented, "super important for DOGE fees to drop to make things like buying movie tix viable". Accordingly, in May Elon Musk noted that he was giving ideas and working with the Dogecoin developers to increase the system transaction efficiency. The co-founder of Dogecoin, Billy Markus but he no longer working on the project. He accepted and agreed with Elon Musk's tweet and planned for a release of a software upgrade. More so, currently, Dogecoin co-founder Billy Markus demanding operators to upgrade to Dogecoin Core 1.14.4 so it will reduce the fees to become the default setting. The Dogecoin update which was released in August contains outstanding performance improvement as well as bug fixes. According to Musk, the Dogecoin upgrade Core 1.14.4 is critical. Current Market Status of DOGE At the time of writing, as per CoinMarketCap, the price of Dogecoin (DOGE) is trading at \$0.2069 with a 24-hour trading volume of \$2,227,558,097. In the last 24-hours DOGE decreased 6.57%, similarly, in the last 7 days DOGE bounces back 14.93%. And it dropped 26.20% within a month. And if this drop continues then it will fall to support level \$0.16. The next support level is \$0.14 and \$0.12. If DOGE breaks \$0.23 then it will surge to the resistance level of \$0.26 and it might also hit \$0.30. Recommended for You

Shiba Inu, a cryptocurrency launched last year, is based on famous memes, like Dogecoin. Despite the similarities, SHIB calls itself the "DogeCoin killer" in the crypto market. It has managed to steal some of Dogecoin's thunder, but not enough to make a difference. It is significantly behind

Dogecoin. SHIB has been extremely volatile during the last month, according to market research data. It held at \$0.0000080 until August 25 before falling to \$0.0000056 on September 8. It has now rebounded to about \$0.0000070 as per CoinMarketCap. SHIB was founded in August 2020 by an unknown individual using the alias Ryoshi. Its mascot was started as a joke, like Dogecoin. Shiba Inu, like many other cryptocurrencies, runs on the Ethereum blockchain. According to a recent study, Shiba Inu and Dogecoin (DOGE), two of the most popular meme-based cryptocurrency tokens, have peaked, demonstrating that excitement is fleeting. Large Whales in Action Shiba Inu and Dogecoin have recently plummeted. Dogecoin fell 7% while Shiba Inu coin fell 10%, indicating a downward trend for both currencies. Overall, the study indicates that large “whales” buy both Dogecoin and Shiba Inu currency, then sell them off, causing the market to collapse. Some analysts think that the value of both digital currencies has peaked and that the excitement around them is now beginning to fade. But, given cryptocurrency’s volatile nature, any assumption is hazardous. The Shiba Inu group also wants the coin featured on the Robinhood app. Some believe that the Shiba Inu coin decline would lead to a price rise, as more purchasers will invest because of the cheap cost. Prices are expected to continue to decrease and perhaps increase next year. The Co-founder of Ethereum, Vitalik Buterin has given some suggestions for the development of Dogecoin. He shows interest in collaborating Dogecoin with Ethereum which will allow traders to trade DOGE with low transaction-fees and high-speed. Buterin has shared his views on the potential collaboration of Dogecoin and Ethereum where the 268 people he followed in twitter alone can ask him questions. As a result, the CEO of Three Arrow Capital, Zhu Su, asked Buterin, “What are some promising Ethereum/Doge collaboration ideas? What about Doge piqued your interest in the project?” Responding to the question, Buterin answered with reference of Proof-of-Stake (PoS) and Proof-of-Work (PoW): “Personally, I hope that Doge will be able to transition to PoS soon, possibly using Ethereum code. I also hope they don’t cancel the annual PoW issuance of \$5 billion, but instead put it in some kind of DAO that funds global public goods. Would be a good fit for Dogecoin’s non-greedy, wholesome ethos.” Ethereum And Dogecoin Collaboration Significantly, Buterin had already talked about the potential collaboration between Ethereum and Dogecoin in June. He explained that if Doge opens a bridge to Ethereum then users can trade DOGE several in seconds which will be great. Moreover, Buterin thinks that it would be secure for Doge-to-Ethereum bridge. When Ethereum achieves any scalability that works for Ethereum assets, then traders can trade DOGE with low transaction fees and high speed. However, in August, Ethereum co-founder joined the Dogecoin foundation’s board of advisors. Buterin joined along with Jared Birchall who is the close associate of Tesla CEO Elon Musk. As we all know, Musk is a great supporter of Dogecoin. Recommended for You

True to the fact there never goes a single week upon the crypto industry without the mention of the much loved and adored meme-coin, the Dogecoin (DOGE). In spite of creating a major buzz last month about the Dogecoin Foundation, many came in awe to witness the surge of the DOGE furthermore. Also, the highlight was that the board members who joined the Dogecoin Foundation, being the co-founder of Ethereum (ETH) Vitalik Buterin, Dogecoin co-founder Billy Markus, Dogecoin developer Ross Nicoll and from the stables of Tesla, Jared Birchall. Besides, with such a team into the Dogecoin Foundation, many speculate that DOGE will profusely shoot up soon. Vitalik’s Views The co-founder of Ethereum (ETH), the young chap, Vitalik Buterin is wholly positive with the DOGE and being part of the Dogecoin Foundation. Accordingly, Buterin puts forth that there are high possibilities for DOGE to adapt itself into Proof-of-Staking (PoS). In spite of this, Buterin adds, it’s the same way as ETH has now switched to PoS. Likewise, DOGE ought to follow the same way. Also, he adds this PoS will be towards the crypto mining profusely. Moreover, Buterin took to expressing this officially via Twitter. Upon the tweet, Buterin depicts that DOGE should never ban out or stop its 5 billion per annum Proof-of-Work (PoW). In addition, he insists DOGE should invest in Decentralized Autonomous Organizations (DAO) as support towards global funds. Also, he adds that this will help DOGE in maintaining its non-profit public stance on the whole. The Developers and Leaders Opinions Much to the prediction and analysis by Vitalik Buterin, the core developer of DOGE, Ross Nicoll, and the community leader of DOGE Gary Lachance depict the same. In spite of this, the developer Ross Nicoll reveals his personal desire for DOGE to adopt the PoS. However, he states that he has to pacify many among the foundation for this. Also, he terms satisfying everyone at times would be hard. On the other hand, the leader of the DOGE community, Gary Lachance also joins with Nicoll’s statements but with a rather different aspect and point of view. Accordingly, Lachance states PoS establishes less consumption of electricity compared to the PoW in terms of mining activities. Also, he points out the energy being burnt towards the mining of Bitcoin (BTC) and the dangers it poses to the environment. Furthermore, Lachance states adopting PoS for DOGE would be the best and foremost idea in terms of bringing environment-friendly and green mining.

The newly emerged meme coin smartly portrays its name as “Dogecoin 2.0” in the crypto market. So the DOGE community now legally demands the fresh faced meme coin to change its name immediately. The Doge foundation accuses the new entrant for opting its popular brand name and reputation in the marketplace. Dogecoin is one of the most popular and crypto friendly meme coin attracting large crypto lovers worldwide. Recently, doge’s value in the market surged nearly to \$0.33 offering the holders a great and profitable week. Besides, the DOGE community is now initiating partnerships with business giants increasing its value and standards among other Altcoins. Copycat Dogecoin 2.0 The DOGE foundation is very cautious about the new entrant, Dogecoin 2.0 with the same identity as Doge. So the entire Doge community is forcing the new meme coin to rename its brand and title in the market. Also, the DOGE team is filing a legal case against the fresh Dogecoin 2.0 to change its name. Moreover, to

avoid the existing confusions DOGE foundations distances itself from the duplicate dogecoin 2.0 (DOGE2). This Dogecoin 2.0 was launched in May on the Binance Smart Chain (BSC) Network. At present the coin holds the value of \$0.147636 USD trading under the symbol of Doge 2. Importantly, the DOGE community filed a strong case against this new meme crypto project. The filing document clearly states, it has arranged legal lawyers to reach out and discuss with Dogecoin 2.0's developers and team. Besides, it also shares, the entire Dogecoin system is concerned to protect the Dogecoin name and the whole community from possible misuse. After the filing, Dogecoin 2.0 passively replied the popular DOGE foundation stating, "Dogecoin 2.0 aims to offer investors long term growth in utilizing a much more sustainable tokenomics structure than its somewhat inflated predecessor." In the midst of so many controversies, the DOGE community is receiving constant support from popular crypto stars. The main crypto proponents like Ethereum co-founder Vitalik Buterin and Tesla CEO Elon Musk are supporting the entire community. However, firing off legal demands DOGE community forces the fresher meme coin to rename its resembling identity. As this might spoil the name and reputation earned by the well known, crypto friendly DOGE foundation in the marketplace. Recommended for You

During the past 24 hours, markets have been falling, headed by Polkadot (down 9%), Dogecoin (down 8%), Binance Coin (6%) and Cardano (down 4 percent). The entire market value for cryptography has fallen by about \$90 billion from yesterday (4 percent). The remainder of the top 10 is also red, indicating that the market movement cannot be based on any specific development from a few coins or tokens. Instead, it is just a short-term market correction in financial terms. After a double-digit percentage gain from most of the significant cryptocurrencies last month. The markets seem considerably more optimistic than anytime else in August. For its 12 September implementation of smart contracts, Cardano has anticipated a price rise of 121% from 25 July. In the past month, Dogecoin bounced back over 50%. Promptly saying that the Dogecoin Foundation brought the band back together. With the assistance of Vitalik Buterin and Elon Musk's adviser Jared Birchall. Solana on the Rise In addition, Solana is developing success with its DeFi products, decentralized funding apps. Which eliminate the intermediaries for transactions, such as loans and asset exchanges. Over \$2 billion in money is currently being circulated via Solana DeFi protocols. And this week the token of SOL has reached an all-time high of \$80. But most market activity is linked to Bitcoin and Ethereum, the crypto-reserve currency. The former received \$50,000 momentarily in three months. While long-term investors continue to sit down and limit supply this week. According to Glassnode, transaction counts and volumes have lately been slow. As for Ethereum, the increased demand for NFTs has been boosted "based on blockchain that reflects ownership of digital goods such as art, collectables and, uh, rocks. Yesterday was a golden day for non-fungible tokens, a month that had already been high selling. NFT marketplace OpenSea achieved a 24-hour record sales volume of \$195 million. Which was \$90 million on the previous day. Recommended for You

Dogecoin (DOGE) is one of the most talked-about cryptocurrencies in the industry. It has reached a profuse state such that the first thing for many crypto-illiterates to recognize next to Bitcoin (BTC) is the DOGE. Such is its presence in the crypto industry all over the world. Amidst all this, even the first cryptocurrency all speculate to invest upon for all amateur investors will be the DOGE. However, the Dogecoin Foundation which was buried completely for the past 6 years now re-surfaces, with a complete focus to bring the DOGE and its blockchain to greater heights. The Dogecoin Foundation The Dogecoin Foundation was first formed by the year 2014 after the launch of the Dogecoin (DOGE) at the end of 2013. Moreover, the complete focus of the Dogecoin Foundation was to improvise the complete Dogecoin project and its blockchain technology by all aspects. Also, they strived hard for making the Dogecoin technology able to reach a wide range of organizations for utilizing their blockchain technology. In spite of all this, the Dogecoin Foundation initially got support from many charity bases from all over the crypto industry. However, the foundation soon became soulless as many of the members started to part off from it. Accordingly, two of the founders, Ben Doernberg and Eric Nakagawa parted off from the foundation. Ever since then, the Dogecoin Foundation became completely silent and it got lost. The Upgraded Dogecoin Foundation The news spread like hot fire all over the crypto industry as soon as Dogecoin Foundation was announced officially upon its comeback. The announcement's put forth by the Dogecoin Foundation themselves on Tuesday. In spite of this surprising comeback by the Dogecoin Foundation, they still proclaim that they remain with the same goals and focus as they were once they were established. Accordingly, the Dogecoin Foundation puts forth that they will all strive together and support DOGE furthermore in all aspects including by developing their blockchain technology even more efficient and usable to a large scale of firms. Moreover, they determine that they will be launching many new projects all focused on bringing the DOGE to new heights as it has ever seen so far. Also, the Dogecoin Foundation mentions they will be using the same Dogecoin icon as their badges and other doge-based memes and digital media which promote DOGE. Besides, they reveal that they have so far planned the complete budget for the foundations working for the next 3 years. In spite of all this, the team will be having Ethereum (ETH) co-founder Vitalik Buterin, Dogecoin co-founder Billy Markus and also the DOGE mainstream developer Max Keller on board. In addition to this, the CEO of Neuralink, Jared Birchall will be also part of the team in establishing the Tesla CEO, Elon Musk's views of DOGE. Recommended for You

There never goes a month without the meme-based Shiba Inu coin, the Dogecoin (DOGE), on reaching the limelight among the crypto industry. Sudden spikes and sudden falls all prevail and are quite an ordinary thing when it comes to the DOGE. Likewise, the news spread like fire and all took over social media as the DOGE spikes continuously over the past 24 hours. The 17% Spike Hype It was long back, about the end of the year 2013 when two programmers by the names Jackson Palmer and Billy Markus brought out the now fascinating DOGE. At that time the crypto was launched merely as a joke, as a meme-based coin just for fun. However, no one at that time knew that DOGE would be reaching such heights now. In spite of all this, the total market value of DOGE amounts to about \$44.42 billion.

Likewise, the news which took over the fire upon social media and the entire crypto industry is on how the graph of DOGE went up for the past 24 hours. Ever since August 15th, the value of DOGE has been on a profuse rise till now. For the first half of the time, DOGE spiked up to about nearly a two digits increase the percentage of about 17%. Furthermore, it kept on the same pace reaching about 33% which astonished everyone. Moreover, this is not the first time DOGE has reached a 33% increase, it has seen many such so far over the past year. In addition, this instigated many and many to take over the social media using the hashtag #dogecoin1dollar making it on-trend. Upon Twitter, people stormed in support of DOGE with thousands of people using the hashtag. Similarly, more than thousands of people are using the hashtag #dogecoin1dollar even now on Facebook. Besides, the social media platform, Tiktok saw more than 8.2 million views on people mentioning the hashtag. The surge of Other DOGE Like Cryptos The whole market was kind of like making everyone puzzled upon how other altcoins which are similar to DOGE have behaved during DOGE's rise in the past 24 hours. Following this, the similar meme-based coin, the Shiba Inu (SHIB) spiked up to about more than 12% taking the last week into consideration as the time period. Likewise, polydoge (POLYDOGE) galloped to a high of about 43% rise during the same past week. Also, other meme-based cryptos following DOGE like the Supershiba (\$SSHIBA) and shibance token (WOOF) witnessed a huge surge of about 40%. On the contrary, it seems that people are of the thought that all these DOGE copycat cryptos will follow the same path as the DOGE, and all of these would become the next DOGE. However, the time has to decide, let's wait and watch as many are hoping the same though! Recommended for You

- Watford F.C. players will wear Dogecoin shirts. - Stake.com has paid for the appearance of Dogecoin. In the 2019-2020 soccer season, the team wore Bitcoin shirts. English soccer team Watford F.C. players will wear Dogecoin shirts in this new Premier League season. The players will wear a Dogecoin logo on their sleeves. According to the British sports outlet The Athletic, Dogecoin will appear on all three Watford shirts. Accordingly, sports betting site and crypto casino Stake.com has paid for the appearance of the Dogecoin. Sports outlet The Athletic reported, the worth of the deal is nearly \$970,500 and will be paid in cryptocurrency. The Stake.com deal is not the first crypto sponsorship for Watford's. As a matter of fact, in the 2019-2020 soccer season, the soccer team wore Bitcoin shirts to promote the cryptocurrency. That was part of a deal with another sports betting site, Sportsbet.io. Moreover, for creating some vibration regarding the partnership, Stake.com also plans to give away 10 million DOGE the worth is roughly \$2 million. In Britain, Dogecoin has never appeared in high-profile sports events. Dogecoin was started as a joke in 2013 and uses the image of the meme Shiba Inu dog known as Doge. But it has since captured the imagination of many crypto fans and has garnered the support of celebrities, most notable Tesla CEO Elon Musk. Henceforth, the meme coin has surged 8,185% over the past year. Sports and crypto tie-ups are becoming more common as companies reap the rewards of the crypto boom. Of note, according to UEFA, the Premier League is a hot target for sponsors. It's the most profitable soccer league in the world, with 5.86 billion euros of revenue in 2019, nearly \$6.92 billion at today's exchange rates. Recommended for You

Another speculation is on the rise now, with many fans showing their interest in the meme-based crypto- the Dogecoin (DOGE). Many took to Twitter that Dogecoin should be incorporated upon numerous attributes profusely owing to its high popularity. Also, the fact that it is the seventh-largest cryptocurrency in terms of market cap value. In spite of all such suggestions, now DOGE has taken on AMC Entertainment Holdings, one of the largest chains of cinemas in the world. DOGE into AMC Many of the Dogecoin fans have put forth that DOGE should be into AMC (American Multi-Cinemas) Entertainments. All this started at first with the famous YouTuber, Steven Steele who took this to Twitter. Upon his tweet, Steele says AMC should soon start accepting DOGE. In addition, he adds that AMC on incorporating DOGE makes a lot of sense though. On the other hand, Steele himself is quite influential in terms of the crypto industry as most of what he talks about on his YouTube channel is of it. Also, he has about 4.1k subscribers to his channel and 10k on Twitter. Besides, what took this news too hot is, the Dogman, Elon Musk himself liking Steven Steele's Tweet. Amidst all the market busy on Bitcoin (BTC) and Amazon stocks, Steele has turned all heads towards Dogecoin and AMC. Moreover, all the DOGE fans extend their support towards Steele's tweet, many contradicting that once AMC accepts DOGE, this will propel DOGE to the moon! It's All Risky's Views The quite famous crypto critic who goes by the name "It'sALLrisky" who has over 174.6k followers on Twitter, also extended his support to Steele's tweet. "It'sALLrisky" who once was a Bitcoin (BTC) enthusiast shifted to DOGE ever since its prominence in the market. Furthermore, on It'sALLrisky's tweet, both the CEO of AMC, Adam Aron, and Elon Musk too. Also, he insists Aron make DOGE coin acceptance for AMC as also the Dogman, Elon Musk, himself accepts the idea. Accordingly, "It'sALLrisky" states once AMC accepts DOGE, both firms will contradict mutual benefits profusely. Also, the value of AMC's stocks will rise along with the price of DOGE too. However, this might be a great move for AMC, as their stocks have fallen down for the past two days.

A well-known brand for male grooming product company, Axe is ready to release a limited number of DOGE themed body sprays. The firm produces a "crypto scented" body spray called "Dogecan" available to U.S residents only. Axe's Dogecans On Tuesday, the company revealed an announcement about the giveaway of the free Doge themed body sprays. Axe's target audiences are always the younger male demographic. The Dogecan crypto scents were mainly launched for the young male consumers which lasts up to 48 hours. The Dogecans were very attractive featuring the image of the cartoon Shiba Inu printed on the cans. Axe's super offer encouraged all its consumers to register in its global website to get a chance to receive a free Dogecan. Besides this marketing strategy was promoted only to the U.S residents as Axe is a Unilever global product. Thus, as per the record there were around 1,000 lucky Americans, took part in this giveaway of crypto scented body sprays. vibes for tm ðŹŽ #dogecan 07.20.21 pic.twitter.com/KjgKn4K6Wx " AXE (@AXE) July 19, 2021 Moreover, some dogecoin favorites and personalities receive a sample of Dogecans to promote the campaign. It includes Dogecoin co-founder

Billy Markus, a famous Dogecoin Rise twitter account team and Doge proponent and a musical artist Lil Mook. DOGE Surpass \$1 Additionally, the idea to launch these crypto scented Dogecans was planned on Doge day which falls in April. All the Dogecoin evangelists hope to see the digital currency hit \$1. Axe is very eager to jump on the dogecoin (DOGE) hype train like other users. Thus, the firm believes the distribution of these crypto scents will shoot up the value of Dogecoin to \$1. In addition, the wrapping of the “Dogecans” holds a notable quote for the consumers saying, “We’re going to the moon, in this can you’ll find the crypto-confidence you need to get there.” According to CoinMarketCap, the current value of Dogecoin is \$0.178328 USD at the time of writing. Thus the doge market stays bearish at present. But on the other hand, DOGE trading volume shot up 1250% close to \$1 billion in the Q2, 2021. As a note, Dogecoin reached its ATH on May 8th 2021, to \$0.731 USD. Therefore, with all these promotions, marketing campaigns, twitter posts of DOGE favorites and celebrities this meme-coin will celebrate its Doge day surpassing to \$1. Recommended for You

The famously known meme-coin (DOGE) trading volumes shot up 1250% close to \$1 billion in the Q2, 2021. This remarkable score is recorded in the world’s top cryptocurrency exchange, Coinbase. Dogecoin is so popular in the crypto industry with numerous investors and as an additional asset it is the favorite coin for Tesla CEO, Elon Musk. Mostly, Musk’s tweet has super power on the price value of Dogecoin. DOGE in Crypto market Moreover, the average daily volume of Dogecoin in the first quarter is just \$74 million a day. Then the value of the meme coin skyrockets up-to \$995 million per day in the April to June time-period. Notably, the overall global trading volumes of DOGE rose up-to \$18.82 billion per day amid volatile markets. But at the same time high volatility is always risky for crypto crashes due to huge trading volumes. Significantly, Dogecoin market price was \$0.004 at the start of the year 2021. Then gradually the price went 50% high due to the tweet of Musk regarding the dogecoin. In February, the researchers were curious to find out the moves of Musk on cryptocurrency prices. In the methodology, the researchers found six twitter events from 2020 and 2021 which reflected more on the trading volume of DOGE. Thus, some celebrities have superior power on affecting the price surges of the cryptocurrencies. For instance, the SNL night on May 8th, 2021 raised the Shiba Inu-themed coin to reach its ATH to \$0.731. Also, after a lot of shouts from Musk, DOGE market value decreased 75% after its all-time high of \$0.181. Dogecoin Remains competitive Besides many controversies and arguments from crypto proponents, Elon Musk and investors the performance of Dogecoin remains high. It is competing with the top and famous digital currencies Bitcoin and Ether. Moreover, Ethereum is moving forward on an average volume of 53% per day on global exchanges. Whereas, bitcoin is dipping down 14% from its price value in the crypto market. Thus, Ethereum is surpassing Bitcoin in the crypto market. Importantly, the main reasons for bitcoin’s fall is China’s crackdown on bitcoin mining and Musk removing the bitcoin payments for Tesla products. Additionally, world’s top crypto exchanges listed Dogecoin on their platforms during this second quarter of the year. Doge is now available in Gemini and eToro from May, and Coinbase in June. More so, Coinbase reveals the overall cryptocurrency trading volumes which shows 32% increase worth \$19 billion on daily crypto transactions. Thus, this data covers more than 5% of transactions with a combination of DOGE during the Q2. According to CoinMarketCap, Dogecoin price is \$0.176853 USD at the time of writing. More so, these digital currencies play a vital role in all industries and businesses at present. Therefore its prices hit record highs before the year end. Recommended for You

You thought Dogecoin was a joke? Presently, we have Baby Doge “another meme digital currency that has been brought under the spotlight by the Dogefather Elon Musk. The Tesla boss initially tweeted about Dogecoin side project Baby Doge, and the digital currencies’ worth nearly multiplied from that point forward. Musk utilized the verses of a viral Baby Shark melody from last year and used it to allude to Baby Doge. A meme currency dependent on an all-around existing meme coin may not be the best speculation choice. It is probably going to remain profoundly unpredictable, and quite possibly nobody may be dealing with it. Elon Musk has been a colossal adherent to cryptocurrencies. He played a vital role in order to push the crypto market about Bitcoin and Dogecoin with his tweets. Both the coins were in a vertical direction for the principal half of 2021. These cryptographic forms of money gave huge returns before numerous plunges. There have been examples when Musk’s tweets have likewise prompted a plunge in the worth of different cryptocurrencies. His declaration on Tesla’s choice to not acknowledge Bitcoin as installments didn’t go well and, in the long run, prompted a market dunk in mid-May. Baby Dogecoin Still Manages To Surpass 450,000 Holders Dogecoin has been on a decline in recent times and has been a worry for the financial backers. The meme digital currency was made by software engineers Billy Markus and Jackson Palmer in 2013 But it has not stopped Baby Doge from surpassing 450,000 holders as recently claimed on its Twitter handle. Financial investors still find it worth it, and the number of holders has drastically increased due to social media posts by influencing personalities like Musk. Recommended for You

The Dogecoin millionaire, Glauber Contessoto who took to fame and became sensational just overnight brings forth his research on the most loved cryptocurrency of all, the Dogecoin (DOGE). He comically put forth a joke, on which he theorizes why Dogecoin (DOGE) is the best ever cryptocurrency in the world. Contessoto’s History Glauber Contessoto, an ordinary man, became a millionaire overnight and this became sensational news for the time. Glauber Contesoto, a 33-year-old, invested about \$250,000 in Dogecoin (DOGE) by the month of February. When DOGE reached its all-time high of \$0.75 on April 15, he became a millionaire overnight and the rest is history. Amidst all this, Contessoto simply quit his daily job and started his own youtube channel, which is completely devoted to DOGE. The meme-based coin for sure has changed many people’s lives though. Contessoto’s Research In spite of all this, Contessoto made a tweet just a few hours back. Upon the tweet, Contessoto depicts that he has found out why the meme-based coin, will always be the best cryptocurrency in the world. After some extensive & intensely laborious research I have finally discovered why #DogeCoin is the best crypto. You guys remember the old Superman cartoons and comic books? Dog is a man’s best friend right? Well guess

what SUPERMAN's DOG's NAME WAS " Krypto.. I rest my case #DOGE " SlumDOGE Millionaire (@ProTheDoge) July 9, 2021 The DOGE maniac, states that he's come up with a theory after extensive and arduous labor. Contessoto, states joking comically, bringing the old times, Superman comics. Furthermore, he goes on in the comics, Superman's dog, the Superdog who goes by the name "Krypto". Therefore, the DOGE devotee summarizes that the "dog" translates to "DOGE" and "Krypto" translates to "Crypto". In addition, he adds that dogs are man's best friend symbolizing DOGE is the "Best Crypto". Elon Musk's Promise Moreover, Contessoto states he adores Elon Musk like anything. And, it's evident, for all DOGE lovers, Elon Musk is the hero for all. Despite the recent market fall on which the complete crypto market failed drastically, Contessoto swore that he would never ever sell off his DOGE, ever! He reveals he is as confident over DOGE as how Elon Musk is. On the other hand, Elon tweeted recently stating that DOGE will for sure surpass both Bitcoin (BTC) and Ethereum (ETH). - A new fee structure for Dogecoin has been created. - To reduce overall transaction fees as well as incentivize node operators. In order to reduce overall transaction fees as well as incentivize node operators a new fee structure for Dogecoin has created to relay low-fee transactions to miners. Dogecoin core developer Patrick Lodder and his team spearheaded the proposal. However, this will implemented gradually over many software releases. Started in 2014 and implemented in 2018, the present meaningful fee model enabled to prevent on-chain transaction spamming. More so, these fees charge 1 DOGE per kilobyte of transaction records, which translates to nearly 2.16 DOGE per average transaction. This year's dogecoin price surge makes meaningful fees costly. At present, users can keep their dogecoins on centralized firms however transferring funds to self-hosted wallets is costly. On the other hand, transactions with relay fees under 1 DOGE will not provide enough incentive to reach miners and mostly left unconfirmed. Most of the changes applied cater to a freer system in which miners and nodes drive rates. Moreover, changes the minimal relay fees from 1 DOGE to 0.001 DOGE. At launch, the node operators on the Dogecoin network will be able to set custom relay fees. The dust limit needs to reduced to 0.01 DOGE to increase the use of microtransactions. More so, in crypto the dust refers to a small fraction of the token which is negligible practically. However, the dust limit is so high under the present model. Last year might be considered dust in terms of US dollars but is now considerably more costly due to the dogecoin's price spike this year. Through decreasing the dust limit the transactions between 0.01 DOGE and 1 DOGE could be considered full transactions and hence accepted and relayed by miners. Moreover, the node operators would be able to control this dust limit utilizing the new "dustlimit" parameter. Explain a default block inclusion fee rate at 0.01 DOGE, which is increased from the present fee of 0.00001 DOGE. This fee will increase miners to confirm a transaction on the soonest block available in spite of disincentivizing spam transactions. Enhancing the relay logic to enable more transactions into the freespace. It is an apportioned section of a block where transactions with no relay fee can mined free of any inclusion block fee. Due to high relay fees on minimal transactions, the freespace mostly went unused. However, the transactions from the mempool will no longer prioritized mainly on transaction size. In a second software release, the needed minimum fee rate will reduce to 0.01 DOGE once 30% of the network starts relaying transactions with 0.01 DOGE/kb. Dogecoin developer Ross Nicoll said, "The purpose of Dogecoin transaction fees is spam prevention! We provide suggested values so users can have confidence. If they use those values, their transactions will confirm in a reasonable time." He also mentioned that there are less default fees in the proposal. Anyone can change their nodes to utilize alternative values. Notably, Elon Musk followed by many others in Twitter, r/dogecoindev, and the Dogecoin Github, has already shown their support. Udi Wertheimer replied to the Github proposal, suggesting that the team development should encourage a more robust and dynamic free market, which could effect reducing fees based on present market conditions. Also, a developer, Wertheimer, noted the uncertainty concerning free transaction relay. And its ability to open the door for cheap distributed denial of service (DDoS) attacks on nodes, to which Lodder replied with Good point. Recommended for you

- Dogecoin (DOGE) tweeted that McDonald's should accept Dogecoin. - McDonald's Corporation is an American fast-food company. - McDonald's might accept the cryptocurrency Dogecoin for payments. Dogecoin (DOGE) from its official Twitter posted a tweet recently that "McDonalds should accept Dogecoin! " McDonalds should accept Dogecoin! @McDonalds ðŸ’€!! pic.twitter.com/cRkNh6Zi5D " DogecoinðŸŽŹ (@Dogecoinxx) June 26, 2021 McDonald's Corporation is an American fast-food company. More so, the company founded in 1940 as a restaurant operated by Richard and Maurice McDonald, in San Bernardino, California, United States. Moreover, McDonald's is considered to be the world's biggest restaurant chain by revenue. However, providing more than 69 million customers in over 100 countries. Currently, McDonald's contains the ninth-biggest global brand valuation. On other hand, Dogecoin is based on the famous "doge" Internet meme and contains a Shiba Inu on its logo. However, the open-source crypto was created by Billy Markus from Portland. In addition, Oregon and Jackson Palmer from Sydney, Australia, and was forked from Litecoin (LTC) in December 2013. In addition, Dogecoin's creators envisaged it as a fun, light-hearted digital currency that would have greater appeal over the core Bitcoin audience, since it was based on a dog meme. Even more, Tesla CEO Elon Musk posted many tweets on social media that Dogecoin is his favorite coin. Added with this, many news revolved around the social media space that McDonald's might accept the cryptocurrency Dogecoin for payments. According to CoinGecko, the DOGE price is at \$0.24, with a 24-hour trading volume of \$1,845,136,557, at the time of writing. McDonald's Could Use BitPay or FlexaHQ Creator of Dogecoin (no longer on the project) Shibetoshi Nakamoto tweets, "Hey @McDonalds, I think y'all should consider accepting Dogecoin! You can use a payment processor like @BitPay or @FlexaHQ, and people can buy some chicken tendies and fries with meme money." Furthermore, all the news indicates that McDonald's could soon accept meme coin DOGE. Recommended for You

DogeCoin seems to be losing interest amongst many of its backers, after being the darling crypto of

2021. The crypto outperformed bitcoin this year and reached an all time high. The growth was fuelled by social media posts by Elon Musk and a community of redditors. The crypto has gained more than 15,000% since January, till its peak on 15th May. Since its peak the crypto has fallen almost 50%. Dogecoin was almost a dead currency at the end of last year. However, Elon Musk's tweet reinvigorated the crypto and gave it a new life. Created purely as a joke, Dogecoin sparked the meme currency domain in cryptocurrencies. Due to which cryptos like Shiba Inu and SafeMoon gained billions of dollars in market cap. It was a shock to many when the crypto became one of the top 10 cryptos in the world. No one could have thought that cryptocurrency made as a joke could've gained billions. Even the founders weren't even sure about the crypto, and had sold most of their stake a long time ago. Doge's popularity was once at a point where its Google searches outnumbered bitcoin by 8,000%. Falling Popularity Like all good things in life, what goes up must come down. Dogecoin lost more than 60% of its value in the last month and so did its popularity. Ever since its fall in price 90% of the Google searches for Dogecoin have also fallen. The twitter trends which were trending just a month back have now vanished. However, bitcoin has taken back its glory from Dogecoin. Bitcoin is now the most Googled cryptocurrency and also the biggest crypto to trend on twitter. Recommended for you

The founder of Ethereum (ETH), Vitalik Buterin revealed recently that he made profits in millions through his investment in Dogecoin. Buterin's Reveals Vitalik Buterin gave out a long podcast session on Sunday for the Lex Friedman podcast. The podcast took more than 3 hours. Throughout the podcast, Buterin just didn't brag upon Ethereum alone. He's actually open-minded enough and he gave out his hearty comments and views on whatsoever be the cryptocurrency. Upon this podcast, Buterin mentions his profits of millions through Dogecoin (DOGE). He mentions he's known about Dogecoin ever since its introduction to the industry in the year 2014. He states when it came out first, everyone was mocking it, which is true to the fact though. Buterin continues on starting, he invested \$25,000 around the year 2016 on Dogecoin. It was all hysterical when he uttered he was actually afraid of what his mother's actions would be when he reveals he has spent \$25,000 on Dogecoin. At that time Dogecoin was rarely known to be invested upon. It was all just a meme-joke based coin, which itself is a joke by then for the whole crypto industry to mock at. The fear he had on his mother was an epic humorous moment though. Sale of Dogecoin In 2020, Elon Musk started commenting and supporting Dogecoin in the most radical way ever by the year's end. Buterin further continued that Elon's backup on Dogecoin made the price of Dogecoin shoot up from \$0.08 to \$0.37. The market cap value reached \$20B. Buterin went on to remember all of this happening on the very same day and during the time he was stuck in Singapore in the Covid crisis. On reaching a profit of more than 8000%, he sold off the Dogecoin which he bought for \$25,000 to a massive \$4.3 million. He further stated, he was watching out for Dogecoin even after making his sale. He said he witnessed numerous fallbacks again with small peaks here and there for the Dogecoin. Buterin was all of pride when he exclaimed he sold his Doge at its peak and that particular move made him feel like a pro-trader. Recommended for you

At Miami Bitcoin Conference 2021, Rep Warren Davidson said, Fed is dogecoining the US dollar referring to the massive money printing. Warren Davidson was attending a panel along with Senator Cynthia Lummis. The panel discussed the topic, "Bringing Bitcoin Innovation Home to America". Several financial industry leaders were there at the panel. Some of them are Ryan Louvar of Wisdomtree and Matt Hougan of Bitwise. Rep Warren said that, Federal Reserve is dogecoining US Dollars while addressing the panel. He compared the Fed's money printing to dogecoining. He mocked the Fed's plan to print more money. And he used dogecoining as a scapegoat. The Federal Reserve has recently decided to expand the monetary policies of the USA. They decided to print more money for that. Many Crypto proponents have rebuked Fed's monetary policy to print more money. The printing of more money will make an unending pool of money in the market. The market will have a continuous flow of money. Dogecoin has the same kind of property. It has a regular flow in the market. In fact, the ever increasing supply of dogecoin was the reason for that comparison. Firstly, there are plenty of dogecoin miners in the field. Secondly, dogecoin miners were rewarded 1000 doge per block. Hence, the blocks are created every minute. This results in the creation of \$14.4 million doge every day, indeed. Thus, it creates an infinite supply. There are over 129 billion Doge in circulation, today. In conclusion, at this level if the FED creates a money supply in the market, it will be disastrous. Davidson added, "There is a benefit in scarcity that doge coiners don't get. And, apparently neither does the Fed". Also, Rep Lummis viewed that it's anti American to destroy money like that. Rep. Davidson and Lummis fear that this policy is hazardous. It may contribute to inflation. Further they added that it may lower the purchasing power of the US dollar. Further they added that this policy may contribute to inflation. Also, they raised several concerns over the increasing national debt and balanced budget. In addition, S. Lummis added, she prefers Bitcoin and the US dollar to coexist. So excited that there's bicameral support for #crypto clarity in Congress. If we do this right, we will cement the US as the leader in innovation and entrepreneurship. #Bitcoin2021 <https://t.co/CwKxTUZ4cy> " Warren Davidson (@WarrenDavidson) June 4, 2021 Recommended for You

Dogecoin's perpetual rise since the end of last year now suffers. Its history for surpassing the market's leaders, Bitcoin and Ethereum now faces the worst drop in its dollar value. Dogecoin's Dollar Value History Dogecoin remained low upon its transaction value from its start till last year's month of December. Dogecoin witnessed a transaction value of \$713 million by the month of May 2017 for the first time. After that Dogecoin steadily increased throughout recent times. Since the end of last year, it witnessed a constant and stable dollar value in terms of its transactions with a few bears here and there. After December 2020 Dogecoin blockchain shot up to space like it got new blasting thrusters. The transaction value from wallet to wallet reached a peak of \$82 Billion on May 5th, surpassing the records of Bitcoin and Ethereum. Bitcoin's peak accounted for only \$35 Billion and that of Ethereum even less than just \$12 Billion. Outdoing two of the top market-leading blockchains is no joke. And all thanks to Elon Musk for pushing Dogecoin and its blockchain to such
